Dear Gov. and Speaker:

Pursuant to P.L. 31-233, attached are copies of all CCU WORK SESSION packets for GPA & GWA from Jan - Sept 2018.

My apology that this is coming to you in bulk. I was mistaken to think that CCU WORK SESSIONS were not official meetings (since no CCU action takes place at work sessions - just discussion) and thus did not provide the materials as mandated by P.L. 31-233. I recently asked clarification from our Legal Counsel who confirmed that "work sessions still appear to be "meetings" as referenced in the legislation" and materials should be provided.

FYI - Work Session is venue where the Commission reviews / discusses items to be brought up for approval at the official CCU meeting which follows the work sessions. FYI no Minutes are taken for GPA/GWA work

2400

sessions just audio recordings. Effective immediately meeting materials will be provide for all GPA & GWA Work Sessions.

Please look for other transmittals forthcoming for:
GPA / GWA WORK SESSIONS
2013 - 2017

Respectfully,
B. Lou Sablan
Board Secretary

GUAM POWER AUTHORITY WORK SESSION

CCU Conference Room

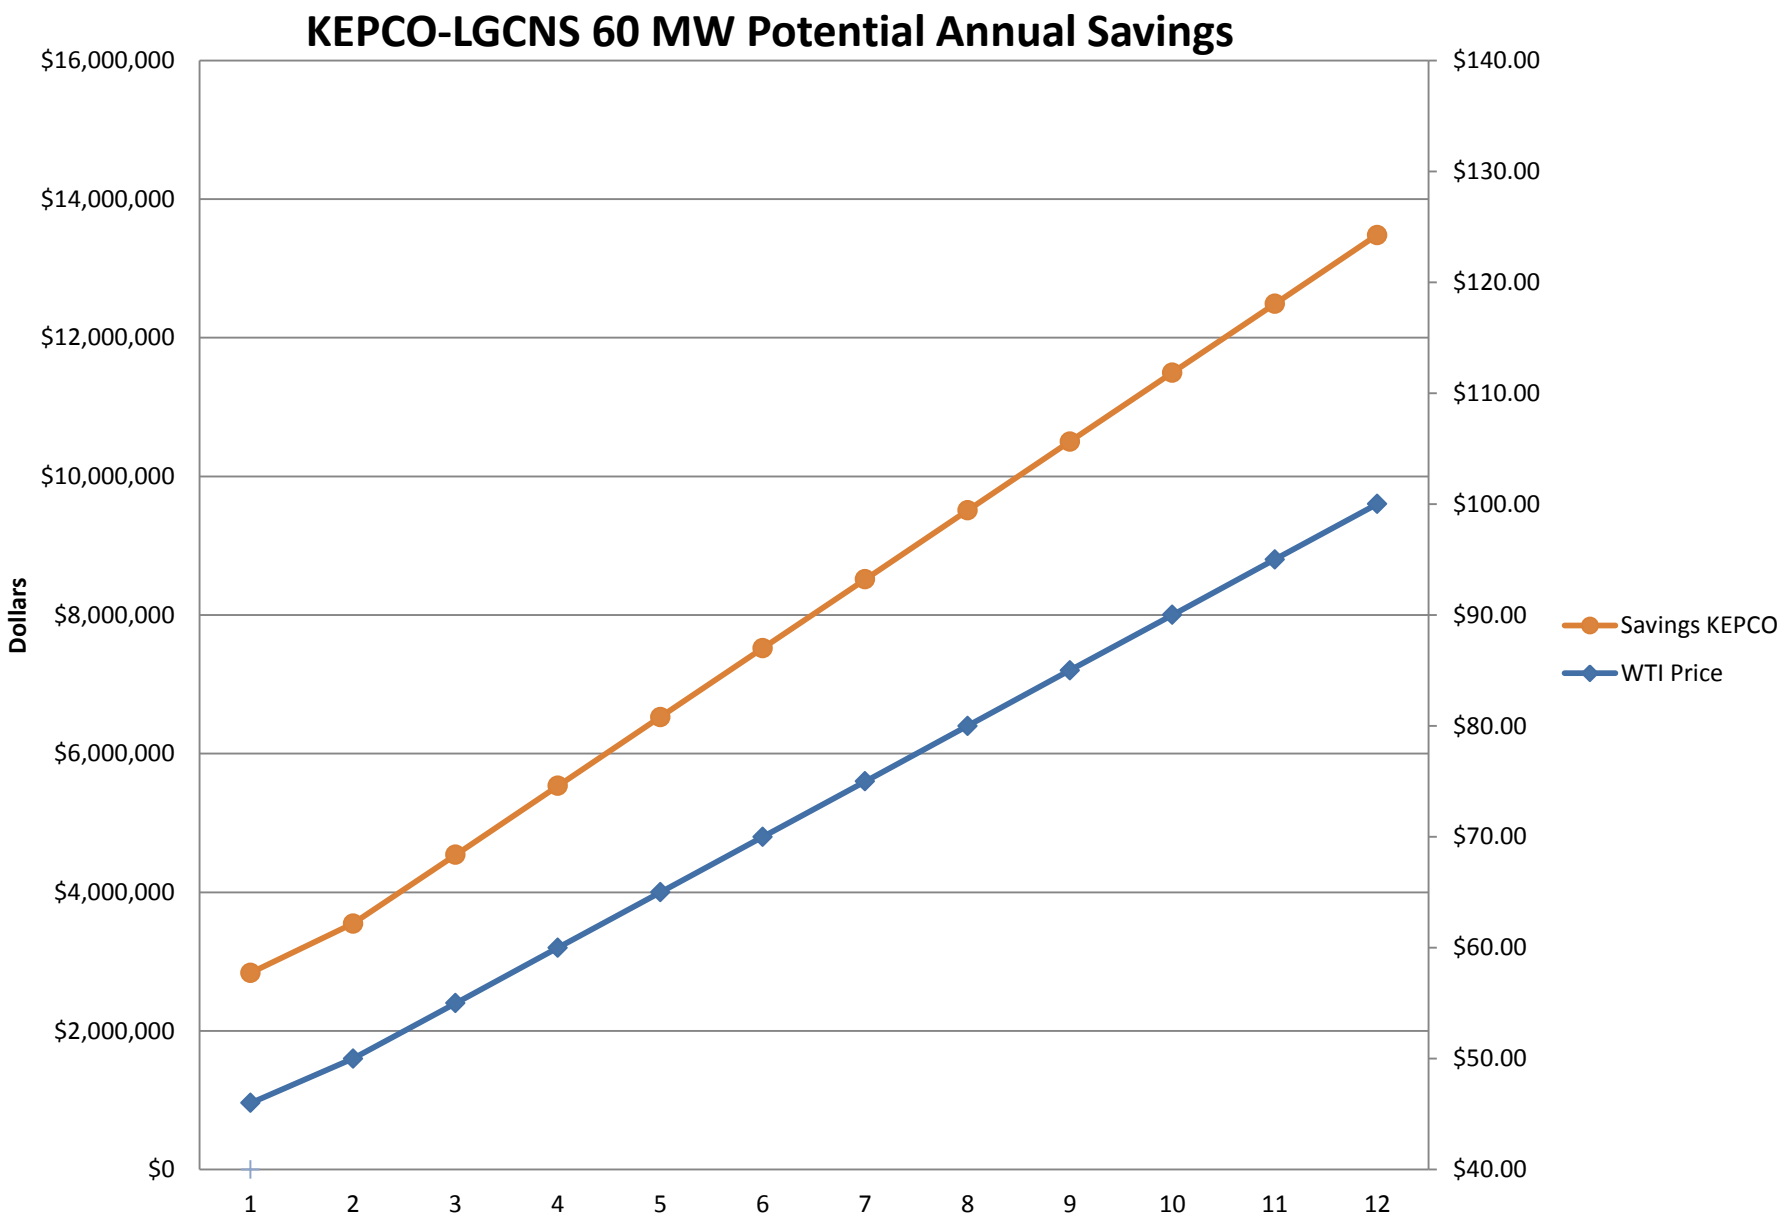
4:30 p.m., January 18, 2018

AGENDA

1. **ISSUES FOR DECISION**
   - 1.1 Power Purchase Agreement Phase II Renewables / Resolution 2018-01
   - 1.2 Bond Refinancing Savings Utilization / Resolution 2018-02
   - 1.3 Piti Substation 115kV GIS Major Maintenance / Resolution 2018-03
2. **GM REPORT**
   - 2.1 Updates
3. **ISSUES FOR DISCUSSION**
   - 3.1 CY2018 Major Project Updates
   - 3.2 CY2018 Outage Reduction Program
4. **DIVISION REPORTS**
   - 4.1 Administration: Customer Service, HR, Procurement
   - 4.2 Engineering & Technical: Engineering, IT, Planning & Regulatory, SPORD
   - 4.3 Finance Reports
   - 4.4 Operations: Facilities, Generation, PSCC, T&D, Transportation
   - 4.5 Public Information Office
5. **ANNOUNCEMENTS**
   - 5.1 Next Meeting: CCU Meeting – January 23
6. **ADJOURNMENT**

Approval of Power Purchase Agreement

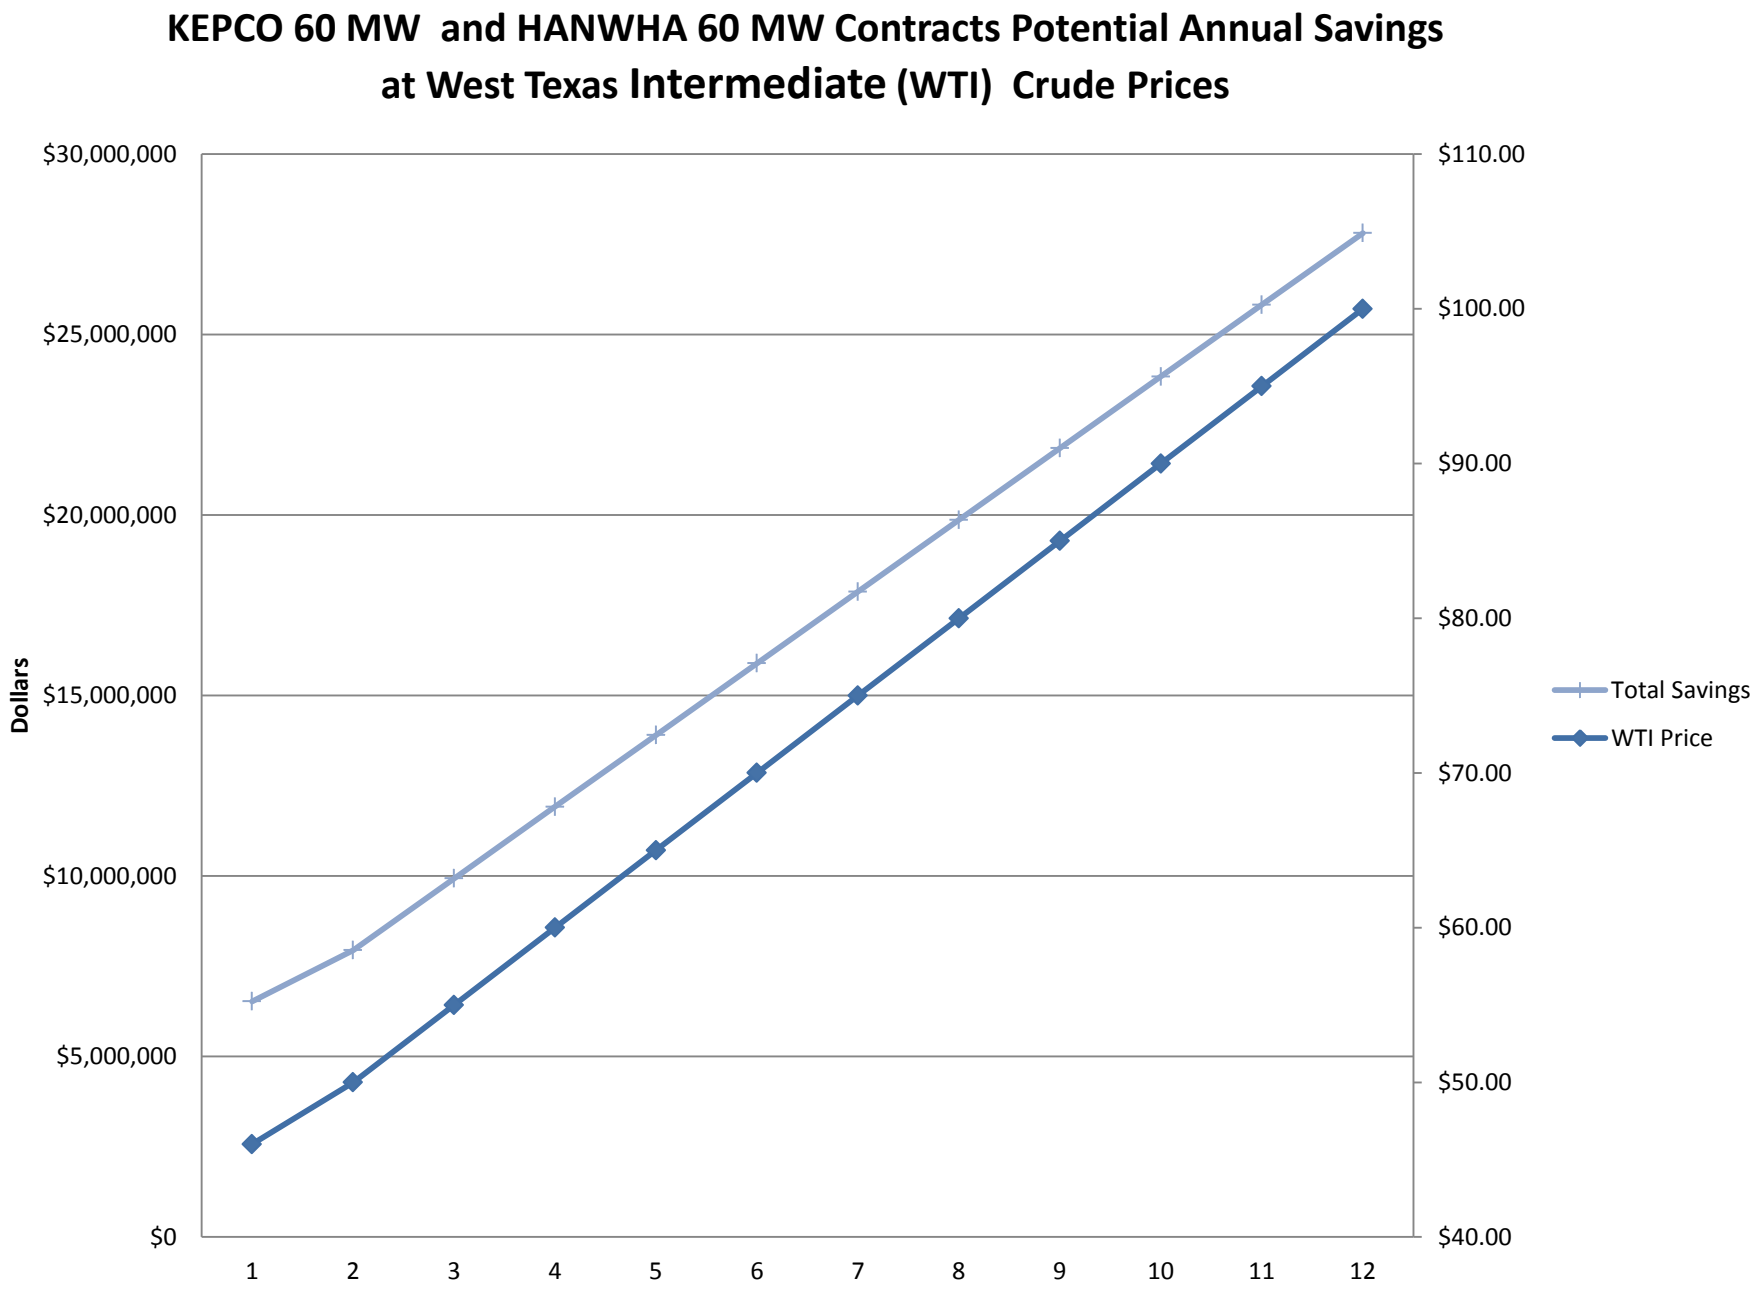
KEPCO-LG-CNS Mangilao Solar, LLC



January 18, 2017

Requesting Approval - KEPCO-LG-CNS Mangilao Solar, LLC contract

- Award 60MW Power Purchase Agreement to KEPCO-LG-CNS Mangilao Solar, LLC which includes:
  - Two 30MW Solar Plants at Sasajyan
  - Install 32MW/32MWH ESS for Ramp Rate Control
  - Install 34.5 KV Underground Transmission Lines from Sasajyan (New Solar Plants) to Pagat Substation and Overhead Transmission Lines between Pagat and Macheche Substations
  - Install Differential Relays at GPA Substations as per System Impact Study (SIS) recommendation for system stability
  - Other Requirements Identified by Final SIS



Power Purchase Agreement (PPA)

- Power Purchase agreement for KEPCO-LG-CNS Mangilao Solar, LLC for 60 MW of Solar PV
- 25 Year contract at starting price of $0.0855/KWH with an annual escalator of 1 %.
- With West Texas Crude at $65/ Barrel, savings estimated at about $6.5M annually
- Commercial Operation: Estimated Date April 2020
- Subject to PUC approval

Issues for Decision

Resolution No. 2018-01:

RELATIVE TO APPROVAL OF THE PHASE II RENEWABLE ENERGY ACQUISITION POWER PURCHASED AGREEMENT FOR KEPCO-LG CNS MANGILAO SOLAR, LLC

What is the project's objective? Is it necessary and urgent?

GPA intends to meet its 2008 IRP goals and comply with Public Law 29-62 which sets renewable goals under the Renewable Portfolio Standards (RPS) with the Phase II projects. In January 2017 GPA obtained the price bids for GPA Multi-Step Bid No: GPA-070-16 for 60MW of Renewable Energy Resource capacity with ESS for ramp control. KEPCO-LG CNS Mangilao Solar, LLC., is one of the two (2) lowest responsive bidders (Hanwha Energy Corporation is the other one) with having two proposals for 30MW solar PV projects totaling 60 MW of solar PV capacity with ESS for ramp control. GPA and KEPCO-LG CNS Mangilao Solar, LLC have completed and agreed to commercial terms and conditions of the Power Purchase Agreements (PPA). GPA seeks approval to submit KEPCO-LG CNS Mangilao Solar, LLC's PPA to the PUC for their approval.

Where is the location?

The KEPCO_LGCNS 2x30MW solar projects are located at Sasajyan, Mangilao.

How much will it cost?

Please see attached table.

When will it be completed?

The Agreement is for 25 year term.

What is its funding source?

Funding source is LEAC.

KEPCO_LGCNS Price Proposal

RESOLUTION NO. 2018-01

RESOLUTION RELATIVE TO APPROVAL OF THE PHASE II RENEWABLE ENERGY ACQUISITION AWARD TO KEPCO-LG CNS MANGILAO SOLAR, LLC., FOR 60 MW OF RENEWABLE ENERGY CAPACITY

WHEREAS, in May 2016 GPA announced GPA Multi-Step Bid No: GPA- 070-16 for 60MW of Renewable Energy Resource capacity with ESS for ramp control; and

WHEREAS, in January 2017 GPA obtained the price bids and KEPCO-LG CNS Mangilao Solar, LLC., is one of the two (2) lowest responsive bidders (Hanwha Energy Corporation is the other bidder) providing two proposals for 30MW solar PV projects totaling 60 MW of solar PV capacity with ESS for ramp control; and

WHEREAS, the responsive bidders provided price proposals for the energy and ramp controls to include interconnection costs of each 30MW proposal. **Exhibit A** provides a summary of the energy price proposals which shows the first year price for KEPCO-LG CNS Mangilao Solar, LLC is $85.50/$/MWH; and

WHEREAS, GPA evaluates bidder's price proposal against GPA's variable operating costs primarily made up of fuel costs; and

WHEREAS, GPA has determined that KEPCO-LG CNS Mangilao Solar, LLC proposals would provide substantial savings to GPA over the term of the contracts based on current and projected LEAC rates; and

WHEREAS, the table below represents the projected savings of potential award case **Exhibit B** contains case summaries; and

CASE	Description	Project Size	5 Year Projected Savings On Current LEAC ($115/MWH)	5 Year Projected Savings on Projected LEAC	Present Value Utility Cost Savings thru Contract Term
1	KEPCO Proposal 1&2 (60MW)	60 MW	$ 20,470,866	$43,331,390	$90,301,058

RESOLUTION NO: 2018-01

WHEREAS, GPA considers renewable energy as an effective hedge against rising fuel oil prices; and

WHEREAS, the bid prices proposed are an excellent fuel hedge as the bidders' energy prices are fixed with escalations no more than 1% annually for all proposals. **Exhibit C** summarizes GPA historical LEAC; and

WHEREAS, renewable energy is sustainable energy and good for the island; and

WHEREAS, Public Law 29-62 sets renewable goals under the Renewable Portfolio Standards (RPS); and

WHEREAS, the award of 120MW contracts including Hanwha Energy Corporation 60 MW project is projected to increase GPA's ratio of renewable energy to sales up to 26% by 2020. **Exhibit D** is a projected RPS outlook; and

WHEREAS, KEPCO-LG CNS Mangilao Solar, LLC has concurred with GPA recommendations from the system impact study which is incorporated in the contract documents; and

WHEREAS, GPA would like to proceed with an approval to award KEPCO-LG CNS Mangilao Solar, LLC a total of 60MW of renewable energy capacity contract subject to PUC approval.

NOW, THEREFORE, BE IT RESOLVED, by the CONSOLIDATED COMMISSION ON UTILITIES, the GOVERNING BODY of the GUAM POWER AUTHORITY as FOLLOWS:

1. The CCU authorizes GPA to petition the PUC for approval to award Phase II Renewable Acquisition Bid of two 30MW proposals totaling 60MW to KEPCO-LG CNS Mangilao Solar, LLC as required under the PUC Procurement Protocol.
2. The CCU authorizes GPA to contract KEPCO-LG CNS Mangilao Solar, LLC for renewable energy subject to PUC approval.

RESOLVED, that the Chairman certifies and the Board Secretary attests to the adoption of this Resolution.

RESOLUTION NO: 2018-01

DULY AND REGULARLY ADOPTED AND APPROVED THIS 23RD DAY OF JANUARY 2018.

STRATEGIST CASE SUMMARY

	Base Case (No Phase II)	Case 1 (60MW)	SAVINGS
Present Value Utility Cost[3] ($000)	6,896,417	6,806,116	90,301

Notes:

1. The Currrent LEAC is used in this case evaluation to demonstrate minimum savings potential with $115/MWH LEAC rate presently proposed for next LEAC period.

2. Projected LEAC is based on STRATEGIST software output that analyzes genernation costs for various generation resources and its operating characteristics. This LEAC is based on load and fuel forecasts done by LEIDOS in 2016.

3. Present Value Utility Cost is an evaluation of generation operating costs in the STRATEGIST software. This is used to determine cost impact of generation resources and their operation variables (efficiency, fuel costs, capacity, etc.) based on energy requirements.

Bond Refinancing

PL 34-69

- Section 2(h) – GPA shall notify I Liheslatura within sixty (days) of refinancing of it intent and plan regarding the savings achieved from refinancing.

Summary of Savings:

- Final Par Amount of Refunding: $148,670,000
- Final Par Amount of Refunded: $150,440,000
- Total Cash Flow Savings: $11,528,439
- Annual Cash Savings: $501,236
- NPV Savings: 5.17%
- All-In True Interest Cost: 4.12

Bond Refinancing - Continued

- Reduction in debt services from 2018 to 2021: $1,482,326
- Reduction from 2022 on to be use to offset annual cost of new power plant.

Recommendations for $1,482,326 Savings:

- DSM – Replenish Existing Rebate Program
- DSM – Revolving Short Term Reimbursement Fund-Zero Interest charged
  - Reduces consumption
  - Maintain quality of life
  - Part of money saved to be used to reimburse GPA revolving fund

Example of Reimbursement Program

Issues for Decision

Resolution No. 2018-03:

Relative to <u>Authorize Expenditures for the Piti 115KV GIS Major Maintenance</u>

What is the project's objective and is it necessary and urgent?
To perform an overdue detailed 12-year maintenance and inspection for the Piti 115KV Gas Insulated Switchgear (GIS). The maintenance work is necessary for compliance with the manufacturer's recommendations. The insulating medium for the switchgear is SF6 gas, and under certain conditions such as breaker operations (trip/close), sulfuric acid may be produced which may lead to severe deterioration of internal parts.

The GIS The Piti 115 kV GIS is a critical substation interconnecting the MEC Plant Units 8 and 9 to the power grid.

Where is it at?
Piti

How much will it cost?
The required services will cost $2,507,300.

Basic Bid

A1	Mobilization / Demobilization	436,800
A2	GIS - Initial Testing, Assessing, and Reporting	381,000
A3	GIS - Inspection, Servicing, Replace, Maintenance, Gauge Calibration	1,061,000
A4	Reuse and Recycling of Removed SF6 Gas	21,000
A5	Crane Repair	13,000
A6	Training Course - Operation and Maintenance	72,000
A7	Final Testing, Commissioning, Reporting, and Re-Certification	212,000
	Total Basic Bid Cost	$ 2,196,800

Additive Bid

B1	New SF6 Gas	39,000
B2	Disposal of Removed SF6 Gas	12,500
B3	GIS OEM Spare Parts, Consumables, and Special Tools	165,000
B5	New Fixed Cage Ladder and Landing Platform	94,000
	Total Additive Bid Cost	$ 310,500

Total Bid Cost **$ 2,507,300**

Construction Management Cost/ T&D Support	$	130,000
Total Requested Cost	**$**	**2,637,300**

When will it be completed?
Time delivery to complete work is 10 months upon receipt of PO.

What is its funding source?
GPA 2014 Revenue-Bonds fund.

The RFP/BID responses:
AYM International Inc., the only bidder, submitted quote for GPA's consideration under Multi-Step Re-Bid Invitation No. GPA-027-17. The initial bid had no bidders.

AYM International was determined to be a technically qualified and responsive bidder.

CONSOLIDATED COMMISSION ON UTILITIES
Guam Power Authority | Guam Waterworks Authority
P.O. Box 2977 Hagatna, Guam 96932 | (671) 648-3002 | guamccu.org

Resolution No. 2018-03
AUTHORIZING THE GUAM POWER AUTHORITY TO PETITION PUC FOR APPROVAL OF PITI SUBSTATION 115 KV GIS MAINTENANCE PROJECT AND TO CONTRACT REQUIRED SERVICES

WHEREAS, the Piti Substation 115 kV Gas Insulated Switchgear (GIS) was commissioned in 1999; and

WHEREAS, the insulating medium of the 115 kV Substation is SF6 gas, which under certain conditions may produce sulfuric acid, leading to severe deterioration of internal parts; and

WHEREAS, maintenance of the GIS equipment is critical to ensure functionality to allow MEC Plant Units 8 and 9, GPA's most efficient generating units, to connect to the IWPS; and

WHEREAS, the project will overhaul the Piti 115 Kv GIS Maintenance project as part of the 12-year maintenance schedule; and

WHEREAS, the Procurement Office has provided adequate public announcement for the required services for the Piti 115 Kv GIS Major Maintenance through a Multi-Step Re-Bid Invitation No. GPA-027-17 providing the project specifications and information required of each offeror; and

WHEREAS, due to the highly specialized nature of the work and limited local resources, only one vendor AYM International, Inc. submitted a proposal during the re-bid process for GPA's consideration; and

WHEREAS, GPA's Evaluation Committee has determined AYM International Inc. to be technically qualified based on meeting the Step One- Technical Proposal Evaluation criteria and whose bid on Step Two – Price Proposal Evaluation submitted a basic bid totaling $2,196,800 for GPA's consideration and additive bids totaling $2,507,300; and

WHEREAS, the 2014 GPA Revenue Bonds initially allocated funding of $700,000, and GPA has reallocated 2014 Bond Funds to fund an additional $1,937,300 for additional required items for the project;

NOW, THEREFORE, BE IT RESOLVED, by the Consolidated Commission on Utilities as follows:

1. After careful consideration, the Consolidated Commission on Utilities finds the procurement of the required services for the Piti 115 Kv GIS Major Maintenance project to be reasonable and prudent.

2. The General Manager of GPA is hereby authorized to petition the PUC to reallocate 2014 Revenue Bonds for the Piti 115 kV GIS Major Maintenance project and for the award of the contract.

2. Upon PUC's approval, the General Manager of the GPA is hereby authorized an increase in obligating authority up to $2,507,300 for the purpose of procuring the required services from AYM International, Inc.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

DULY and REGULARLY ADOPTED AND APPROVED THIS 23rd DAY OF JANUARY, 2018.

FROM: Bid Evaluation Committee

SUBJECT: **Step One – Technical Proposal Evaluation Recommendation**
Re: Multi-Step Re-Bid GPA-027-17
Piti 115kV GIS Major Maintenance

The bid evaluation committee has completed reviewing vendor's proposal for Step One – Technical Proposal Evaluation of the Multi-Step Re-Bid GPA-027-17. Only one (1) vendor submitted its bid, which is AYM International Inc. The committee evaluated the proposal using a scoring and evaluation criteria form below.

QUALITATIVE PROPOSAL SCORING WORKSHEET

ITEM	DESCRIPTION	WEIGHTED SCORE (%)
1	Scoring Worksheet 1	97
2	Scoring Worksheet 2	80
3	Scoring Worksheet 3	98
4	Scoring Worksheet 4	90
5	Scoring Worksheet 5	92
	AVERAGE	**91.4 (Acceptable)**

- Proposals that scored greater than or equal to 80 percent are deemed acceptable.
- Proposals that scored between 75 and 79 percent are deemed potentially acceptable.
- Proposals scoring below 75 percent are deemed unacceptable.

Based on the scoring worksheet, vendor's proposal is deemed acceptable (See attachment for specifics). The Committee, hereby, recommends that GPA proceed with Step Two – Evaluation of Priced Proposal for the ***Acceptable Proposal***.

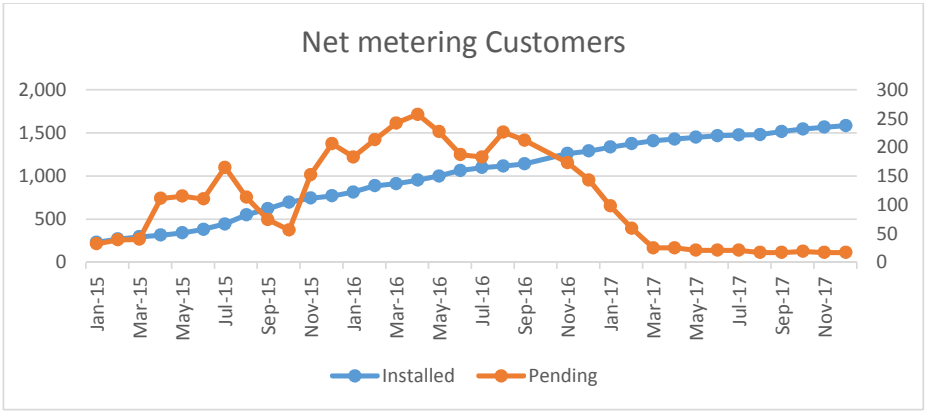
TO: **Consolidated Commission on Utilities**

FROM: **General Manager**

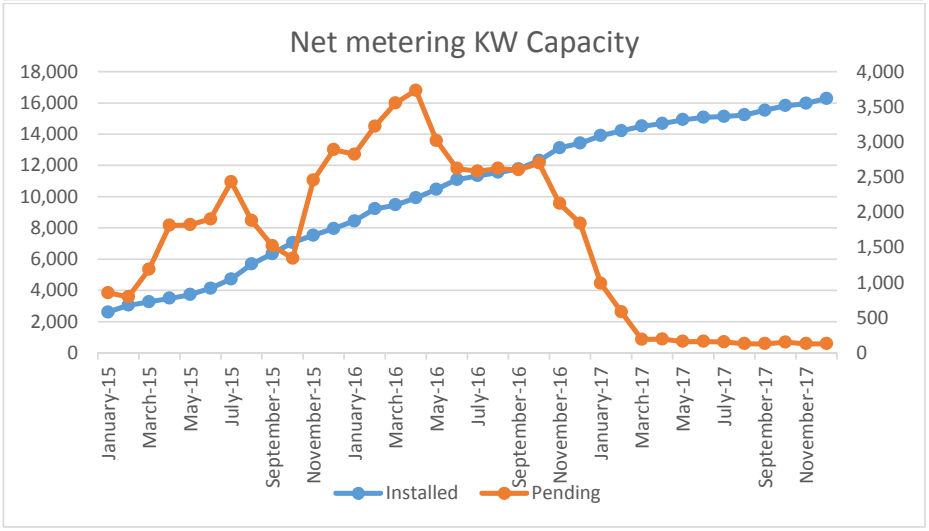
DATE: **January 18, 2018**

SUBJECT: **General Manager's Report**

1. **Generation System Update:**



- The following summarizes the expected situation for January 2018. The peak demand in January 2018 has been 240MW compared to the highest peak demand in January 2017 of 232MW. This increase seems to indicate the system peak demand and therefore its energy sales will continue to increase in 2018.



▪ **January 2018 Capacity Available:**	**384 MW**
▪ **January 2018 Projected Demand**	**242 MW**
▪ **Available Reserve Margin**	**142 MW**
▪ **Two Largest Units Capacity**	**117 MW**
▪ **Reserve less two largest units**	**25 MW**

This table is provided to show that without a new power plant, GPA will not be able to meet load growth by 2022. Furthermore, as shown, because we lack adequate base load capacity, GPA's fuel related cost to provide additional energy to new customers will continue to drive its total energy cost higher because energy production would come from costlier less efficient standby units. The lack of new units which could work with intermittent renewables will result in limited solar PV additions into the grid thereby limiting cost saving opportunities.

Summary of System Generating Capacity With No New Baseload:					**With New 180MW**
Description	**FY 2015**	**FY2017**	**FY2018**	**FY2021**	**FY2022**
Baseload MW Capacity	299	208	208	208	268
Emergency/Standby Capacity	120	200	200	200	200
Total MW Capacity	**419**	**408**	**408**	**408**	**468**
Peak MW Demand	249	261	266	283	283
Reserve Margin	170	147	142	125	185
Total Two Largest Units	132	120	120	120	88
Reserve Less Two Largest Units	**38**	**27**	**22**	**5**	**97**
% Baseload Capacity	**71.4%**	**51.0%**	**51.0%**	**51.0%**	**57.3%**
% Energy from Baseload	98.0%	80.0%	62.2%	62.2%	72.6%
% Energy from Renewables	0.0%	3.5%	3.5%	26.4%	26.4%
% Energy from Emergency/Peaker	**2.0%**	**16.5%**	**16.5%**	**11.4%**	**1.0%**

2. Net metering Summary Ending December 2017:

Estimated Net Metering Impact FY2009 to FY2017:

Fiscal Year	Amount
FY 2009	$1,657
FY 2010	$8,483
FY 2011	$18,177
FY 2012	$58,546
FY 2013	$278,025
FY 2014	$352,157
FY 2015	$856,921
FY 2016	$2,200,795
FY 2017	$2,828,835
Total:	**$6,603,596**

The continued growth in sales from non-net metering customers has mitigated revenue decline due to net metering customers

3. Renewable Energy Production Summary Thru December 2017:

Energy Production Source:	Kwh Production	Oil Barrels Avoided	Fuel Cost Avoided
NRG Total Production beginning Oct 2015	107,114,628	179,097	$9,850,362
Net Metering Estimated Production beginning Jan 2015	50,302,831	84,107	$4,625,896
Wind Power Production beginning Jan 2016	790,121	1,321	$72,660
Renewables Total:	**158,207,580**	**264,526**	**$14,548,918**
System Heat Rate Kwh/Gal	14.2		
System Fuel $/Bbl	$55.00		

4. Demand Side Management (DSM) Program Expenses Thru December 31, 2017:

All Expenses – Fiscal Year

Description	FY16	FY17	FY18 as of December'17	Total to Date
Regular/OT Pay	$11,348.80	$22,256.00	$4,690.09	$38,294.89
Other Contractual	$28,278.50	$73,010.05	0.0	$101,288.55
Paid Rebates-Split AC	$154,700.00	$557,275.00	$336,025.00	$1,048,000.00
Paid Rebates-Central AC	$3,400.00	$8,200.00	$800.00	$12,400.00
Paid Rebates-Washer/Dryer	$2,800.00	$7,425.00	$1,800.00	$12,025.00
Total Expenses	200,527.30	$668,166.05	$343,315.09	$1,212,008.44

2

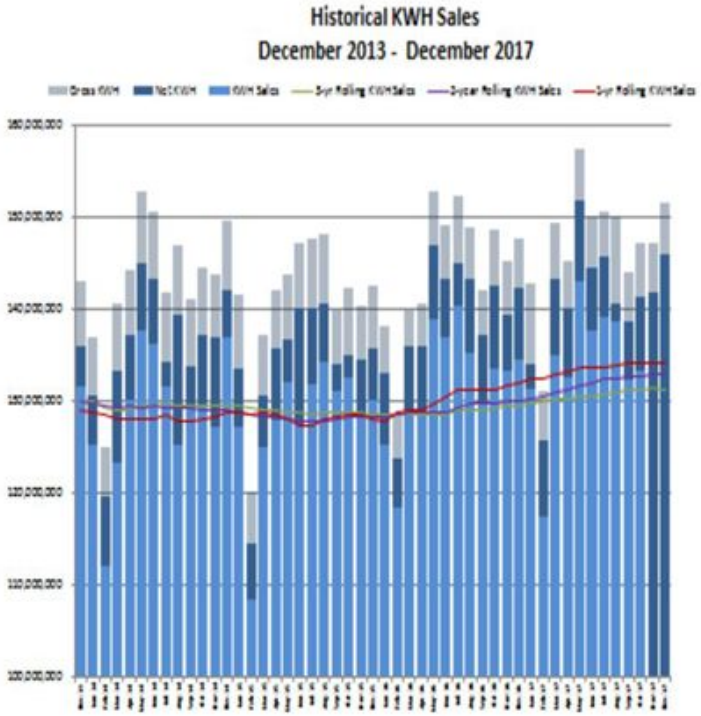
5. **Phase II Renewables:** The OPA has upheld GPA's decision for the award of 120MW of solar PV to KEPCO and Hanwha. A subsequent protest filed in the Superior Court of Guam was subsequently withdrawn. GPA can now proceed obtaining CCU and PUC approvals for the two 60 MW contracts. I ask the CCU and the PUC to expedite their awards in consideration of the substantial delays that have occurred. These two renewable contracts will provide substantial savings to the ratepayers through LEAC.

6. **Phase III Renewables Bid**: The bid has been issued. The bid request is for about 40MW of solar PV renewables to be constructed on Navy leased land. The energy produced would be stored in batteries during the day and released at nighttime to meet peak time load. The bid price opening date for acceptable proposals is set for April 17, 2018.

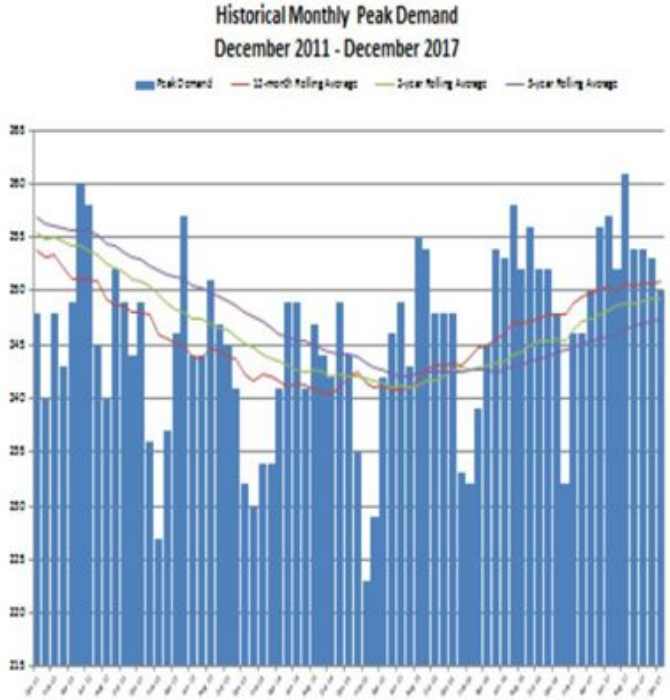
7. **USEPA Consent Decree:** We met with the USEPA Region 9 Acting Administrator on December 18th. The meeting was an opportunity for us to update the administrator on progress made towards compliance. Work continues towards a consent decree which may be completed within the next six months.

8. **2010 Bonds Re-financed:** The 2010 bonds were successfully re-financed in December and has resulted in an annual debt service payment reduction of $501,236.00. We would like to thank everyone for their work in achieving the savings for our ratepayers. GPA would like to inform the Legislature of the intended use of the debt service reduction within 60 days after refinancing.

   Final Par Amount of Refunding Bonds: $148,670,000
   Final Par Amount of Refunded Bonds: $150,440,000 (i.e., all outstanding)
   Total Cash Flow Savings: $11,528,439
   Average Annual Cash Flow Savings: $501,236 (PUC minimum: $300,000)
   Net Present Value Savings: $7,777,917
   NPV Savings / Refunded Par Amount: 5.17% (Legislative minimum: 2%)
   All-In True Interest Cost: 4.12% (PUC maximum 4.32%)
   All thresholds required by the various approvals of the various agencies have been met.

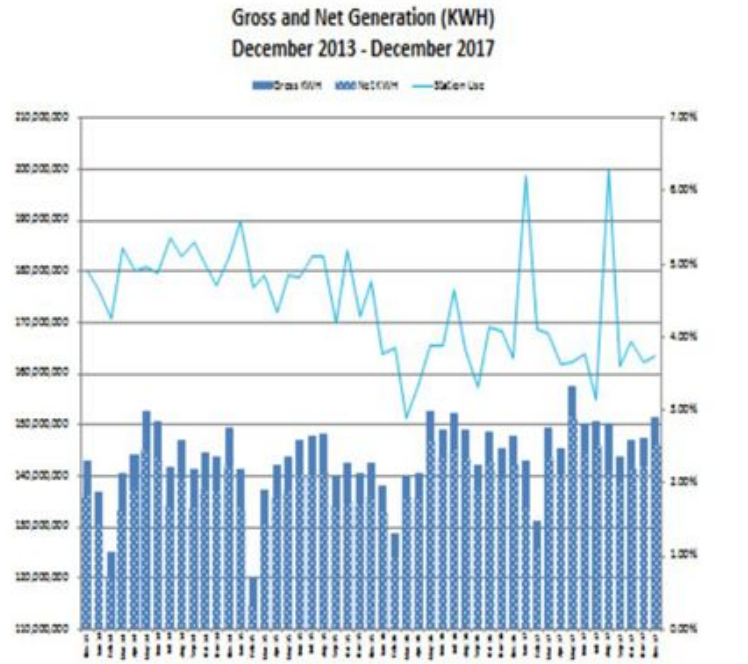


9. **January 2018 PUC Agenda:**
   - GPA Docket, LEAC adjustment for February 2018 thru July 2018 period

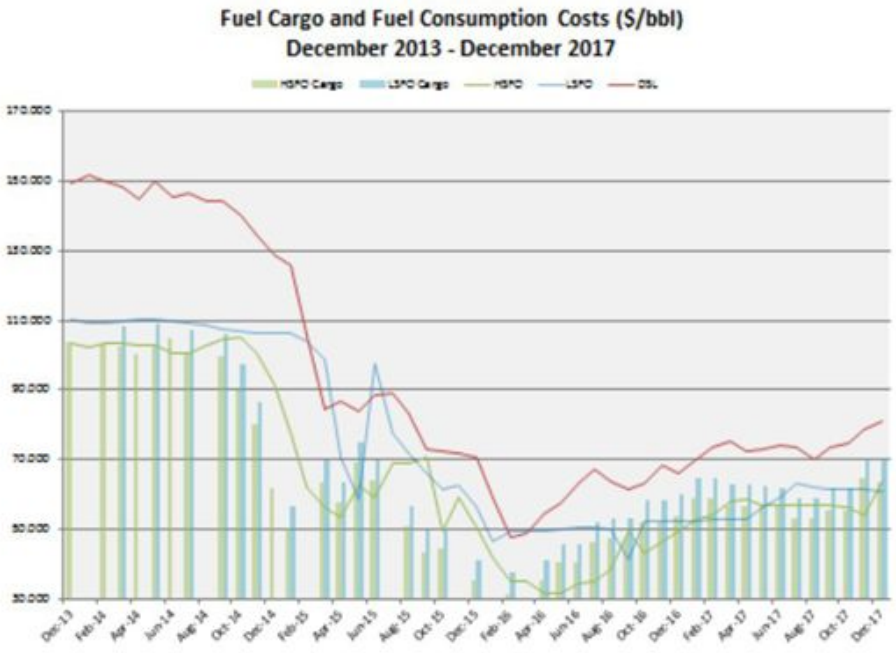


10. **New Power Plant Procurement:**
    a. GPA has issued the multi-step bid for the new power plant. GPA plans to have a short list of qualified bidders by early April. The successful short list will then be provided the technical specifications of the new plant for them to submit their proposal and price by this summer.

    b. The rezoning efforts for the land for the new power plant will continue. Senator Ada has introduced Bill-223-34 for this re-zoning which may have a public hearing at the end of January. GPA held a public meeting on January 5th at the Astumbo Senior Citizen Center and received some input from landowners in the vicinity of the proposed plant. The latest public meeting held was at 6:00pm on January 17, 2018 at the Tamuning Senior Center.



11. **Key Performance Indicators:** The following pages provide updated information thru December 2017.



John M. Benavente, P.E.

Updates on Major CY 2018 Projects

January 18, 2018

New 180 MW Power Plant

DESCRIPTION	TIMELINE
• **Bid announcement:**	January 16, 2018
• **Qualified Bidders List:**	April 7, 2018
• **Technical Bid Issue:**	TBD (~ May 2018)
• **Notification of Intend to award**:	TBD
• **CCU / PUC Approval:**	TBD
• **Commercial Operations:**	30 months after contract signing (~ Dec 2021)

40 MW Energy Storage System

- **Awarded:** May 2017
- **Completion date:** August 31, 2018
- To mitigate generator trip related outages which resulted in Under Frequency Load Shedding activations to avoid blackouts
- Mitigates net power fluctuations by NRG 25MW plant and 1,500 net metering customers
- **Construction Cost:** ~$35M

SCADA Project

- Provides state of art Supervisory Control and Data Acquisition (SCADA) capability for GPWA
- **Awarded:** December 14, 2016
- **Completion Date:** October 1, 2018
- **Project cost:** $2,319,605.07 (GPA/GWA Combined)
- Provides real time monitoring and control of power system
- One control center for both GPA and GWA located here in Fadian. Shelters System Control Centers from natural disasters
- First SCADA system for GWA Water and Wastewater Systems

Phase III Renewables
40 MW on Leased Navy Land

- **Purpose:** Decrease/Stabilize LEAC Rates
- **Bid Issued:** Nov. 16, 2017
- **Bid Milestones:**
  - Phase I: Technical proposal due:
    - March 6, 2018
  - Phase II: Bid Opening (price):
    - April 17, 2018
  - Notification of Intent to award:
    - May 2, 2018
- CCU/PUC Approval: TBD

Renewables Integration Study

- **Task Order Awarded:**
  - January 9, 2017
- **Completion Date:**
  - TBD - 2018
- **Project Amount:**
  - $ 895,377.00

- This study will determine what capacity of renewables could be accommodated within the grid including system upgrades necessary for a stable and reliable grid.
- Study would provide information needed to plan for additional renewables and infrastructure upgrades necessary.
  - Phase II System Impact Study
  - Long Range Transmission Plan
  - Phase III ESS recommendations
  - New Generation operating characteristics requirements

Residual Fuel Oil Contract

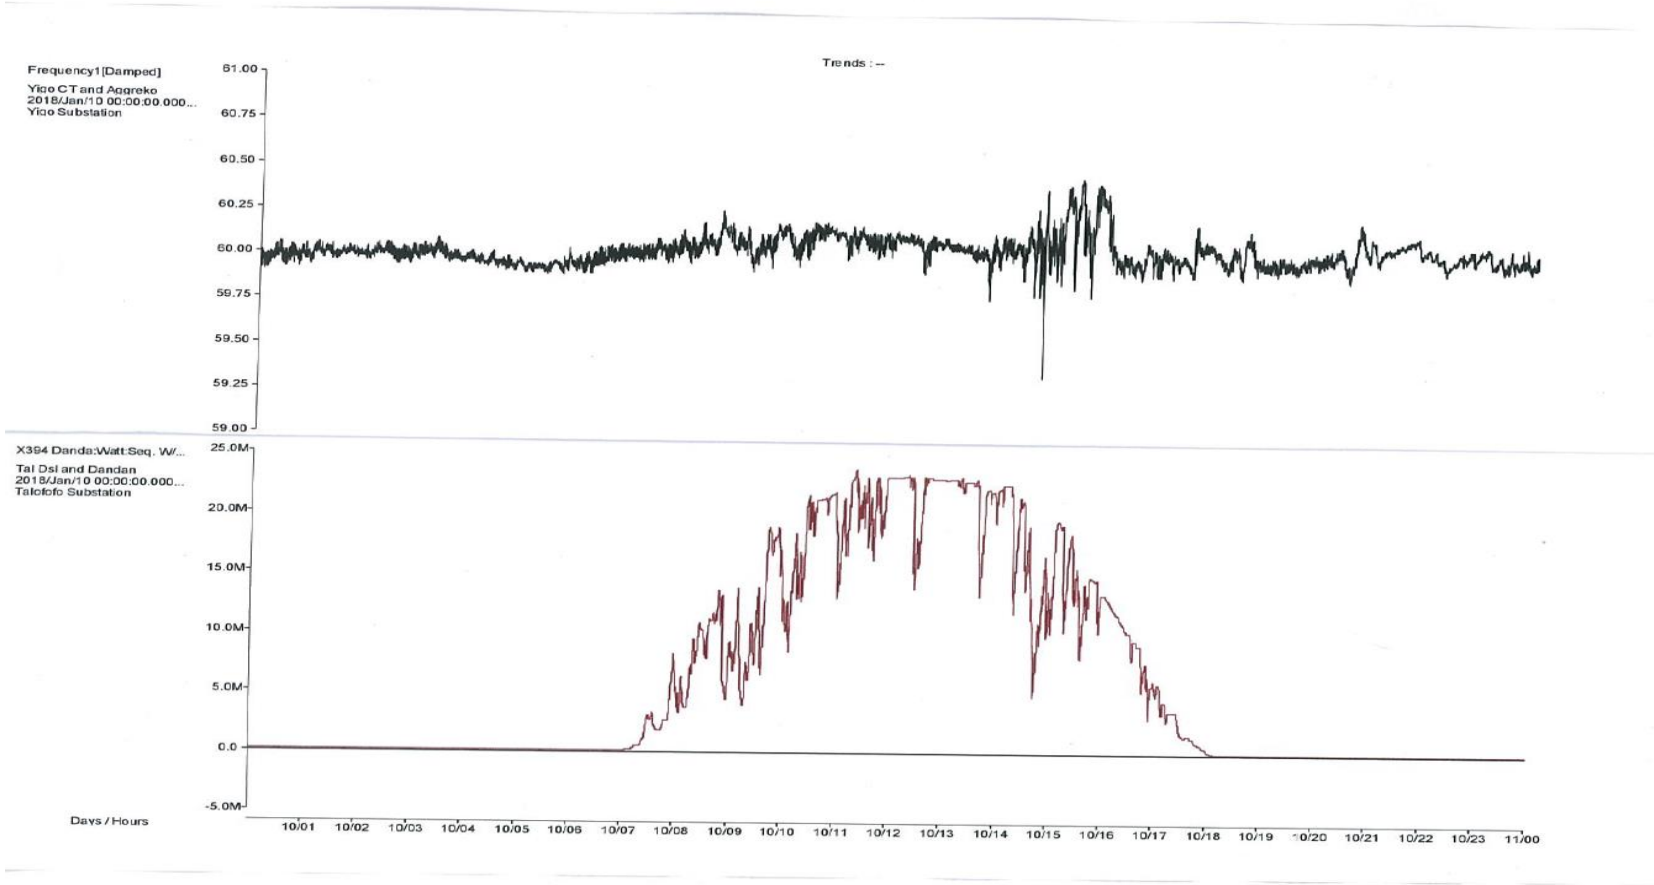
- Current contract expires August 2018
- Provides low and high sulfur fuel
- Last residual fuel oil contract after over 60 years burning this fuel for energy production
- 2-year contract with three one year options

  (MS GPA-009-18)
- **Bid opening date:**
  - February 2018
- **CCU/PUC Approval:**
  - TBD (~ May 2018)

Ultra Low Sulfur Diesel

- Contract for about 1M Barrels
- One contract for bulk fuel delivery to GPA Leased Tristar Tanks (MS GPA-008-18)
- One contract for truck deliveries to various power stations (MS GPA-006-18)
- **Opening date:**
  - February 2018
- **CCU/PUC Approval:**
  - TBD (~ June 2018)

Outage Improvement Programs



January 18, 2018

Energy Storage System Program

Generations/Transmission UFLS

- Under Frequency Load Shedding (UFLS) Relays dumps load from the system whenever system frequency decays to 59.3 Hz.
- The dumping of load is necessary in order to avoid overloading the generators on line which would consequently result in an island-wide blackout. Duration of UFLS outages typically between 5 to 30 minutes.
- The last Island-wide Blackout was on July 11, 2013. There were four additional blackouts between November 2010 and the last one. The recovery from an island-wide power outage would take five plus hours.
- The existing base load units are slow reacting to frequency decays and past attempts to mitigate outages by increasing on line spinning reserves were unsuccessful.
- The 40 MW Energy Storage System (ESS) consist of one 24 MW unit at the Hagatna Substation and one 16 MW unit at the Talofofo Substation. It is anticipated that these ESS would reduce over 70% of future UFLS outages due to generator trips and solar PV intermittencies.
- The project cost is $35M which is being funded by 2014 bond funds. Commissioning is programmed for August 2018.

Jan 10, 2018 Stage 1-1
UFLS activated at 59.3 Hz due to NRG drop in load from 17MW to 4MW resulting in five feeders losing power

Vegetation Management Program

Current Vegetation Management

- Contracts issued for North, Central and South sectors
- Crews assigned to trim critical areas on weekly basis
- Limited number of linemen available; adequate manpower unavailable to sustain trimming needs especially during rainy periods when vegetation growth compounds
- Vegetation trimming requires linemen when vegetation is very close to lines; can limit to tree trimmers if vegetation kept low lying
- Most work accomplished with chain saws and machetes
- Debris collected un-mulched; difficult to handle/dispose
- Overhaul of current program planned last year

Vegetation Management Northern Sector

Sustainable Vegetation Management

- Dedicated team for three sectors of the Island
- Teams consist of:
  - Two Lineman/Bucket Truck (as required)
  - Two operators; operates mower/dump truck/mulcher
  - Three Tree Trimmers to gather and mulch vegetation
- Clear trees and vegetation under and within right of ways
- Trees outside of ROW must also be cut with owner permission
- Continue Tree Trimming Contracts to assist with backlogs
- Work with Mayors on under the line mowing maintenance and the painting of poles with traffic yellow

Vegetation Mowers with Extended Booms

Heavy Duty Cutter Mowers

Heavy Duty Mulchers
To be Pulled by Dump Truck

Predictive & Preventive Maintenance

Predictive Based Maintenance

- Performed by America's Best Electricmart, Inc.
- GPA Purchase Order Number 24304
- $214,000 total Cost
- Started October 30, 2017 and completed on December 28, 2017 (59 Days)

Predictive Based Maintenance

- **Predictive Based Maintenance Technology Utilizes Radio Frequency, Proprietary Analytics, and Ultrasonic Acoustic Technology**
- **Predictive Based Maintenance Pinpoints Locations where Arcing, Leaking, and Electrical Tracking are Present to Identify Failing Parts**
- **Line Inspection Work Involved 10 Worst Performing Transmission Circuits**
- **Line Inspection Work Involved 10 Worst Performing Distribution Circuits**
- **296 Miles of GPA T&D Lines were Surveyed**
- **Worst Performing Circuits were determined in terms of Outages not including UFLS or Generation related outages**

Predictive Based Maintenance

- **50 Specific Locations Associated with a Transmission or Distribution Circuit along with Location Maps and Photos where a Particular Hardware, Insulator, or Line Appurtenance is Failing were Identified**
- **The Final Report Outlining the 50 Locations was Forwarded to T&D for Prioritized Scheduling to Avoid Extended Outages**
- **Total Estimated Cost to Survey entire GPA Transmission and Distribution System is $856,400**

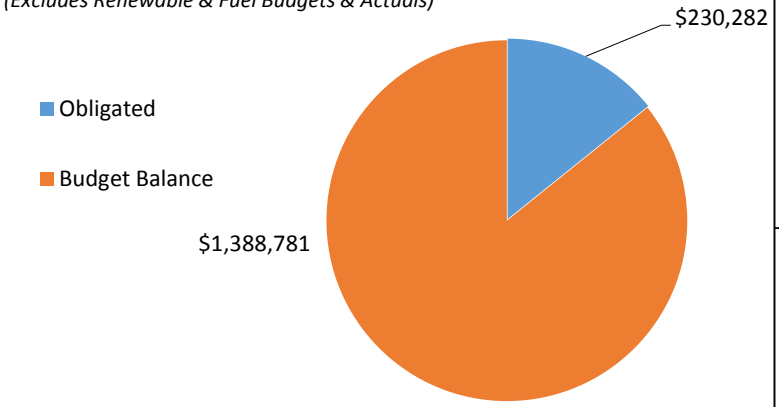
SPORD CCU Report

December 2017



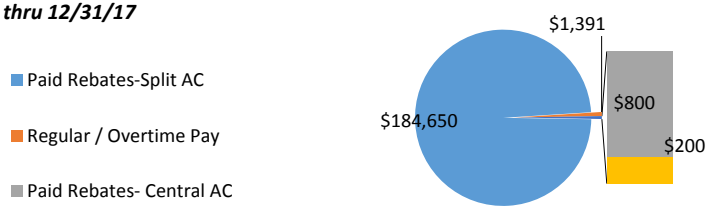
SPORD FY 2018 Budget Status

SPORD O&M:

O&M (Non-Labor) Budget Status

thru 12/31/17

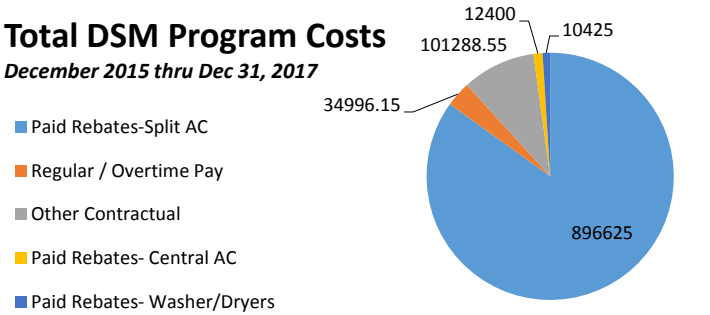
(Excludes Renewable & Fuel Budgets & Actuals)



Approved Budget	$	1,619,063
Adjusted Budget	$	1,619,063
Actuals	$	106,218

DSM Expenses:

FY17 DSM Program Costs



thru 12/31/17

FY 18 Total = $ 342,615

Total DSM Program Costs

December 2015 thru Dec 31, 2017

Total to Date = $1,211,308

2

Ongoing Activities

- Contract Performance Management (IPP, PMC, Agrekko)
- Generation Fuel Supply & Fuel Farm Management
- DSM Rebate Processing
- Renewables (Wind Turbine Maint & DOAg MOA, NRG Invoicing)
- Smart Grid/Network Support
- Project Management (*See Nov-Dec Project Activities*)

Project Activities

No.	Project Description	Nov/Dec Activities	Status / Est. Completion
1	Energy Storage System (Phase I)	GPA reviewing 100% design. Clearing and Grading work commenced in November 2017 and is on-going.	August 2018
2	Renewable Energy Resource Phase II	OPA denied Shanghai protest favoring GPA. Additional protest withdrawn. GPA & bidders initiated discussions to finalize bid documents for Jan. CCU Meeting.	~ Dec 2019 2 years after contract signing (Commerical Operation)
3	New Power Plant Bid (EPCM)	Review of draft IPP bid documents for new power plant. Discussion on land details and RFQ process. PUC approved RFQ in Nov 2017. Finalized RFQ.	Jan 2018 (Issue RFP Step 1 Solicitation)
4	DSM Marketing	Completed DSM Point of Sales Kits, GPA marketing signage, EV vehicle wrap (prepped for parade), various media ads, waiver form, etc.	Continuous
5	DSM Rebate Program	Processed over 500 equipment in applications for rebates totaling ~ $197K	Continuous
6	Wireless Network Expansion (LML)	Commenced Southern Expansion in collaboration with GWA: 30%	To be Updated
		Assessment of GWA Well Locations: Completed	Completed
		Assessment of Existing Tropos Units: 20%	Continuous
7	Performance Metrics Automation Project	Target Completion, Phase I: Dashboard build out	Aug 2017
		Started Phase II: Automating and consolidating data sources	Sept 2017
		Roll-out and Change Management Initiatives commenced	Sept 2017
8	Electric Grid Analysis Software	Additional training for users	Mar 2018
9	Services to Develop Business Performance Indices using iDashboards	Dashboard builds 95%	Dec 2017
10	Supervisory Control and Data Acquisition (SCADA) System	Supervisory Control and Data Acquisition (SCADA) System SCADA Systems Architecture Approved, Network Equipment approved, and Revised Schedule/Completion date submitted by Benson, Currently under GPWA review	Mar 2018

Project Activities

No.	Project Description	Nov/Dec Activities	Status / Est. Completion
11	Mobile Workforce Management System	Closing 1/5/2018 and Vendor Demostration being scheduled	Jan 2018 (Bid Award)
12	Consulting Services for Smart Grid Analytics Enabled Distribution System Planning, Technical, and Economic Feasibility Studies	RFP evaluation ongoing	Feb 2018 (RFP Award)
13	TEMES Piti # 7 ECA Expiration & Transition to GPA	Coordinating tasks under AGMETS for Transition. ECA & Technical Assessment - Data Compilation in Progress - ESA Visit completed, awaiting LEIDOS report - Technical Assessment Visit completeed, awaiting LEIDOS report Assisting Generation with Transition	Completion Date: Nov 2017
14	MEC Piti &8 and #9 - ECA Expiration	ESA & Technical Assessment pending completion of discussions with LEIDOS/BWSC. Bid Document Preparation for New IPP Procurement. Data Compilation in Progress.	Jan 2018 (Bid Docs) Mar/Apr 2018 (ESA &Tech Assessment Report)
15	Planning Software Upgrades & Training (Capacity Expansion/ Portfolio Optimization / Stochastics)	Training of 2 SPORD Engineers for PO use commenced 10/3/2017. Upcoming task: Configuration and management of database, training for - SPORD - PSCC	Start Date: Oct 2017 Completion Date: Sept 2018
16	Generation Software (GADS open software)	Installation at Generation Division completed. Database configuration in progress. Training completed on Nov. 15, 2017.	Nov 2017
17	IFB for ULSD Supply for Baseloads and Peaking Units	Solicitation in progress	Start Date: Nov 2017 Est. completion: FY2018
18	Contract for Lease of Bulk ULSD Storage	Lease procurement approved. Reviewing and finalizing lease contract.	Early 2018 (Tank Available)
19	EV Infrastructure	Developing fast charge station scope for Mangilao offices.	Sept 2018

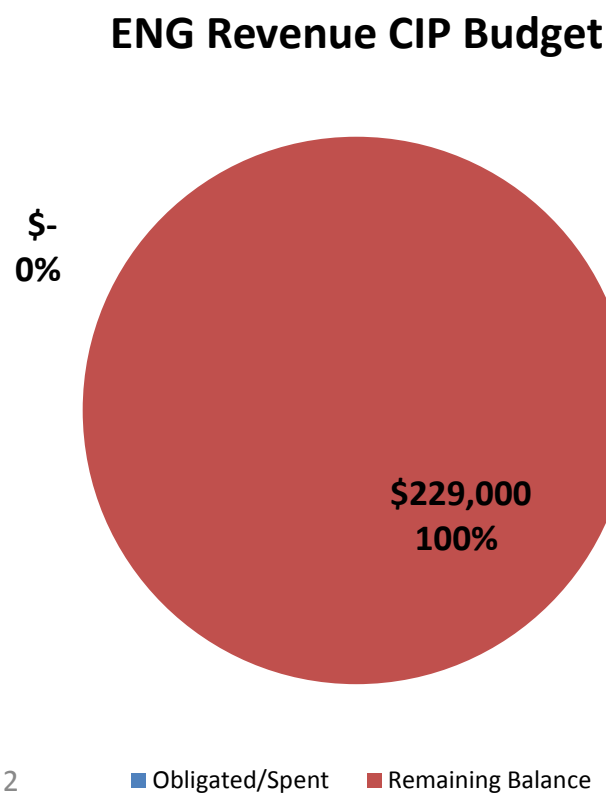
Project Activities

No.	Project Description	Nov/Dec Activities	Status / Est. Completion
20	Consulting Support, new procurements for Piti 7,8,9	Data compilation and bid document preparation (GPA side) in progress. Awaiting LEIDOS recommendations and draft.	Start: October 2017, Announce in Jan/Feb 2018 Completion: August 2018
21	Fuel Conversion Plan	Initial discussion commenced, detailed discussions in November after submission of Assessment Report. Data Requests being addressed.	Start: October 2017 Completion: June 2018
22	Fuel Bulk Storage Facility Assessment	Consultant Site Visits for ESA and Technical Inspeciton completed. Reports due Januaryr 2018.	Start: Sept 2017 End: January 2018
23	Design and Engineering Consulting for Remote Start of GPA Plants	Engineering Project Management team reviewed scope. Dratt of assessment and implementation plan completed.	August 2018
24	Renewable Energy Resource Phase III	Bid announced in Nov. 2017. Site visits scheduled in January 2018.	(Mar 2018) Tech Proposal Due
25	Utility Energy Services Contract (UESC)	Kicked off discussions with UOG, Guam Energy Office, Dept. of Navy, and GPA team on project development and opportunities. Discusssed DSM Model House.	
26	IFB for ULSD Delivery Services for GPA Plants	Solicitation in progress	Start: November 2017 Completion: FY2018 Contract Start: TBD
27	IFB for RFO Supply to Baseload Plants	Solicitation in progress	Start: November 2017 Completion: FY2018 Contract Start: TBD
28	IFB for Petroleum Inspection Services	Solicitation in progress	Start: November 2017 Est. Completion: May 2018 Contract Start: Jun 01, 2018
29	RFO Storage Lease	Lease extension approved by CCU. For PUC review and approval	Start: November 2017 Est. Completion: Mar 2018 Contract Start: Aug 1, 2018

Planned Procurements

- Piti #7 Additional Procurements
  - Pending Technical Assessment of plant potential procurements may include Maintenance Services Contract or a Re-capitalization Contract.
- Piti #8 and #9
  - Exploring options for re-capitalization contract after expiration of ECA in 2018. Projecting solicitation early 1st Quarter 2018.
- IPP Contracts for up to 180 MW Generation Resources
  - Documents being drafted. Projecting solicitation early 1st Quarter 2018.
- ULSD Supply & Delivery to Baseload and Peaking Units
  - Solicitation in progress

Planned Procurements



- MV90 Integration and Training Services
  - Processing Documents through PMM to be solicited in January 2018
- Engineering Analysis Trainings Services
  - Processing Documents through PMM to be solicited in February 2018

Engineering Work Orders

Engineeirng Work Order Summary -December 2017	
Work Orders Received from Customer Services	121
Work Orders Processed & Released to T&D	116
Work Orders Processed & Released to CSR	57
Work Orders Canceled	3
Work Orders Pending Survey	25
Pending Work Orders at Engineering	470

Engineering Large Customer and Net Metering Tracking

Date Received	Customer Name	Work Order Number(s)	Location	KVA	Meter Qty	Status
05/07/14	Port Authority of Guam	412337	Piti			Upgrades of existing facilities, includes line relocations and service conversions from overhead to underground 75% completed. Currently on hold pending Port Authorty direction for final removal.
12/20/13	CoreTech International	Multiple	Dededo	250	50	Lada Estates, 450 kVA, Phase I 100% Completed 242 units energized, Phase II 300 kVA, applications received for 93 units, Phase II 100% Completed. Phase III on hold due to Labor and Permit issues.
01/27/15	TG Engineers PC	422182-85, 90-93, 96-98	Agana Heights	100	11	11 Unit Apartment, 100 kVA, 97% Completed
06/02/15	Docomo Pacific Inc.	Multiple	Various Locations Islandwide	50		New Comm Towers and Power Supplies, 10 sites, 9 completed
05/13/15	CoreTech International Towers	426021	Tamuning	3300	104	New condominiums, 2-1500kVA and 1 300 kVA, Tower 101 100% Completed, Tower 102, 103, and 104 are 45% completed, currently on hold. Temporary power pending for Community Center, 100% Completed. First 52 Service Orders for Tower 101 is 100% completed.
05/11/16	Korando Corp (DPW Bile Pigua Bridge)	437716	Merizo			Bile and Pigua Bridge Reconstruction - 65 % Completed, Route 25/26 Road Widening, currently on hold.
12/09/16	Maeda Pacific	443952	Harmon			Route 1 and Route 3 road improvements - 85% completed, involves new underground 34.5kV and 13.8kV lines and the removal of overhead ples and lines. Pulling of wires intiated 10/9/17. Final Termination and testing Completed. Energizing of new underground 13.8kV and 34.5 kV lines completed. Pending removal of overhead lines.
Pending	New Nikko Expansion	Pending	Tumon	1500	1	New Nikko Expansion, pending submittal of work order application. Redesign of primary feed ongoing.
03/10/17	Best Housing Corp Ltd	446924-30	Mangilao	60	6	New 6-Unit Townhome, 50% completed
06/01/17	GWA Pump Stations 2 and 3	450278-9	Santa Rita	150	2	New GWA Pump Stations. 20% Completed.
06/01/17	WM Eng Office Building	450280	Tamuning	150	1	New office building. 90% Completed.
07/17/17	Keystone Pacific Realty Corp	451488	Hagatna	100	10	New apartment. 92% Completed. Pending additional applications.
07/17/17	Grand Rock Corp.	451490, 1	Santa Rita	50	4	100% Completed. Released to T&D.
08/07/17	Matsumoto, Akiyoshi	452146-49, 51, 4, 6	Tumon	60	7	New 6 Unit Apartment with Common Meter. 5% Completed.
08/17/17	Micronesian Community Corp.	Pending	Mangilao	130	13	New 13 unit subdivison, 5% completed
09/11/17	Grand Harvest Inc.	453016,19,22,24-30,32,34,35,38,40	Dededo	225	17	New 17 Unit Apartment, 85 % Completed.
10/02/17	Sumitomo Mitsui (Baza Gardens Waste water)	453369	Yona	300	1	Baza ardens Wastewater Treatment Plant Improvements, 0% Completed
Varies	Pending Net Metering Customers	Varies	Various Locations Islandwide		17	Pending Net Metering Customers

PLANNING & REGULATORY DIVISION REPORT

The following summarizes P&R's activities for the month of December 2017

INSPECTIONS/MONITORING

- Best Management Practices (BMP) Weekly Inspection/Report – Cabras Power Plant
- Spill Prevention, Control and Countermeasures (SPCC) Inspection/Report - Cabras, CT, Diesel, Piti 7 Power Plants and Substations
- Dededo CT operating hours and emissions monitoring
- Aggreko Emissions Monitoring – Emissions indicate that we are on track with our estimates and we can reasonably expect to be below the 250 ton/year limit at 238 tons on Jan. 8, 2018

ENVIRONMENTAL RESPONSE

- Incident at Port Authority of Guam – Responded to Crane Operators getting sick and 2 being hospitalized. Attended meetings and provided internal incite, information, and investigation

REPORTING

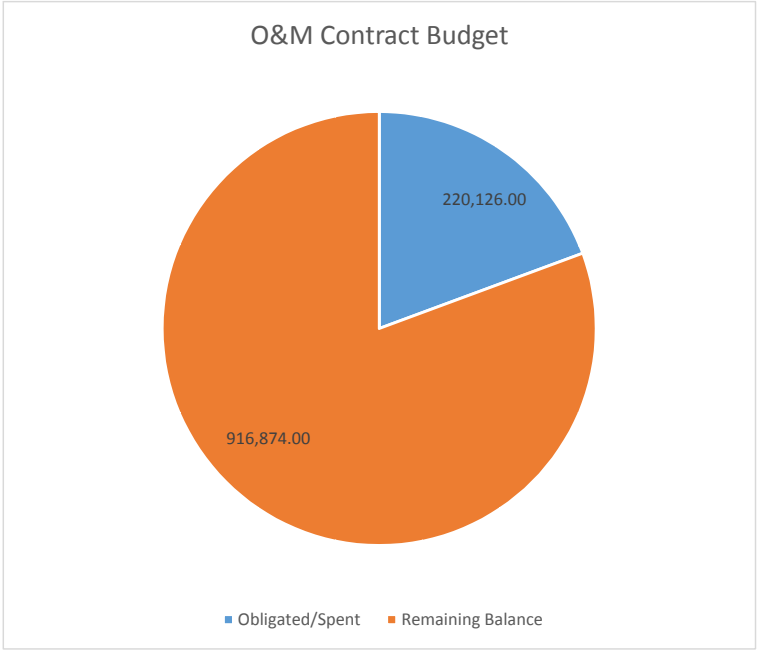
- New Source Performance Standards (NSPS) Monthly– Submitted reports to GEPA for Macheche CT, Yigo CT, Talofofo, Manenggon and Tenjo Diesel Plants.

WASTE DISPOSAL

- Monitoring of UNITEK and GRESCO used oil disposal to the WOF

OTHERS

- Reviewed and approved bid for laboratory analysis PO
- Prepared a monitoring station estimate for the AGMET
- Provided comments of the Leidos Draft ESA Report
- Reviewed initial report from Leidos inspection of MEC 8 & 9 in preparation for an ESA Phase I assessment of the facility. Leidos to submit Phase I ESA of MEC 8&9 on January 06, 2018.
- Additional information regarding Multi Step Bid No. GPA-017-18: Provided responses to the questions from AM Insurance for GPA Pollution Insurance MSB:
    - as to the current status of the groundwater remediation at the Tanguisson Power Plant;
    - and provided status of Guam Power in terms of USEPA air quality requirements;
    - provided details on: pollution incidents, releases and spills, violations, corrective actions, law suits, claims, complaints and regulatory notices;
    - provided details on the maintenance, leak detection and inspection program for the LSFO and HSFO tanks at the Piti Tank Farm



- GPA-017-18 - Broker Services & Pollution Liability Insurance - Provided data/information in response to questions from bidders
- RFP-17-005 Smart Grid - participated as a committee member
- Price Calculations – calculated the difference in price between using RFO and ULSD at the MEC 8&9 for the GM. Updated data up to 2020
- Fuel Use & Emissions for Consent Decree - Updated data to 2013 - Nov. 2017
- GM's Presentation to US EPA – updated information on ESP and Emissions in the power point presentation
- Carbon Capture – attended conference call with US EPA, Guam EPA, the Governor's Office, and the company Karbon CCs Ltd. regarding the use of Karbon's carbon capture technology for Guam source
- Energy Storage System Project (ESS) – reviewed and provided comments on Agana Sub tank and pipeline inspection report

Planning & Regulatory
CCU Report

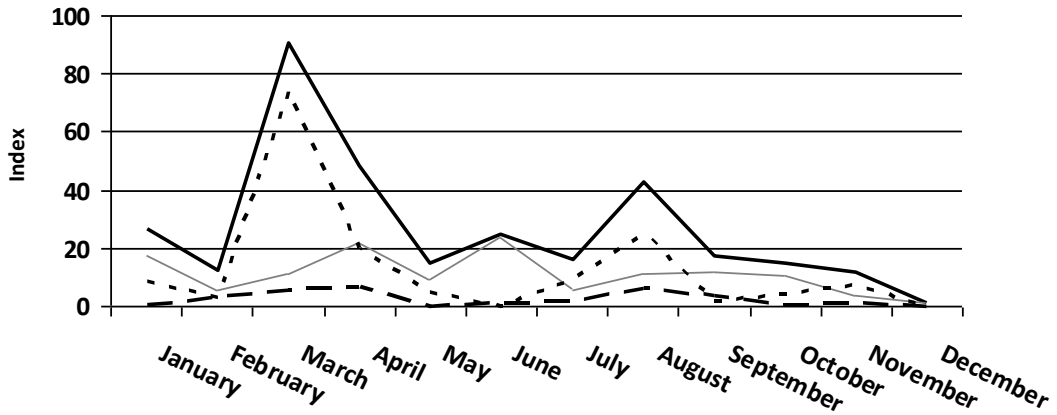
December 31, 2017

Planning & Regulatory O&M Contract Budget

- Revenue Funded
- Target
  - 7.41% O&M Obligated by November 16, 2017
  - 19.28 O&M Obligated as of Nov. 30, 2017 (actual)
  - 19.36 O&M Obligated as of Dec. 31, 2017 (actual)
  - 30.09% O&M Obligation by February 28, 2018

2

P&R Weekly & Monthly Inspection Reports



- Best Management Practices (BMP) Report Summary [Weekly]
- Generation Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]
- T&D Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]

- GPA is responsible to employees, the island environment, and the community to take all reasonable steps necessary to prevent spills from its facilities in order to protect human health and the environment

P&R Inspection Report Purpose

- The purpose of these inspections is to catch discrepancies and violations internally and correct them before inspections by Guam EPA and US EPA
- Regulatory Agencies can conduct scheduled or un-scheduled (surprise) inspections any time
- Any major discrepancies or violations cited can lead to issuance of a Notice of Violation (NOV), possible fines, and/or other enforcement action
- P&R conducts routine SPCC inspections in compliance with the requirements of 40CFR 112.7(a)(3)(ii), Discharge Prevention Measures

Issues for Decision

Resolution No. 2018-02:

What is the project's objective and is it necessary and urgent?

Guam Power Authority's (GPA) Bond Refinancing Program will result in a 2018 to 2021 cumulative debt service reduction of $1,482,326 and as per Guam PL 34-69, Section 2(h), GPA must notify I Liheslatura within sixty (60) days of refinancing of its intent and plan regarding the savings achieved from refinancing. GPA desires to reserve these savings for the benefit of the community by assisting the Guam Department of Education (GDOE) with its energy goals. GPA proposes to use the Bond Refinancing Program savings towards its proposed DSM program: *Bringing Energy Savings to (BEST) Schools Program*. The BEST Schools Program goals include:

- Supporting GDOE to achieve their legislative mandate to deploy and utilize renewable energy systems;
- Incentivizing GDOE to reduce their energy use and expenditures;
- Modernizing GDOE facilities infrastructure and extending GDOE equipment life with enhanced, proactive maintenance;
- Partnering up with GDOE under the UESC Program to execute the above;
- Ensuring GDOE continues to contribute to the O&M and capital investments for the GPA Power System; and

GPA will supplement the funding of this program with federal grants. The BEST Schools Program may increase GDOE's use of renewable energy, decrease GDOE's energy consumption and GHG footprint, and improve GDOE's facilities maintenance. This proposed program benefits GDOE, GPA, renewable energy system providers, and Guam students and residents.

How much is the savings?

Average Annual Cash Savings: $501,236.00 (Strategic Investments Option)

RESOLUTION NO. 2018-02

RESOLUTION RELATIVE TO BOND FINANCING SAVINGS UTILIZATION

WHEREAS, Guam Power Authority's (GPA) Bond Refinancing Program will result in a 2018 to 2021 cumulative debt service reduction of $1,482,326; and

WHEREAS, as per Guam PL 34-69, Section 2(h), GPA must notify I Liheslatura within sixty (60) days of refinancing of its intent and plan regarding the savings achieved from refinancing; and

WHEREAS, GPA desires to reserve these savings for the benefit of the community by making a strategic investment assisting the Guam Department of Education's (GDOE) with its Legislative mandate for renewable energy; and

WHEREAS, GPA proposes to use the Bond Refinancing Program savings towards GPA's ***Bringing Energy Savings to (BEST) Schools Program;*** and

WHEREAS, the BEST Schools Program goals include:

- Supporting GDOE to achieve their legislative mandate to deploy and utilize renewable energy systems;
- Incentivizing GDOE to reduce their energy use and expenditures;
- Modernizing GDOE facilities infrastructure and extending GDOE equipment life with enhanced, proactive maintenance;
- Partnering up with GDOE under the UESC Program to execute the above;
- Ensuring GDOE continues to contribute to the O&M and capital investments for the GPA Power System; and

WHEREAS, GPA will supplement the funding of this program with federal grants; and

RESOLUTION NO: 2018-02

WHEREAS, any installed solar PV system energy production shall offset GDOE electricity billing on a kilowatt-hour generated for kilowatt-hour consumed basis at the LEAC or below the rate; and

WHEREAS, this proposed program benefits GDOE, GPA, renewable energy system providers, and Guam students and residents; and

NOW, THEREFORE, BE IT RESOLVED, by the CONSOLIDATED COMMISSION ON UTILITIES, the GOVERNING BODY of the GUAM POWER AUTHORITY as FOLLOWS:

1. The CCU authorizes GPA to petition the PUC for approval of the BEST Schools Program
2. Upon program approval by the PUC, the CCU authorizes the GPA General Manager to implement the BEST Schools Program.

RESOLVED, that the Chairman certifies and the Board Secretary attests to the adoption of this Resolution.

DULY AND REGULARLY ADOPTED AND APPROVED THIS 27th DAY OF FEBRUARY 2018.

Bond Refinancing

PL 34-69

- Section 2(h) – GPA *shall* notify *I Liheslatura* within sixty (60) days of refinancing of its intent and plan regarding the savings achieved from refinancing.

Summary of Savings:

- Final Par Amount of Refunding: $148,670,000
- Final Par Amount of Refunded: $150,440,000
- Total Cash Flow Savings: $11,528,439
- Annual Cash Savings: $501,236
- NPV Savings: 5.17%
- All-In True Interest Cost: 4.12

Bond Refinancing

- Reduction in debt services from 2018 to 2021 totaling about $1,482,326 available for a program
- Reduction from 2022 on to be use to offset annual debt service cost of new 180 MW power plant.

Recommendations for Using $1,482,326 Savings

Option 1. DSM – Replenish Existing Rebate Program

Option 2. DSM – Revolving Short Term Reimbursement Fund-Zero Interest Charged

- Reduces consumption
- Maintain quality of life
- Part of money saved to be used to reimburse GPA revolving fund

- Option 3. DSM Feasibility Plan ($250,000)
  - Support GPA's goal to help GDOE achieve their legislative mandate to deploy and utilize renewable energy systems
  - Incentivize GDOE to reduce their energy use and expenditures
  - Modernize GDOE facilities infrastructure and extend GDOE equipment life with enhanced, proactive maintenance
  - Propose that GDOE partner up with GPA under the UESC Program to execute the Plan Recommendations

Example of Option 2 Program

Residential Customers Demographics:

Assume FY 2918 Average Cost = $0.25/Kwh

KWH RANGE	Residential	Min. Monthly $	Max Monthly. $
Below 0	884	-	-
0-350	7,403	-	$87.50
351-500	4,291	$87.75	$125.00
501-750	7,681	$125.25	$187.50
751-1000	7,221	$187.75	$250.00
1001-2000	13,887	$250.25	$500.00
2001-3000	2,215	$500.25	$750.00

Targeted Assets:	
1. LED Lighting	
2. High Efficiency Air Conditioning Units	
3. Other High Savings Initiatives	

Customer Average Monthly Kwh:	**1000**
Investment Required:	$1,000
24 Month Payments	$42

Current Bill:	**$250**
Monthly Estimated Savings:	$68
Estimated Billing with new A/C	$182
Add Investment Re-payment	$42
Approximate New Bill Monthly	**$224**

1st 24 Months Savings:	**$632**
Annual Savings Thereafter	**$816**

Option 3: BEST Schools Program

- Bringing Energy Savings to (BEST) Schools Program
  - Option A: Strategic Investments on Behalf of GDOE
    - Make Strategic Investment of about $1.48 M into GDOE roof top solar PV program to assist GDOE with its solar mandate (PL 32-095), 10% energy reduction goal, and improve its facilities maintenance. This would be seed funding towards eventually utilizing all GDOE school rooftops for solar PV generation as practical and economic.
    - Use Bond Refinancing Program savings from 2018 thru 2021 period towards installation, commissioning, and operations and maintenance of solar PV + energy storage systems on GDOE facilities
    - GPA evaluates solar PV production potential of all schools
    - Work with GDOE in seeking federal grants and other funding
    - Offset GDOE electric billing on a kilowatt-hour generated for kilowatt-hour consumed basis at the LEAC rate
    - Creates Multiple Win-Win scenarios for GDOE and ratepayers

Best School Program Savings

Description:	GPA BEST Program	GDOE PPA - Leased Schools
GPA Savings Investment:	$1,482,326	
Average $/Watt for Solar PV	4.5	
Total PV KW Capacity	329	
Annual Energy Production	721,399	721,399

Average GDOE Rate/Kwh	0.26
Leac Rate February 2018	0.14
Base Rate	0.12

GDOE PPA $/Kwh (80% of GPA Rate)		$0.21
GDOE Savings $/Kwh		$0.05

GDOE Savings Annually	**$100,996**	**$37,513**

Option 3: BEST Schools Program

- Bringing Energy Savings to (BEST) Schools Program
  - Option B: GPA-GDOE DSM & Renewable Plan ($250,000)
    - Solar Photovoltaic (PV) Systems – Identify and conduct preliminary sizing of solar PV array locations for each school site and the locations of existing electric meters for connection of on-site solar power generation.
    - Heating Ventilation & Air-Conditioning (HVAC) Systems – Provide a preliminary audit of existing school building HVAC systems for energy efficiency opportunities.
    - Water/Wastewater Systems – Provide a preliminary audit of existing systems for water use & operational efficiency opportunities.
    - Energy Management Systems (EMS) – Provide a preliminary audit of existing systems for energy efficiency opportunities.
    - Lighting Systems – Document existing systems and recommend opportunities for energy efficiency.
    - Operations & Maintenance (O&M) Plans – Evaluate and make recommendations to maximize equipment life and performance.
    - Propose that GDOE partner up with GPA under the UESC Program to execute the Plan Recommendations
    - Use BizConnect to help GDOE with their mandate to reduce energy consumption by 10%

Helping GDOE Meet Its 10% Energy Reduction Goal

Supporting Bond Refinance Savings Use Option 3

BizConnect

- GPA has a separate product for commercial and government customers called BizConnect
- BizConnect is especially useful for customers with multiple meters servicing their premise
- GPA has configured BizConnect for two customers: UOG and GTA.
  - GTA uses it aggressively
- Bizconnect can help GDOE School Leadership manage toGDOE's 10% energy reduction goal

BizConnect

- Offers a configurable suite of reports for C&I users to gain visibility into their usage and cost, coupled with measurement and verification to quantify the results of their conservation measures
- Presents deduct and net metering views, as well as coincident peak analysis
- Encourages behavioral savings in response to user configured threshold consumption notifications
- Empowers the large customer base to understand the impact of participating in utility programs, while working toward their own objectives of containing risk and minimizing impact on the environment

GPA Goals

- Near-Term Goals
  - Determine the top five schools for electricity (kWh) consumption per student. (Done)
  - Create Login Profiles for each of these schools
  - Create a training program on BizConnect for these schools
  - Conduct the training for the principals of these five schools
  - Provide Guidance on Using BizConnect to Manage Energy Use and help Meet GDOE's 10% Energy Reduction Mandate
- Long-Term Goals
  - Have every school on BizConnect
  - Help GDOE achieve its mandate to cut energy use by 10%
  - Become GDOE's Favored Energy Partner

Top Five Energy Consuming Schools

Rank	School Name	kWh Billed	# of Students	kWh/Student
1	Southern High School	538,389.30	1,495	360.13
2	Tamuning Elementary School	145,570.72	565	257.65
3	As Tumbo Middle School	106,398.00	581	181.26
4	Tiyan High School	223,392.00	1,260	177.30
5	Okkodo High School	302,816.24	1,762	171.86

GPA BizConnect Goals

- Increase customer satisfaction by helping them manage energy usage and cost
- Increase mindshare between GPA and its commercial, industrial, and government customers
- Improve effectiveness of GPA's DSM initiatives
- Lower burden on call centers by reducing call volume and duration
- Improve public reputation of the utility
- Improve the value we provide customers

Issues for Decision

Resolution No. 2018-04:

RELATIVE TO APPROVAL OF THE PHASE II RENEWABLE ENERGY ACQUISITION POWER PURCHASE AGREEMENT FOR HANWHA ENERGY CORPORATION

What is the project's objective? Is it necessary and urgent?

GPA intends to meet its 2008 IRP goals and comply with Public Law 29-62 which sets renewable goals under the Renewable Portfolio Standards (RPS) with the Phase II projects. In January 2017 GPA obtained the price bids for GPA Multi-Step Bid No: GPA-070-16 for 60MW of Renewable Energy Resource capacity with ESS for ramp control. Hanwha Energy Corporation is one of the two (2) lowest responsive bidders (KEPCO-LG CNS Mangilao Solar, LLC., is the other one) with having two proposals for 30MW solar PV projects totaling 60 MW of solar PV capacity with ESS for ramp control. GPA and Hanwha Energy Corporation have completed and agreed to commercial terms and conditions of the Power Purchase Agreements (PPA). GPA seeks approval to submit Hanwha Energy Corporation's PPA to the PUC for their approval.

Where is the location?

The Hanwha Energy Corporation 2x30MW solar projects are located at Dandan, Inarajan.

How much will it cost?

Please see attached table.

When will it be completed?

The Agreement is for 25 year term.

What is its funding source?

Funding source is LEAC.

HANWHA ENERGY CORPORATION Price Proposals

Contract Year	Proposal 1			Proposal 2		
	Annual Price ($/MWH)	Guaranteed Net Annual Generation (MWH/YR)	MicroGrid Operations Fixed Annual Fee	Annual Price ($/MWH)	Guaranteed Net Annual Generation (MWH/YR)	MicroGrid Operations Fixed Annual Fee

RESOLUTION NO. 2018 – 04

RELATIVE TO APPROVAL OF THE PHASE II RENEWABLE ENERGY ACQUISITION AWARD TO HANWHA ENERGY CORPORATION FOR 60 MW OF RENEWABLE ENERGY CAPACITY

WHEREAS, in May 2016 GPA announced GPA Multi-Step Bid No: GPA- 070-16 for 60MW of Renewable Energy Resource capacity with ESS for ramp control; and

WHEREAS, in January 2017 GPA obtained the price bids and Hanwha Energy Corporation is one of the two (2) lowest responsive bidders with having two proposals for 30MW solar PV projects totaling 60 MW of solar PV capacity with ESS for ramp control; and

WHEREAS, Hanwha Energy Corporation provided $62.45/MWH & $65.99/MWH price proposals (first year) for the energy and ramp controls to include interconnection costs. **Exhibit A** provides a summary of the energy price proposals; and

WHEREAS, GPA evaluates bidder's price proposal against GPA's variable operating costs primarily made up of fuel costs; and

WHEREAS, GPA has determined that Hanwha Energy Corporation proposals would provide substantial savings to GPA over the term of the contracts based on current and projected LEAC rates (**Exhibit B**)**;** and

WHEREAS, GPA considers renewable energy as an effective hedge against rising fuel oil prices; and

WHEREAS, the bid prices proposed are an excellent fuel hedge as the bidders' energy prices are fixed with escalations no more than 1% annually for all proposals. **Exhibit C** summarizes GPA historical LEAC; and

WHEREAS, renewable energy is sustainable energy and good for the island; and

WHEREAS, Public Law 29-62 sets renewable goals under the Renewable Portfolio Standards (RPS); and

RESOLUTION NO: 2018-xx

WHEREAS, the award of 120MW contracts including KEPCO-LG CNS Mangilao Solar, LLC 60 MW project is projected to increase GPA's ratio of renewable energy to sales up to 26% by 2020. **Exhibit D & E** is a projected RPS outlook; and

WHEREAS, Hanwha Energy Corporation has concurred with GPA recommendations from the system impact study which is incorporated in the contract documents; and

WHEREAS, GPA would like to proceed with an approval to award Hanwha Energy Corporation a total of 60MW of renewable energy capacity contract subject (the "Agreement") to PUC approval.

WHEREAS, the Agreement, in the unexecuted form attached hereto as **Exhibit F,** has been reviewed by the CCU.

WHEREAS, this (Agreement shall be effective on the Effective Date as defined therein provided that the obligations of the parties thereunder shall be subject to the satisfaction of the following conditions precedent:

(i) Receipt by GPA of a final, non-appealable approval of this Agreement by the Guam Public Utilities Commission ("PPA Approval");

(ii) Execution of the Interconnection Agreement by the Parties;

(iii) Receipt by GPA of a final, non-appealable approval of the Interconnection Agreement (ICA) by the Guam Public Utilities Commission ("ICA Approval"); and

WHEREAS, Title 12 of the Guam Code Annotated, Chapter 8, Section 8306 provides that the Guam Power Authority may enter into alternate energy agreements to develop alternate energy or to purchase alternate energy only if all of the following conditions are met:

(a) Local funds of the government of Guam or the Guam Power Authority Funds may be used to develop alternate energy sources (including power generated from windmills, solar ponds and Ocean Thermal Energy Conversion) as may be later, appropriated by the Legislature or approved by law for that specific purpose.

(b) Any power produced or sold from alternate energy sources (including power generated from windmills, solar ponds and Ocean Thermal Energy Conversion (OTEC) cannot be purchased by Guam Power Authority or the government of Guam at a cost greater than the average cost of producing power found in the Islandwide Power System (not inclusive of backup diesel generators), specifically the two Cabras Units, the two Tanguisson Units, and the Piti Power Plant.

RESOLUTION NO: 2018-xx

(c) No contract may be signed by the government of Guam or the Guam Power Authority to develop or purchase power from alternate energy sources (including power generated from windmills, solar ponds and Ocean Thermal Energy Conversion), if such contract will result in increased expenses and costs for the Guam Power Authority. No such alternate energy contract may be signed until the board of directors of the Guam Power Authority has so certified that the agreement is consistent with all bond covenants and that the price paid for electricity pursuant to the agreement does not exceed actual current avoided cost.

(d) For so long as the Navy Power Pool Agreement is in effect, neither the Guam Power Authority nor the government of Guam may contract to purchase any power generated from alternate energy source (including power generated from windmills and solar ponds and Ocean Thermal Energy Conversion) without giving the United States Navy prior written notification.

(e) Any contract to purchase alternate energy (including power generated from windmills and solar ponds and Ocean Thermal Energy Conversion) must provide that any loss or damage to the Islandwide Power System, Guam Power Authority and the U.S. Navy or to consumers as a result of or proximately caused by the negligence of alternate energy supplier or by the quality of alternate energy supplied will be borne solely by the alternate energy supplier who will hold Guam Power Authority and the government of Guam harmless.

(f) All interface facilities to provide usable alternate energy (including power generated from windmills, solar ponds and Ocean Thermal Energy Conversion) shall be installed and maintained at the expense of the supplier of alternate energy. Any such interconnections shall be at existing lines owned and operated by the Islandwide Power System, and such interfaces shall be subject to the engineering standards and approval set by the Guam Power Authority.

(g) Any contract to purchase alternate energy (including power generated from windmills, solar ponds and Ocean Thermal Energy Technology) must provide that neither the government of Guam nor the Guam Power Authority shall be obligated to purchase electrical power not needed by the Guam Power Authority.

RESOLUTION NO: 2018-xx

NOW, THEREFORE, BE IT RESOLVED, by the CONSOLIDATED COMMISSION ON UTILITIES, the GOVERNING BODY of the GUAM POWER AUTHORITY as FOLLOWS:

1. The CCU authorizes GPA to petition the PUC for approval to award Phase II Renewable Acquisition Bid of two 30MW proposals totaling 60MW to Hanwha Energy Corporation as required under the PUC Procurement Protocol.
2. The CCU authorizes GPA to contract Hanwha Energy Corporation for renewable energy subject to PUC approval.
3. The CCU certifies and confirms that the requirements of 12 GCA Section 8306 as set forth above are met and satisfied in connection with the Agreement as follows:
    a. The requirements of 12 GCA Section 8306(a) are satisfied in connection with the Agreement in that GPA, pursuant to the provisions of Public Law 30-66 (as codified in Title 12 of the Guam Code Annotated, Section 8104(n)) and other applicable laws, is authorized to enter into the Agreement, together with any other agreement to be entered into by the parties in connection therewith, and perform all the obligations imposed upon GPA as set forth therein, including, without limitation, the obligation to purchase Renewable Energy as defined in the Agreement and pay all amounts due and owing under the terms of the Agreement. No separate and specific appropriation or approval by *Liheslaturan Guahan* is required for such purpose.
    b. The requirements of 12 GCA Section 8306(b) and (c) are satisfied in connection with the Agreement in that the CCU hereby certifies that the Agreement and the purchase of Renewable Energy by GPA at the time of the execution of the Agreement pursuant to the terms therein will not result in (A) costs to GPA which exceed the average cost of producing power under the Islandwide Power System owned and operated by GPA not inclusive of energy production from any backup diesel generators or other renewable energy sources, or (B) increased expenses and costs for GPA. Further, the CCU hereby certifies that the Agreement is consistent with and does not violate any and all bond covenants applicable to and imposed upon GPA and that the price to be paid by GPA for Renewable Energy as provided therein does not exceed GPA's actual current avoided cost.
    c. The requirements of 12 GCA 8306(d) are not applicable with regard to the Agreement since GPA is not a party to a pooling agreement or any other agreement with the United States Department of Navy or any other federal agency, department or instrumentality ("Federal Government) which requires GPA to notify or obtain the approval of the Federal Government of this Agreement as contemplated.

RESOLUTION NO: 2018-xx

d. The requirements of 12 GCA Section 8306(e) are satisfied as the Agreement contemplates that the Hanwha entity executing the Agreement is obligated to indemnify and hold harmless GPA from any loss or damage to the Islandwide Power System as a result of or proximately caused by such entity or by the quality of alternate energy supplied.

e. The requirements of 12 GCA Section 8306(f) are satisfied as the Agreement and any interconnection agreements executed in connection therewith provide that all interface facilities to provide the Renewable Energy shall be installed and maintained at the expense of the Hanwha entity thereunder and that any such interconnections shall be at existing lines owned and operated by the Islandwide Power System, and such interfaces shall be subject to the engineering standards and approval set by GPA.

f. The requirements of 12 GCA Section 8306(g) are satisfied in connection with the Agreement as any and all Renewable Energy to be purchased by GPA pursuant to the terms of the Agreement constitute electrical power needed and required by GPA in connection with the operation and stability of the Islandwide Power System and in order to meet renewable energy portfolio standards which GPA is mandated to achieve and satisfy by law including without limitation, the mandates as set forth in Public Law 29-062 as codified in Title 12 of the Guam Code Annotated, Section 8311.

RESOLVED, that the Chairman certifies and the Board Secretary attests to the adoption of this Resolution.

DULY AND REGULARLY ADOPTED AND APPROVED THIS 27TH DAY OF FEBRUARY 2018.

STRATEGIST CASE SUMMARY

	Base Case (No Phase II)	Case 1 (60MW)	SAVINGS
Present Value Utility Cost[3] ($000)	6,896,417	6,662,844	233,572

Notes:
1. The Currrent LEAC is used in this case evaluation to demonstrate minimum savings potential with $115/MWH LEAC rate presently proposed for next LEAC period.
2. Projected LEAC is based on STRATEGIST software output that analyzes genernation costs for various generation resources and its operating characteristics. This LEAC is based on load and fuel forecasts done by LEIDOS in 2016.
3. Present Value Utility Cost is an evaluation of generation operating costs in the STRATEGIST software. This is used to determine cost impact of generation resources and their operation variables (efficiency, fuel costs, capacity, etc.) based on energy requirements.

INTERCONNECTION AGREEMENT

This Interconnection Agreement ("Agreement") is made and entered into this [___] day of _____, 201__ (the “Effective Date”), by Guam Power Authority ("GPA" or “Transmission Provider”), and _____("_____" or “Interconnection Customer”) each hereinafter sometimes referred to individually as "Party" or both referred to collectively as the "Parties."

Interconnection Customer Application No: _____

In consideration of the mutual covenants set forth herein, the Parties agree as follows:

Article 1. Scope and Limitations of Agreement

1.1 This Agreement governs the terms and conditions under which the Interconnection Customer's Small Generating Facility will interconnect with, and operate in parallel with, the Transmission System.

1.2 This Agreement does not constitute an agreement to purchase or deliver the Interconnection Customer's power. The purchase or delivery of power and other services that the Interconnection Customer may require will be covered under a separate agreement. The Interconnection Customer will be responsible for separately making all necessary arrangements (including scheduling) for delivery of electricity to GPA in accordance with GPA's standard procedures, as provided by GPA to Interconnection Customer no later than ninety (90) days prior to commencement of testing of the Small Generating Facility.

1.3 Responsibilities of the Parties

1.3.1 The Parties shall perform all obligations of this Agreement in accordance with all Applicable Laws and Regulations, Operating Requirements, and Good Utility Practice.

1.3.2 The Interconnection Customer shall construct, interconnect, operate and maintain its Small Generating Facility and construct or cause to be constructed the Interconnection Facilities in accordance with this Agreement, Good Utility Practice and the requirements of Section 1.4.4 below.

1.3.2.1 The cost of constructing, interconnecting, operating and maintaining the Small Generating Facility shall be borne entirely by Interconnection Customer.

1.3.2.2 The cost of developing, designing, procuring, constructing and installing the Interconnection Facilities shall be borne by Interconnection Customer

1.3.2.3 On or before the Commercial Operation Date (as defined in the Power Purchase Agreement), the Interconnection Customer shall transfer the Interconnection Facilities to GPA by execution and delivery of the Bill of Sale attached hereto as Attachment 7.

1.3.2.4 Interconnection Customer shall manage the overall Construction progress (Engineering, Procuring and Constructing) and bear up to $900,000.00 of the direct, verified costs of construction of such System Stability Upgrades which are referred in Section 4.2 below and in

Attachment 5, but such costs shall in no event exceed $900,000.00. Any verified costs in excess of such amount shall be reimbursed by GPA to Interconnection Customer with GPA's prior approval.

1.3.3 GPA shall operate and maintain the Transmission System, the Interconnection Facilities and the Network Upgrades in accordance with this Agreement and Good Utility Practice.

1.3.3.1 The Parties agree that Network Upgrades [will not be required] solely as a result of Interconnection Customer installing the Small Generating Facility and the Interconnection Facilities.

1.3.4 The Interconnection Customer agrees to construct the Interconnection Facilities in accordance with applicable specifications that meet or exceed those provided by the National Electrical Safety Code, the American National Standards Institute, IEEE Standards, Underwriter's Laboratory, and Operating Requirements in effect at the time of construction and other applicable national and state codes and standards. The Interconnection Customer agrees to design and install its Small Generating Facility so as to reasonably minimize the likelihood of a disturbance adversely affecting or impairing the system or equipment of GPA.

1.3.5 Interconnection Customer shall be responsible for the safe installation of the Interconnection Facilities. Following transfer by Interconnection Customer in accordance with Section 1.4.2.4, GPA shall be responsible for the safe operation, maintenance, repair, inspection and condition of the Interconnection Facilities and the Transmission System, including System Stability and Network Upgrades

1.3.6 GPA shall provide without cost to Interconnection Customer the reasonable use of labor, personnel and equipment necessary for Interconnection Customer's installation of the Small Generating Facility and the Interconnection Facilities (and the Network Upgrades if applicable), so long as GPA does not incur material out-of-pocket cost or constraint of resources as a result thereof. The foregoing includes, by way of example, (i) providing access to GPA technical information and engineering personnel as needed for questions and answers, (ii) utilizing GPA equipment and trucks as needed for GPA support, (iii) receiving and loading wire reels at the Port of Guam and bringing the same to the Small Generating Facility lay-down area, (iv) providing electricians and equipment for wire installation, splicing, terminations and testing, and (v) providing flag men for traffic control during wire installation, splicing and testing.

1.3.7 GPA shall provide Interconnection customer and its subcontractors regarding the work on the Interconnection Facilities the following items (i) the right of Access to Interconnection Facilities (ii) cover GPA's internal cost of any power shut down support during normal working hours (iii) provide sufficient land for

installing transformer and switchgear to its existing Substations as described in Attachment 2 iv) acquisiton and permitting of additional land for Apra Heights Substation

1.4 Parallel Operation Obligations

Once the Small Generating Facility has been authorized to commence parallel operation, the Interconnection Customer shall abide by all rules and procedures pertaining to the parallel operation of the Small Generating Facility in the Guam control area, including, but not limited to: 1) the rules and procedures concerning the operation of generation set forth by the Transmission Provider for the Transmission System and 2) the Operating Requirements set forth in Appendix H of the Power Purchase Agreement.

1.5 Metering

The Parties' responsibilities with respect to purchase, installation, operation, maintenance, testing, repair and replacement of metering and data acquisition equipment are specified in Section 7.4 of the Power Purchase Agreement.

1.6 Reactive Power

The Interconnection Customer shall design its Small Generating Facility to maintain a composite power delivery at continuous rated power output at the Point of Interconnection at all power factors over the range of 0.95 leading to 0.95 lagging, unless GPA has established different requirements that apply to all similarly situated generators in the control area on a comparable basis. The Small Generating Facility shall be capable of continuous dynamic operation throughout the power factor design range as measured at the Point of Interconnection.

1.7 Definitions

Capitalized terms used herein shall have the meanings specified in the Glossary of Terms in Attachment 1 or the body of this Agreement.

Article 2. Inspection, Testing, Authorization, and Right of Access

2.1 Equipment Testing and Inspection

2.1.1 The Interconnection Customer shall test and inspect its Small Generating Facility and the Interconnection Facilities prior to interconnection. The Interconnection Customer shall notify GPA of such activities no fewer than five Business Days (or as may be agreed to by the Parties) prior to such testing and inspection. The notification shall be made by submitting a test plan for GPA's approval prior to the first scheduled testing date. GPA shall provide feedback within ten (10) business days. The test plan shall include all relevant testing details including but not limited to the date and time of each test, and expected MW and MVAR output of the Small Generating Facility. Testing and inspection shall occur on a Business Day. GPA may, at its own expense, send qualified personnel to the Small Generating Facility site to inspect the interconnection and observe the testing. The Interconnection Customer shall provide GPA a written test report when such testing and inspection is completed.

2.1.2 GPA shall provide the Interconnection Customer written acknowledgment within five (5) Business Days, that it has received the Interconnection Customer's written test report. Such written acknowledgment shall not be deemed to be or construed as any representation, assurance, guarantee, or warranty by GPA of the safety, durability, suitability, or reliability of the Small Generating Facility or any associated control, protective, and safety devices owned or controlled by the Interconnection Customer or the quality of power produced by the Small Generating Facility.

2.2 Authorization Required Prior to Parallel Operation

2.2.1 GPA has listed applicable parallel operation requirements in Appendix H of the Power Purchase Agreement. Additionally, GPA shall notify the Interconnection Customer of any changes to these requirements as soon as they are known. GPA shall make Reasonable Efforts to cooperate with the Interconnection Customer in meeting requirements necessary for the Interconnection Customer to commence parallel operations by the in-service date.

2.2.2 The Interconnection Customer shall not operate its Small Generating Facility in parallel with the Transmission System without the one-time prior written authorization of GPA. GPA will provide such authorization once GPA receives notification that the Interconnection Customer has complied with all applicable parallel operation requirements set forth in Appendix H of the Power Purchase

Agreement. Such authorization shall not be unreasonably withheld, conditioned, or delayed.

2.2.3 GPA shall have control of the power transmission system including the interconnecting transmission line breaker at the point of interconnection.

2.3 Right of Access

2.3.1 Upon reasonable notice, GPA may send a qualified person to the premises of the Interconnection Customer at or immediately before the time the Small Generating Facility first produces energy to inspect the interconnection, and observe the commissioning of the Small Generating Facility (including any required testing), startup, and operation for a period of up to three (3) Business Days after initial start-up of the unit.

2.3.2 Following the initial inspection process described above, at reasonable hours, and upon reasonable notice, or at any time without written notice in the event of an emergency or hazardous condition, GPA shall have access to the Interconnection Customer's premises for any reasonable purpose in connection with the performance of the obligations imposed on it by this Agreement or if necessary to meet its legal obligation to provide service to its customers. Within forty-eight (48) hours after a GPA access due to an emergency or hazardous condition, GPA shall provide a written summary of any such access and of any work performed during such access.

2.3.3 Each Party shall be responsible for its own costs associated with following this article.

Article 3. Effective Date, Term, Termination, and Disconnection

3.1 Effective Date

This Agreement shall become effective on the Effective Date.

3.2 Term of Agreement

This Agreement shall become effective on the Effective Date and shall remain in effect for a period of twenty-five (25) years from the Commercial Operation Date (as defined in the Power Purchase Agreement), or such other longer period as the Interconnection Customer may request and shall be automatically renewed for each successive one-year

period thereafter, unless terminated earlier in accordance with Article 3.3 of this Agreement. In no event, however, shall GPA be entitled to terminate this Agreement unless and until the Power Purchase Agreement is terminated.

3.3 Termination

No termination shall become effective until the Parties have complied with all Applicable Laws and Regulations applicable to such termination.

3.3.1 The Interconnection Customer may terminate this Agreement at any time by giving GPA twenty (20) Business Days written notice.

3.3.2 Transmission Provider may terminate this Agreement if the Small Generating Facility has ceased commercial operation for three (3) consecutive years, beginning with the last date of commercial operation for the Small Generating Facility, after giving the Interconnection Customer twenty (20) Business Days advance written notice. The Small Generating Facility will not be deemed to have ceased Commercial Operation for purposes of this Article 3.3.2 if the Interconnection Customer can document that it has taken other significant steps to maintain or restore operational readiness of the Small Generating Facility for the purpose of returning the Small Generating Facility to commercial operation as soon as possible.

3.3.3 Either Party may terminate this Agreement after Default pursuant to Article 7.6.

3.3.4 Upon termination of this Agreement, the Small Generating Facility will be disconnected from the Transmission System. All costs required to effectuate such disconnection shall be borne by the terminating Party, unless such termination resulted from the non-terminating Party's Default of this Agreement or such non-terminating Party otherwise is responsible for these costs under this Agreement.

3.3.5 The termination of this Agreement shall not relieve either Party of its liabilities and obligations, owed or continuing at the time of the termination.

3.3.6 The provisions of this Article shall survive termination or expiration of this Agreement.

3.4 Temporary Disconnection

Temporary disconnection shall continue only for so long as reasonably necessary under Good Utility Practice.

3.4.1 Emergency Conditions

"Emergency Condition" shall mean a condition or situation: (1) that in the judgment of the Party making the claim is imminently likely to endanger life or property; or (2) that, in the case of GPA, is imminently likely (as determined in a non-discriminatory manner) to cause a material adverse effect on the security of, or damage to, the Transmission System or the Interconnection Facilities; or (3) that, in the case of the Interconnection Customer, is imminently likely (as determined in a non-discriminatory manner) to cause a material adverse effect on the security of, or damage to, the Small Generating Facility, or with respect to the Interconnection Facilities until transferred to GPA pursuant to this Agreement. Under Emergency Conditions, if GPA believes that the Emergency Condition may reasonably be expected to affect the Transmission System or the Interconnection Facilities, GPA may immediately suspend interconnection service and temporarily disconnect the Small Generating Facility. GPA shall notify the Interconnection Customer promptly when it becomes aware of an Emergency Condition that may reasonably be expected to affect the Interconnection Customer's operation of the Small Generating Facility. The Interconnection Customer shall notify GPA promptly when it becomes aware of an Emergency Condition that may reasonably be expected to affect the Transmission System. To the extent information is known, the notification shall describe the Emergency Condition, the extent of the damage or deficiency, the expected effect on the operation of both Parties' facilities and operations, its anticipated duration, and the necessary corrective action.

3.4.2 Routine Maintenance, Construction, and Repair

GPA may interrupt interconnection service or curtail the output of the Small Generating Facility and temporarily disconnect the Small Generating Facility from the Transmission System when necessary, according to Good Utility Practice, for routine maintenance, construction, and repairs on the Transmission System. GPA shall provide the Interconnection Customer with five Business Days notice prior to such interruption. GPA shall use Reasonable Efforts to coordinate such reduction or temporary disconnection with the Interconnection Customer. The interruption or curtailment shall continue only for so long as reasonably necessary under Good Utility Practice.

3.4.3 Forced Outages

During any forced outage, GPA may suspend interconnection service to effect immediate repairs on the Transmission System. GPA shall use Reasonable Efforts to provide the Interconnection Customer with prior notice. If prior notice is not given, GPA shall, upon request, provide the Interconnection Customer

written documentation after the fact explaining the circumstances of the disconnection.

3.4.4 Adverse Operating Effects

GPA shall notify the Interconnection Customer as soon as practicable if, based on Good Utility Practice, there is a significant probability that operation of the Small Generating Facility will cause damage to the Transmission System. Supporting documentation used to reach the decision to disconnect shall be provided to the Interconnection Customer upon request. If, after notice, the Interconnection Customer fails to remedy the adverse operating effect within a reasonable time, GPA may disconnect the Small Generating Facility. GPA shall provide the Interconnection Customer with five (5) Business Day notice of such disconnection, unless the provisions of Article 3.4.1 apply.

3.4.5 Modification of the Small Generating Facility

The Interconnection Customer must receive written authorization from GPA before making any change to the Small Generating Facility that may have a material impact on the safety or reliability of the Transmission System. Such authorization shall not be unreasonably withheld. Modifications shall be done in accordance with Good Utility Practice. If the Interconnection Customer makes such modification without GPA's prior written authorization, GPA shall have the right to temporarily disconnect the Small Generating Facility until the Interconnection Customer makes necessary changes in order for the Small Generating Facility not to have a material impact on the safety or reliability of the Transmission System.

3.4.6 Reconnection

The Parties shall cooperate with each other to restore the Small Generating Facility, Interconnection Facilities, and the Transmission System to their normal operating state as soon as reasonably practicable following a temporary disconnection.

Article 4. Cost Responsibility for Interconnection Facilities

4.1 Interconnection Facilities

The Interconnection Customer shall install and pay for the cost of the Interconnection Facilities itemized in Attachment 2 of this Agreement, and as further set forth in Section 1.4.

4.2 System Stability Upgrades

It is agreed that system operational characteristic changes or Small Generator Facility modifications shall be required to be installed by the Interconnection Customer as a result of the development, installation or operation of the Small Generating Facility or other generation installed in Guam.

Transmission system relaying to line current differential upgrade is required as further described in Attachment 5. GPA shall own and operate the System Stability Upgrades described in Attachment 5 of this Agreement, which will be installed as and to the extent required as as result of the Interconnection Customer connecting to the Interconnection Facilities. All actual costs of such required System Stability Upgrades, including overhead, shall be borne by the Interconnection Customer.

For any verified costs for the System Stability Upgrades in excess of $900,000.00, GPA shall reimburse the Interconnection Customer. The Interconnection Customer shall properly notify and obtain GPA's approval prior to exceeding the $900,000.00 cap.

Article 5. [Not Used]

Article 6. Billing, Payment, Milestones, and Financial Security

6.1 Milestones

The Parties shall agree on milestones for which each Party is responsible and list them in Attachment 4 of this Agreement. A Party's obligations under this provision may be extended by agreement. If a Party anticipates that it will be unable to meet a milestone for any reason other than a Force Majeure Event, it shall immediately notify the other Party of the reason(s) for not meeting the milestone and (1) propose the earliest reasonable alternate date by which it can attain this and future milestones, and (2) requesting appropriate amendments to Attachment 4. The Party affected by the failure to meet a milestone shall not unreasonably withhold agreement to such an amendment unless it will (1) suffer significant uncompensated economic or operational harm from the delay, (2) attainment of the same milestone has previously been delayed, or (3) it has reason to believe that the delay in meeting the milestone is intentional or unwarranted notwithstanding the circumstances explained by the Party proposing the amendment.

Article 7. Assignment, Liability, Indemnity, Force Majeure, Consequential Damages, and Default

7.1 Assignment

This Agreement may be assigned by either Party upon fifteen (15) Business Days prior written notice and opportunity to object by the other Party; provided that:

7.1.1 Either Party may assign this Agreement without the consent of the other Party to (i) any affiliate of the assigning Party with an equal or greater creditworthiness and with the legal authority and operational ability to satisfy the obligations of the assigning Party under this Agreement, provided that the assigning Party promptly notifies the other Party of any such assignment or (ii) to any person or entity succeeding to all or substantially all of the assets of such Party, and whose creditworthiness is equal to or higher than that of such Party;

7.1.2 The Interconnection Customer shall have the right to assign this Agreement, without the consent of GPA, for collateral security purposes to aid in providing financing for the Small Generating Facility, provided that the Interconnection Customer will promptly notify GPA of any such assignment.

7.1.3 Any attempted assignment that violates this Article is void and ineffective. Assignment shall not relieve a Party of its obligations, nor shall a Party's obligations be enlarged, in whole or in part, by reason thereof. An assignee is responsible for meeting the same financial, credit, and insurance obligations as the Interconnection Customer. Where required, consent to assignment will not be unreasonably withheld, conditioned or delayed.

7.2 Limitation of Liability

Each Party's liability to the other Party for any loss, cost, claim, injury, liability, or expense, including reasonable attorney's fees, relating to or arising from any act or omission in its performance of this Agreement, shall be limited to the amount of direct damage actually incurred. In no event shall either Party be liable to the other Party for any indirect, special, consequential, or punitive damages, except as authorized by this Agreement.

7.3 Indemnity

7.3.1 This provision protects each Party from liability incurred to third parties as a result of carrying out the provisions of this Agreement. Liability under this provision is exempt from the general limitations on liability found in Article 7.2.

7.3.2 The Parties shall at all times indemnify, defend, and hold the other Party harmless from, any and all damages, losses, claims, including claims and actions relating to injury to or death of any person or damage to property, demand, suits, recoveries, costs and expenses, court costs, attorney fees, and all other obligations by or to third parties, arising out of or resulting from the other Party's action or failure to meet its obligations under this Agreement on behalf of the indemnifying Party, except in cases of gross negligence or intentional wrongdoing by the indemnified Party.

7.3.3 If an indemnified person is entitled to indemnification under this Article as a result of a claim by a third party, and the indemnifying Party fails, after notice and reasonable opportunity to proceed under this article, to assume the defense of such claim, such indemnified person may at the expense of the indemnifying Party contest, settle or consent to the entry of any judgment with respect to, or pay in full, such claim.

7.3.4 If an indemnifying party is obligated to indemnify and hold any indemnified person harmless under this article, the amount owing to the indemnified person shall be the amount of such indemnified person's actual loss, net of any insurance or other recovery.

7.3.5 Promptly after receipt by an indemnified person of any claim or notice of the commencement of any action or administrative or legal proceeding or investigation as to which the indemnity provided for in this Article may apply, the indemnified person shall notify the indemnifying party of such fact. Any failure of or delay in such notification shall not affect a Party's indemnification obligation unless such failure or delay is materially prejudicial to the indemnifying party.

7.4 Consequential Damages

Other than as expressly provided for in this Agreement, neither Party shall be liable under any provision of this Agreement for any losses, damages, costs or expenses for any special, indirect, incidental, consequential, or punitive damages, including but not limited to loss of profit or revenue, loss of the use of equipment, cost of capital, or cost of temporary equipment or services, whether based in whole or in part in contract, in tort, including negligence, strict liability, or any other theory of liability; provided, however, that damages for which a Party may be liable to the other Party under another agreement will not be considered to be special, indirect, incidental, or consequential damages hereunder.

7.5 Force Majeure

7.5.1 As used in this article, a Force Majeure Event shall mean an event or circumstance which prevents one Party from performing its obligations under this Agreement, which event or circumstance was not anticipated as of the Effective Date, which is not within the reasonable control of, or the result of the negligence of, the Affected Party, and which, by the exercise of due diligence, the Affected Party is unable to overcome or avoid or cause to be avoided. So long as the requirements of the preceding sentence are met, a Force Majeure Event shall include, without limitation, any act of God, labor disturbance, act of the public enemy, war, insurrection, riot, fire, storm or flood, explosion, breakage or accident to machinery or equipment, any order, regulation or restriction imposed by governmental, military or lawfully established civilian authorities, or any other cause beyond a Party's control. A Force Majeure Event does not include an act of negligence or intentional wrongdoing.

7.5.2 If a Force Majeure Event prevents a Party from fulfilling any obligations under this Agreement, the Party affected by the Force Majeure Event (Affected Party) shall promptly notify the other Party, either in writing or via the telephone, of the existence of the Force Majeure Event. The notification must specify in reasonable detail the circumstances of the Force Majeure Event, its expected duration, and the steps that the Affected Party is taking to mitigate the effects of the event on its performance. The Affected Party shall keep the other Party informed on a continuing basis of developments relating to the Force Majeure Event until the event ends. The Affected Party will be entitled to suspend or modify its performance of obligations under this Agreement (other than the obligation to make payments) only to the extent that the effect of the Force Majeure Event cannot be mitigated by the use of Reasonable Efforts. The Affected Party will use Reasonable Efforts to resume its performance as soon as possible.

7.6 Default

7.6.1 No Default shall exist where such failure to discharge an obligation (other than the payment of money) is the result of a Force Majeure Event as defined in this Agreement or the result of an act or omission of the other Party. Upon a Default, the non-defaulting Party may give written notice of such Default to the defaulting Party. Except as provided in Article 7.6.2, the defaulting Party shall have sixty (60) calendar days from receipt of the Default notice within which to cure such Default; provided however, if such Default is not capable of cure within sixty (60) calendar days, the defaulting Party shall commence such cure within twenty (20) calendar days after notice and continuously and diligently complete such cure

within six months from receipt of the Default notice; and, if cured within such time, the Default specified in such notice shall cease to exist.

7.6.2 If a Default is not cured as provided in this article, or if a Default is not capable of being cured within the period provided for herein, the non-defaulting Party shall have the right to terminate this Agreement by written notice at any time until cure occurs, and be relieved of any further obligation hereunder and, whether or not that Party terminates this Agreement, to recover from the defaulting Party all amounts due hereunder, plus all other damages and remedies to which it is entitled at law or in equity. The provisions of this Article will survive termination of this Agreement.

Article 8. [Not Used]

Article 9. Confidentiality

9.1 Confidential Information shall mean any confidential and/or proprietary information provided by one Party to the other Party that is clearly marked or otherwise designated "Confidential." For purposes of this Agreement all design, operating specifications, and metering data provided by the Interconnection Customer shall be deemed Confidential Information regardless of whether it is clearly marked or otherwise designated as such.

9.2 Confidential Information does not include information previously in the public domain, required to be publicly submitted or divulged by Governmental Authorities (after notice to the other Party and after exhausting any opportunity to oppose such publication or release), or necessary to be divulged in an action to enforce this Agreement. Each Party receiving Confidential Information shall hold such information in confidence and shall not disclose it to any third party nor to the public without the prior written authorization from the Party providing that information, except to any permitted disclosee of confidential information pursuant to the Power Purchase Agreement, to fulfill obligations under this Agreement, or to fulfill legal or regulatory requirements.

9.2.1 Each Party shall employ at least the same standard of care to protect Confidential Information obtained from the other Party as it employs to protect its own Confidential Information.

9.2.2 Each Party is entitled to equitable relief, by injunction or otherwise, to enforce its rights under this provision to prevent the release of Confidential Information without bond or proof of damages, and may seek other remedies available at law or in equity for breach of this provision.

9.3 Notwithstanding anything in this Article to the contrary, if during the course of an investigation by a Governmental Authority or otherwise, a Governmental Authority requests information from one of the Parties that is otherwise required to be maintained in confidence pursuant to this Agreement, the Party receiving the request, if required under Applicable Laws and Regulations, shall provide the requested information to the Governmental Authority conducting the investigation, within the time provided for in the request for information. In providing the information, the Party may request that the information be treated as confidential and non-public by the Governmental Authority and that the information be withheld from public disclosure. The Party shall notify the other Party to this Agreement when it is notified by a Governmental Authority that a request to release Confidential Information has been received, at which time either of the Parties may respond before such information would be made public. .

Article 10. Disputes

10.1 The Parties agree to resolve all disputes arising out of this Agreement according to the provisions of the Power Purchase Agreement.

Article 11. Taxes

11.1 The Parties agree to follow all applicable Guam tax laws and regulations.

11.2 Each Party shall cooperate with the other to maintain the other Party's tax status. Nothing in this Agreement is intended to adversely affect the Transmission Provider's tax exempt status with respect to the issuance of bonds including, but not limited to, local furnishing bonds.

Article 12. Miscellaneous

12.1 Governing Law, Regulatory Authority, and Rules

The validity, interpretation and enforcement of this Agreement and each of its provisions shall be governed by the laws of the Territory of Guam (where the Point of Interconnection is located), without regard to its conflicts of law principles. This Agreement is subject to all Applicable Laws and Regulations. Each Party expressly reserves the right to seek changes in, appeal, or otherwise contest any laws, orders, or regulations of a Governmental Authority.

12.2 Amendment

The Parties may amend this Agreement by a written instrument duly executed by both Parties.

12.3 No Third-Party Beneficiaries

This Agreement is not intended to and does not create rights, remedies, or benefits of any character whatsoever in favor of any persons, corporations, associations, or entities other than the Parties, and the obligations herein assumed are solely for the use and benefit of the Parties, their successors in interest and where permitted, their assigns.

12.4 Waiver

12.4.1 The failure of a Party to this Agreement to insist, on any occasion, upon strict performance of any provision of this Agreement will not be considered a waiver of any obligation, right, or duty of, or imposed upon, such Party.

12.4.2 Any waiver at any time by either Party of its rights with respect to this Agreement shall not be deemed a continuing waiver or a waiver with respect to any other failure to comply with any other obligation, right, duty of this Agreement. Termination or default of this Agreement for any reason by the Interconnection Customer shall not constitute a waiver of the Interconnection Customer's legal rights to obtain an interconnection from GPA. Any waiver of this Agreement shall, if requested, be provided in writing.

12.5 Entire Agreement

This Agreement, including all Attachments, constitutes the entire agreement between the Parties with reference to the subject matter hereof, and supersedes all prior and contemporaneous understandings or agreements, oral or written, between the Parties with respect to the subject matter of this Agreement. There are no other agreements, representations, warranties, or covenants which constitute any part of the consideration for or any condition to, either Party's compliance with its obligations under this Agreement.

12.6 Multiple Counterparts

This Agreement may be executed in two or more counterparts, each of which is deemed an original but all constitute one and the same instrument.

12.7 No Partnership

This Agreement shall not be interpreted or construed to create an association, joint venture, agency relationship, or partnership between the Parties or to impose any partnership obligation or partnership liability upon either Party. Neither Party shall have any right, power or authority to enter into any agreement or undertaking for, or act on behalf of, or to act as or be an agent or representative of, or to otherwise bind, the other Party.

12.8 Severability

If any provision or portion of this Agreement shall for any reason be held or adjudged to be invalid or illegal or unenforceable by any court of competent jurisdiction or other Governmental Authority, (1) such portion or provision shall be deemed separate and independent, (2) the Parties shall negotiate in good faith to restore insofar as practicable the benefits to each Party that were affected by such ruling, and (3) the remainder of this Agreement shall remain in full force and effect.

12.9 Security Arrangements

Infrastructure security of electric system equipment and operations and control hardware and software is essential to ensure day-to-day reliability and operational security. Both Parties are expected to meet basic standards for system infrastructure and operational security, including physical, operational, and cyber-security practices.

12.10 Environmental Releases

Each Party shall notify the other Party, first orally and then in writing, of the release of any hazardous substances, any asbestos or lead abatement activities, or any type of remediation activities related to the Small Generating Facility or the Interconnection Facilities, each of which may reasonably be expected to affect the other Party. The notifying Party shall (1) provide the notice as soon as practicable, provided such Party makes a good faith effort to provide the notice no later than twenty-four (24) hours after such Party becomes aware of the occurrence, and (2) promptly furnish to the other Party copies of any publicly available reports filed with any governmental authorities addressing such events.

12.11 Subcontractors

Nothing in this Agreement shall prevent a Party from utilizing the services of any subcontractor as it deems appropriate to perform its obligations under this Agreement; provided, however, that each Party shall require its subcontractors to comply with all applicable terms and conditions of this Agreement in providing such services and each

Party shall remain primarily liable to the other Party for the performance of such subcontractor.

12.11.1 The creation of any subcontract relationship shall not relieve the hiring Party of any of its obligations under this Agreement. The hiring Party shall be fully responsible to the other Party for the acts or omissions of any subcontractor the hiring Party hires as if no subcontract had been made; provided, however, that in no event shall a Party be liable for the actions or inactions of the other Party or its subcontractors with respect to obligations of the first Party under this Agreement. Any applicable obligation imposed by this Agreement upon the hiring Party shall be equally binding upon, and shall be construed as having application to, any subcontractor of such Party.

12.11.2 The obligations under this Article will not be limited in any way by any limitation of subcontractor's insurance.

12.12 Waiver of Sovereign Immunity

To the extent that GPA may in any jurisdiction claim for itself or its assets or revenues immunity from suit, execution, attachment (whether in aid of execution, before judgment or otherwise) or other legal process and to the extent that in any such jurisdiction there may be attributed to GPA or its assets or revenues such immunity (whether or not claimed), GPA agrees not to claim and irrevocably waives such immunity to the full extent permitted by the laws of such jurisdiction.

Article 13. Notices

13.1 General

Unless otherwise provided in this Agreement, any written notice, demand, or request required or authorized in connection with this Agreement ("Notice") shall be deemed properly given if delivered in person, delivered by recognized national currier service, or sent by first class mail, postage prepaid, to the person specified below:

If to the Interconnection Customer:

Interconnection Customer: _____
Attention: _____
Address: _____

18

_____
Physical Address: _____
_____
Phone: _____
Email: _____
Fax: _____

If to the Transmission Provider:

Guam Power Authority
Attention: _____
Address: _____
_____
Physical Address: _____
_____
Phone: _____
Email: _____
Fax: _____

13.2 Billing and Payment

Billings and payments shall be sent to the addresses set out below:

Interconnection Customer:

Interconnection Customer: _____
Attention: _____
Address: _____
_____
Physical Address: _____
_____
Phone: _____
Email: _____
Fax: _____

Transmission Provider:

Guam Power Authority
Attention: _____
Address: _____
_____
Physical Address: _____

	_____
Phone:	_____
Email:	_____
Fax:	_____

13.3 Alternative Forms of Notice

Any notice or request required or permitted to be given by either Party to the other and not required by this Agreement to be given in writing may be so given by telephone, facsimile or e-mail to the telephone numbers and e-mail addresses set out below:

If to the Interconnection Customer:

Interconnection Customer:	_____
Attention:	_____
Address:	_____
	_____
Physical Address:	_____
	_____
Phone:	_____
Email:	_____
Fax:	_____

If to the Transmission Provider:

	Guam Power Authority
Attention:	_____
Address:	_____
	_____
Physical Address:	_____
	_____
Phone:	_____
Email:	_____
Fax:	_____

13.4 Designated Operating Representative

The Parties may also designate operating representatives to conduct the communications which may be necessary or convenient for the administration of this Agreement. This person will also serve as the point of contact with respect to operations and maintenance of the Party's facilities.

Interconnection Customer's Operating Representative:

Interconnection Customer: _____
Attention: _____
Address: _____
_____
Physical Address: _____
_____
Phone: _____
Email: _____
Fax: _____

Transmission Provider's Operating Representative:

Guam Power Authority
Attention: _____
Address: _____
_____
Physical Address: _____
_____
Phone: _____
Email: _____
Fax: _____

With a copy of all notices, including notices of any defaults, sent to legal counsel of the applicable Party, as follows:

Interconnection Customer: _____
Attention: _____
Address: _____
_____
Physical Address: _____
_____
Phone: _____
Email: _____
Fax: _____

13.5 Changes to the Notice Information

Either Party may change this information by giving five Business Days written notice prior to the effective date of the change.

Attachment 1

Glossary of Terms

Applicable Laws and Regulations – All duly promulgated applicable federal, state, territorial and local laws, regulations, rules, ordinances, codes, decrees, judgments, directives, or judicial or administrative orders, permits and other duly authorized actions of any Governmental Authority.

Business Day – Any day except a Saturday, Sunday, a Federal Reserve Bank holiday or an official Guam holiday. A Business Day shall open at 8:00 a.m. and close at 5:00 p.m. local time for the relevant Party's principal place of business.

Default – The failure of a breaching Party to cure its breach under this Agreement, within the time periods provided in Section 7.6 hereof.

Effective Date -- The date first set forth in the preamble hereto.

Good Utility Practice – Any of the practices, methods and acts engaged in or approved by a significant portion of the electric utility industry during the relevant time period, or any of the practices, methods and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at the lowest reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method, or act to the exclusion of all others, but rather to be generally acceptable and consistently adhered to acceptable practices, methods, or acts.

Governmental Authority – Any federal, territorial or local governmental body; any governmental, quasi-governmental, regulatory or administrative agency, commission, body or other authority exercising or entitled to exercise any administrative, executive, judicial, legislative, policy, regulatory or taxing authority or power; or any court or governmental tribunal.

IEEE Standards - The standards of the Institute of Electrical and Electronics Engineers (IEEE), or its IEEE Standards Association (IEEE-SA), in effect as of the Effective Date.

Interconnection Customer – Any entity, including the Transmission Provider, the Transmission Customer or any of the affiliates or subsidiaries of either, that proposes to interconnect its Small Generating Facility with the Transmission System.

Interconnection Facilities – The Interconnection Facilities include all facilities and equipment between the Small Generating Facility and the Piti and Apra Heights Substations, including any required modification, additions or upgrades related to Interconnection that are necessary to physically and electrically interconnect the Small Generating Facility to such facilities. The Interconnection Facilities are described in more detail in Attachment 2 and Attachment 3 hereto.

Network Upgrades – Additions, modifications, and upgrades to the Transmission System required for steady state system stability to accommodate the interconnection, at the Point of Interconnection, of the Interconnection Customer's facility with the Interconnection Facilities.

Operating Requirements – Any operating and technical requirements that may be applicable and are set forth in the Power Purchase Agreement or in this Interconnection Agreement, including Attachment 5 hereto.

Party or Parties – The Transmission Provider, Interconnection Customer or any combination of the above.

Point of Interconnection – The point at the Small Generating Facility site (_____)where the Small Generating Facility connects with the Interconnection Facilities, as shown in Attachment 3.

Reasonable Efforts – With respect to an action required to be attempted or taken by a Party under the Interconnection Agreement, efforts that are timely and consistent with Good Utility Practice and are otherwise substantially equivalent to those a Party would use to protect its own interests.

Small Generating Facility – The Interconnection Customer's device for the production of electricity, but shall not include the Interconnection Facilities.

Power Purchase Agreement - (i) The Renewable Energy Purchase Agreement for the sale by Interconnection Customer and the purchase by GPA of renewable solar energy from the Small Generating Facility, dated as of _____, 201___.

System Stability Upgrades – Additions, modifications, and upgrades to the Transmission System, System Operational Characteristics or Small Generating Facility required for power system recovery as a result of faults or loss of generation events, which are not considered as Network Upgrades.

Tariff – The Transmission Provider's tariff through which open access transmission service and interconnection services are offered and as amended or supplemented from time to time, or any successor tariff.

Transmission Provider – As defined in the preamble hereto.

Transmission System – The facilities owned, controlled or operated by the Transmission Provider that connect to the Interconnection Facilities and are used to provide transmission service under the Tariff.

Attachment 2

Description of the Small Generating Facility, Interconnection Facilities and Metering Equipment

Equipment, including the Small Generating Facility, Interconnection Facilities, and metering equipment shall be itemized and identified as being owned by the Interconnection Customer or by GPA.

Interconnection Facilities:

The Interconnection Facilities and the capped amounts with respect thereto (beyond which GPA will reimburse Interconnection Customer as set forth in this Agreement) include the following:

Description of work for the Substation:

A. Interconnection Customer is responsible for the design and construction of additions at the existing _____ Piti and Apra Heights Substations. Interconnection Customer shall procure and install Facility Hardware in accordance with applicable codes and standards; plans and specifications. Interconnection Customer shall test and commission the augmented substation to provide for a complete, functional, and operational _____ modification of Piti and Apra Heights Substations. Interconnection Customer shall be responsible for the following:

    1. Development of detailed engineering and physical arrangement for the new additions at the Piti 115 kV Substation and 115 & 34.5kV for Apra Heights Substation. including, but not limited to:

        a. At Piti Substation Interconnection Customer will use the existing spare 115kV switchgear and will connect one circuit (AAAC 927MCM) to it which will come from Apra Heights Substation

        b. At Apra Heights Substation one circuit (AAAC 927MCM) will come in from Malojloj Substation and will connected to the Substation.

        c. Interconnection Customer will provide a 50MVA transformer according to the SIS report which will be installed with switchgear at Apra Heights Substation

        d. In case GPA requires a higher capacity transformer (i.e. 60MVA) due to GPA's grid condition, Interconnection Customer will provide such required transformer on the basis that GPA will provide the cost difference between the 50MVA capacity and the new capacity

2. Civil and foundation design for substation new Equipment and related modification of Existing facility. Supply and installation of structural steel to support new equipment, as required, and anchor bolts for all new equipment. Structural steel will be hot dip galvanized. For foundation design, geotechnical data of Piti and Apra Heights Substations area shall be provided by GPA if available.

3. Circuit and Raceway design for all 34.5 and 115 kV new equipment and related modification of Existing facility in accordance with applicable codes and standards and specifications.

4. Circuit and Raceway list.

5. Interconnection Customer shall prepare an energization and start-up plan and submit to GPA for approval. GPA shall provide input within 10 business days.

6. Exclusion: The Interconnection Customer's work does not include the upgrade of Existing facility's infrastructures such as software version upgrade, utility system, storm & waste water drainage system, security system, external lighting, spare part storage, landscaping and etc.; unless Interconnection Customer's work detrimentally affects function of existing facility. If so, then Interconnection Customer shall take the necessary measures to correct deficiencies.

   For modification of Existing substations, Interconnection customer is only responsible for new equipment and directly-related modification work to have equipment functional that it will provide according to this Agreement.

Description of work for the Malojloj _____ Substation:

A. Interconnection Customer is responsible for the design and construction new _____ Substation. Interconnection Customer shall procure and install Facility Hardware in accordance with applicable codes and standards and specifications. Interconnection Customer shall test and commission the substation to provide for a complete, functional, and operational _____ Substation. Interconnection Customer shall be responsible for the following:

B. GPA shall be involved in the review, inspection, testing and approval processes throughout the design, construction and commissioning, as described herein.

C. GPA reserves the right to witness standard factory testing of Malojloj Substation switchgear, relay and control panel, and similar equipment supplied as spare parts. Not less than 30 days prior to factory tests, a factory test plan shall be submitted to the Owner and GPA for approval. Each item of electrical equipment and similar equipment supplied as spare parts shall be given the manufacturer's routine factory tests and also other tests as specified, to ensure successful operation of parts of the assemblies. The factory test

equipment and the test methods used shall conform to the applicable requirements of ANSI, IEEE, UL and NEMA standards and equivalent standards as approved by GPA. Five certified copies of the reports of production tests, including complete test data shall be submitted to the Owner and GPA. Factory tests shall be witnessed by the Owner and GPA, at the discretion of the Owner and GPA. Interconnection Customer shall be responsible for cost of travel, meals, and accommodations for two (2) GPA personnel for a minimum of three (3) days, or days, required to perform and witness a comprehensive factory acceptance testing.

D. Each Plant will generate and feed a maximum output of 22.5MW to the grid directly and the remaining generated power; which could be a maximum 7.5MW for each Plant will be charged during day time into the ESS and will be discharged during night time. So the total maximum output of the two power Plants is 45 MW and the maximum charging amount is 15MW. One 50MVA Step-up transformer which specification will follow the Harmon substation's 115/34.5kV transformer specification will be installed with switchgear.

E. Description of work for the Malojloj __Substation:

1. The new _____ Substation will be housed in a concrete building. The metering switchgear proposed for the Malojloj Substation, which would be directly adjacent to the Small Generating Facility and on Interconnection Customer's property, include one meter for each project (A), (B) for Power Purchase Agreement billing purposes, and would be a unit that is rated for 34,500 volts and up to 1200 amps of power along with associated auxiliaries. A meter shall also be provided on the 115 kV of the step-up power transformer. The unit would provide protective-type circuit breakers for a currently planned 60MW solar system.

2. The Work under these plans and specifications shall include complete engineering, procurement, and construction services for the 34.5 and 115 kV substation equipment associated with the Project. The Project substation, otherwise known as the Malojloj Substation, shall include 38 kV class switchgear draw-out type breaker assembly of metal-clad vacuum circuit breakers, enclosed in a walk-in concrete structure in area that collects the solar generated ac power at 34.5 kV from the solar array field and 34.5/115 kV Step-Up Transformer with 115kV class SF6 Gas Circuit Breaker (GCB) with associated disconnect switches. .

3. The Interconnection Customer is responsible for the selection, procurement, and installation of all _____ Substation equipment. This equipment shall be GPA approved equipment and conform with GPA current specifications, unless otherwise noted and approved in writing by GPA.

4. The Work required shall consist of:

a. AC collection switchgear, relaying, and metering.

b. The specific technical scope of work under these specifications includes the 38 kV class switchgear, 38 kV class vacuum breakers, one (1) 34.5/115 kV Step-Up Transformer and one (1) 115kV class SF6 Gas Circuit Breaker.

c. Relays, metering, current transformers, and voltage or potential transformers.

d. Surge arresters, cables, and raceways.

e. Grounding and lightning protection.

f. Breaker controls.

g. SCADA system including SCADA Remoter Terminal Unit (RTU).

h. Battery bank and battery bank charger.

i. Station service pad mount transformer including AC panels, DC panels, control wiring, and all other appurtenances for a complete and operational facility in accordance with GPA standards.

j. All of the new facilities shall be Interconnection Customer furnished and installed except as noted herein.

5. The Point of Interconnection is located at the designated 115 kV side of the step-up power transformer with associated metering equipment at the Malojloj Substation at the 34.5 kV level. Interconnection Customer shall provide the substation revenue meter and associated current and potential transformers. The revenue meter shall be a Schweitzer Engineering Laboratories SEL-735 or equivalent. The current and potential transformers shall have 0.2 percent accuracy or better. Current transformers shall be window type. The Interconnection Customer is responsible for the installation of these devices.

6. All necessary mounting materials such as weatherproof enclosures, terminal blocks, shorting current transformer blocks, conduit, etc. shall be provided.

7. Interconnection Customer shall prepare an energization and start-up plan and submit to Owner and GPA for approval 30 days prior to energization. GPA shall provide input within 10 business days.

Description of work for the transmission line from Substation to Substation:

A. Interconnection Customer is responsible for the design and construction of one (1) 115 kV overhead transmission line between Malojloj Substation and Apra Heights Substation.

Interconnection Customer plans to install new steel poles for this 115 kV circuit from Malojloj Substation to Apra Heights Substation along one side of road.

B. Interconnection Customer is responsible for the design and construction of one (1) 115 kV overhead transmission line using existing 115kV steel pole between Apra Heights Substation and Piti Substation along the one side of road. Interconnection Customer is responsible for the modification of existing two (2) 34.5 kV & one (1) 13.8 kV circuits. After the modification each pole will have a one 115kV circuit, two 34.5kV circuits and one 13.8kV circuit configuration

C. The Work includes the complete construction of a 115 kV overhead transmission line from the Malojloj Substation to Piti Substation via Apra Heights Substation in accordance with the applicable codes, standards and specifications.

D. Installation of fiber optic communication lines from Dandan Substation to Apra to Piti 115 kV Substation and associated hardware.

E. Transmission lines shall be 3#927 kcmil AAAC conductors. If required, underground cable for 34.5 kV line shall be two sets 3#1000 kcmil XLPE Al. conductors. 13.8 kV overhead lines shall be 3#336.4 kcmil Al.

F. GPA reserves the right to witness standard factory testing of the power circuit breakers and Apra Heights 50 MVA power transformer, relay and control panel, and similar equipment supplied as spare parts. Not less than 30 days prior to factory tests, a factory test plan shall be submitted to the Owner and GPA for approval. Each item of electrical equipment and similar equipment supplied as spare parts shall be given the manufacturer's routine factory tests and also other tests as specified, to ensure successful operation of parts of the assemblies. The factory test equipment and the test methods used shall conform to the applicable requirements of ANSI, IEEE, UL and NEMA standards and equivalent standards as approved by GPA. Five certified copies of the reports of production tests, including complete test data shall be submitted to the Owner and GPA. Factory tests shall be witnessed by the Owner and GPA, at the discretion of the Owner and GPA. Interconnection Customer shall be responsible for cost of travel, meals, and accommodations for two (2) GPA personnel for a minimum of three (3) days, or days, required to perform and witness a comprehensive factory acceptance testing. Per diem rates shall conform with Federal GSA Schedule.

G. Interconnection Customer will replace one wooden pole with a steel pole as stated in Attachment 2 clause A. The wooden pole is located on the Apra Heights Substation-Piti Substation route at the branch into Tenjo substation. Interconnection Customer’s responsibility will be limited to replacing the wooden pole with the same circuit configuration. In the case that GPA requires additional configuration circuit changes, then GPA will provide the direct cost differences that may arise from the additional configuration changes.

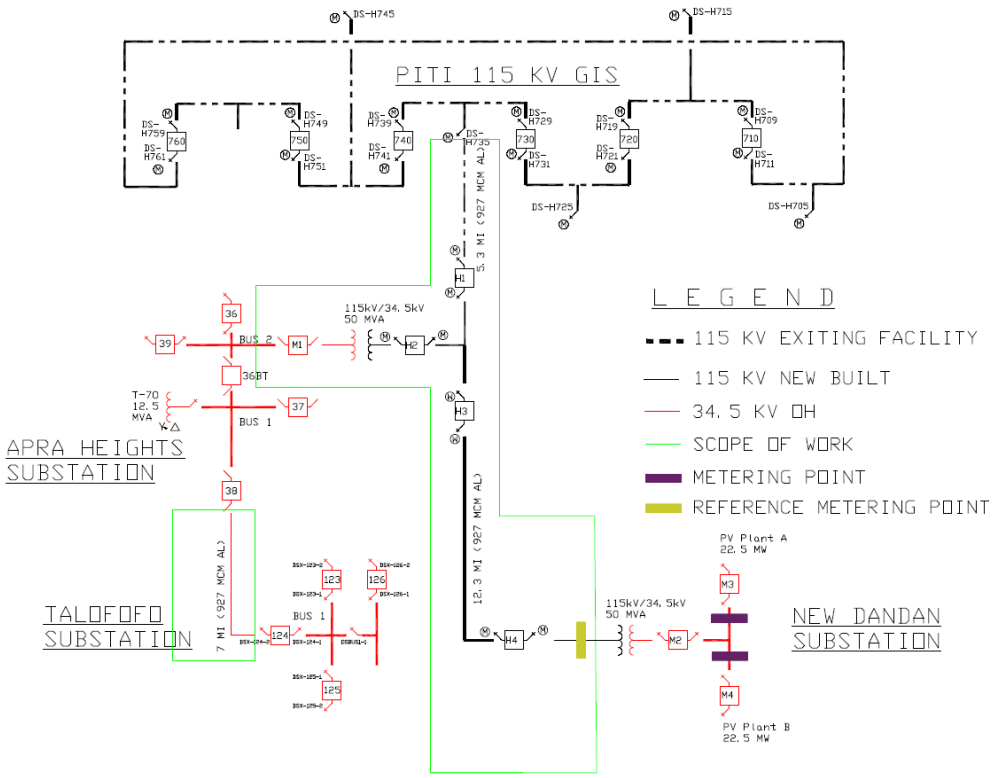
Spare Parts:

The Interconnection Customer shall provide the following spare parts with proper storage;

a. For each equipment supplied, the manufacturer's recommended spare parts shall be provided in accordance with best utility practices.
b. Underground Wire: the length of the longest cable run shall be provided (1000 kcmil XLPE Al. or other approved cable size), if required.
c. Underground Splices/Termination Kits: 10% of total installed, if required.
d. Overhead Transmission Line: Steel pole shall be provided one (1) set per pole type. Spare of 115kV overhead cable is not provided, because Interconnection Customer will follow the GPA's cable standard specification.
e. Non-standard/inventory materials: Provide replacement or replacement parts.

Small Generating Facility:

The general location of the Small Generating Facility and the Malojloj Substation are noted on the attached picture. The facility is planned to be installed at the locations of Lot B-3REM14, B-3REM-R14 and B-3-R4. The Small Generating Facility will be an approximately 60 MW AC fixed tilt solar and 40MW/usable 65MWh Energy Storage System (ESS) for Ramp-rate control generating facility. The Small Generating Facility will be equipped with high efficiency solar panels generating direct current that will be converted to alternating current (AC) using approximately 2,500 to 3,000kW inverters manufactured by SMA or equivalent type. Inverter will generate approximately 60MW AC power that will be transformed by LV side of 550V to 655V to MV side of 34.5kV transformers located in close proximity to the inverter. And also, these approximately 60MW solar generators are connected with Renewable Integrated ESS which is located in ESS building. The ESS consist of approximately 40MWPCS and usable 65MWh Batteries. The PCS will generate V AC power that will be transformed by LV side of 434V to 550VV to MV side of 34.5kV transformers located in close proximity to the PCS. The onsite underground constructed 34.5kV collection grid will bring the 1% ramp rate controlled approximately 60MW solar generated electricity to the Malojloj Substation to be located on the site of the Small Generating Facility, where GPA will accept the metered power under the Power Purchase Agreements.



Addendum to Attachment 2 -- Project Site Picture

Project layout is subject to change as a result of archeological findings, wetlands or any other survey results

Attachment 3

One-line Diagram Depicting the Small Generating Facility, Interconnection Facilities and Metering Equipment

Provide meter at the 115 kV side of the step-up power transformer at Malojloj Substation.

Attachment 4

Milestones

In-Service Date: _____

Critical milestones and responsibility as agreed to by the Parties:

	Milestone/Date	Responsible Party
(1)	Preliminary design for Interconnection Facilities (_____/__/20_____)	Interconnection Customer
(2)	GPA approval of design basis (_____/__/20____)	GPA
(3)	Interconnection Customer to have all permits in hand for Interconnection Customer construction to start on public roads (supported by GPA engineering) (_____/__/20_____)	Interconnection Customer
(4)	Construction completion (18 month after permits are in hand)	Interconnection Customer

Agreed to by:

For the GPA (If Applicable) _____ Date_____

For the Interconnection Customer_____ Date_____

1

Attachment 5

Additional Operating Requirements for the Transmission Provider's Transmission System Needed to Accept the Interconnection Customer

The following requirements must be met by the Interconnection Customer prior to initiating parallel operation with the Transmission Provider's Transmission System:

If ramp rate is greater than 3 MW/minute and this situation lasts more than ten (10) times per day or five (5) consecutive times per day, seller shall reduce plant output to meet ramp rate is less than 3 MW/minute. If system issues remain, GPA reserves the right to restrict Seller's plant output until seller restores operation with a ramp rate less than 3 MW/minute.

(a) GPA counts the failure power is greater than 3 MW/minute.

i. If the number of failure is greater than ten (10) times per day or five (5) consecutive times per day, GPA SCADA sends the warning command to seller's EMS/PMS or inform via email.

ii. Seller's EMS/PMS double check the number of failure times, and send back to GPA SCADA to verify the exact number of failure times.

iii. Seller sends the restore documentation included analysis the data, how to fix, fix plan and expected results to GPA for confirming.

iv. When seller restores operation with a ramp rate less than 3MW/minute for full renewable power (60 MW), than seller send the restore result documentation to GPA.

v. GPA reviews the restore result documentation and allows to operate full (60MW) power of seller's renewable plant.

(b) If GPA's ESS or UFLS is activated twice during a single day, then GPA reserves the right to restrict Sellers's plant output until Seller restores operation with a ramp rate less than 3 MW/minute.

The Interconnection Customer is interconnecting into an established GPA power grid. The Interconnection Customer shall design, construct, and operate its facilities to ensure compatible operations with GPA and protect its facilities against any grid events. These measures shall comply with inverter ride-through and/or ramping requirements as stated in the System Impact Study.

The Interconnection Customer shall be responsible for the following project:

Transmission relay upgrade to line differential relays:

This project will replace existing line and overcurrent relays for 20 existing transmission lines with primary and backup SEL-311L line differential relays. Two each SEL-311L line differential relays will be installed (primary and backup) at each substation associated with a transmission line. Hence, 4 each SEL311L for each transmission line for a total of eighty (80) SEL311L relays shall be installed. The Interconnection Customer shall be responsible for materials, labor, and equipment. GPA will provide technical support in the setting of relays.

The Interconnection Customer's obligation shall be limited to provision of labor, equipment and materials at its cost up to $900,000 only in connection with differential relay replacement project for the System Stability Upgrades.

GPA shall provide the Interconnection Customer with detailed written instructions for quantity and quality of labor, equipment and materials for the differential relay replacement project prior to April 30, 2018 and the scope of work for provision of labor, equipment and materials for the differential relay replacement project shall be mutually agreed by the Interconnection Customer and GPA.

Interconnection Customer shall make best efforts in completing the Transmission Relay Upgrade prior to COD. However, GPA will not unreasonably withhold COD if the Transmission Relay Upgrade is not completed as long as Interconnection Customer complies with all other requirements for COD.

For the implementation Interconnection Customer shall provide to GPA intended construction schedule and construction method and GPA shall provide a response to these items within one (1) week. GPA shall provide Right of Access, Power shut down and all necessary matters so that Interconnection Customer can replace the existing relays at the predetermined date which was agreed on between Interconnection Customer and GPA. If due to GPA's fault the Transmission Relay Upgrade implementation is delayed beyond the intended COD of the Small Generating Facility, Interconnection Customer should be only responsible for the remaining cost up to the cap as defined in 4.2 and shall not be responsible for implementing the remaining Transmission Relay Upgrade.

Upon completion of the differential relay replacement project for the System Stability Upgrades, ownership of all assets in relation to the differential relay replacement project for System Stability Upgrades and all rights thereof shall be transferred to the GPA.

Attachment 6

[Not Used]

Attachment 7

Bill of Sale

THIS BILL OF SALE (this "Bill of Sale") is made and entered into by _____ ("Seller"), and Guam Power Authority ("Buyer", and together with Seller, the "Parties"), effective as of [_____], 20__.

RECITALS

WHEREAS, Seller in connection with the development, construction and ownership of a solar power generating station and related assets located in the Territory of Guam (the "Project") has designed, developed and constructed, and owns, certain transmission, switching and related assets described more fully on Exhibit "A" hereto, together with all ancillary rights and interests (including all manufacturers' and contractors' warranties) relating thereto and further described on Exhibit "A" hereto (the "Assets"); and

WHEREAS, Seller and Buyer entered into a Renewable Energy Purchase Agreement dated as of _____, 201____, pursuant to which Seller and Buyer have agreed to sell and purchase renewable energy generated by the Project (the "Seller Purchase Agreement"), Purchase Agreement, the "Purchase Agreement") and Seller and Buyer entered into an Small Generator Interconnection Agreement dated as of _____, 201___, pursuant to which Seller and Buyer have agreed to the installation and interconnection of the Project with Buyer's transmission system (the "SGIA"); and

WHEREAS, as contemplated by the SGIA, and in connection with the operation of the Project by Seller and the purchase and sale of renewable energy pursuant to the Purchase Agreement, Seller desires to transfer and Buyer desires to receive the Assets.

NOW, THEREFORE, BE IT KNOWN THAT:

1. Conveyance and Assignment. For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Seller does hereby **GRANT, BARGAIN, ASSIGN, TRANSFER, SET OVER, DELIVER AND CONVEY** to Buyer all of Seller's right, title and interest in and to the Assets, **TO HAVE AND TO HOLD** the Assets by Buyer and its successors and permitted assigns, forever.

2. **NO WARRANTY. THE ASSETS ARE HEREBY CONVEYED AS IS, WHERE IS, AND SELLER HEREBY GIVES NO WARRANTY OF DESIGN, MATERIALS, WORKMANSHIP OR PERFORMANCE OF THE ASSETS, EITHER EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.** However, Seller covenants and agrees that the manufacturers' and contractors' warranties transferred hereby as part of the Assets shall extend for a period of at least one (1) year from the acceptance of the Assets by Seller.

3. Further Assurances. Seller for itself, its successors and assigns, hereby covenants and agrees that, at any time and from time to time upon the written request of Buyer, Seller will do, execute, acknowledge and deliver or cause to be done, executed, acknowledged and delivered, such further acts, deeds, assignments, transfers, conveyances, powers of attorney and assurances as may be reasonably required in order to assign, transfer, set over, convey, assure and confirm unto and vest in Buyer, its successors and assigns, title to the assets sold, conveyed and transferred by this Bill of Sale.

4. Counterparts. This Bill of Sale may be executed in counterparts.

5. Governing Law. This Bill of Sale shall be governed by and construed in and interpreted in accordance with the laws of the Territory of Guam.

[Signature page follows.]

IN WITNESS WHEREOF, the Parties have executed this Bill of Sale as of the date above first written.

RENEWABLE ENERGY
PURCHASE AGREEMENT
BETWEEN
GUAM POWER AUTHORITY
AND
[HANWHA ENERGY CORPORATION][2]

THIS RENEWABLE ENERGY PURCHASE AGREEMENT (the "Agreement"), effective as of last date set forth on the signature page hereto (the "Effective Date"), is entered into by and between and Guam Power Authority, ("GPA" or "Buyer") and [Hanwha Energy Corporation] [3], a _____ ("Seller"). The purpose of this Agreement is to establish the terms and conditions under which Seller shall sell and GPA shall purchase Renewable Energy and associated Renewable Energy Credits, as defined herein. In this Agreement, Seller and GPA may be individually referred to as a "Party" or collectively as "Parties."

Recitals

WHEREAS, Seller desires to sell to GPA at the Delivery Point a portion of the Renewable Energy and associated RECs from the Facility and GPA desires to buy the same from the Seller at the Delivery Point.

WHEREAS, on the date hereof, Seller and GPA have entered into a Renewable Energy Purchase Agreement as to the remaining capacity of the Facility (the "Additional PPA").

Therefore, for good and valuable consideration, including, without limitation, the covenants and agreements of the Parties contained in this Agreement, the receipt and sufficiency of which consideration is acknowledged, the Parties agree as follows:

ARTICLE ONE: DEFINITIONS

The following definitions apply to this Agreement:

1.1 "Actual Renewable Energy" means the actual output of the Facility (expressed in MWhs), measured at the Delivery Point, including all Renewable Energy and all Stored Energy, over any Production Measurement Period. Actual Renewable Energy shall be measured by the Seller Metering Equipment, and adjusted as applicable in accordance with Section 7.4.

1.2 "Affiliate" means, with respect to any party, any other party (other than an individual) that, directly or indirectly, through one or more intermediaries, controls, or is controlled by, or is under common control with, such party. For this purpose, "control" means the direct or indirect ownership of fifty percent (50%) or more of the outstanding capital stock or other equity interests having ordinary voting power.

1.3 "Annual Facility Test" has the meaning set forth in Section 4.9.

1.4 "Annual Microgrid Payment" means, as to each Contract Year, the amount set forth in Appendix A.

1.5 "Appraisal Price" means the average of three (3) appraisals of the market value of the Facility at the end of the Delivery Term, delivered by three (3) independent appraisers qualified by experience and expertise to

[2] Please note that it is expected that Hanwha Energy Corporation will establish a special-purpose entity to execute the PPA

[3] Please note that it is expected that Hanwha Energy Corporation will establish a special-purpose entity to execute the PPA

determine the arm's length market value of the Facility. If the Parties do not agree on the independent appraisers then they shall be determined by arbitration in accordance with Section 12.9.

1.6 "Bankrupt" means with respect to any entity, such entity (i) files a petition or otherwise commences, authorizes or acquiesces in the commencement of a proceeding or cause of action under any bankruptcy, insolvency, reorganization or similar law, or has any such valid petition filed or commenced against it, (ii) makes an assignment or any general arrangement for the benefit of creditors, (iii) otherwise becomes bankrupt or insolvent (however evidenced), (iv) has a liquidator, administrator, receiver, trustee, conservator or similar official appointed with respect to it or any substantial portion of its property or assets, or (v) is generally unable to pay its debts as they fall due.

1.7 "Bid Security" or "Bid Bond" means the $150,000.00, which is the amount of the security provided by Seller in connection with its initial bid to GPA for the Project.

1.8 "Business Day" means any day except a Saturday, Sunday, a Federal Reserve Bank holiday or an official Guam holiday. A Business Day shall open at 8:00 a.m. and close at 5:00 p.m. local time for the relevant Party's principal place of business. The relevant Party, in each instance unless otherwise specified, shall be the Party by whom the Notice or payment or delivery is to be received.

1.9 "Buyout Payment" means, with respect to Seller's election not to re-build the Facility pursuant to Section 12.2, an amount equal to: Minimum Production x the number of Contract Years (or portion thereof) remaining in the Delivery Period x Incremental Price

1.10 "Change Event" has the meaning set forth in Section 4.16(c).

1.11 "Charging Energy" means Renewable Energy generated by the Facility and used to charge the Microgrid Unit as contemplated in Appendix C.

1.12 "Claiming Party" has the meaning set forth in Section 4.9.

1.13 "Claims" means all claims or actions, threatened or filed and, whether groundless, false, fraudulent or otherwise, that directly or indirectly relate to the subject matter of an indemnity, and the resulting losses, damages, expenses, attorneys' fees and court costs, whether incurred by settlement or otherwise.

1.14 "COD Extension" has the meaning set forth in Section 4.2(a).

1.15 "COD Extension Payment" has the meaning set forth in Section 4.2(a).

1.16 "Commercially Reasonable" or "Commercially Reasonable Efforts" means, with respect to any purchase, sale, decision, or other action made, attempted or taken by a Party, such efforts as a reasonably prudent business would undertake for the protection of its own interest under the conditions affecting such purchase, sale, decision or other action, consistent with Good Utility Practices, including, without limitation, electric system reliability and stability or other regulatory mandates relating to renewable energy portfolio requirements, the cost of such action (including whether such cost is reasonable), the amount of notice of the need to take a particular action, the duration and type of purchase or sale or other action, and the commercial environment in which such purchase, sale, decision or other action occurs. "Commercially Reasonable" or "Commercially Reasonable Efforts" shall be reviewed and determined based upon the facts and circumstances known, or which could have been known with the exercise of reasonable efforts, at the time that a sale, purchase, or other action is taken and shall not be based upon a retroactive review of what would have been optimal at such time.

1.17 "Commercial Operation" has the meaning set forth in Section 4.1.

1.18 "Commercial Operation Date" or "COD" means the date that Commercial Operation of the Project has been achieved in accordance with Section 4.1.

1.19 "Confidential Information" means all information, whether written or oral, that is disclosed or otherwise available in connection with this Agreement or the performance by either Party of any of its duties hereunder, except any information which: (i) at the time of disclosure or thereafter is generally available to the public (other than as a result of a disclosure by any Party in violation of this Agreement); (ii) was available to any Party on a non-confidential basis from a source other than the Party hereto providing the Confidential Information, provided that such source is not bound by a confidentiality agreement that protected the Confidential Information; or (iii) has been independently acquired or developed by any Party without violating any of its obligations under this Agreement.

1.20 "Contract Price" means the price in U.S. Dollars (unless otherwise provided for) rounded to the nearest $0.01, to be paid by GPA to Seller for the purchase of the Renewable Energy, as described in Appendix A.

1.21 "Contract Year" means the annual period, beginning on the Commercial Operation Date, and renewing thereafter on each anniversary of the Commercial Operation Date.

1.22 "Conventional Energy Resource" is an energy resource that is non-renewable in nature, such as natural gas, coal, oil, and uranium, or electricity that is produced with energy resources that are not Renewable Energy resources.

1.23 "Credit Rating" means, with respect to any entity, the rating then assigned to such entity's unsecured, senior long-term debt obligations (not supported by third party credit enhancements) or if such entity does not have a rating for its senior unsecured long-term debt, then the rating then assigned to such entity as an issuer rating by S&P, Moody's or any other rating agency agreed by the Parties.

1.24 "Cure Plan" has the meaning set forth in Section 4.7.

1.25 "Daily Delay Liquidated Damages" has the meaning set forth in Section 4.2(b).

1.26 "Defaulting Party" has the meaning set forth in Section 6.1.

1.27 "Deficiency Amount" has the meaning set forth in Section 4.8

1.28 "Delivery Period" means the period of delivery under this Agreement, commencing on the Commercial Operation Date and continuing for the Term, as such period may be extended in accordance with this Agreement.

1.29 "Delivery Point" means the point at which the Renewable Energy (including Stored Energy) will be delivered and received, as specified in Section 2.1 herein, or such other delivery point as may be agreed to by the Parties in writing.

1.30 "Development Security" means the security deposit during construction of the renewable project or facility prior to Commercial Operation Date. The Development Security shall be 50% of the total projected payment for the 1st contract year based on the contractor's 1st Contract Year energy rate and the guaranteed energy production. Refer to Section 9.1 for additional requirements.

1.31 "Dispatch Down" means any curtailment is initiated by GPA for reasons other than Force Majeure or Seller Event of Default.

1.32 "Early Termination Date" has the meaning set forth in Section 6.2.

1.33 "Effective Date" means the date first set forth above.

1.34 "Eligible Renewable Energy Resources" are applications of the following defined technologies that displace Conventional Energy Resources that would otherwise be used to provide electricity to GPA's customers: biogas electricity generator, biomass electricity generator, fuel cell that use only renewable fuels, geothermal

generator, hybrid wind and solar electric generator, landfill gas generator, solar electricity resources, wind generator and such other generally accepted renewable energy resources.

1.35 "Emergency" means any abnormal interconnection or system condition (including, without limitation, equipment or transmission limitations and constraints caused by thermal limits, stability, voltage, or loop flows) that Buyer determines in accordance with Good Utility Practices): (a) requires automatic or immediate manual operation to prevent or limit loss of Buyer's system or generation supply; (b) could adversely affect the reliability of the Buyer system or generation supply; (c) could adversely affect the reliability of any interconnected electric system; or (d) could otherwise pose a threat to public safety.

1.36 "End Date" has the meaning given in Section 12.1(b).

1.37 "Environmental Attributes" means environmental characteristics that are attributable to Renewable Energy, including credits; credits towards achieving local, national or international renewable portfolio standards; green tags; Renewable Energy Credits; greenhouse gas or emissions reductions, credits, offsets, allowances or benefits; actual SO2, NOx, CO2, CO, Carbon, VOC, PM_{10}, mercury, and other emissions avoided; and any and all other green energy or other environmental benefits associated with the generation of Renewable Energy (regardless of how any present or future law or regulation attributes or allocates such characteristics). Such Environmental Attributes shall be expressed in kWh or, as applicable in the case of emissions credits, in tonne equivalent or other allowance measurement. Environmental Attributes does not include Tax Benefits, or any energy, capacity, reliability, or other power attributes used by Seller to provide electricity services.

1.38 "EPC Contractor" means the contractor(s) under the engineering, procurement and construction contract for the Project.

1.39 "Equitable Defenses" means any bankruptcy, insolvency, reorganization and other laws affecting creditors' rights generally, and with regard to equitable remedies, the discretion of the court before which proceedings to obtain same may be pending.

1.40 "Event of Default" has the meaning set forth in Section 6.1.

1.41 "Excused Hours" means the hours in the applicable Production Measurement Period (i) in which Seller has declared Force Majeure, (ii) during any Planned Outage or Forced Outage but subject to an aggregate maximum of six hours per Contract Year; (ii) in which Seller has initiated a Dispatch Down or (iii) in which Seller's delivery to GPA of Renewable Energy is adversely affected as a result of failure by GPA to perform its obligations under this Agreement or the Interconnection Agreement or in which GPA does not accept delivery of Renewable Energy for any reason.

1.42 "Facility" means all of the following: the Project, as defined in Section 2.1 of this Agreement, the purpose of which is to produce Renewable Energy including the Microgrid Unit, Seller's Interconnection Facilities and all equipment and other tangible assets, land rights and contract rights reasonably necessary for the construction, operation, and maintenance of the electric generating facility that produces the Renewable Energy being sold under this Agreement.

1.43 "Facility Capacity" has the meaning set forth in Section 2.1.

1.44 "Facility Test" has the meaning set forth in Section 4.1(e).

1.45 "Facility Debt" means the obligations of Seller or its Affiliates to any Facility lender, tax equity investor or other financing party pursuant to the Financing Documents, including without limitation, principal of, premium and interest on indebtedness, reimbursement obligations regarding letters of credit, obligations under financing leases, fees, expenses or penalties, amounts due upon acceleration, prepayment or restructuring, swap or interest rate hedging obligations and breakage costs and any claims or interest due with respect to any of the foregoing. Facility Debt does not include trade debt or obligations incurred in the ordinary course of business.

1.46 "FERC" means the Federal Energy Regulatory Commission or any successor government agency.

1.47 “Financing Documents” means the loan and credit agreements, notes, bonds, indentures, security agreements, lease financing agreements, mortgages, deeds of trust, interest rate exchanges, swap agreements and other documents relating to the development, bridge, construction and/or permanent debt financing or a tax equity investment for the Facility (including any portfolio debt financing of which the Facility is included), including any credit enhancement, credit support, working capital financing, or refinancing documents, and any and all amendments, modifications, or supplements to the foregoing that may be entered into from time to time at the discretion of Seller and/or its Affiliates in connection with development, construction, ownership, leasing, operation or maintenance of the Facility.

1.48 “Forced Outage” means the shutdown or unavailability of the Facility, or a portion thereof other than as a Planned Outage, for reasons including, but not limited to, unanticipated equipment breakdown, human error, or Emergency conditions. A Forced Outage shall not include any Outage that may be deferred consistent with Good Utility Practices and without causing safety risk damage to equipment or additional costs.

1.49 “Forced Outage Notice” has the meaning set forth in Section 4.12(b).

1.50 Force Majeure” means an event or circumstance which prevents one Party from performing its obligations under this Transaction, which event or circumstance was not anticipated as of the date the Transaction was agreed to, which is not within the reasonable control of, or the result of the negligence of, the Claiming Party, and which, by the exercise of due diligence, the Claiming Party is unable to overcome or avoid or cause to be avoided. So long as the requirements of the preceding sentence are met, a “Force Majeure” event may include, but shall not be limited to, any act of God, an act or threatened act of the public enemy, blockade, accidents of navigation or breakdown or injury of vessels, accidents to harbors, docks, canals or other assistances to, or adjuncts of, shipping or navigation, perils of the sea, air crash, shipwreck, train wrecks or other failures or delays of transportation, nuclear emergency, radioactive contamination, ionizing radiation, release of hazardous waste or materials, sabotage, invasion, riot, civil disturbance or disobedience, flood, drought, military ordinances or archaeological discoveries at the Project site, change in applicable law or interpretation or application thereof, failure or delay by any Governmental Authority in issuing or granting any required clearance, approval, arrangement, or permit, an earthquake, storm, fire, flood, tidal wave, storm, wind, explosion or any similar cataclysmic occurrence, lightning, epidemic, war (imminent, declared or otherwise), terrorism or riot. Notwithstanding the foregoing, Force Majeure shall not be based on (i) the loss of Buyer's markets; (ii) Buyer's inability economically to use or resell the Renewable Energy purchased hereunder; (iii) the loss or failure of Seller's supply, including materials or equipment, unless such loss or failure is caused by a Force Majeure event (iv) the delay in or inability of Seller to obtain financing or economic hardship of any kind; or (v) Seller's ability to sell the Renewable Energy at a price greater than the Contract Price or Buyer’s ability to purchase the Renewable Energy at a price less than the Contract Price; or (vi) strike or other labor dispute. Neither Party may raise a claim of Force Majeure based in whole or in part on curtailment by a transmission provider unless (i) such Party has contracted for firm transmission with a transmission provider for the Renewable Energy to be delivered to or received at the Delivery Point and (ii) such curtailment is due to "force majeure" or "uncontrollable force" or a similar term as defined under the transmission provider's tariff.

1.51 “Force Majeure Extension” has the meaning set forth in Section 4.2(c).

1.52 “Good Utility Practices” means any of the practices, methods and acts engaged in or approved by a significant portion of the electric utility industry during the relevant time period, or any of the practices, methods and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result of the lowest reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method or act to the exclusion of all others, but rather to be generally accepted and consistently adhered to acceptable practices, methods, or acts.

1.53 “Governmental Authority” means any federal, territorial or local government body; any governmental, quasi-governmental, regulatory or administrative agency, commission, body or other authority exercising or entitled to exercise any administrative, executive, judicial, legislative, policy, regulatory or taxing authority or power; or any court or governmental tribunal.

1.54 “Governmental Charges” has the meaning set forth in Section 10.2.

1.55 “GPA Delay” means any delay by GPA in performing an obligation under this Agreement or under the Interconnection Agreement which results in a delay to Seller achieving COD. A GPA Delay is not an Event of Default unless it is otherwise so designated in this Agreement.

1.56 “Guaranteed Output” has the meaning given in Section 4.8.

1.57 “Incremental Price” means, at the time of its calculation, the LEAC Rate minus the Contract Price, provided, however, if the LEAC Rate is less than the Contract Price then the Incremental Price shall be deemed to be zero. Sample calculations of the Incremental Price are shown in Schedule III to Appendix K.

1.58 “Independent Engineer” shall mean one of the engineering firms set forth in Appendix D hereto, and any other independent engineer or engineering firm, nationally recognized in the United States and having knowledge and expertise in the United States generation industry (including specifically the design and construction of utility scale solar photovoltaic power projects), and which is mutually agreed to by the Parties.

1.59 “Interconnection Agreement” means the agreement for interconnection service relating to the Facility between GPA and Seller, executed and delivered as of the Effective Date in the form attached hereto as Appendix J.

1.60 “Interest Rate” means, for any date, the lesser of (a) the per annum rate of interest equal to the prime lending rate as may from time to time be published in The Wall Street Journal under "Money Rates" on such day (or if not published on such day on the most recent preceding day on which published), plus two percent (2%) and (b) the maximum rate permitted by applicable law.

1.61 “kWh” means kilowatt hour.

1.62 “LEAC Rate” means the “Fuel Recovery Charge” (expressed in US$/MWh) as set forth in GPA’s most recent approved tariff in effect as of any date of determination of the LEAC Rate under this Agreement.

1.63 “Letter(s) of Credit” means one or more irrevocable standby letters of credit issued by a U.S. commercial bank or a foreign bank with a U.S. branch with such bank having a Credit Rating of at least A- from S&P or A3 from Moody's, in substantially the form set forth in Appendix [F-1] hereto; provided, however that such form may be modified by the issuing bank as long as such modifications are acceptable to the beneficiary in its sole discretion. Costs of a Letter of Credit shall be borne by the applicant for such Letter of Credit.

1.64 “Merger Event” means, with respect to a Party, that such Party consolidates or amalgamates with, or merges into or with, or transfers substantially all of its assets to another entity and (i) the resulting entity fails to assume all of the obligations of such Party hereunder or (ii) the benefits of any credit support provided pursuant to this Agreement fail to extend to the performance by such resulting, surviving or transferee entity of its obligations hereunder unless such credit support is replaced by the resulting, surviving or transferee entity in accordance with this Agreement.

1.65 “Minimum Production” has the meaning set forth in Section 4.8.

1.66 “Month” means a calendar Month. The term “Monthly” shall have a meaning correlative to a Month.

1.67 “Moody's” means Moody's Investor Services, Inc. or its successor.

1.68 “MW” or “MWh” means megawatt or megawatt hour, in each case rounded to the nearest whole MW or MWh.

1.69 “NAR” means the North American Renewables Registry.

1.70 “NAR Operating Procedures” means any and all guidelines, procedures, requirements and obligations established by the NAR, including the terms of use, operating procedures, and fee schedules, as such may be amended from time to time.

1.71 “Non-Defaulting Party” has the meaning set forth in Section 6.

1.72 "Notice” has the meaning set forth in Section 12.7.

1.73 “Outage” means the period during which the Facility or a portion thereof is out of service.

1.74 “Outside Commercial Operation Date” has the meaning set forth in Section 4.2(b).

1.75 “Payment and Performance Bond” means one or more payment and performance bonds issued by an insurance company or other institution having an investment grade Credit Rating from S&P, Moody’s or Fitch, in substantially the form set forth in Appendix [F-2] hereto; provided, however that such form may be modified by the issuing entity as long as such modifications are acceptable to the beneficiary in its sole discretion.

1.76 “Planned Outage” means any Outage that is not a Forced Outage, and refers to the shutdown or unavailability of the Facility or a portion thereof for inspection or maintenance in accordance with an advance schedule.

1.77 “Production Measurement Period” has the meaning set forth in Section 4.8.

1.78 “Project” has the meaning set forth in Section 2.1.

1.79 “QRE” means the Qualified Reporting Entity as such term is defined in the NAR Operating Procedures.

1.80 “Quantity” means the actual quantity of Renewable Energy (including Stored Energy) sold by Seller and purchased by and delivered to GPA pursuant to this Agreement. The Quantity shall be measured based on the metered data from the Seller Metering Equipment at the Delivery Point.

1.81 “Renewable Energy” means energy derived from a Renewable Energy Resource.

1.82 “Renewable Energy Credit” or “REC” means the unit created to track kWh derived from an Eligible Renewable Energy Resource or kWh equivalent of Conventional Energy Resources displaced by distributed renewable energy resources if and to the extent recognized under applicable law.

1.83 “Renewable Energy Resource” means an energy resource that is replaced rapidly by a natural, ongoing process and that is not nuclear or fossil fuel.

1.84 “Replacement Price” means the price at which GPA, acting in a Commercially Reasonable Manner, purchases electricity in place of Renewable Energy.

1.85 “S&P” means the Standard & Poor's Rating Group (a division of McGraw-Hill, Inc.) or its successor.

1.86 “SCADA” means “supervisory control and data acquisition” and shall refer to that category of software application program that can be used to gather data from the Facility remotely in real time in order to monitor Facility equipment and conditions.

1.87 “Schedule,” "Scheduled” or "Scheduling” means the actions of Seller, Buyer and/or their designated representatives, of notifying, requesting and confirming to each other the quantity and type of Renewable Energy (including Stored Energy) to be delivered on any given day or days during the Delivery Period at a specified Delivery Point.

1.88 "Scheduled Commercial Operation Date" has the meaning set forth in Section 4.2(a).

1.89 "Seller Failure" has the meaning set forth in Section 5.1.

1.90 "Seller Failure Damages" has the meaning set forth in Section 5.1.

1.91 "Seller's Interconnection Facilities" means Seller's equipment as specified in the Interconnection Agreement.

1.92 "Seller Metering Equipment" means all metering equipment and data processing equipment used to measure the Quantity delivered to the Delivery Point.

1.93 "Shortfall Damages" has the meaning set forth in Section 4.8.

1.94 "Sponsor Interest" means an upstream ownership interest held by an entity that is an Affiliate of the Seller as of the Effective Date which represents a partial indirect ownership interest in Seller and which is established in connection with a tax equity financing.

1.95 "Microgrid Unit" means the energy storage unit to be installed by Seller as part of the Facility, as contemplated in Appendix C.

1.96 "Stored Energy" means Charging Energy stored in the Microgrid Unit which is later delivered to the Delivery Point as contemplated in Appendix C.

1.97 "Tax Benefits" means any and all tax benefits arising from the ownership and operation of the Facility, including without limitation Renewable Energy related tax credits or other benefits established under Section 45 and Section 48 of the Internal Revenue Code, as amended, or any similar or successor provision of the Internal Revenue Code, or any other applicable tax law, regulation, or code.

1.98 "Tax Equity Investor Interest" means an upstream ownership interest held by a financing party (including a financial institution, insurance company or other third party not affiliated with the Seller except based on the applicable tax equity investment or other similar investments or financings) as of the Effective Date which represents a partial indirect ownership interest in Seller and which is established in connection with a tax equity financing.

1.99 "Term" has the meaning set forth in Section 12.1.

1.100 "Termination Damages" has the meaning set forth in Section 4.4.

1.101 "Test Energy" means non-firm Renewable Energy generated prior to the Commercial Operation Date, subject to immediate interruption, fluctuations or reduction/increase with no prior Notice, due to unit performance.

1.102 "Transaction" means the transaction relating to the purchase or sale of Renewable Energy as contemplated in this Agreement.

1.103 "Unit Contingent" means that the Renewable Energy (excluding Charging Energy but including Stored Energy) is intended to be supplied from the Facility as it is produced.

1.104 "Weather Hours" means the total hours in any Production Measurement Period, as applicable, in which the Facility is derated as a result of cumulative weather conditions which are outside historical average conditions for any applicable Month during the Production Measurement Period in which the deration occurs, calculated in accordance with Appendix K.

ARTICLE TWO: COMMERCIAL TERMS

2.1 Commercial Terms.

The following commercial terms apply to the Transaction that is the subject of this Agreement, each as more fully described herein:

Buyer: GPA	**Seller:** Hanwha Energy Corporation
Project: Hanwha Project A	
Delivery Point: The "Point of Interconnection" as defined in the Interconnection Agreement	
Guaranteed Annual Production (MWhs): As set forth in Appendix A	**Estimated Annual Production: (MWhs):** NOT APPLICABLE
Guaranteed Availability (%): NOT APPLICABLE	**Guaranteed Capacity (MWs):** NOT APPLICABLE
Delivery Period: Twenty-five (25) years from the Commercial Operation Date	**Contract Price ($/MWh):** See Appendix A
Renewable Energy Type: Unit Contingent (solar) and associated RECs	**Development Security:** As contemplated in Section 9.1
Day(s) of week: Monday through Sunday, including NERC holidays	**Hours:** Hour Ending 0100 – Hour Ending 2400, Monday through Sunday Chamorro Standard Time (CHST), Guam time
Commercial Operation Date: No later than 36 months after Effective Date.	
Test Energy: Seller agrees to sell and Buyer agrees to purchase all Test Energy from the Facility. The test period shall be up to six (6) months. . The price of such Test Energy for the first thirty days shall be the current LEAC Rate. The price thereafter shall be the Year 1 Contract Price set out in Appendix A. Test Energy shall be delivered in accordance with the Scheduling provisions contained herein. Both Parties agree that Seller will use Commercially Reasonable Efforts to pre-schedule the Test Energy, but Buyer shall nonetheless be obligated to accept all Test Energy up to 22.5 MW per hour of Test Energy for the period set forth above. Seller shall provide to Buyer all RECs associated with the Test Energy sold hereunder in accordance with Section 4.16.	

ARTICLE THREE: REPRESENTATIONS AND WARRANTIES

3.1 Mutual Representations and Warranties.

On the Effective Date of this Agreement, each Party represents and warrants to the other Party that:

(a) It is duly organized, validly existing and in good standing under the laws of the jurisdiction of its formation;

(b) It has all regulatory authorizations necessary for it to legally perform its obligations under this Agreement (other than permits or regulatory authorizations to be obtained by Seller for the construction, operation or maintenance of the Facility, which Seller reasonably anticipates it will be able to obtain in due course);

(c) The execution, delivery and performance of this Agreement are within its powers, have been duly authorized by all necessary action and do not violate any of the terms and conditions in its governing documents, any contracts to which it is a party or any law, rule, regulation, order or the like applicable to it, and the Agreement constitutes its legally valid and binding obligation enforceable against it in accordance with its terms, subject to any Equitable Defenses.

(d) It is not Bankrupt and there are no proceedings pending or being contemplated by it or, to its knowledge, threatened against it which would result in it being or becoming Bankrupt;

(e) There is not pending or, to its knowledge, threatened against it or any of its Affiliates any legal proceedings that could materially adversely affect its ability to perform its obligations under this Agreement;

(f) No Event of Default or potential Event of Default with respect to it has occurred and is continuing and no such event or circumstance would occur as a result of its entering into or performing its obligations under this Agreement; and

(g) It is acting for its own account, has made its own independent decision to enter into this Agreement and as to whether this Agreement is appropriate or proper for it based upon its own judgment, is not relying upon the advice or recommendations of the other Party in so doing, and is capable of assessing the merits of and understanding, and understands and accepts, the terms, conditions and risks of this Agreement;

3.2 Seller Representations and Warranties.

Seller affirmatively represents and warrants to GPA that:

(a) On the Effective Date of this Agreement, or in due course as required in accordance with the Financing Arrangement Deadline (as may be extended as provided in Section 4.3), Seller has (or reasonably expects to have in due course), good defensible title, or valid and effective leasehold rights in the case of leased property, to the Facility, free and clear of all liens, charges, claims, pledges, security interests, equities and encumbrances of any nature whatsoever other than the lien of current taxes not delinquent, liens, charges, claims, pledges, security, interests, equities and encumbrances relating to Facility Debt as provided for herein, or liens that in the aggregate do not materially detract from or interfere with the ability of Seller to deliver the Quantity of the Renewable Energy;

(b) All acts necessary to the valid execution, delivery and performance of this Agreement by Seller have or will be taken and performed as required under Seller's ordinances, bylaws, or other regulations including, but not limited to (i) the valid authority of the person

executing this Agreement to bind Seller and (ii) the Term of this Agreement does not extend beyond any limitation applicable to Seller imposed by relevant governing documents and applicable law; and

(c) Seller will have at the time of sale, title to and ownership of the RECs sold hereunder.

3.3 GPA Representations and Warranties.

GPA represents and warrants that:

(a) The Commission on Consolidated Utilities has made all certifications required by the Guam Public Utilities Commission and the Guam legislature in order for the valid execution, delivery and performance of this Agreement by GPA copies of which are attached hereto as Appendix L.

(b) Each of the PPA Approval and the ICA Approval is final, non-appealable and not subject to rehearing or other proceedings challenging its validity or enforceability.

(c) No authorizations, approvals or consents of any governmental or regulatory authority or agency or any other person, and no filings or registrations with any governmental authority or agency, are necessary for the execution, delivery or performance by GPA of this Agreement, or for the validity or enforceability thereof, except for any authorizations, approvals, consents or filings which have been made or obtained prior to the date hereof and are in full force and effect and are conclusive, binding and final.

(d) During the entire Term of the Agreement, all terms and conditions set forth in this Agreement shall be valid and enforceable against GPA.

(e) All legal, statutory and regulatory requirements and conditions necessary for the validity and enforceability of this Agreement and the obligations of GPA hereunder to purchase Renewable Energy, including, without limitation, the conditions and requirements as set forth in Title 12 of the Guam Code Annotated, Section 8306, have been satisfied, and at the time of the execution of the Agreement GPA further represents and warrants specifically as to the following: **NOTE TO GPA: GPA IS TO ENSURE THE RESOLUTIONS OF THE CCU ATTEST TO THE MATTERS SET FORTH BELOW**.

(i) Pursuant to the provisions of Public Law 30-66 (as codified in Title 12 of the Guam Code Annotated, Section 8104(n)), GPA is authorized to enter into this Agreement, together with any other agreement to be entered into by GPA and Seller as provided herein, and perform all the obligations imposed upon GPA as set forth herein, including, without limitation, the obligation to purchase Renewable Energy and pay all amounts due and owing to the Seller under the terms of this Agreement, and that no separate and specific appropriation or approval by *Liheslaturan Guahan* is required for such purpose.

(ii) This Agreement and the purchase of Renewable Energy by GPA at the time of the execution of the Agreement pursuant to the terms herein will not result in (A) costs to GPA which exceed the average cost of producing power under the islandwide power system owned and operated by GPA not inclusive of energy production from any backup diesel generators or other renewable energy sources, and (B) increased expenses and costs for GPA.

(iii) As set forth in the resolutions attached hereto as Appendix L, the Consolidated Commission on Utilities has certified that this Agreement is consistent with and does not violate any and all bond covenants applicable to and imposed upon

GPA and that the price to be paid by GPA for Renewable Energy as provided herein does not exceed GPA's actual current avoided cost.

GPA is not a party to a pooling agreement or any other agreement with the United States Department of Navy or any other federal agency, department or instrumentality ("Federal Government) which requires GPA to notify or obtain the approval of the Federal Government of this Agreement.

(iv) Any and all Renewable Energy to be purchased by GPA pursuant to the terms of this Agreement constitutes electrical power needed and required by GPA in connection with the operation and stability of the islandwide power system and to meet renewable energy portfolio standards which GPA is mandated to achieve and satisfy by law including without limitation, the mandates as set forth in Public Law 29-062 as codified in Title 12 of the Guam Code Annotated, Section 8311.

ARTICLE FOUR: PERFORMANCE REQUIREMENTS

4.1 Commercial Operation.

Seller shall achieve Commercial Operation of the Project no later than the Scheduled Commercial Operation Date except to the extent such date is extended pursuant to Section 4.2, in which case Commercial Operation shall occur on or prior to the Outside Commercial Operation Date. Commercial Operation shall be achieved as of the date on which each of the following conditions precedent has been satisfied or waived in writing by the Parties, as applicable ("Commercial Operation"):

(a) Seller shall have obtained all governmental and regulatory authorizations, including any applicable permits, required for the construction, ownership, operation and maintenance of the Project and for the sale of the Renewable Energy therefrom;

(b) Seller and Buyer shall have entered into the Interconnection Agreement;

(c) Seller shall have established SCADA information and real time data feed to enable GPA to view parameters or data points that relate to Renewable Energy data and other actual resource data for the Facility;

(d) The Microgrid Unit shall be capable of charging and discharging Renewable Energy;

(e) The Project shall in all other respects be capable of delivering the Renewable Energy to GPA at the Delivery Point;

(f) Seller shall perform at its cost a capacity test in accordance with the protocol outlined in Appendix I to determine the capacity of the Project ("Facility Test"). GPA shall receive the entire Renewable Energy from the Facility during such test. Renewable Energy deliveries during testing shall be measured at the Delivery Point.

GPA shall use all available Commercially Reasonable Efforts to assist Seller in achieving the Scheduled Commercial Operation Date. Seller shall present to GPA a certificate executed by its duly executed officer, and by an Independent Engineer as to items (c), (d) and (e), verifying that each of the foregoing conditions has been satisfied or waived in writing by the Parties and Commercial Operation shall be deemed to have occurred upon the delivery of such certificate to GPA unless GPA objects to such certificate within ten (10) Business Days of delivery thereof and such objections are either agreed by Seller or resolved in favor of GPA pursuant to Section 12.9 hereof. Upon any acceptance or deemed acceptance of Seller's certificate by GPA, all conditions, set forth above shall no longer be a condition precedent to Commercial Operation of the Project. If the Commercial Operation Date does not occur on or before the Outside Commercial Operation Date, as such date may be extended in accordance with Section 4.2 herein; either Party shall have the right to terminate the Agreement upon written Notice to the other Party. In the event of such termination by either Party, GPA shall be entitled to Termination Damages set forth in Section 4.4; provided, however, that in accordance with Section 4.2(c), GPA shall not be entitled to such Termination Damages if the Outside Commercial Operation Date is not achieved due to a Force Majeure event or a GPA Delay.

4.2 Extension of Commercial Operation Date.

(a) Planned Extension. The Parties agree that the Commercial Operation Date is expected to be No later than 36 months after Effective Date. (as extended pursuant to the terms of this Agreement, the "Scheduled Commercial Operation Date"). Seller may elect to extend the Commercial Operation Date beyond such date (the "COD Extension") by paying GPA for such extension (the "COD Extension Payment"). The COD Extension Payment shall be in the amount of fifty percent (50%) of the Shortfall Damages (based on ninety percent (90%) of the Minimum Production for the first Contract Year per day for

each day (or portion thereof) after but not including the date of the COD Extension until, but not including, the date on which the Project actually achieves Commercial Operation]. To extend the Commercial Operation Date, Seller must, as early as reasonably possible, but in no event later than fourteen (14) days prior to the first day of the proposed extension, provide GPA with Notice of its election to extend the Commercial Operation Date along with an estimate of the duration of the extension. The COD Extension Payment is in addition to and not to be considered part of the Development Security, and shall be paid to GPA at the time of the Notice hereunder. Seller's request to extend the Commercial Operation Date shall not be valid unless proper Notice and payment are timely received by GPA. No Event of Default shall be deemed to have occurred with respect to Seller's extension as provided herein, and GPA shall not have the right to terminate the Agreement or to receive Termination Damages with respect to such extension so long as Seller has provided the Notice, estimation and payment as provided in this Section 4.2(a). Seller may further extend the Commercial Operation Date beyond the original COD Extension, subject to the foregoing Notice, estimation and payment terms applicable to the original COD Extension.

Seller shall be entitled to a prompt refund, without interest, of any portion of the COD Extension Payment held by GPA which exceeds the amount required to cover the number of days by which the Commercial Operation Date was actually extended. In no event may Seller extend the Commercial Operation Date by more than ninety (90) days through the payment of the COD Extension Payment, except as provided in Section 4.2(b). In the event that the Project does not achieve Commercial Operation on or before the expiration of any COD Extension period as provided herein, either Party shall have the right to terminate the Agreement upon written Notice to the other, subject to any further extension rights pursuant to Sections 4.2(b) or (c) below. In the event of such termination by either Party in accordance with this provision, GPA shall be entitled to Termination Damages as set forth in Section 4.4 as its sole and exclusive remedy, subject to Section 4.2(c).

(b) Unplanned Extension/Additional Planned Extension. In the event that (i) the Project does not achieve Commercial Operation by the Scheduled Commercial Operation Date and Seller fails to provide sufficient Notice and/or payment in order to extend the Commercial Operation Date as provided in Section 4.2(a), or (ii) the Commercial Operation Date shall not have occurred within the ninety (90) day planned extension period provided under Section 4.2(a), then Seller may further extend the Commercial Operation Date by paying GPA damages ("Daily Delay Liquidated Damages"). The Daily Delay Liquidated Damages shall be in the amount of one hundred percent (100%) of the Shortfall Damages (based on ninety percent (90%) of the Minimum Production for the first Contract Year) per day for each day (or portion thereof) after but not including the earlier of the dates set forth in sub-clauses (i) or (ii) above, or until, but not including, the date on which the Project actually achieves Commercial Operation, and shall be payable within ten (10) Business Days following receipt of an invoice from GPA for any such Daily Delay Liquidated Damages. No Event of Default shall be deemed to have occurred with respect to Seller's extension as provided herein and GPA shall not have the right to terminate the Agreement with respect to such extension or to receive Termination Damages so long as Seller has extended the Commercial Operation Date and pays the Daily Delay Liquidated Damages as provided in this Section 4.2(b).

In no event may the Commercial Operation Date be extended more than one hundred and eighty (180) days through the payment of Daily Delay Liquidated Damages, without the express written consent of GPA. In the event that the Project does not achieve Commercial Operation on or before three hundred and sixty-five (365) days from the Scheduled Commercial Operation Date (as extended pursuant to this Agreement, the "Outside Commercial Operation Date"), then either Party shall have the right to terminate the Agreement upon written Notice to the other, subject to any further extension rights

pursuant to Section 4.2(c) below. In the event of such termination by either Party in accordance with this provision, GPA shall be entitled to Termination Damages as set forth in Section 4.4 as its sole and exclusive remedy, subject to Section 4.2(c).

(c) Additional Extension. The Scheduled Commercial Operation Date and the Outside Commercial Operation Date shall also be extended, without payment or other penalty, on a day-for-day basis for each day of delay caused by reason of Force Majeure (a "Force Majeure Extension") or by reason of GPA Delay. Any Force Majeure Extension or GPA Delay shall also extend the period of any planned or unplanned extensions pursuant to Sections 4.2(a) or (b) on a day-for-day basis for each day during the Force Majeure Extension or GPA Delay, and Seller shall not be required to pay any COD Extension Payments or Daily Delay Liquidated Damages, as applicable, for any days during the Force Majeure Extension or GPA Delay. Notwithstanding any other provision in this Agreement, if, due solely to a Force Majeure Extension and/or a GPA Delay, the Project does not achieve Commercial Operation on or before the Outside Commercial Operation Date, then the Parties by mutual agreement may terminate this Agreement without penalty or further obligation to either Party, and after one hundred and eighty 180 days following the Outside Commercial Operation Date, either Party may unilaterally terminate this Agreement without penalty or further obligation to either Party. For the sake of clarityin the event of any such termination, GPA shall not be entitled to Termination Damages.

4.3 Financing Arrangement Deadline.

Seller shall make Commercially Reasonable Efforts to secure a financing sufficient for the successful completion of the Project as and when required and procure a preliminary agreement customary for such financing (such as an engagement letter) no later than one (1) year after the Effective Date as extended day-for-day for any Force Majeure Extension or GPA Delay (the "Financing Arrangement Deadline"). After the execution of the preliminary agreement, Seller shall provide GPA with a copy of such agreement within three (3) Business Days. In the event that Seller fails to procure the execution of a preliminary agreement by the Financing Arrangement Deadline, GPA may terminate the Agreement and shall be entitled to Termination Damages set forth in Section 4.4 as its sole and exclusive remedy.

4.4 Termination Damages.

Prior to the Commercial Operation Date, Seller may terminate this Agreement at any time for its convenience. GPA shall be entitled to termination damages, payable solely from the Bid Security or the Development Security established in Section 9.1 ("Termination Damages"), in the amounts set forth in the table below, if: (a) subject to the last sentence of this Section 4.4, Seller terminates the Agreement prior to the Commercial Operation Date for any reason other than: (i) a Force Majeure event or (ii) an Event of Default by GPA; [(b) GPA terminates the Agreement as a result of Seller failing to meet any Financing Arrangement Deadline after the passage of a grace period of thirty (30) days (as extended day-for-day for any Force Majeure Extension or GPA Delay);] and/or (c) GPA terminates the Agreement as a result of Seller failing to achieve the Commercial Operation Date on or prior to the Scheduled Commercial Operation Date, as the same may have been extended pursuant to Section 4.2. The Termination Damages are designed to help compensate GPA for, among other things, transactions that it did not consummate because it relied on this Agreement with Seller, and GPA's potential failure to meet its applicable renewable energy portfolio requirements and do not constitute a penalty payment. Accordingly, Seller shall pay to GPA, from the Development Security, Termination Damages in the following amounts, based upon when the termination occurs:

Prior to Posting Date of Development Security pursuant to Section 9.1:	$0.00

[Up to Financing Arrangement Deadline]	100% of the Bid Security
[Up to six months following Financing Arrangement Deadline]	50% of Development Security
[From six months to twelve months following Financing Arrangement Deadline]	75% of Development Security
[From twelve months following Financing Arrangement Deadline]	100% of Development Security

No later than five (5) Business Days following the Financing Arrangement Deadline, GPA shall return the Bid Security to Seller, to the extent GPA has not validly claimed the Bid Security in respect of Termination Damages on or prior to such date. Notwithstanding the foregoing, in the event that Seller terminates this Agreement for any reason prior to the posting date for the Development Security as set forth in Section 9.1 herein, then Seller shall owe GPA no Termination Damages and such termination shall be without penalty to Seller.

4.5 Seller's and Buyer's Obligations.

Subject to Appendix H and Appendix C, Seller shall sell and deliver, or cause to be delivered, and GPA shall purchase and receive, or cause to be received, all Renewable Energy generated by the Facility (excluding Charging Energy but including Stored Energy when delivered, in each case, as set forth in Appendix C), at the Delivery Point, and GPA shall pay Seller the Contract Price for such Quantity of Renewable Energy (including Stored Energy) as measured by the Seller's Metering Equipment at the Delivery Point; provided that for quantities of Renewable Energy (including Stored Energy) in excess of the Estimated Annual Renewable Energy Amount, as shown in the third column of Appendix A, which are not make-up quantities for delivery deficiencies in prior Production Measurement Periods, the price payable by GPA shall be the lower of the Contract Price and the LEAC Rate.

For Seller's failure to deliver Renewable Energy as required hereunder, GPA's remedies shall be as set forth in Section 4.8. For GPA's failure to purchase and receive Renewable Energy (including Stored Energy) as required hereunder, Seller shall in addition have all other remedies available at law or in equity. Seller shall be responsible for any costs or charges imposed on or associated with the Renewable Energy (including Stored Energy) or its delivery up to the Delivery Point. GPA shall be responsible for any costs or charges imposed on or associated with Renewable Energy (including Stored Energy) or its receipt at and from the Delivery Point. Title to and risk of loss of Renewable Energy (including Stored Energy) from the Facility delivered to the Delivery Point shall transfer to GPA at the Delivery Point. Seller warrants that it will deliver to Buyer Renewable Energy (including Stored Energy) free and clear of all liens, security interests, claims and encumbrances or any interest therein or thereto by any person arising prior to the Delivery Point.

4.6 Operation of Facility.

Seller shall operate and maintain the Facility in accordance with Good Utility Practices and in accordance with the Agreed Ramp Rate as set forth in Appendix C.

4.7 Not Used.

4.8 Minimum Production.

The Facility is expected to produce a minimum number of MWhs of Renewable Energy (including Stored Energy) each Contract Year as set forth in the third column of Appendix A (such annual MWh production is the "Minimum Production"). Seller during the Delivery Period shall (i) during any Contract Year, deliver to GPA at least ninety percent (90%) of the Minimum Production (which calculated amounts are set forth in the fourth column

of Appendix A), and (ii) for any consecutive six (6) Contract Years during the Delivery Period, deliver to GPA at least ninety-five percent (95%) of the aggregate Minimum Production during such period (which shall include make-up amounts generated and delivered in any years in excess of one hundred percent (100%) of the Minimum Production for such year) (any such time period a "Production Measurement Period" and each such guaranteed amount of delivered Renewable Energy during any Production Measurement Period, the "Guaranteed Output"). Any shortfall of Renewable Energy (expressed in MWhs/year) from the applicable Guaranteed Output during a Production Measurement Period shall be deemed a "Deficiency Amount." For the avoidance of doubt, (i) Stored Energy delivered to the Delivery Point shall count towards Seller's achievement of the Minimum Production during each Production Measurement Period, and (ii) Charging Energy shall not be delivered by Seller and shall not count towards any Deficiency Amount as it is used to charge the Microgrid Unit as contemplated in Appendix C.

GPA shall be entitled to receive damages for any Deficiency Amount ("Shortfall Damages") which are not due to Excused Hours or Weather Hours (except, in the case of Weather Hours, as set forth below). Shortfall Damages shall be calculated as follows on an annual basis at the end of each Contract Year (and [in accordance with the example set forth in Schedule I to Appendix K].):

Shortfall Damages = Deficiency Amount x Incremental Price.

For purposes of clarity, if Actual Renewable Energy (including Stored Energy) for any given Contract Year is less than the Minimum Production for that year (even if due to Excused Hours or Weather Hours), there shall be a "Shortfall," and Seller shall be entitled to deliver to GPA Renewable Energy in the amount of such Shortfall in subsequent time periods (even if such make-up amounts are in excess of the Minimum Production for such subsequent year), and this Agreement may be extended as necessary for a period of up to six (6) months to allow Seller to make up any Shortfalls; however, there shall be no Shortfall Damages owing to GPA for such individual Contract Year unless such Actual Renewable Energy is less than the Guaranteed Output for the applicable Production Measurement Period, and such shortfall is not due to Excused Hours or Weather Hours (except, in the case of Weather Hours, as set forth below).

In the event Shortfall Damages are due for a Production Measurement Period of six (6) rolling Contract Years, then such Shortfall Damages shall be reduced by the amount of any Shortfall Damages paid for any Contract Year during such six (6) year Production Measurement Period. Seller's payment of Shortfall Damages shall be Seller's sole liability and obligation, and GPA's sole right and remedy, with respect to Seller's failure to deliver the Guaranteed Output during any Production Measurement Period.

To the extent any Deficiency Amount is due to Weather Hours, Seller's sole liability and GPA's sole remedy shall be to deliver thereafter Renewable Energy equal to such Deficiency Amount attributable to Weather Hours, calculated in accordance with Appendix K (which includes a sample calculation for a hypothetical Production Measurement Period). If any portion of a Deficiency Amount due to Weather Hours is not made up in the five (5) Contract Years beginning in the first Contract Year following the Contract Year in which the Weather Hours Deficiency Amount occurred, then Seller shall pay Shortfall Damages for the remaining Deficiency Amount. Notwithstanding the foregoing, with respect to any Deficiency Amount that is due to Weather Hours, Seller shall have the option, at any time prior to the expiration of the five (5) Contract Year make-up period, to pay any remaining associated Shortfall Damages in their entirety. If the Deficiency Amount arising as a result of Weather Hours occurs in the last five (5) years of the Delivery Period, then unless Seller exercises its option to pay the Deficiency Amount early, the Delivery Period shall be extended as necessary, for a period of up to six (6) months, to achieve a make-up period of five (5) Contract Years as described above. The Contract Price for such Renewable Energy shall be the Contract Price in effect in the Contract Year in which the Deficiency Amount due to Weather Hours accrued.

Seller shall be entitled to sell, and GPA shall purchase, quantities of Renewable Energy for which Shortfall Damages are paid hereunder, during any remaining Production Measurement Period during the Delivery Period. The price therefore shall be the Contract Price in effect at the time the Shortfall Damages accrued. During any Contract Year, all Renewable Energy delivered by Seller to GPA in excess of the Minimum Production shall be credited against makeup of any outstanding Deficiency Amounts, with oldest Deficiency Amounts made up first.

To the extent any Deficiency Amount is due to Excused Hours, Seller shall be excused from any liability with respect thereto.

Notwithstanding the foregoing, in the event that the Delivery Point is unavailable for any reason other than due to GPA's electric system, Seller's obligation to supply and sell, and GPA's obligation to accept and purchase, Renewable Energy shall be limited to such Renewable Energy that is actually deliverable from the Facility to the Delivery Point during such period except this paragraph shall not apply in the case of Excused Hours or an Event of Default by either Party.

4.9 Facility Testing.

In addition to the Facility Test referenced in Section 4.1(e), the capacity of the Facility shall be tested during each Contract Year during the Delivery Period (the "Annual Facility Test"). Seller shall notify GPA of the specific date on which it intends to conduct the Annual Facility Test at least ten (10) Business Days in advance and shall permit GPA to be present at such test. GPA shall have the right to receive copies of the results of the Annual Facility Test, which shall be conducted in accordance with the protocol set forth in Appendix I. Any dispute regarding the results of the Annual Facility Test shall be resolved as set forth in Section 12.9 of this Agreement. GPA shall receive, in accordance with Section 4.5, the entire Renewable Energy from the Facility during any Annual Facility Test or re-test. Renewable Energy deliveries during testing shall be measured at the Delivery Point.

4.10 Scheduling.

Seller agrees to supply at the Delivery Point all Renewable Energy produced by the Project, net of Renewable Energy self-generated and consumed at the Facility, and net of any generation losses prior to the Delivery Point, up to the Facility Capacity, in accordance with the scheduling and coordination procedures set out in Appendix H. GPA agrees to take at the Delivery Point all Renewable Energy tendered by Seller in accordance with the foregoing sentence. The Schedules and estimates provided pursuant to this Section 4.10 shall be made by Seller in good faith and based on information available to it at such time, but in no event shall such Schedules be binding on Seller nor shall Seller be liable for any inaccuracies in such Schedules.

4.11 Force Majeure.

To the extent either Party is prevented by Force Majeure from carrying out, in whole or part, its obligations under this Transaction and such Party (the "Claiming Party") gives Notice and details of the Force Majeure to the other Party as soon as practicable, then the Claiming Party shall be excused from the performance of its obligations with respect to such Transaction (other than the obligation to make payments then due or becoming due hereunder). The Claiming Party shall remedy the Force Majeure with all reasonable dispatch. The non-Claiming Party shall not be required to perform or resume performance of its obligations to the Claiming Party corresponding to the obligations of the Claiming Party excused by Force Majeure.

4.12 Facility Outages and Maintenance Scheduling.

(a) Planned Outages. Seller shall provide written Notice to GPA prior to conducting any Planned Outages of the Facility. Within ninety (90) days prior to the Commercial Operation Date, as the same may be extended in accordance with the provisions of Section 4.2, and on or before the first day of each subsequent Contract Year, Seller shall provide GPA with a schedule of such proposed Planned Outages. The proposed Planned Outages schedule shall be submitted electronically to GPA, using a reasonably acceptable format provided by GPA. Such format is subject to change from time-to-time during the Term of this Agreement by agreement of the Parties, but will generally describe the nature of the Outage, the expected duration, and any other pertinent information that will assist GPA in planning for the decreased output of the Facility as a result of the Outage.

GPA shall promptly review Seller's proposed schedule and may request modifications within thirty (30) days of GPA's receipt of such schedule. Changes to the schedule may

be requested by either Party and each Party shall make Commercially Reasonable Efforts to accommodate such changes, provided further that Seller shall have no obligation to agree to GPA's proposed modifications or revisions to any Planned Outage schedule.

Notwithstanding any of the foregoing, Seller shall not commence a Planned Outage that is expected to result in an Outage of ten percent (10%) or more of the Facility without notifying GPA of the Planned Outage at least five (5) Business Days prior to the start of such Planned Outage.

(b) Forced Outages. In the event of any Forced Outage, Seller shall promptly notify GPA of the same. Seller shall immediately notify GPA verbally and shall then, within twenty-four (24) hours thereafter, provide written Notice to GPA (the "Forced Outage Notice"). The Forced Outage Notice shall be submitted electronically to GPA, using a reasonably acceptable format provided by GPA. Such format is subject to change from time-to-time during the Term of this Agreement by agreement of the Parties, but will generally describe the nature of the Outage, the expected duration, and any other pertinent information that will assist GPA in planning for the decreased output of the Facility as a result of the Outage. Seller shall return the Facility to service as soon as possible, consistent with Good Utility Practices, after the Forced Outage ceases to exist.

(c) GPA Parts Inventory. To the extent GPA maintains an inventory of parts or components that are used or useful in the Facility and provided it can prudently do so under its own ordinary course operating practices and restrictions, GPA shall cooperate with Seller in a commercially reasonable manner by making such parts or components available to Seller at its request during the period of time Seller is obtaining replacement parts or components for the Facility in order to maximize output of Renewable Energy. If Seller obtains a replacement part or component from GPA, it shall at GPA's option either replace such part or component with the new part or component ordered by Seller or return the borrowed part or component to GPA at such time as Seller obtains the replacement. Seller shall bear the installation, transportation and labor charges relating to GPA's replacement parts or components, and if the parts or components are returned to GPA then Seller shall reimburse GPA for any damage to such parts or components while in Seller's possession.

4.13 Operating Status Reports.

From the Effective Date of this Agreement, through the date of Commercial Operation, Seller shall provide GPA with Monthly reports regarding material data pertaining to the operation of the Facility. The operations data is generally identified as performance, Outage, and risk data and shall be sent electronically to GPA using a reasonably acceptable format provided by GPA. The operations data report format may be modified by agreement of the Parties from time-to-time during the Term of this Agreement.

4.14 Resource Quality Reporting: Forecasting.

Seller shall provide to GPA at its request copies of non-proprietary resource quality data that could reasonably be expected to affect, in any material manner, the operation and/or productivity of the Facility, whether produced, compiled or otherwise generated by Seller or any third party in a Commercially Reasonable manner, so that GPA can evaluate the expected performance of the Facility. Seller shall provide such data as it is produced or otherwise made available to Seller. Upon Commercial Operation of the Facility, to the extent generated or procured by Seller, Seller shall also provide to GPA Monthly and day-ahead forecasting information for the Facility. Such information shall be in a format agreed to by the Parties and include, among other things: Seller's forecasts for the performance of the Facility based on Facility specifications, weather-based forecasting, and weather-related studies. Such information, which will be used by GPA solely for evaluation, Scheduling, and other purposes related to this Agreement, shall be provided as available. In no event shall the data and/or information provided to GPA pursuant to this Section 4.14 be binding upon Seller, nor shall Seller be liable for any penalties, charges or other damages based on the inaccuracy of such data or information.

4.15 Permit Violations.

Seller shall at all times during the Term of this Agreement maintain and comply with all applicable permits for the development, ownership and maintenance of the Facility in all material respects. As soon as practicable after the occurrence of any event known to Seller that would constitute or is reasonably likely to lead to a violation of any applicable permit, but in no event more than ten (10) Business Days thereafter, Seller shall provide GPA with written Notice of the same.

4.16 Change in Technical Requirements.

The Parties agree that, from and after the Effective Date, if Seller is required at any time to comply with new or modified technical or other performance requirements for the Facility or any material portion thereof (or in the manner any such facilities are to be operated or maintained) and such addition to or change in the above standards causes an increase in Seller's actual costs to perform in excess of $25,000 in the aggregate, then the Parties shall negotiate in good faith to agree upon an adjustment to the Contract Price and/or the Annual Microgrid Payment, as applicable, to compensate Seller for such increased costs. Such a change in the technical or performance requirements may arise as a result of the scheduling protocols or the communication protocols to be established by GPA pursuant to Appendix H or any other protocols or regulations established by GPA, requirements imposed by the transmission provider or pursuant to the Interconnection Agreement, requirements imposed by GPA or another Governmental Authority pursuant to or in connection with this Agreement, among other circumstances.

Seller will deliver prompt notice of the occurrence of a change in technical or performance requirements which has or is reasonably expected to result in the additional actual costs described above. If, on the date which is forty-five (45) days following Seller's delivery of notice to GPA, the Parties are unable to agree upon an adjustment to the Contract Price and/or the Annual Microgrid Payment, as applicable, which compensates Seller for such additional costs and is otherwise mutually acceptable, then Supplier may submit such dispute for resolution pursuant to Section 12.9.

4.17 Delivery of RECs.

(a) Use of North American Renewables Registry. At least ten (10) days prior to COD, Seller shall transfer to GPA the authority to create, own and transfer all Environmental Attributes associated with the Renewable Energy produced by the Facility, by executing and delivering the form entitled "Generator Owner's Designation of Responsible Party" published by NAR, wherein Seller shall designate GPA as the "responsible party" for all matters relating to the creation, ownership, and transfer of any RECS. Thereafter, GPA shall be responsible for all obligations relating to creating and transferring RECs and Seller shall have no further obligations or liabilities with respect thereto, provided, however, that Seller shall reimburse to GPA its costs of creating and maintaining the NAR account and NAR's fees charged to transfer the RECs, up to an aggregate maximum amount of $5,000 per annum. In the event this Agreement is terminated for any reason, the Parties agree to each consent to the termination of such designation in accordance with NAR procedures.

(b) GPA Registration as a QRE. GPA shall be the QRE for the Facility as required by NAR and shall comply with any and all NAR Operating Procedures relating to the registration and operation as a QRE and the reporting of generation data from the Facility to NAR. As the QRE, each month upon receipt of an invoice and associated interval metering data from Seller in accordance with Section 7.5 herein, GPA shall report such data to NAR within three (3) Business Days following receipt of such data. The Parties shall cooperate to ensure that the Seller Metering Equipment and the resulting interval metering data meet the NAR requirements for metering equipment and generation data.

(c) Change Event. During the Term, in the event that (i) the NAR Operating Procedures are amended or changed such that it becomes impossible for the Parties to utilize NAR as the REC tracking method and/or for GPA to continue as "responsible party" for purposes of

creating, owning and transferring RECs attributable to the Facility; (ii) the fees or charges imposed by NAR on either Seller or GPA to utilize the NAR REC tracking system are materially increased such that use of the NAR REC tracking system becomes uneconomic or infeasible; or (iii) the NAR REC tracking system is eliminated (each one individually, a "Change Event"), then the Parties shall promptly negotiate in good faith to reform the terms of this Agreement in order to give effect to the original intention of the Parties to the extent reasonable under the circumstances, including utilizing an alternative method for transferring RECs to GPA, but in no case shall Seller's cost with respect thereto exceed $5,000 per annum.

4.18 Ramp Rate Control Performance.

During the Delivery Period, Seller shall cause the Microgrid Unit to comply with the performance guarantees for ramp rate control set forth [below] (the "Ramp Rate Control Performance Guarantees").] If the Microgrid Unit System fails to meet the Ramp Rate Control Performance Guarantees over the time periods set forth [below], GPA may provide written notice to Seller of the failure to meet the Ramp Rate Control Performance Guarantees and a request for Seller to take steps needed for the Energy Storage System to meet the Ramp Rate Control Performance Guarantees. In response to such a notice, Seller shall, within two (2) weeks from the date of such notice, provide GPA with a written remedial action plan that provides a detailed description of Seller's course of action and plan to meet the Ramp Rate Control Performance Guarantees and shall take steps to implement such remedial action within six (6) months of the date of such action plan; provided, however, GPA shall not be entitled to such a remedial action plan if the failure to achieve the Ramp Rate Control Performance Guarantees is due to a Force Majeure event, GPA Delay or an Event of Default by GPA. Seller's sole obligation with respect to any deficiency in the Ramp Rate Control Performance Guarantees is to follow its remedial action plan.

If ramp rate is greater than 3 MW/minute seller shall reduce plant output until ramp rate is less than 3 MW/minute. If system issues remain, GPA reserves the right to restrict Seller's plant output until seller restores operation with a ramp rate less than 3 MW/minute. The Interconnection Agreement shall define conditions for Seller's plant reduction and implementation of GPA's restrictions.

ARTICLE FIVE: SELLER FAILURE

5.1 Seller Failure.

In the event Seller fails to deliver to GPA any Quantity of Renewable Energy to which GPA is entitled in accordance with the terms of this Agreement and instead sells such Quantity of Renewable Energy to which GPA is entitled to a third party in violation of this Agreement ("Seller Failure"), then Seller shall pay to GPA the "Seller Failure Damages," which shall mean the positive difference, if any, between the Replacement Price and the Contract Price for the period of such Seller failure, times such Quantity of Renewable Energy. GPA shall calculate the Seller Failure Damages and shall provide to Seller an invoice for such amount, including a written statement explaining in reasonable detail the calculation of such amount. Seller shall pay the Seller Failure Damages not later than ten (10) days following its receipt of such an invoice from GPA. If the Replacement Price is less than the Contract Price, then the Seller Failure Damages are deemed to be zero. The Seller Failure Damages represent the sole and exclusive remedy of GPA for Seller's failure as described herein.

ARTICLE SIX: EVENTS OF DEFAULT; REMEDIES

6.1 Events of Default.

An "Event of Default" shall mean, with respect to a Party (a "Defaulting Party"), the occurrence of any of the following:

(a) The failure to make, when due, any payment required pursuant to this Agreement if such failure is not remedied within three (3) Business Days after receipt of written Notice;

(b) Any representation or warranty made by such Party herein is false or misleading in any material respect when made or when deemed made or repeated, if such failure is not remedied within thirty (30) Business Days after receipt of written Notice, or such longer time, not to exceed sixty (60) Business Days, as is reasonably required to remedy such failure, provided the Defaulting Party is employing Commercially Reasonable Efforts to achieve the remedy;

(c) The failure to perform any material covenant or obligation set forth in this Agreement (except to the extent constituting a separate Event of Default and except for such Party's obligations to deliver or receive the Renewable Energy, the remedies for which are provided in Article Five) if such failure is not remedied within thirty (30) Business Days after written Notice, or such longer time, not to exceed sixty (60) Business Days, as is reasonably required to remedy such failure, provided the Defaulting Party is employing Commercially Reasonable Efforts to achieve the remedy;

(d) Such Party becomes Bankrupt (or if the Bankruptcy is involuntary, the failure of such Party to achieve dismissal of the Bankruptcy within ninety (90) days);

(e) A Merger Event occurs with respect to such Party;

(f) If during the Term of this Agreement there have occurred three (3) or more Seller Failures as that term is used in Section 5.1;

(g) With respect to Seller, a material permit violation occurs, such violation has or is reasonably likely to result in a material adverse effect on the Seller's ability to perform its obligations under this Agreement and such violation is not remedied within fifteen (15) Business Days after Notice by either GPA or the relevant permitting authority, or such longer time, not to exceed sixty (60) Business Days, as is reasonably required to remedy such failure, provided the Defaulting Party is employing Commercially Reasonable Efforts to achieve the remedy;

(h) With respect to Seller, failure to maintain the Development Security as required pursuant to this Agreement and the failure to reinstate the same within ten (10) Business Days after Seller's receipt of written Notice thereof from GPA.

6.2 Declaration of an Early Termination Date.

If an Event of Default with respect to a Defaulting Party shall have occurred on or after the Commercial Operation Date and be continuing, the other Party (the "Non-Defaulting Party") shall have the right but not the obligation to: (i) designate a day, no earlier than the day such Notice is effective and no later than twenty (20) days after such Notice is effective, as an early termination date ("Early Termination Date") to accelerate all amounts owing between the Parties and to liquidate and terminate this Agreement between the Parties; (ii) withhold any payments due to the Defaulting Party under this Agreement as setoff against termination costs and liabilities as determined herein (and until such amounts are determined); and (iii) suspend its performance under this Agreement.

6.3 Suspension of Performance and Other Remedies.

Except as otherwise expressly provided in this Agreement, if an Event of Default shall have occurred and be continuing, the Non-Defaulting Party, upon written Notice to the Defaulting Party, shall have the right (i) to suspend performance under this Agreement; and (ii) to the extent an Event of Default shall have occurred and be continuing to exercise any remedy available at law or in equity including any specific remedies set forth in this Agreement; provided, however, that any damages shall include only the direct actual damages incurred by the Non-Defaulting Party as provided in Section 8.1.

ARTICLE SEVEN: PAYMENT AND NETTING

7.1 Billing Period.

Unless otherwise specifically agreed upon by the Parties, the calendar Month shall be the standard period for all payments under this Agreement. The Annual MicroGrid Payment shall be divided into twelve equal monthly payments each Contract Year. No later than the tenth (10^{th}) day after the end of each Month, each Party will render to the other Party an invoice (in the case of Seller, such invoice being rendered in accordance with Section 7.5) for the payment obligations of non-invoicing Party, if any, incurred hereunder during the preceding Month.

7.2 Timeliness of Payment.

Unless otherwise agreed by the Parties, all invoices under this Agreement shall be due and payable in accordance with each Party's invoice instructions on or before the later of the tenth (10th) day of each Month, or if later the tenth (10th) day after receipt of the invoice or, if such day is not a Business Day, then on the next Business Day. Each Party will make payments by electronic funds transfer, or by other mutually agreeable method(s), to the account designated by the other Party. Any amounts not paid by the due date will be deemed delinquent and will accrue interest at the Interest Rate, such interest to be calculated from and including the due date to but excluding the date the delinquent amount is paid in full.

7.3 Disputes and Adjustments of Invoices.

A Party may, in good faith, dispute the correctness of any invoice or any adjustment to an invoice, rendered under this Agreement or adjust any invoice for any arithmetic or computational error within twelve (12) Months of the date the invoice, or adjustment to an invoice, was rendered. In the event an invoice or portion thereof, or any other claim or adjustment arising hereunder, is disputed, payment of the undisputed portion of the invoice shall be required to be made when due, with Notice of the objection given to the other Party. Any invoice dispute or invoice adjustment shall be in writing and shall state the basis for the dispute or adjustment. Except as otherwise provided in this Agreement, payment of the disputed amount shall not be required until the dispute is resolved. Upon resolution of the dispute, any required payment shall be made within two (2) Business Days of such resolution along with interest accrued at the Interest Rate from and including the due date to but excluding the date paid. Inadvertent overpayments shall be returned upon request or deducted by the Party receiving such overpayment from subsequent payments, with interest accrued at the Interest Rate from and including the date of such overpayment to but excluding the date repaid or deducted by the Party receiving such overpayment. Any dispute with respect to an invoice is waived unless the other Party is notified in accordance with this Section 7.3 within twelve (12) Months after the invoice is rendered or any specific adjustment to the invoice is made. If an invoice is not rendered within twelve (12) Months after the close of the Month during which performance of a Transaction occurred, the right to payment for such performance is waived.

7.4 Metering and Other Facilities.

Seller shall be responsible, at its sole expense, for providing the Seller Metering Equipment in accordance with Good Utility Practices. In accordance with the terms of the Interconnection Agreement, the Seller may elect to have GPA provide Seller with the Seller Metering Equipment; provided, however, the cost of such meters shall be borne solely by Seller at no cost to GPA. Seller shall be solely responsible for operating, maintaining, and repairing the Seller Metering Equipment at its own expense throughout the Term of this Agreement. Seller shall inspect and test the Seller Metering Equipment upon its installation and at least once every year at Seller's expense. Seller shall give GPA reasonable advance Notice of any test, and promptly provide GPA with the results of any such test. GPA may observe the test and conduct its own tests, at GPA's expense, to verify Seller's procedures and results.

Upon an inaccurate read of the Seller Metering Equipment or if Seller knows of any material inaccuracy or defect in Seller Metering Equipment, Seller shall notify GPA in writing within forty-eight (48) hours of such defect. Seller shall be solely responsible for adjusting, repairing, replacing or recalibrating such metering device as near as practicable to a condition of zero (-0-) error, and for paying any expenses associated with such adjustment, repair,

replacement or recalibration. If a metering device fails to register or is found upon testing to be inaccurate, an adjustment will be made correcting all measurements by the inaccurate or defective metering device in the following manner:

(a) In the event that an adjustment factor cannot be reliably calculated, the Parties shall use the measurements from GPA-owned meters if they are installed, fully operational and calibrated in accordance with Good Utility Practices. If for any reason the measurements cannot be obtained from GPA owned meters, the Parties shall use data from Seller's computer monitoring system to determine the relevant measurements. If Seller's computer monitoring system is found to be inaccurate by more than two (2) percent, the Parties shall estimate the amount of the necessary adjustment using the site meteorological information for the period of the inaccuracy based upon deliveries of Renewable Energy delivered to GPA at the Delivery Point from the Facility during periods of similar operating conditions when the Seller Metering Equipment was registering accurately. The adjustment will be made for the period during which inaccurate measurements were made.

(b) If the Parties cannot agree on the actual period during which the inaccurate measurements were made, the period during which the measurements are to be adjusted will be the shorter of: (1) the last one-half of the period from the last previous test of the metering device to the test that found the metering device to be defective or inaccurate; or (2) the one hundred and eighty 180-day period immediately preceding the test that found the metering device to be defective or inaccurate.

(c) Upon determination of corrected measurements, the required payment adjustment shall be made according to the procedures set forth in Section 7.3.

7.5 Invoices.

Seller shall maintain and read the Seller Metering Equipment for measuring the Renewable Energy (including Stored Energy) delivered hereunder. For review purposes, Seller shall furnish GPA with a written invoice reflecting the Contract Price and the interval data from the Seller Metering Equipment used to calculate that invoice; and any other charges due, within ten (10) Business Days after Seller reads the Seller Metering Equipment. Seller shall furnish GPA with a written invoice reflecting the applicable portion of the Annual Microgrid Payment the tenth (10^{th}) day after the end of each Month. Such invoices may be furnished to GPA by facsimile transmission or by such other method as the Parties agree.

ARTICLE EIGHT: LIMITATIONS

8.1 Limitation of Remedies, Liability and Damages.

EXCEPT AS SET FORTH HEREIN, THERE IS NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND ANY AND ALL IMPLIED WARRANTIES ARE DISCLAIMED. THE PARTIES CONFIRM THAT THE EXPRESS REMEDIES AND MEASURES OF DAMAGES PROVIDED IN THIS AGREEMENT SATISFY THE ESSENTIAL PURPOSES HEREOF. FOR BREACH OF ANY PROVISION FOR WHICH AN EXPRESS REMEDY OR MEASURE OF DAMAGES IS PROVIDED HEREIN, SUCH EXPRESS REMEDY OR MEASURE OF DAMAGES SHALL BE THE SOLE AND EXCLUSIVE REMEDY AND THE OBLIGOR'S LIABILITY SHALL BE LIMITED AS SET FORTH IN SUCH PROVISION AND ALL OTHER REMEDIES OR DAMAGES AT LAW OR IN EQUITY ARE WAIVED. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED HEREIN OR IN A TRANSACTION, THE OBLIGOR'S LIABILITY SHALL BE LIMITED TO DIRECT ACTUAL DAMAGES ONLY, SUCH DIRECT ACTUAL DAMAGES SHALL BE THE SOLE AND EXCLUSIVE REMEDY AND ALL OTHER REMEDIES OR DAMAGES AT LAW OR IN EQUITY ARE WAIVED. UNLESS EXPRESSLY HEREIN PROVIDED, NEITHER PARTY SHALL BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY OR INDIRECT DAMAGES, LOST PROFITS OR OTHER BUSINESS INTERRUPTION DAMAGES, BY STATUTE, IN TORT OR CONTRACT, UNDER ANY INDEMNITY PROVISION OR OTHERWISE. IT IS THE INTENT OF THE PARTIES THAT THE LIMITATIONS HEREIN IMPOSED ON REMEDIES AND THE MEASURE OF DAMAGES BE WITHOUT REGARD TO THE CAUSE OR CAUSES RELATED THERETO, INCLUDING THE NEGLIGENCE OF ANY PARTY, WHETHER SUCH NEGLIGENCE BE SOLE, JOINT OR CONCURRENT, OR ACTIVE OR PASSIVE. TO THE EXTENT ANY DAMAGES REQUIRED TO BE PAID HEREUNDER ARE LIQUIDATED, THE PARTIES ACKNOWLEDGE THAT THE DAMAGES ARE DIFFICULT OR IMPOSSIBLE TO DETERMINE, OR OTHERWISE OBTAINING AN ADEQUATE REMEDY IS INCONVENIENT AND THE DAMAGES CALCULATED HEREUNDER CONSTITUTE A REASONABLE APPROXIMATION OF THE HARM OR LOSS.

Notwithstanding the foregoing, if GPA is the Defaulting Party, the Parties agree that the actual damages recoverable to Seller hereunder on account of an Event of Default by GPA shall include loss of Tax Benefits on a grossed up after tax basis, using the highest applicable United States marginal personal income tax rate.

Any assets transferred to GPA as required by the Interconnection Agreement shall require a one year warranty on all construction work and assignment of any manufacturer warranties from the transfer of such assets; provided, however, that the obligations and liability of Seller pursuant to such warranty and obligation to assign shall be subject to any limitations and exclusions set forth in the Interconnection Agreement.

ARTICLE NINE: CREDIT AND COLLATERAL REQUIREMENTS

9.1 Development Security.

In order to secure Seller's obligations prior to Commercial Operation of the Facility, hereunder, Seller shall post the Development Security in the form of a Letter of Credit or cash deposit in the amount of $2,375,805 The Development Security shall be held by GPA as security for Seller's obligations prior to the Commercial Operation Date including its obligation to satisfy the Financing Arrangement Deadline, but GPA may draw on the Development Security at any time only in the amounts and according to the schedule set forth in Section 4.4. Seller shall post the Development Security in accordance with the following terms and conditions:

(a) Seller shall post the Development Security within ten business (10) days following the Effective Date of this Agreement.

(b) If the Development Security is posted as a Letter of Credit, it shall be in substantially the form attached hereto as Appendix [F-1].

(c) Any Development Security posted in cash shall bear simple interest at a rate equal to the Interest Rate. The calculation and payment of any such interest shall be made in accordance with the procedure specified in Section 9.3 of this Agreement.

9.2 Forfeiture of Development Security.

In the event that the Commercial Operation Date does not occur on or before the Scheduled Commercial Operations Date, as extended pursuant to the terms of this Agreement, and to the extent Seller does not remit any COD Extension Payment or Daily Delay Liquidated Damages payment when due, then GPA shall be entitled to proceed against the Development Security in accordance with the terms thereof, to the extent of the amount(s) due and owing from time to time. Seller acknowledges and agrees that forfeiture of all or a portion of the Development Security, as provided herein, represents reasonable compensation to GPA for, among other things, transactions that it did not consummate because it relied on this Agreement with Seller, and GPA's potential failure to meet its applicable renewable energy portfolio requirements as a result of Seller's failure to achieve Commercial Operation by the Scheduled Commercial Operation Date. Notwithstanding the foregoing, if Seller terminates this Agreement prior to the Commercial Operation Date for the sole purpose of selling the Renewable Energy to a third party, GPA shall be entitled to both the Development Security and any other remedies available at law or in equity to the extent that GPA's actual damages exceed the value of the Development Security.

9.3 Return of Development Security.

At the end of the Term or upon the termination of this Agreement following the settlement and payment of any damages owed as a result of such termination, GPA shall return to Seller any remaining portion of the Development Security still held by GPA and to which GPA has no claim pursuant to the terms of this Agreement. If the Development Security was posted as a Letter of Credit, GPA shall return the Letter of Credit to Seller and Seller shall be entitled to immediately cancel such Letter of Credit. If the Development Security was posted in cash, GPA shall return to Seller the balance of the Development Security, together with daily interest at the Interest Rate, from and including the date that the Development Security was posted until, but not including, the date on which the Development Security is returned by GPA.

9.4 Performance Security.

In order to secure Seller's obligations after Commercial Operation of the Facility and during the Delivery Period hereunder, Seller shall post security in one of the forms contemplated below, each of which is deemed acceptable by GPA (the "Performance Security"):

(a) A Letter of Credit or cash in the amount of $4,751,610; or

(b) A Payment and Performance Bond in the amount of $4,751,610; or

(c) A subordinated second lien on the Sponsor Interest and Seller agrees to take such action as is reasonably required in order to perfect GPA's security interest in, and lien on, such collateral and any and all proceeds resulting therefrom; provided, that concurrently with the grant of such lien, GPA shall enter into such subordination, inter-creditor and other agreements with the senior financing parties as they as may reasonably require pursuant to which GPA shall agree that their rights and remedies pursuant to their second lien shall be subordinated in all respects to the senior first lien held by the financing parties; provided further, for the avoidance of doubt, there shall be no lien granted on the Tax Equity Investor Interest.

The Performance Security shall be held by GPA as security for Seller's obligations after the Commercial Operation Date and during the Delivery Period, but GPA may draw on the Performance Security at any time only in the amounts actually due and payable by Seller to GPA pursuant to this Agreement. Seller may (i) post the Performance Security by posting a combination or one or more of the above acceptable forms of credit support in an aggregate amount of $4,751,609.95, and (ii) at any time elect to substitute any form of one or more of the above acceptable forms of credit support for any existing Performance Security in which case GPA shall return the replaced Performance Security and reasonably cooperate with Seller in the exchange or cancellation of such credit support.

Seller shall post the Performance Security in accordance with the following terms and conditions:

(a) Seller shall post the Development Security within ten (10) business days following the Commercial Operation Date.

(b) If the Performance Security is posted as a Letter of Credit, it shall be in substantially the form attached hereto as Appendix [F-1].

(c) If the Performance Security is posted as a Payment and Performance Bond, it shall be in substantially the form attached hereto as Appendix [F-2].

(d) Any Performance Security posted in cash shall bear simple interest at a rate equal to the Interest Rate. The calculation and payment of any such interest shall be made in accordance with the procedure specified in Section 9.5 of this Agreement.

9.5 Return of Performance Security.

At the end of the Term or upon the termination of this Agreement following the settlement and payment of any damages owed as a result of such termination, GPA shall return to Seller any remaining portion of the Performance Security still held by GPA and to which GPA has no claim pursuant to the terms of this Agreement. If the Performance Security was posted as a Letter of Credit or a Payment and Performance Bond, then GPA shall return the Letter of Credit or Payment and Performance Bond to Seller and Seller shall be entitled to immediately cancel such Letter of Credit or Payment and Performance Bond. If the Performance Security was posted in cash, GPA shall return to Seller the balance of the Performance Security, together with daily interest at the Interest Rate, from and including the date that the Performance Security was posted until, but not including, the date on which the Performance Security is returned by GPA.

ARTICLE TEN: GOVERNMENTAL CHARGES

10.1 Cooperation.

Each Party shall use Commercially Reasonable Efforts to implement the provisions of and to administer this Agreement in accordance with the intent of the Parties to minimize all taxes, so long as neither Party is materially adversely affected by such efforts.

10.2 Governmental Charges.

Seller shall pay or cause to be paid all taxes imposed by any Government Authority ("Governmental Charges") on or with respect to the Renewable Energy or this Agreement arising prior to the Delivery Point. GPA shall pay or cause to be paid all Governmental Charges on or with respect to the Renewable Energy or this Agreement at and from the Delivery Point (other than ad valorem, franchise or income taxes which are related to the sale of the Renewable Energy and are, therefore, the responsibility of the Seller). In the event Seller is required by law or regulation to remit or pay Governmental Charges, which are GPA's responsibility hereunder, GPA shall promptly reimburse Seller for such Governmental Charges. If GPA is required by law or regulation to remit or pay Governmental Charges which are Seller's responsibility hereunder, GPA may deduct the amount of any such Governmental Charges from the sums due to Seller under Article Seven of this Agreement. Nothing shall obligate or cause a Party to pay or be liable to pay any Governmental Charges for which it is exempt under the law.

ARTICLE ELEVEN: ASSIGNMENT

11.1 Buyer Assignment.

Buyer may not assign this Agreement or assign or delegate its rights and obligations under this Agreement, in whole or in part, without Seller's consent, not to be unreasonably withheld.

11.2 Seller Assignment.

Seller may perform any of the following, without the consent of the Buyer (1) transfer, pledge, encumber, or assign this Agreement or the accounts, revenues, or proceeds hereof, in connection with any financing or other financial arrangements for the Facility, (2) transfer or assign this Agreement to any of its Affiliates in connection with a transfer of the Facility to such Affiliate, (3) transfer or assign this Agreement to any person or entity succeeding to all or substantially all of the assets of such Party, and (4) transfer or assign this Agreement to _____ or to any of its Affiliates; provided, that Seller provides Buyer prior notice of any such transfer or assignment and, with respect to any transfer to an such assignee of Seller, (A) such assignee posts replacement credit support in accordance with this Agreement, and (B) such Affiliate enters into an assignment and assumption agreement, in form and substance reasonably satisfactory to Buyer, pursuant to which Affiliate assumes all of Seller's obligations hereunder and otherwise agrees to be bound by the terms of this Agreement. Seller agrees that it will provide written notice to Buyer of any assignment of this Agreement by Seller within five (5) Business Days of the date of such assignment.

Except as stated above, neither this Agreement nor any of the rights, interests and obligations hereunder shall be assigned by Seller without the prior written consent of Buyer, which consent shall not be unreasonably withheld. Any assignment of this Agreement in violation of the foregoing shall be, at the option of Buyer, void.

11.3 Liability After Assignment.

A Party's assignment or transfer of rights or obligations pursuant to this Article 11 shall relieve said Party from any liability and financial responsibility for the performance thereof arising after any such transfer or assignment.

11.4 Transfers of Ownership.

Subject to any rights of first offer or refusal under this Agreement, during the Term, Seller shall not sell, transfer, assign or otherwise dispose of its interest in the Facility to any third-party absent (1) a transfer of this Agreement to such third-party and (2) Seller entering into an assignment and assumption agreement, in form and substance reasonably satisfactory to Buyer, with such third-party.

11.5 Successors and Assigns.

This Agreement and all of the provisions hereof are binding upon, and inure to the benefit of, the Parties and their respective successors and permitted assigns.

11.6 Collateral Assignment by Seller.

In the event that Seller pursuant to Section 11.2 (1) transfers, pledges, encumbers or collaterally assigns this Agreement to Seller's lenders, Seller shall provide written notice to Buyer of such transfer, pledge, encumbrance or assignment, including the address of Seller's lenders. In connection with any financing or refinancing of the Facility, Buyer at Seller's request shall negotiate in good faith with Seller and Seller's lenders to agree upon a reasonable direct agreement with respect to this Agreement, which shall be in form and substance reasonably agreed to by Buyer, Seller and Seller's lenders, and which shall, among other terms. include provisions substantially as follows:

(a) The Parties shall not amend or modify this Agreement in any material respect without the prior written consent of the Seller's lenders;

(b) Prior to exercising its right to terminate this Agreement as a result of an Event of Default by Seller, Buyer shall give notice of such Event of Default by Seller to the administrative agent of Seller's lenders, which Buyer has been provided written notice of; and

(c) Seller's lenders shall have the right, but not the obligation, to cure an Event of Default on behalf of Seller in accordance with the provisions of this Agreement, provided that Seller's lenders shall be provided an additional forty-five (45) days, from the end of the cure periods provided pursuant to Section 6.1, to effect a cure of such Event of Default.

ARTICLE TWELVE: MISCELLANEOUS

12.1 Term of Agreement; Conditions Precedent.

(a) The Term of this Agreement shall commence on the Effective Date and shall remain in effect for the duration of the Delivery Period, as set forth in Section 2.1, unless earlier terminated by either Party in accordance with this Agreement herein (the "Term"); provided, however, that such termination shall not affect or excuse the performance of either Party under any provision of this Agreement that by its terms survives any such termination.

(b) This Agreement shall be effective on the Effective Date provided that the Parties' obligations hereunder shall be subject to the satisfaction of the following conditions precedent:

(i) Receipt by GPA of a final, non-appealable approval of this Agreement by the Guam Public Utilities Commission ("PPA Approval");

(ii) Execution of the Interconnection Agreement by the Parties;

(iii) Receipt by GPA of a final, non-appealable approval of the Interconnection Agreement by the Guam Public Utilities Commission ("ICA Approval"); and

GPA shall submit this Agreement for approval by the Guam Public Utilities Commission within thirty (30) days of the Effective Date. GPA shall also submit the Interconnection Agreement for approval by the Guam Public Utilities Commission within thirty (30) days of the execution of the Interconnection Agreement. Each Party shall use Commercially Reasonable Efforts to satisfy the conditions precedent prior to the End Date; provided that neither Party shall be obligated to execute the Interconnection Agreement except on terms acceptable to such Party in its sole discretion. Seller shall have the right in its sole discretion to waive the conditions precedent set forth in section 12.1(b) above.

Either Party has the right to terminate this Agreement by Notice, which will be effective five (5) Business Days after such Notice is given, if the conditions precedent set forth above have not been satisfied (or waived in accordance herewith) within [**to be determined based on date of signing – between 60-120 days consistent with proposed project schedule**] days after the Effective Date ("End Date"). If either Party exercises its termination right pursuant to this Section 12.1(b), no Termination Damages will be due or owing by either Party and Seller will be entitled to a return of any Development Security provided to GPA.

12.2 Insurance.

At all times during the Term of this Agreement, Seller shall maintain at its own expense insurance policies for the Facility and its tangible assets in such amounts and against such risks and losses as are consistent with Good Utility Practices and those policies listed below. Such insurance policies shall be maintained only with insurers rated at least A- VII by MVI Best or comparable ratings agency.

- Commercial General Liability with limits of $1,000,000 including products, completed operations, and contractual for this Agreement. GPA shall be an additional insured. Seller shall grant a waiver of subrogation in favor of GPA.

- Commercial Auto Liability in the amount of $1,000,000 combined single limit for bodily injury and property damage. GPA shall be an additional insured. Seller shall grant a waiver of subrogation in favor of GPA.

- Excess Liability with limits of $5,000,000. GPA shall be an additional insured. Seller shall grant a waiver of subrogation in favor of GPA.

- Workers Compensation and Employers Liability with statutory limits and $1,000,000/$1,000,000/$1,000,000 respectively. Seller shall add a waiver of subrogation endorsement in favor of GPA.

- Pollution Liability, when applicable, with limits for $5,000,000. GPA is to be an additional insured. Seller shall grant a waiver of Subrogation in favor of GPA.

- Builder's Risk or Installation Floater, when applicable, is to be furnished by Contractor.

- Property insurance that will keep the premises, property, improvements, structures, and machinery and equipment on the premises insured, at a minimum, against with an all risk property policy for full replacement value as determined from time to time. Such insurance shall be issued by financially responsible insurers duly authorized to do business in Guam, and shall contain the standard form of waiver of subrogation. Nothing contained herein shall be construed as creating any liability or responsibility on the part of GPA for the adequacy of insurance coverage on the premises. As to any insurable risks of loss or damage to the premises not required to be insured hereunder, Seller shall bear the cost of the same. Seller shall be deemed to be self-insured as to the deductible or co-insurance amount applicable to such insurance coverage and shall pay any deductible or co-insurance amount applicable in the event of such loss or damage.

At all times after achieving COD, Seller may discontinue or otherwise cancel each of the aforementioned policies, except the following insurance policies, which shall be maintained with the limits set forth below:

- Commercial General Liability with limits of $1,000,000.00 including products, completed operations, and contractual for this Agreement. GPA shall be an additional insured. Seller shall grant a waiver of subrogation in favor of GPA.

- Excess Liability with limits of $3,000,000.00. GPA shall be an additional insured. Seller shall grant a waiver of subrogation in favor of GPA.

- Property insurance that will keep the premises, property, improvements, structures, and machinery and equipment on the premises insured, at a minimum, against with an all risk property policy for full replacement value as determined from time to time. Such insurance shall be issued by any financially responsible insurer duly authorized to do business in Guam, and shall contain the standard form of waiver of subrogation. Nothing contained herein shall be construed as creating any liability or responsibility on the part of GPA for the adequacy of insurance coverage on the premises. As to any insurable risks of loss or damage to the premises not required to be insured hereunder, Seller shall bear the cost of the same. Seller shall be deemed to be self-insured as to the deductible or co- insurance amount applicable to such insurance coverage and shall pay any deductible or co-insurance amount applicable in the event of such loss or damage.

- Seller is also required to carry Business Interruption and Extra Expense insurance in the amount of $1,000,000.00.

If the Facility is lost or damaged due to a casualty, then only if and to the extent Seller is not required to use available insurance proceeds to prepay any Facility Debt then outstanding, Seller shall re-build the Facility promptly and in a commercially reasonable manner if and to the extent technically feasible and commercially reasonable in

light of the available insurance proceeds and subject to the procurement by Seller of the consent of any lender or financing party pursuant to the Financing Documents if required thereunder; provided, however, (i) if the time to re-build the Facility would result in less than five (5) years remaining in the Delivery Period then (A) Seller shall have the option in lieu of re-building the Facility to pay to GPA the Buyout Payment and terminate this Agreement with no further costs or penalties provided that the Buyout Payment shall not in any case exceed the available insurance proceeds remaining following full prepayment of the Facility Debt, or (B) if Seller nevertheless elects to re-build the Facility then GPA shall reimburse Seller for any deductibles payable by Seller under its property insurance, and (ii) regardless of when the casualty event occurs, if Seller re-builds the Facility then the Delivery Period shall be extended for the greater of one (1) year or two (2) times the length of the interruption of the sale of Renewable Energy (pro rated based on the Minimum Production for partial interruptions), and the Contract Price shall be the price in effect, without escalation, at the beginning of the re-building period.

Within ten (10) Business Days after receipt of a request for the same from GPA, Seller shall deliver to GPA a certificate of insurance for any or all policies maintained in accordance with this Section 12.2, which certificate shall include at least the following information: (i) the name of the insurance company, policy number and expiration date; and (ii) the coverage and limits on coverage, including the amount of deductibles or self-insured retentions.

Seller shall furnish certificates of insurance and waiver of subrogation endorsement to GPA prior to commencement of construction of the Facility showing evidence of such coverage, including the statement to the effect that cancellation or termination of the insurance shall not be effective until at least thirty (30) days after receipt of written Notice to GPA. At all times Seller's insurance shall be primary and non-contributory to any other insurance that may be carried by GPA. The statement of limits of insurance coverage shall not be construed as in any way limiting the Seller's liability under this Agreement. GPA shall be an additional insured on all liability coverage and certificates of insurance shall clearly indicate such.

12.3 Indemnity.

To the extent permitted by law, each Party shall indemnify, defend and hold harmless the other Party from and against any Claims arising from or out of any event, circumstance, act or incident first occurring or existing during the period when control and title to the Renewable Energy is vested in such Party, unless a Claim is due to such Party's willful misconduct or gross negligence. To the extent permitted by law, each Party shall indemnify, defend and hold harmless the other Party against any Governmental Charges for which such Party is responsible under Article Ten. Notwithstanding anything to the contrary contained in this Agreement, no individual representative of either Party shall have any personal liability to the other Party as a result of the breach of any representation, warranty, covenant or agreement contained herein.

12.4 Site Access and Inspection of Records.

Seller shall provide GPA with reasonable access to the Facility site for purposes of review and inspection during regular business hours within a reasonable time after a request for the same is made by GPA. During such reviews and inspections, GPA representatives shall be permitted to review such records relating to the Facility and reasonably related to the performance of this Agreement, including Facility maintenance and operations logs. GPA shall have access to the Facility site for the limited purposes described herein, but Seller shall at all times remain responsible and liable for the control and operation of the Facility and the Facility site. GPA representatives shall follow Seller's safety procedures when accessing the Facility site and shall conduct themselves in a manner that will not interfere with the operation of the Facility. Seller will provide GPA with information about such safety procedures to enable GPA to comply with this requirement.

12.5 Audit.

Subject to Section 7.3, each Party has the right, at its sole expense and during normal working hours, to examine copies of the records of the other Party to the extent reasonably necessary to verify the accuracy of any statement, charge or computation made pursuant to this Agreement.

12.6 Confidentiality.

The Parties will make Commercially Reasonable Efforts to safeguard Confidential Information against disclosure by employing the same means to protect such Confidential Information as that Party uses to protect its own non-public, confidential or proprietary information, and otherwise in accordance with the provisions of this Section 12.6. Specifically, no receiving Party shall itself, or permit its employees, consultants and/or agents to disclose to any person, corporation or other entity the Confidential Information without the prior written consent of the Party providing the Confidential Information, except a receiving Party may distribute the Confidential Information to its and its Affiliates' board members, officers, employees, agents, consultants, actual or potential investors, actual or potential purchasers, actual or potential Facility lenders or financing parties, and others who have a need for such Confidential Information.

The Parties acknowledge, however, that a Party may need to disclose the Confidential Information in connection with its regulatory filings or to otherwise satisfy its governmental and regulatory requirements. In the event that a Party intends to disclose any of the Confidential Information to its regulatory authorities including, but not limited to, the Guam Public Utilities Commission, the FERC, or any employee, staff member, consultant, and/or agent of the foregoing, it shall give the other Party prompt prior written Notice of its intention so that the other Party may seek a protective order or other appropriate remedy. In addition, each Party specifically agrees not to use the other Party's name in connection with this Agreement or the Facility in any press releases, public meetings or hearings, or other public communications, including any release to any newswire service, without the express written consent of the other Party. The Parties anticipate that at some future time it may be in the best interests of one or both of them to disclose Confidential Information to the media and the Parties anticipate entering into a subsequent agreement that will govern the terms of such disclosure. The Parties expressly agree, however, that unless and until such subsequent agreement is executed between the Parties, the terms of this Agreement shall be binding with respect to such disclosure.

In the event that any Party receiving the Confidential Information becomes legally compelled (by deposition, interrogatory, request for documents, subpoena, civil investigative demand or similar process) to disclose any of the Confidential Information, the legally compelled Party shall give the other Party providing the Confidential Information prompt prior written Notice of such requirement so that the providing Party may seek a protective order or other appropriate remedy and/or waive compliance with the terms of this Agreement. In the event that such protective order or other remedy is not obtained, the providing Party waives compliance with the terms hereof.

Each Party acknowledges that the unauthorized disclosure of any Confidential Information may cause irreparable harm and significant injury that may be difficult to ascertain. Each Party therefore agrees that specific performance or injunctive relief, in addition to other legal and equitable relief, are appropriate remedies for any actual or threatened violation or breach of this Agreement, **although neither Party shall be entitled to any special, consequential, indirect or punitive damages as a result of a breach of this Agreement, whether a claim is based in contract, tort or otherwise**. The Parties agree that the respondent in any action for an injunction, specific performance decree or similar relief shall not allege or assert that the initiating Party has an adequate remedy at law in respect to the relief sought in the proceeding, nor shall the respondent seek the posting of a bond by the Party initiating the action. Under no circumstances will either Party's directors, management, employees, agents or consultants be individually liable for any damages resulting from the disclosure of Confidential Information in violation of the terms of this Agreement.

12.7 Notices.

All notices, requests, statements or payments ("Notices") shall be made as specified on Appendix B attached hereto and incorporated herein by reference. Notices (other than with respect to scheduling) shall, unless otherwise specified herein, be in writing and may be delivered by hand delivery, United States mail, overnight courier service or facsimile. Notice by facsimile or hand delivery shall be effective at the close of business on the day actually received, if received during business hours on a Business Day, and otherwise shall be effective at the close of business on the next Business Day. Notice by overnight United States mail or courier shall be effective on the next Business Day after it was sent. Notices relating to Facility operations and Scheduling, as required pursuant to Appendix H, may be given electronically and shall be deemed effective upon receipt; otherwise,

electronic notices shall not be effective unless affirmatively acknowledged in writing (including by reply e-mail) by the receiving Party. A Party may change its addresses by providing Notice of same in accordance herewith.

12.8 Purchase Option.

(a) Transfer During the Delivery Period. In the event that Seller desires to sell the Facility during the Delivery Period, Seller shall provide prior written Notice of the same to GPA, and agrees to engage in discussions with GPA during an exclusivity period with GPA if GPA desires to purchase the Facility. Within ninety (90) days following Seller's Notice to GPA of its intent to sell the Facility, GPA may deliver to Seller an indicative purchase price at which it would be willing to purchase the Facility. If GPA does not deliver the indicative purchase price within ninety (90) days, then Seller shall be free to transfer the Facility under any terms and conditions at any time thereafter. If GPA delivers the indicative purchase price within ninety (90) days, then the Parties shall negotiate exclusively for a period of up to sixty (60) days after GPA delivers the indicative purchase price. If no binding agreement is entered into by the Parties during such sixty (60)-day period then Seller shall be free to transfer the Facility to any person on materially comparable terms, including price, better than GPA's indicative offer, and neither Party shall have any further liability or obligation to the other Party in connection with such sale or as a result of the terminated negotiations. If Seller does not transfer the Facility on such basis within one (1) year following the end of the sixty (60)-day exclusive negotiation period, then the procedure in this paragraph shall apply to any subsequent sale of the Facility during the Term of this Agreement.

(b) Transfer or Extension of Delivery Period. GPA, by Notice delivered to Seller at least one hundred and eighty (180) days prior to the end of the Delivery Period, may either (i) extend the Term of this Agreement on a year-to-year basis, in which case the Contract Price during the extension of the Term shall be eighty percent (80%) of the LEAC Rate in effect from time to time during such extension (whereupon either Party may thereafter terminate this Agreement on one hundred and eighty (180) days' Notice prior to the end of any extension year), or (ii) purchase the Facility from Seller at eighty percent (80%) of the Appraisal Price, within thirty (30) days of the determination of the Appraisal Price. If GPA fails to send such Notice then this Agreement shall terminate in accordance with the terms hereof.

12.9 Alternative Dispute Resolution. All disputes arising under this Agreement are subject to the provisions of this Section 12.9.

(a) If a dispute, controversy or claim arises out of, relates, or is in connection with, this Agreement, or the breach, termination or validity thereof, whether sounding in contract, tort, unfair competition, equity, or other legal form, it shall be settled solely in the manner provided for in this Section 12.9. A meeting of the Parties shall be held within ten (10) Business Days after either Party gives the other Party written Notice of the dispute. The Notice shall set forth in reasonable detail the aggrieved Party's position and its proposal for resolution of the dispute. A representative of each Party who has authority to resolve the dispute shall be in attendance at all meetings. If the dispute is not resolved within thirty (30) days after the first meeting of the Parties, or such other period of time as to which the Parties agree, the dispute shall be settled by arbitration in the manner provided in this Section 12.9). A Party's failure to comply with this Section 12.9 shall entitle the other Party to recover its costs and reasonable attorney's fees in any judicial proceedings that circumvent this dispute resolution provision. Settlement discussions undertaken under this Section 12.9 shall be privileged and confidential and no position taken or communication made by a party during or in connection with said settlement discussions may be presented as evidence in the ensuing arbitration should settlement fail to achieve a negotiated result.

(a) Arbitration. Any disputes between the Parties and/or their respective representatives involving or arising under a Claim relating to the terms of this Agreement, or the breach thereof, may be submitted to binding arbitration, whether such Claims sound in contract, tort or otherwise. The arbitration shall be conducted in accordance with the Federal Arbitration Act and the then prevailing Commercial Arbitration Rules of the American Arbitration Association. The validity, construction, and interpretation of this Agreement to arbitrate and all procedural aspects of the arbitration conducted pursuant hereto shall be decided by the arbitrator(s). Submission shall be made upon the request of either Party. Within twenty (20) calendar days of the receipt by the respondent of service of the Notice of arbitration, the Parties shall select one (1) arbitrator by mutual consent. If the Parties are unable to agree upon a single arbitrator, there shall be three (3) arbitrators. Specifically, in the event the Parties cannot agree upon a single arbitrator, both the claimant and the respondent shall appoint one (1) arbitrator within ten (10) calendar days after written Notice by either Party that three (3) arbitrators shall be necessary. The two (2) arbitrators so appointed shall then select the third arbitrator within twenty (20) calendar days, who shall be the chairperson, of the tribunal. The chairperson shall be a person who has over eight (8) years of experience in energy-related transactions, and none of the arbitrators shall have been previously employed by either Party or have any direct interest in either Party or the subject matter of the arbitration, unless such conflict is expressly acknowledged and waived in writing by both Parties. The chairperson shall be bound to schedule and hear the dispute in its entirety within three (3) Months after his/her appointment and shall render the panel's decision within thirty (30) calendar days after the hearing concludes. It is agreed that the arbitration proceeding shall be conducted in Honolulu, Hawaii, or another neutral location mutually agreed to by the Parties; provided, however, either Party may provide all witnesses, deponents and other ancillary personnel by video telecast or other electronic media, it being the intent of the Parties to minimize expenses of conducting the arbitration. It is further agreed that the arbitrator(s) shall have no authority to award consequential, treble, exemplary, or punitive damages of any type or kind regardless of whether such damages may be available under any law or right, with the Parties hereby affirmatively waiving their rights, if any, to recover or claim such damages. The compensation and any costs and expenses of the arbitrators shall be borne equally by the Parties. Any arbitration proceedings, decision or award rendered hereunder and the validity, effect and interpretation of this arbitration provision shall be governed by the Federal Arbitration Act. The award shall be final and binding on the Parties and judgment upon any award may be entered in any court of competent jurisdiction. The Parties agree that all information exchanged as a result of any proceeding as described herein shall be deemed Confidential Information.

(b) Judicial Relief. Either Party may petition a court of appropriate jurisdiction, as described in Section 12.11, for non-monetary relief relating to any claim of breach of this Agreement in order to prevent undue hardship relating to any such claimed breach pending the appointment of an arbitration panel as described in this Section 12.9.

12.10 Governing Law.

THIS AGREEMENT AND THE RIGHTS AND DUTIES OF THE PARTIES HEREUNDER SHALL BE GOVERNED BY AND CONSTRUED, ENFORCED AND PERFORMED IN ACCORDANCE WITH THE LAWS OF GUAM**,** WITHOUT REGARD TO PRINCIPLES OF CONFLICTS OF LAW.

12.11 Jurisdiction and Costs.

Subject to the mandatory arbitration provisions herein, with respect to any proceeding in connection with any claim, counterclaim, demand, cause of action, dispute and controversy arising out of or relating to this Agreement, the Parties hereby consent to the exclusive jurisdiction of the local and federal courts in the Territory of Guam. Both Parties waive any right to trial by jury in such action. In the event such judicial proceedings are

instituted by either Party, the prevailing Party shall be entitled to award of its costs and reasonable attorneys' fees incurred in connection with such proceedings.

12.12 Financial Accounting Standards.

Under the latest interpretations of the Financial Accounting Standards Board's Interpretation No. 46(R) (FIN No. 46(R)), "Consolidation of Variable Interest Entities," GPA may be required to consolidate a Seller's entity for which GPA has entered into a long-term power purchase agreement. Seller agrees to provide all information needed in order for GPA to determine whether or not the special purpose entity which owns the Seller's generating facility must be consolidated by GPA under FIN No. 46(R). If it is determined that GPA needs to consolidate such special purpose entity, Seller agrees to provide all information needed to comply with the consolidation requirements of FIN 46(R) in a timely manner every calendar quarter. If GPA is required to consolidate the special purpose entity that owns the Seller's generating facility in its financial statements, Seller agrees to provide access to any needed records and personnel, as requested, so GPA's independent auditor, Deloitte & Touche LLP, can conduct financial statement audits in accordance with generally accepted auditing standards, as well as internal control audits in accordance with Section 404 of the Sarbanes-Oxley Act of 2002.

12.13 Forward Contract.

The Parties intend that in any relevant proceedings, each be regarded as a forwards trading merchant in respect of this Agreement and that each Transaction be a forwards contract for purposes of the United States Bankruptcy Code, 11 U.S.C. §§ 101 et seq., as amended from time to time.

12.14 General.

No delay of a Party in the exercise of, or the failure to exercise, any rights under this Agreement shall operate as a waiver of such rights, a waiver of any other rights under this Agreement or a release of the other Party from any of its obligations under this Agreement. Any provision declared or rendered unlawful by any applicable court of law or regulatory agency or deemed unlawful because of a statutory change will not otherwise affect the remaining lawful obligations that arise under this Agreement; and provided, further, that if such an event occurs, the Parties shall use their best efforts to reform this Agreement in order to give effect to the original intention of the Parties. The term "including" when used in this Agreement shall be by way of example only and shall not be considered in any way to be in limitation. The headings used herein are for convenience and reference purposes only. The indemnity provisions of this Agreement shall survive the termination of this Agreement for the period of the applicable statute of limitations. The audit provisions of this Agreement shall survive the termination of this Agreement for a period of twelve (12) Months. This Agreement shall be binding on each Party's successors and permitted assigns.

12.15 Entire Agreement; Amendment.

This Agreement, together with any appendices, schedules, and any written supplements hereto constitutes the entire agreement between the Parties relating to the subject matter hereof. This Agreement shall be considered for all purposes as prepared through the joint efforts of the Parties and shall not be construed against one Party or the other as a result of the preparation, substitution, submission or other event of negotiation, drafting or execution hereof. Except to the extent herein provided for, no amendment or modification to this Agreement shall be enforceable unless reduced to writing and executed by both Parties.

12.16 Appendices.

The following Appendices are included in this Agreement for all purposes:

Appendix A	Contract Price and Minimum Production
Appendix B	Notice Addresses
Appendix C	Ramp Rate Control and Microgrid

Appendix D	Independent Engineers
Appendix E	[Not Used]
Appendix F	Form of Letter of Credit
Appendix G	[Not Used]
Appendix H	Scheduling and Coordination
Appendix I	Base Conditions and Facility Test Protocol
Appendix J	Interconnection Agreement
Appendix K	Additional Terms regarding Ramps Rates and Dispatch Down
Appendix L	Resolutions of Consolidated Committee on Utilities

12.17 Special Provisions.

It is the policy of GPA not to discriminate on the basis of age, race, sex, color, national origin, or disability in its hiring and employment practices, or in admission to, access to, or operation of its programs, services, and activities. With regard to all aspects of this Agreement, Seller certifies and warrants it will comply with this policy. No person shall be excluded from participation in, be denied benefits of, be discriminated against in the admission or access to, or be discriminated against in treatment or employment in GPA's contracted programs or activities, on the grounds of such person's handicap or disability, age, race, color, religion, sex, national origin, or any other classification protected by federal or Guam law; nor shall any person be excluded from participation in, be denied benefits of, or be otherwise subjected to discrimination in performance of contracts with GPA or in the employment practices of GPA's contractors. Accordingly, all persons entering into contracts with GPA shall, upon request, be required to show proof of such nondiscrimination and to post notices of non-discrimination in conspicuous places that are available to all employees and applicants.

Seller hereby represents that Seller has not been retained or retained any persons to solicit or secure a contract from GPA upon an agreement or understanding for a contingent commission, percentage, or brokerage fee, except for retention of bona fide employees or bona fide established commercial selling agencies for the purpose of securing business. Breach of the provisions of this section is, in addition to a breach of this Agreement, a breach of ethical standards, which may result in civil or criminal sanction, debarment or suspension from being a contractor or subcontractor under any other contract with GPA and any Government Authority.

It shall be a breach of ethical standards for any person to offer, give or agree to give any employee or former employee, or for any employee or former employee to solicit, demand, accept or agree to accept from another person, a gratuity or an offer of employment in connection with any decision, approval, disapproval, recommendation, preparation of any part of a program requirement or a purchase request, influencing the content of any specification or procurement standard, rendering of advice, investigation, auditing or in any other advisory capacity in any proceeding or application, request for ruling, determination, claim or controversy or other particular matter, pertaining to any program requirement of a contract or subcontract or to any solicitation or proposal therefor. It shall be breach of ethical standards for any payment, gratuity or offer of employment to be made by or on behalf of a subcontractor under a contract to the prime contractor or higher tier subcontractor or a person associated therewith, as an inducement for the award of a subcontractor or order. Breach of the provisions of this paragraph is, in addition to a breach of this Agreement, a breach of ethical standards, which may result in civil or criminal sanction, debarment or suspension from being a contractor or subcontractor under any other contract with GPA and any Governmental Authority.

Seller warrants that no person providing services on behalf of Seller or in its employment who has been convicted of a sex offense under the provisions of Chapter 25 of Title 9 of the Guam Code Annotated, or convicted of an offense

defined in Article 2 of Chapter 28 of Title 9 of the Guam Code Annotated regardless of the jurisdiction in which the conviction was obtained, shall provide services on behalf of Seller relative to this Agreement. If any person employed by Seller and providing services under this Agreement is convicted subsequent to the date of this Agreement, then Seller warrants that it will notify GPA of the conviction within twenty-four hours of the conviction, and will immediately remove such convicted person from providing services under this Agreement. If Seller is found to be in violation of any of the provisions of this paragraph, then GPA shall give Notice to Seller to take corrective action. Seller shall take corrective action within twenty-four hours of Notice from GPA, and Seller shall notify GPA when action has been taken. If Seller fails to take corrective steps within twenty-four hours of Notice from GPA, then GPA in its sole discretion may suspend this Agreement temporarily.

12.18 Waiver of Immunity.

To the extent that GPA may in any jurisdiction claim for itself or its assets or revenues immunity from suit, execution, attachment (whether in aid of execution, before judgment or otherwise) or other legal process and to the extent that in any such jurisdiction there may be attributed to GPA or its assets or revenues such immunity (whether or not claimed), GPA agrees not to claim and irrevocably waives such immunity to the full extent permitted by the laws of such jurisdiction.

IN WITNESS THEREOF, the Parties hereto made and executed this Agreement, signed by their duly authorized officers or individuals, as of the dates listed below.

APPENDIX B

NOTICE ADDRESSES

APPENDIX C

RAMP RATE CONTROL & MICROGRID

I. Description of Storage Unit

A. Specifications. The Facility shall include the Storage Unit as more fully described in the technical specifications set forth in Schedule C-1 attached hereto ("Storage Technical Specifications").

B. Operations. The operation of the Storage Unit shall at all times be subject to the operating restrictions and limitation set forth in Schedule C-2 attached hereto ("Storage Operating Restrictions"). At no time will Seller be expected to operate the Storage Unit in a manner that is inconsistent with the Storage Operating Restrictions notwithstanding any contrary terms in this Agreement.

C. Metering. Seller will install and maintain a separate meter for the Storage Unit and the operation and maintenance of such meter shall be governed by section 7.4 of this Agreement. The Storage Unit will not serve station use and Seller shall separately meter station use.

D. Augmentation. Seller shall be entitled to determine the actions necessary to achieve the Guaranteed Storage Output (as defined below) from time to time, including without limitation, whether to augment the batteries included in the Storage Unit solely as determined by Seller in its discretion.

E. Ramp Rate Control. The Storage Unit shall be operated such that the charging and output of the Storage Unit does not exceed 1% of the Project's nameplate capacity per minute; provided that Seller shall only be obligated to achieve such ramp rate as set forth in the table below on an average basis during each Contract Year ("Agreed Ramp Rate").

Contract Year	Agreed Ramp Rate
1	98.00%
2	97.90%
3	97.80%
4	97.70%
5	97.60%
6	97.50%
7	97.40%
8	97.30%
9	97.20%
10	97.10%
11	97.00%
12	96.90%
13	96.80%
14	96.70%
15	96.60%
16	96.50%
17	96.40%
18	96.30%
19	96.20%

20	96.10%
21	96.00%
22	95.90%
23	95.80%
24	95.70%
25	95.60%

F. Ramp Rate Control Performance

Energy Storage System will control the ramping rate under 1% of the Facility Capacity (i.e. 600 kW) per minute and the control period [for the ramping rate] will be no more than 1 second. Detailed ramping control algorithm will be finalized through discussions between GPA and Seller after the final design of the Energy Storage System is put in place but no later than one (1) month before the commissioning test of the Facility will start.

Evaluation of Performance Verification:

During the Delivery Period, on an annual basis, Seller shall carry out the evaluation process for the performance verification of the Energy Storage System, including power test and 1% ramp-rate control test in the presence of GPA, once every year with annual data storage in the Facility database and GPA SCADA. [Note: specify what is to be measured and equation below.]

$$\left| \frac{\sum_{t-\Delta t}^{t} PV_i(x)}{\Delta t} - \frac{\sum_{t-2\Delta t}^{t-\Delta t} PV_i(x)}{\Delta t} \right| > P_{ramp}$$

Where:

- Δt = 60 seconds
- $PV_i(x)$: PV generation at time t
- i = 1,2,3, ….., 60 seconds
- P_{ramp}: active power considering ramp rate limit per 1min window

Ramp Rate Control shall be based on a plus or minus (±) 1% of rated power of 60MW plant ("Measured Value"). Ramp Rate Control Failure means a plus or minus (±) 2% of Measured Value.

Ramp Control Penalty:

Penalty will apply to failure to meet the 1% ramp per minute rate for both under and over power. Ramp-Control must be controlled within 1 second. The failure percentage is as below:

- Failure Percentage (FP) = (E1 – E2)

Symbol	Item	Unit	Remarks
E1	Guaranteed value of Succeed Ramp-Rate	%	Proposal (offer) shown in table below

E2	Output of Ramp Rate Controlled	%	1% ramping requirement with 2% measurement error

If FP is greater than 0 (zero), then Penalty shall be calculated as follow:

- Under Power Failure Penalty = (AF_U) *(C_U)*(FP_U)
- Over Power Failure Penalty= (AF_O) *(C_O)*(FP_O)

Symbol	Item	Value	Unit
C_U	Nominal Ramp Down Cost	1.96	$/min/MW
C_O	Nominal Ramp Up Cost	0.49	$/min/MW

The penalty is calculated only for the portion exceeding the guaranteed value.

Where:

- Failure Power of Under Power (FP_U) = |Ramp Rate Required Power – CP| [MW]
- Failure Power of Over Power (FP_O) = |CP – Ramp Rate Required Power| [MW]
- Controlled Power (CP) =1 minute Average Power of 1% Ramp Rate Controlled by 1 second
- Acceleration Factor of Under Power (AF_U) = 0.5
- Acceleration Factor of Over Power (AF_O) = 0.5

G. Time Shifting. As described herein, the Storage Unit will be charged during the day and discharged during the night and in this manner will provide GPA with delayed deliveries of Renewable Energy.

E. Communication Protocols. Seller and GPA shall mutually agree (in writing) upon communication protocols to allow GPA to have access to SCADA information and a real-time data feed with respect to the Facility.

II. Delivery of Stored Energy for Dispatch

A. Charging. During the Delivery Period, Seller shall (i) operate and maintain the Storage Unit, (ii) charge the Storage Unit with a portion of the Renewable Energy generated by the Project (referred to as Charging Energy), and (iii) then shall store, discharge and deliver the Stored Energy to the Delivery Point. Charging Energy shall be drawn from the Renewable Energy generated by the Project and Stored Energy when delivered shall count towards the Minimum Production of the Project each Contract Year. In no case shall Seller be penalized for a reduction in the Renewable Energy delivered based on Charging Energy used to charge the Storage Unit.

B. Discharging. Seller shall sell and deliver, or cause to be delivered, and GPA shall purchase and receive, or cause to be received, all Stored Energy discharged by the Storage Unit, at the Delivery Point, and GPA shall pay Seller the Annual Storage Payment as compensation for Seller's operation of the Storage Unit and deliver of such Quantity of Stored Energy to the Delivery Point.

Stored Energy shall be discharged each day during the Delivery Period beginning from a time out of the 6 options as follows: 6 pm, 7 pm, 8 pm, 9 pm, 10 pm and 11 pm local time and shall be delivered to the Delivery

Point except during any Excused Hours and Weather Hours. The Discharge Energy shall be fixed as 5MW and the Delivery Period ends once all remaining Energy in the Microgrid has been discharged until the designated SOC of the Microgrid has been met.

If GPA desires to change the daily start time of the dispatch of the Storage Unit at any time during the Delivery Period, then GPA shall deliver Notice to Seller of such proposed change at least seven (7) days prior to the date on which Seller is being asked to implement such change ("Dispatch Instruction"). Seller shall not be obligated to accept and implement Dispatch Instruction requested by GPA if (i) such Dispatch Instruction is not consistent with the Operating Parameters, Good Utility Practices, any Planned Outages, applicable law or any limits set forth in any permit or approval received by Seller in connection with the Facility, or (ii) implementation of such dispatch instructions would limit, interfere with or prevent Seller's operation and maintenance of the Facility and/or its performance of its obligations under this Agreement, including without limitation, Seller's obligations with respect to the Guaranteed Dispatch Rate and/or Minimum Production and any make-up amounts Seller reasonably expects to deliver in any Contract Year, or (iii) implementation of such dispatch instructions would limit, interfere with or prevent Seller's performance of its obligations under the Interconnection Agreement. Any Dispatch Instruction delivered by GPA shall remain in effect until another valid Dispatch Instruction is delivered by GPA to Seller in accordance herewith.

Contract Year	Estimated Annual Stored Energy to be discharged from the Storage Unit and delivered to the Delivery Point referred to herein as the "Guaranteed Dispatch Rate"
1	6,570
2	6,554
3	6,501
4	6,466

20	5,910
21	5,875
22	5,857
23	5,805
24	5,771
25	5,736

The annual estimate of Stored Energy to be delivered shall be subject to the terms set forth in part II.C below.

EAST\151029886.4

C. Guaranteed Storage Output. The Storage Unit is expected to allow Seller to deliver a minimum number of MWhs of Stored Energy each Contract Year as set forth above (such annual MWh production is the "Guaranteed Dispatch Rate").

Seller during the Delivery Period shall (i) during any Contract Year, deliver to GPA at least ninety percent (90%) of the Guaranteed Dispatch Rate, and (ii) for any consecutive six (6) Contract Years during the Delivery Period, deliver to GPA at least ninety percent (90%) of the aggregate Guaranteed Dispatch Rate during such period (which shall include make-up amounts generated and delivered in any years in excess of one hundred percent (100%) of the Guaranteed Dispatch Rate for such year) (any such time period a "Storage Measurement Period" and each such guaranteed amount of delivered Stored Energy during any Stored Measurement Period, the "Guaranteed Storage Output"). Any shortfall of Stored Energy (expressed in MWhs/year) from the applicable Guaranteed Storage Output during a Storage Measurement Period shall be deemed a "Storage Deficiency Amount."

The Annual Storage Payment for the following Contract Year shall be adjusted for any Storage Deficiency Amount which is not due to Excused Hours or Weather Hours (except, in the case of Weather Hours, as set forth below) ("Shortfall Adjustment"). The Shortfall Adjustment will be calculated as set forth below:

Adjusted Annual Storage Payment = (Storage Deficiency Amount/Guaranteed Dispatch Rate) x Annual Storage Payment

For purposes of clarity, Seller shall be entitled to deliver to GPA Renewable Energy or Stored Energy in the amount of such Storage Shortfall in subsequent time periods (even if such make-up amounts are in excess of the Guaranteed Dispatch Rate for such subsequent year), and this Agreement may be extended as necessary for a period of up to six (6) months to allow Seller to make up any Storage Deficiency Amount; however, there shall be no Shortfall Adjustment for such individual Contract Year unless such Stored Energy delivered hereunder is less than [ninety percent (90%) of the] Guaranteed Storage Output for the applicable Storage Measurement Period, and such shortfall is not due to Excused Hours or Weather Hours (except, in the case of Weather Hours, as set forth below).

In the event Shortfall Adjustment applies to a Storage Measurement Period of six (6) rolling Contract Years, then such Shortfall Adjustment shall be reduced by the amount of any Shortfall Adjustment paid for any Contract Year during such six (6) year Storage Measurement Period. The Shortfall Adjustment to the Annual Storage Payment shall be Seller's sole liability and obligation, and GPA's sole right and remedy, with respect to Seller's failure to deliver the Guaranteed Output during any Storage Measurement Period.

To the extent any Storage Deficiency Amount is due to Weather Hours, Seller's sole liability and GPA's sole remedy shall be to deliver thereafter Renewable Energy or Stored Energy equal to such Storage Deficiency Amount attributable to Weather Hours, calculated in accordance with Appendix K (which includes a sample calculation for a hypothetical Storage Measurement Period). If any portion of a Storage Deficiency Amount due to Weather Hours is not made up in the five (5) Contract Years beginning in the first Contract Year following the Contract Year in which the Weather Hours Storage Deficiency Amount occurred, then a Shortfall Adjustments shall be applied for the remaining Storage Deficiency Amount. Notwithstanding the foregoing, with respect to any Storage Deficiency Amount that is due to Weather Hours, Seller shall have the option, at any time prior to the expiration of the five (5) Contract Year make-up period, to elect to apply any remaining Shortfall Adjustment in its entirety. If the Storage Deficiency Amount arising as a result of Weather Hours occurs in the last five (5) years of the Delivery Period, then unless Seller exercises its option to apply any remaining Shortfall Adjustment early, the Delivery Period shall be extended as necessary, for a period of up to six (6) months, to achieve a make-up period of five (5) Contract Years as described above.

Seller shall be entitled to sell, and GPA shall purchase, quantities of Stored Energy for which Shortfall Adjustments are paid hereunder, during any remaining Storage Measurement Period during the Delivery Period. During any Contract Year, all Renewable Energy delivered by Seller to GPA in excess of the Guaranteed Dispatch Rate shall be credited against makeup of any outstanding Storage Adjustment, with oldest Storage Adjustment made up first.

To the extent any Storage Adjustment is due to Excused Hours, Seller shall be excused from any liability with respect thereto.

D. Remedies. For Seller's failure to deliver Stored Energy as required hereunder, GPA's remedies shall be as set forth in part II.C above. For GPA's failure to purchase and receive Stored Energy as required hereunder, Seller shall in addition have all other remedies available at law or in equity.

E. Title and Risk of Loss. Seller shall be responsible for any costs or charges imposed on or associated with the Stored Energy or its delivery up to the Delivery Point. GPA shall be responsible for any costs or charges imposed on or associated with Stored Energy or its receipt at and from the Delivery Point. Title to and risk of loss of Stored Energy from the Facility delivered to the Delivery Point shall transfer to GPA at the Delivery Point. Seller warrants that it will deliver to Buyer Stored Energy free and clear of all liens, security interests, claims and encumbrances or any interest therein or thereto by any person arising prior to the Delivery Point.

III. Compensation for Storage Unit Operations

Compensation to Seller for the operation of the Storage Unit during the Delivery Period shall consist of an Annual Storage Payment as set forth in Appendix A. The Annual Storage Payment shall be paid in accordance with Sections 7.1, 7.2 and 7.5 of this Agreement.

The Annual Storage Payment shall only be subject to reduction or offset for, and GPA's sole remedy for Seller's failure to deliver Stored Energy and Seller's operation of the Storage Unit shall be, the application of any Shortfall Adjustment in accordance with Section II.C above.

Schedule C-1
Technical Specifications for Storage Unit

- Microgrid Capacity: 20MW PCS, 32.5MWh usable energy (Actual installed capacity shall be determined at later stage)
- The Microgrid will normally perform the ramp rate control as required, but if the Power Plant output exceeds 22.5MW, it will charge the excess amount into the Microgrid.
- The Microgrid will also force charge the Microgrid if the weather conditions are not sufficient enough to make the Power Plant to reach production amounts above 22.5MW to ensure that the Microgrid will discharge every year the agreed on discharge amount.

EAST\151029886.4

Schedule C-2
Operating Parameters for Storage Unit

- The output that the Facility delivers to the grid shall be limited to 22.5MWac throughout the Delivery Period.
- [Seller to provide additional Operating Parameters]

FORM OF LETTER OF CREDIT

(Provided is sample which may be replaced by Bank / Financial Institution Form)

(*Bank or Financial Institution*)

_____, 201__

Irrevocable Standby Letter of Credit No. ____

Beneficiary:
Guam Power Authority
P.O. Box 2977
Guam 96932-2977
Attn:
Applicant:

Dear _____:

We hereby establish for the account of (*Company Name*) ("Applicant") our irrevocable standby letter of credit in your favor for an amount of USD 4,000,000 (Four Million United States Dollars). Applicant has advised us that this letter of credit is issued in connection with the Renewable Energy Purchase Agreement, dated as of _____, 2012, by and between the Applicant, and Guam Power Authority (the "Beneficiary"). This letter of credit shall become effective immediately on the date hereof and shall expire on _____ [*the date that is XX days after the Effective Date of the PPA*] (such date, or such later date(s) as determined by Applicant in accordance with the next succeeding sentence, the "Expiration Date"). The Expiration Date can be extended on one or more occasions by written notice to us from the Applicant, provided that such written notice is received at least 10 days prior to the Expiration Date. This letter of credit is subject to the following:

1. Funds under this letter of credit shall be made available to Beneficiary against its draft drawn on us in the form of Annex 1 hereto, accompanied by (a) a certificate in the form of Annex 2 hereto, appropriately completed and signed by an authorized officer of Beneficiary, dated the date of presentation, and (b) the original of the letter of credit (the "Accompanying Documents") and presented at our office located at (*Bank/Financial Institution Address*) attention _____. (or at any other office which may be designated by us by written notice delivered to you). A presentation under this letter of credit may be made only on a day, and during hours, in which such office is open for business (a "Business Day"). If we receive your draft and the Accompanying Documents at such office on any Business Day, all in strict conformity with the terms and conditions of this letter of credit, we will honor the same by making payment in accordance with your payment instructions on the third succeeding Business Day after presentation.

2. This letter of credit shall terminate upon the earliest to occur of (i) our receipt of a notice in the form of Annex 3 hereto signed by an authorized officer of Beneficiary, accompanied by this letter of credit for cancellation, or (ii) our close of business at our aforesaid office on the Expiration Date, or if the Expiration Date is not a Business Day, then on the succeeding Business Day. This letter of credit shall be surrendered to us by you upon the earlier of presentation or expiration.

3. This letter of credit is issued and subject to the International Standby Practices 1998 (ISP98) International Chamber of Commerce Publication No. 590, and as to matters not addressed by ISP98, shall be governed by and construed in accordance with the laws of the State of New York and application of U.S. Federal Law.

4. This letter of credit sets forth in full our undertaking, and such undertaking shall not in any way be modified, amended, amplified or limited by reference to any document, instrument or agreement referred to herein, except for Annexes 1, 2 and 3 hereto and the notices referred to herein; and any such reference shall not be deemed to incorporate herein by reference any document, instrument or agreement except as otherwise provided in this paragraph 5.

5. Communications with respect to this letter of credit shall be in writing and shall be addressed to us at the address referred to in paragraph 1 above, and shall specifically refer to this letter of credit no. _____.

Very truly yours,

_____

APPENDIX F-2

To be provided

APPENDIX G

NOT USED

APPENDIX H

SCHEDULING AND COORDINATION PROCEDURES

The Parties acknowledge that as of the Effective Date GPA has not yet established protocols for scheduling (firm or intermittent) power to permit solar projects to participate in GPA's scheduling process. As soon as practicable, Seller and GPA shall establish such protocols by mutual agreement in writing. Seller shall use Commercially Reasonable Efforts to comply with all additional reasonable protocols issued by GPA relating to available resources during the Delivery Period, and GPA shall consult with Seller (and take into account and accommodate Seller's reasonable comments) in connection with the preparation of any such additional protocols. The foregoing shall be subject to Section 4.16 of this Agreement.

1.1 General

(a) Notices. Seller shall submit to GPA notices and updates required under this Agreement regarding the Project's status, including, but not limited to, outage requests, forced outages and forced outage reports. If a web based system is not available, Seller shall promptly submit such information to GPA (in order of preference) telephonically, by electronic mail, or facsimile transmission to the personnel designated to receive such information. **Need to include PSCC requirements for Hourly Reports, Daily Production Reports, etc.**

(b) GPA Settlements. GPA shall be responsible for all settlement functions within GPA related to the Project.

(c) Resource Data Template. Seller shall provide the data to the GPA that is required for GPA's resource data template (or successor data system) for the Project consistent with this Agreement. Neither Party shall change such data without the other Party's prior written consent.

(d) Annual Delivery Schedules. No later than forty-five (45) days before (A) the first day of the first Contract Year and (B) the beginning of each calendar year for every subsequent Contract Year during the Delivery Term, Seller shall provide a non-binding forecast of each month's average-day expected Actual Renewable Energy for the following calendar year.

(e) Monthly Delivery Schedules. Ten (10) Business Days before the beginning of each month during the Delivery Term, Seller shall provide a non-binding forecast of each day's average expected Actual Renewable Energy for the following month ("Monthly Delivery Forecast") .

(f) Daily Delivery Schedules. By 5:30 AM Guam Prevailing Time on the Business Day immediately preceding the date of delivery, Seller shall provide GPA with a non-binding forecast of the Project's available energy (a "Day-Ahead Forecast"). A Day-Ahead Forecast provided in a day prior to any non-Business Day(s) shall include Schedules for the immediate day, each succeeding non-Business Day and the next Business Day. Each Day-Ahead Forecast shall clearly identify, for each hour, Seller's estimate of the Project's available energy. Seller may not change such Schedule past the deadlines provided in this section except in the event of a Forced Outage or Schedule change imposed by GPA, in which case Seller shall promptly provide GPA with a copy of any and all updates to such Schedule indicating changes from the then-current Schedule. These notices and changes to the Schedules shall be sent to GPA's on-duty scheduling coordinator. If Seller fails to provide GPA with a Day-Ahead Forecast as required herein, then for such unscheduled delivery period

only GPA shall rely on the delivery Schedule provided in the Monthly Delivery Forecast or GPA's best estimate based on information reasonably available to GPA and Seller shall be liable for Scheduling and delivery based on such Monthly Delivery Forecast or GPA's best estimate.

(g) Hourly Delivery Schedules. Notwithstanding anything to the contrary herein, in the event Seller makes a change to its Schedule on the actual date of delivery for any reason, including Forced Outages (other than a scheduling change imposed by GPA), that results in a change to its deliveries (whether in part or in whole), Seller shall notify GPA immediately by calling GPA's on-duty scheduling coordinator. Seller shall notify GPA of Forced Outages in accordance with this Agreement. Seller shall keep GPA reasonably informed of any developments that are reasonably expected to affect either the duration of the outage or the availability of the Project during or after the end of the outage.

1.2 Dispatch Down/Curtailment.

(a) GPA shall have the right to order Seller to curtail deliveries of Renewable Energy from the Project to the Delivery Point pursuant to a Notice of a Dispatch Down as defined in Appendix K delivered to Seller, provided that the value attributable to any Renewable Energy [in an aggregated quantity of more than _2% of the Minimum Production for any Contract Year] which is not delivered during such curtailment periods, whether for transmission unavailability, operational dispatch or pre-set ramping parameters or otherwise, shall be reimbursed to Seller as provided below.

(b) GPA shall have the right to order Seller to curtail deliveries of Stored Energy from the Microgrid Unit to the Delivery Point pursuant to a Notice of a Dispatch Down as defined in Appendix K delivered to Seller, provided that GPA shall remain obligated to pay Seller the complete Annual Microgrid Payment without adjustment notwithstanding such curtailments, whether for transmission unavailability, operational dispatch or pre-set ramping parameters or otherwise.

(c) Seller shall have the right in its discretion to make up any curtailed quantities of Renewable Energy as a result of a Dispatch Down ("Dispatch Down Makeup Production"), for which it is not reimbursed pursuant to this Appendix H, in the first and any subsequent Contract Year in which at least the Minimum Production is delivered and to extend the Term to the extent necessary, but not to exceed six (6) months, to make up any curtailed quantities. The Contract Price for the Contract Year in which the make-up occurs shall apply to Dispatch Down Makeup Production up to the Minimum Production amount for the Contract Year in which the Dispatch Down originally occurred. For production quantities in excess of the Minimum Production for the Contract Year in which the Dispatch Down originally occurred, the price will be the lesser of the then current LEAC Rate or the Contract Price in the Contract Year in which the make-up occurs. Production in excess of Minimum Production for any Contract Year will first be applied to any previous years' Deficiency Amounts, then to Dispatch Down Makeup Production, then treated under this Agreement as production in excess of Minimum Production.

(d) GPA shall provide to Seller all technical information necessary to justify and support each Dispatch Down.

(e) GPA shall pay Seller, on the date payment would otherwise be due in respect of the month in which any such curtailment in excess of 2% of Minimum Production for such Contract Year occurred], an amount equal to the product of the Contract Price times the amount of Renewable Energy that Seller could reasonably have delivered to

GPA but for such curtailment ("Lost Revenue"). During the Contract Year-end annual true-up process, any payments made by GPA to the Seller for production (MWh) in excess of the Minimum Production for that Contract Year, whether such production results from actual generation surpluses or Lost Revenue, will be adjusted to reflect the lesser of the Contract Price for the then current Contract Year or then current LEAC Rate. For purposes of clarification, for any given Contract Year, GPA will not be required to pay the Contract Price on amounts of production beyond the Minimum Production if the Contract Price for that Contract Year is higher than the LEAC Rate for that Contract Year. Seller agrees to reduce the Project's Renewable Energy as set forth in such a Notice of Dispatch Down that meets the requirements set forth herein.

(f) For purposes of clarification, no curtailment by GPA, as a result of a warranted failure of or defect in the interconnection facilities transferred by Seller to GPA pursuant to the Interconnection Agreement, during the one-year warranty term thereof, shall count against the 2% curtailment threshold set forth above. During the one-year warranty term of the interconnection facilities transferred, any curtailment by GPA which results from such failure of or defect in the interconnection facilities transferred will not be eligible for reimbursement by GPA to Seller, Lost Revenue payments, or Dispatch Down Makeup Production in future Contract Years.

1.3 Outage Notification.

(a) Planned Outages. Seller shall schedule Planned Outages in accordance with Good Utility Practices and with the prior written consent of GPA, which consent may not be unreasonably withheld, conditioned or delayed. Nonetheless, the Parties acknowledge that in all circumstances, Good Utility Practices shall dictate when Planned Outages should occur. Seller shall notify GPA of Seller's proposed Planned Outage schedule for the Project for the following calendar year by submitting a written Planned Outage schedule no later than October 1st of each year during the Delivery Period. The Planned Outage schedule is subject to GPA's concurrence, which concurrence may not be unreasonably withheld, conditioned or delayed. GPA shall promptly respond with its approval or with reasonable modifications to the Planned Outage schedule and Seller shall use its Commercially Reasonable Efforts in accordance with Good Utility Practices to accommodate GPA's requested modifications. Notwithstanding the submission of the Planned Outage schedule described above, Seller shall also submit a completed form of outage notification to GPA no later than fourteen (14) days prior to each Planned Outage and reasonably appropriate outage information or requests to GPA. Seller shall contact GPA with any requested changes to the Planned Outage schedule if Seller believes the Project must be shut down to conduct maintenance that cannot be delayed until the next scheduled Planned Outage consistent with Good Utility Practices. Seller shall not change its Planned Outage schedule without GPA's concurrence, not to be unreasonably withheld, conditioned or delayed.

(b) Forced Outages. Within two hours of any Forced Outage Seller shall submit a completed form of outage notification to GPA in accordance with the instructions shown on the agreed form and shall submit outage information to GPA. Seller shall not substitute Renewable Energy from any other source for the output of the Project during a Forced Outage.

(c) Coordination with GPA. GPA shall cooperate with Seller in arranging and coordinating all Project outages.

1.4 Operations Logs and Access Rights.

(a) Operations Logs. Seller shall maintain a log of all material operations and maintenance information on a daily basis. Such log shall include, but not be limited to, information on power production, efficiency, availability, maintenance performed, outages, results of inspections, manufacturer recommended services, replacements, and control settings or adjustments of equipment and protective devices. Seller shall maintain this information for at least two (2) years and shall provide this information electronically to GPA within five days of GPA's request.

(b) Access Rights. GPA, its authorized agents, employees and inspectors shall have the right of ingress to and egress from the Project during normal business hours upon reasonable advance notice and for any purposes reasonably connected with this Agreement.

APPENDIX I

BASE CONDITIONS AND FACILITY TEST PROTOCOL

[Since this bid is opened to different renewable resources GPA is requiring bidders to provide their own test protocols for GPA's review and approval.]

APPENDIX J
INTERCONNECTION AGREEMENT
(TO BE PROVIDED UPON ITS EXECUTION)

APPENDIX K

ADDITIONAL TERMS REGARDING WEATHER HOURS AND DISPATCH DOWN

WEATHER HOURS

For each applicable period, Seller shall calculate (1) the expected production of the Facility using the historical Weather Data from "WeatherBank PGUM_2004-PRES_solar data" provided in bid Amendment 2 (the "Expected Historical Production") and (2) the expected production of the Facility using the actual Weather Data (the "Expected Actual Production"). Seller than then obtain the quotient, rounded to the fourth decimal place (the "Production Factor"), equal to the Expected Actual Production divided by the Expected Historical Production. If the Production Factor is greater than one (1), then no Weather Hours shall be deemed to have occurred. However, if the Production Factor is less than one (1), then Weather Hours shall be deemed to have occurred. The portion of any Deficiency Amount (as defined in the Agreement) attributable to such Weather Hours shall be the difference equal to (A) the aggregate Minimum Production amount for that period minus (B) the product of (x) the Production Factor and (y) the aggregate Minimum Production amount for that period. The Deficiency Amount due to weather shall not be penalized.

The Deficiency Amount due to weather shall be audited annually by an independent auditor to be selected and the cost shared by both Parties.

DISPATCH DOWN

Buyer shall pay Seller, on the date payment would otherwise be due in respect of the day in which any curtailment is initiated by GPA for reasons of Dispatch Down, an amount equal to the Contract Price times the amount of Renewable Energy that Seller could reasonably have delivered to Buyer but for such Dispatch Down. The determination of the curtailed amount associated with any Dispatch Down shall be calculated as follows:

1) Identification of weather conditions for the period of Dispatch Down
   For any period the Facility was Dispatched Down, Seller shall document the Weather Data associated therewith. ("Weather Data" means solar irradiation, wind speed, and ambient temperatures.)

2) Curtailed amount calculation
   a. Seller shall use PVSyst energy simulation software or other software as agreed by the Parties to generate hypothetical generation amounts for the Dispatch Down period (curtailed amount MWh) by utilizing the Weather Data.

   b. In addition to "Annual Facility Test" (as described in Section 4.9 of this Agreement), GPA shall be entitled to check the accuracy of the equipment associated with the Weather Data once in each Contract Year as agreed with Seller.

RENEWABLE ENERGY
PURCHASE AGREEMENT
BETWEEN
GUAM POWER AUTHORITY
AND
[HANWHA ENERGY CORPORATION][2]

THIS RENEWABLE ENERGY PURCHASE AGREEMENT (the "Agreement"), effective as of last date set forth on the signature page hereto (the "Effective Date"), is entered into by and between and Guam Power Authority, ("GPA" or "Buyer") and [Hanwha Energy Corporation] [3], a _____ ("Seller"). The purpose of this Agreement is to establish the terms and conditions under which Seller shall sell and GPA shall purchase Renewable Energy and associated Renewable Energy Credits, as defined herein. In this Agreement, Seller and GPA may be individually referred to as a "Party" or collectively as "Parties."

Recitals

WHEREAS, Seller desires to sell to GPA at the Delivery Point a portion of the Renewable Energy and associated RECs from the Facility and GPA desires to buy the same from the Seller at the Delivery Point.

WHEREAS, on the date hereof, Seller and GPA have entered into a Renewable Energy Purchase Agreement as to the remaining capacity of the Facility (the "Additional PPA").

Therefore, for good and valuable consideration, including, without limitation, the covenants and agreements of the Parties contained in this Agreement, the receipt and sufficiency of which consideration is acknowledged, the Parties agree as follows:

ARTICLE ONE: DEFINITIONS

The following definitions apply to this Agreement:

1.1 "Actual Renewable Energy" means the actual output of the Facility (expressed in MWhs), measured at the Delivery Point, including all Renewable Energy and all Stored Energy, over any Production Measurement Period. Actual Renewable Energy shall be measured by the Seller Metering Equipment, and adjusted as applicable in accordance with Section 7.4.

1.2 "Affiliate" means, with respect to any party, any other party (other than an individual) that, directly or indirectly, through one or more intermediaries, controls, or is controlled by, or is under common control with, such party. For this purpose, "control" means the direct or indirect ownership of fifty percent (50%) or more of the outstanding capital stock or other equity interests having ordinary voting power.

1.3 "Annual Facility Test" has the meaning set forth in Section 4.9.

1.4 "Annual Microgrid Payment" means, as to each Contract Year, the amount set forth in Appendix A.

1.5 "Appraisal Price" means the average of three (3) appraisals of the market value of the Facility at the end of the Delivery Term, delivered by three (3) independent appraisers qualified by experience and expertise to

[2] Please note that it is expected that Hanwha Energy Corporation will establish a special-purpose entity to execute the PPA

[3] Please note that it is expected that Hanwha Energy Corporation will establish a special-purpose entity to execute the PPA

determine the arm's length market value of the Facility. If the Parties do not agree on the independent appraisers then they shall be determined by arbitration in accordance with Section 12.9.

1.6 "Bankrupt" means with respect to any entity, such entity (i) files a petition or otherwise commences, authorizes or acquiesces in the commencement of a proceeding or cause of action under any bankruptcy, insolvency, reorganization or similar law, or has any such valid petition filed or commenced against it, (ii) makes an assignment or any general arrangement for the benefit of creditors, (iii) otherwise becomes bankrupt or insolvent (however evidenced), (iv) has a liquidator, administrator, receiver, trustee, conservator or similar official appointed with respect to it or any substantial portion of its property or assets, or (v) is generally unable to pay its debts as they fall due.

1.7 "Bid Security" or "Bid Bond" means the $150,000.00, which is the amount of the security provided by Seller in connection with its initial bid to GPA for the Project.

1.8 "Business Day" means any day except a Saturday, Sunday, a Federal Reserve Bank holiday or an official Guam holiday. A Business Day shall open at 8:00 a.m. and close at 5:00 p.m. local time for the relevant Party's principal place of business. The relevant Party, in each instance unless otherwise specified, shall be the Party by whom the Notice or payment or delivery is to be received.

1.9 "Buyout Payment" means, with respect to Seller's election not to re-build the Facility pursuant to Section 12.2, an amount equal to: Minimum Production x the number of Contract Years (or portion thereof) remaining in the Delivery Period x Incremental Price

1.10 "Change Event" has the meaning set forth in Section 4.16(c).

1.11 "Charging Energy" means Renewable Energy generated by the Facility and used to charge the Microgrid Unit as contemplated in Appendix C.

1.12 "Claiming Party" has the meaning set forth in Section 4.9.

1.13 "Claims" means all claims or actions, threatened or filed and, whether groundless, false, fraudulent or otherwise, that directly or indirectly relate to the subject matter of an indemnity, and the resulting losses, damages, expenses, attorneys' fees and court costs, whether incurred by settlement or otherwise.

1.14 "COD Extension" has the meaning set forth in Section 4.2(a).

1.15 "COD Extension Payment" has the meaning set forth in Section 4.2(a).

1.16 "Commercially Reasonable" or "Commercially Reasonable Efforts" means, with respect to any purchase, sale, decision, or other action made, attempted or taken by a Party, such efforts as a reasonably prudent business would undertake for the protection of its own interest under the conditions affecting such purchase, sale, decision or other action, consistent with Good Utility Practices, including, without limitation, electric system reliability and stability or other regulatory mandates relating to renewable energy portfolio requirements, the cost of such action (including whether such cost is reasonable), the amount of notice of the need to take a particular action, the duration and type of purchase or sale or other action, and the commercial environment in which such purchase, sale, decision or other action occurs. "Commercially Reasonable" or "Commercially Reasonable Efforts" shall be reviewed and determined based upon the facts and circumstances known, or which could have been known with the exercise of reasonable efforts, at the time that a sale, purchase, or other action is taken and shall not be based upon a retroactive review of what would have been optimal at such time.

1.17 "Commercial Operation" has the meaning set forth in Section 4.1.

1.18 "Commercial Operation Date" or "COD" means the date that Commercial Operation of the Project has been achieved in accordance with Section 4.1.

1.19 "Confidential Information" means all information, whether written or oral, that is disclosed or otherwise available in connection with this Agreement or the performance by either Party of any of its duties hereunder, except any information which: (i) at the time of disclosure or thereafter is generally available to the public (other than as a result of a disclosure by any Party in violation of this Agreement); (ii) was available to any Party on a non-confidential basis from a source other than the Party hereto providing the Confidential Information, provided that such source is not bound by a confidentiality agreement that protected the Confidential Information; or (iii) has been independently acquired or developed by any Party without violating any of its obligations under this Agreement.

1.20 "Contract Price" means the price in U.S. Dollars (unless otherwise provided for) rounded to the nearest $0.01, to be paid by GPA to Seller for the purchase of the Renewable Energy, as described in Appendix A.

1.21 "Contract Year" means the annual period, beginning on the Commercial Operation Date, and renewing thereafter on each anniversary of the Commercial Operation Date.

1.22 "Conventional Energy Resource" is an energy resource that is non-renewable in nature, such as natural gas, coal, oil, and uranium, or electricity that is produced with energy resources that are not Renewable Energy resources.

1.23 "Credit Rating" means, with respect to any entity, the rating then assigned to such entity's unsecured, senior long-term debt obligations (not supported by third party credit enhancements) or if such entity does not have a rating for its senior unsecured long-term debt, then the rating then assigned to such entity as an issuer rating by S&P, Moody's or any other rating agency agreed by the Parties.

1.24 "Cure Plan" has the meaning set forth in Section 4.7.

1.25 "Daily Delay Liquidated Damages" has the meaning set forth in Section 4.2(b).

1.26 "Defaulting Party" has the meaning set forth in Section 6.1.

1.27 "Deficiency Amount" has the meaning set forth in Section 4.8

1.28 "Delivery Period" means the period of delivery under this Agreement, commencing on the Commercial Operation Date and continuing for the Term, as such period may be extended in accordance with this Agreement.

1.29 "Delivery Point" means the point at which the Renewable Energy (including Stored Energy) will be delivered and received, as specified in Section 2.1 herein, or such other delivery point as may be agreed to by the Parties in writing.

1.30 "Development Security" means the security deposit during construction of the renewable project or facility prior to Commercial Operation Date. The Development Security shall be 50% of the total projected payment for the 1st contract year based on the contractor's 1st Contract Year energy rate and the guaranteed energy production. Refer to Section 9.1 for additional requirements.

1.31 "Dispatch Down" means any curtailment is initiated by GPA for reasons other than Force Majeure or Seller Event of Default.

1.32 "Early Termination Date" has the meaning set forth in Section 6.2.

1.33 "Effective Date" means the date first set forth above.

1.34 "Eligible Renewable Energy Resources" are applications of the following defined technologies that displace Conventional Energy Resources that would otherwise be used to provide electricity to GPA's customers: biogas electricity generator, biomass electricity generator, fuel cell that use only renewable fuels, geothermal

generator, hybrid wind and solar electric generator, landfill gas generator, solar electricity resources, wind generator and such other generally accepted renewable energy resources.

1.35 "Emergency" means any abnormal interconnection or system condition (including, without limitation, equipment or transmission limitations and constraints caused by thermal limits, stability, voltage, or loop flows) that Buyer determines in accordance with Good Utility Practices): (a) requires automatic or immediate manual operation to prevent or limit loss of Buyer's system or generation supply; (b) could adversely affect the reliability of the Buyer system or generation supply; (c) could adversely affect the reliability of any interconnected electric system; or (d) could otherwise pose a threat to public safety.

1.36 "End Date" has the meaning given in Section 12.1(b).

1.37 "Environmental Attributes" means environmental characteristics that are attributable to Renewable Energy, including credits; credits towards achieving local, national or international renewable portfolio standards; green tags; Renewable Energy Credits; greenhouse gas or emissions reductions, credits, offsets, allowances or benefits; actual SO2, NOx, CO2, CO, Carbon, VOC, PM_{10}, mercury, and other emissions avoided; and any and all other green energy or other environmental benefits associated with the generation of Renewable Energy (regardless of how any present or future law or regulation attributes or allocates such characteristics). Such Environmental Attributes shall be expressed in kWh or, as applicable in the case of emissions credits, in tonne equivalent or other allowance measurement. Environmental Attributes does not include Tax Benefits, or any energy, capacity, reliability, or other power attributes used by Seller to provide electricity services.

1.38 "EPC Contractor" means the contractor(s) under the engineering, procurement and construction contract for the Project.

1.39 "Equitable Defenses" means any bankruptcy, insolvency, reorganization and other laws affecting creditors' rights generally, and with regard to equitable remedies, the discretion of the court before which proceedings to obtain same may be pending.

1.40 "Event of Default" has the meaning set forth in Section 6.1.

1.41 "Excused Hours" means the hours in the applicable Production Measurement Period (i) in which Seller has declared Force Majeure, (ii) during any Planned Outage or Forced Outage but subject to an aggregate maximum of six hours per Contract Year; (ii) in which Seller has initiated a Dispatch Down or (iii) in which Seller's delivery to GPA of Renewable Energy is adversely affected as a result of failure by GPA to perform its obligations under this Agreement or the Interconnection Agreement or in which GPA does not accept delivery of Renewable Energy for any reason.

1.42 "Facility" means all of the following: the Project, as defined in Section 2.1 of this Agreement, the purpose of which is to produce Renewable Energy including the Microgrid Unit, Seller's Interconnection Facilities and all equipment and other tangible assets, land rights and contract rights reasonably necessary for the construction, operation, and maintenance of the electric generating facility that produces the Renewable Energy being sold under this Agreement.

1.43 "Facility Capacity" has the meaning set forth in Section 2.1.

1.44 "Facility Test" has the meaning set forth in Section 4.1(e).

1.45 "Facility Debt" means the obligations of Seller or its Affiliates to any Facility lender, tax equity investor or other financing party pursuant to the Financing Documents, including without limitation, principal of, premium and interest on indebtedness, reimbursement obligations regarding letters of credit, obligations under financing leases, fees, expenses or penalties, amounts due upon acceleration, prepayment or restructuring, swap or interest rate hedging obligations and breakage costs and any claims or interest due with respect to any of the foregoing. Facility Debt does not include trade debt or obligations incurred in the ordinary course of business.

1.46 "FERC" means the Federal Energy Regulatory Commission or any successor government agency.

1.47 “Financing Documents” means the loan and credit agreements, notes, bonds, indentures, security agreements, lease financing agreements, mortgages, deeds of trust, interest rate exchanges, swap agreements and other documents relating to the development, bridge, construction and/or permanent debt financing or a tax equity investment for the Facility (including any portfolio debt financing of which the Facility is included), including any credit enhancement, credit support, working capital financing, or refinancing documents, and any and all amendments, modifications, or supplements to the foregoing that may be entered into from time to time at the discretion of Seller and/or its Affiliates in connection with development, construction, ownership, leasing, operation or maintenance of the Facility.

1.48 “Forced Outage” means the shutdown or unavailability of the Facility, or a portion thereof other than as a Planned Outage, for reasons including, but not limited to, unanticipated equipment breakdown, human error, or Emergency conditions. A Forced Outage shall not include any Outage that may be deferred consistent with Good Utility Practices and without causing safety risk damage to equipment or additional costs.

1.49 “Forced Outage Notice” has the meaning set forth in Section 4.12(b).

1.50 Force Majeure” means an event or circumstance which prevents one Party from performing its obligations under this Transaction, which event or circumstance was not anticipated as of the date the Transaction was agreed to, which is not within the reasonable control of, or the result of the negligence of, the Claiming Party, and which, by the exercise of due diligence, the Claiming Party is unable to overcome or avoid or cause to be avoided. So long as the requirements of the preceding sentence are met, a “Force Majeure” event may include, but shall not be limited to, any act of God, an act or threatened act of the public enemy, blockade, accidents of navigation or breakdown or injury of vessels, accidents to harbors, docks, canals or other assistances to, or adjuncts of, shipping or navigation, perils of the sea, air crash, shipwreck, train wrecks or other failures or delays of transportation, nuclear emergency, radioactive contamination, ionizing radiation, release of hazardous waste or materials, sabotage, invasion, riot, civil disturbance or disobedience, flood, drought, military ordinances or archaeological discoveries at the Project site, change in applicable law or interpretation or application thereof, failure or delay by any Governmental Authority in issuing or granting any required clearance, approval, arrangement, or permit, an earthquake, storm, fire, flood, tidal wave, storm, wind, explosion or any similar cataclysmic occurrence, lightning, epidemic, war (imminent, declared or otherwise), terrorism or riot. Notwithstanding the foregoing, Force Majeure shall not be based on (i) the loss of Buyer's markets; (ii) Buyer's inability economically to use or resell the Renewable Energy purchased hereunder; (iii) the loss or failure of Seller's supply, including materials or equipment, unless such loss or failure is caused by a Force Majeure event (iv) the delay in or inability of Seller to obtain financing or economic hardship of any kind; or (v) Seller's ability to sell the Renewable Energy at a price greater than the Contract Price or Buyer’s ability to purchase the Renewable Energy at a price less than the Contract Price; or (vi) strike or other labor dispute. Neither Party may raise a claim of Force Majeure based in whole or in part on curtailment by a transmission provider unless (i) such Party has contracted for firm transmission with a transmission provider for the Renewable Energy to be delivered to or received at the Delivery Point and (ii) such curtailment is due to "force majeure" or "uncontrollable force" or a similar term as defined under the transmission provider's tariff.

1.51 “Force Majeure Extension” has the meaning set forth in Section 4.2(c).

1.52 “Good Utility Practices” means any of the practices, methods and acts engaged in or approved by a significant portion of the electric utility industry during the relevant time period, or any of the practices, methods and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result of the lowest reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method or act to the exclusion of all others, but rather to be generally accepted and consistently adhered to acceptable practices, methods, or acts.

1.53 “Governmental Authority” means any federal, territorial or local government body; any governmental, quasi-governmental, regulatory or administrative agency, commission, body or other authority exercising or entitled to exercise any administrative, executive, judicial, legislative, policy, regulatory or taxing authority or power; or any court or governmental tribunal.

1.54 “Governmental Charges” has the meaning set forth in Section 10.2.

1.55 “GPA Delay” means any delay by GPA in performing an obligation under this Agreement or under the Interconnection Agreement which results in a delay to Seller achieving COD. A GPA Delay is not an Event of Default unless it is otherwise so designated in this Agreement.

1.56 “Guaranteed Output” has the meaning given in Section 4.8.

1.57 “Incremental Price” means, at the time of its calculation, the LEAC Rate minus the Contract Price, provided, however, if the LEAC Rate is less than the Contract Price then the Incremental Price shall be deemed to be zero. Sample calculations of the Incremental Price are shown in Schedule III to Appendix K.

1.58 “Independent Engineer” shall mean one of the engineering firms set forth in Appendix D hereto, and any other independent engineer or engineering firm, nationally recognized in the United States and having knowledge and expertise in the United States generation industry (including specifically the design and construction of utility scale solar photovoltaic power projects), and which is mutually agreed to by the Parties.

1.59 “Interconnection Agreement” means the agreement for interconnection service relating to the Facility between GPA and Seller, executed and delivered as of the Effective Date in the form attached hereto as Appendix J.

1.60 “Interest Rate” means, for any date, the lesser of (a) the per annum rate of interest equal to the prime lending rate as may from time to time be published in The Wall Street Journal under "Money Rates" on such day (or if not published on such day on the most recent preceding day on which published), plus two percent (2%) and (b) the maximum rate permitted by applicable law.

1.61 “kWh” means kilowatt hour.

1.62 “LEAC Rate” means the “Fuel Recovery Charge” (expressed in US$/MWh) as set forth in GPA’s most recent approved tariff in effect as of any date of determination of the LEAC Rate under this Agreement.

1.63 “Letter(s) of Credit” means one or more irrevocable standby letters of credit issued by a U.S. commercial bank or a foreign bank with a U.S. branch with such bank having a Credit Rating of at least A- from S&P or A3 from Moody's, in substantially the form set forth in Appendix [F-1] hereto; provided, however that such form may be modified by the issuing bank as long as such modifications are acceptable to the beneficiary in its sole discretion. Costs of a Letter of Credit shall be borne by the applicant for such Letter of Credit.

1.64 “Merger Event” means, with respect to a Party, that such Party consolidates or amalgamates with, or merges into or with, or transfers substantially all of its assets to another entity and (i) the resulting entity fails to assume all of the obligations of such Party hereunder or (ii) the benefits of any credit support provided pursuant to this Agreement fail to extend to the performance by such resulting, surviving or transferee entity of its obligations hereunder unless such credit support is replaced by the resulting, surviving or transferee entity in accordance with this Agreement.

1.65 “Minimum Production” has the meaning set forth in Section 4.8.

1.66 “Month” means a calendar Month. The term “Monthly” shall have a meaning correlative to a Month.

1.67 “Moody's” means Moody's Investor Services, Inc. or its successor.

1.68 “MW” or “MWh” means megawatt or megawatt hour, in each case rounded to the nearest whole MW or MWh.

1.69 “NAR” means the North American Renewables Registry.

1.70 “NAR Operating Procedures” means any and all guidelines, procedures, requirements and obligations established by the NAR, including the terms of use, operating procedures, and fee schedules, as such may be amended from time to time.

1.71 “Non-Defaulting Party” has the meaning set forth in Section 6.

1.72 "Notice” has the meaning set forth in Section 12.7.

1.73 “Outage” means the period during which the Facility or a portion thereof is out of service.

1.74 “Outside Commercial Operation Date” has the meaning set forth in Section 4.2(b).

1.75 “Payment and Performance Bond” means one or more payment and performance bonds issued by an insurance company or other institution having an investment grade Credit Rating from S&P, Moody’s or Fitch, in substantially the form set forth in Appendix [F-2] hereto; provided, however that such form may be modified by the issuing entity as long as such modifications are acceptable to the beneficiary in its sole discretion.

1.76 “Planned Outage” means any Outage that is not a Forced Outage, and refers to the shutdown or unavailability of the Facility or a portion thereof for inspection or maintenance in accordance with an advance schedule.

1.77 “Production Measurement Period” has the meaning set forth in Section 4.8.

1.78 “Project” has the meaning set forth in Section 2.1.

1.79 “QRE” means the Qualified Reporting Entity as such term is defined in the NAR Operating Procedures.

1.80 “Quantity” means the actual quantity of Renewable Energy (including Stored Energy) sold by Seller and purchased by and delivered to GPA pursuant to this Agreement. The Quantity shall be measured based on the metered data from the Seller Metering Equipment at the Delivery Point.

1.81 “Renewable Energy” means energy derived from a Renewable Energy Resource.

1.82 “Renewable Energy Credit” or “REC” means the unit created to track kWh derived from an Eligible Renewable Energy Resource or kWh equivalent of Conventional Energy Resources displaced by distributed renewable energy resources if and to the extent recognized under applicable law.

1.83 “Renewable Energy Resource” means an energy resource that is replaced rapidly by a natural, ongoing process and that is not nuclear or fossil fuel.

1.84 “Replacement Price” means the price at which GPA, acting in a Commercially Reasonable Manner, purchases electricity in place of Renewable Energy.

1.85 “S&P” means the Standard & Poor's Rating Group (a division of McGraw-Hill, Inc.) or its successor.

1.86 “SCADA” means “supervisory control and data acquisition” and shall refer to that category of software application program that can be used to gather data from the Facility remotely in real time in order to monitor Facility equipment and conditions.

1.87 “Schedule,” "Scheduled” or "Scheduling” means the actions of Seller, Buyer and/or their designated representatives, of notifying, requesting and confirming to each other the quantity and type of Renewable Energy (including Stored Energy) to be delivered on any given day or days during the Delivery Period at a specified Delivery Point.

1.88 "Scheduled Commercial Operation Date" has the meaning set forth in Section 4.2(a).

1.89 "Seller Failure" has the meaning set forth in Section 5.1.

1.90 "Seller Failure Damages" has the meaning set forth in Section 5.1.

1.91 "Seller's Interconnection Facilities" means Seller's equipment as specified in the Interconnection Agreement.

1.92 "Seller Metering Equipment" means all metering equipment and data processing equipment used to measure the Quantity delivered to the Delivery Point.

1.93 "Shortfall Damages" has the meaning set forth in Section 4.8.

1.94 "Sponsor Interest" means an upstream ownership interest held by an entity that is an Affiliate of the Seller as of the Effective Date which represents a partial indirect ownership interest in Seller and which is established in connection with a tax equity financing.

1.95 "Microgrid Unit" means the energy storage unit to be installed by Seller as part of the Facility, as contemplated in Appendix C.

1.96 "Stored Energy" means Charging Energy stored in the Microgrid Unit which is later delivered to the Delivery Point as contemplated in Appendix C.

1.97 "Tax Benefits" means any and all tax benefits arising from the ownership and operation of the Facility, including without limitation Renewable Energy related tax credits or other benefits established under Section 45 and Section 48 of the Internal Revenue Code, as amended, or any similar or successor provision of the Internal Revenue Code, or any other applicable tax law, regulation, or code.

1.98 "Tax Equity Investor Interest" means an upstream ownership interest held by a financing party (including a financial institution, insurance company or other third party not affiliated with the Seller except based on the applicable tax equity investment or other similar investments or financings) as of the Effective Date which represents a partial indirect ownership interest in Seller and which is established in connection with a tax equity financing.

1.99 "Term" has the meaning set forth in Section 12.1.

1.100 "Termination Damages" has the meaning set forth in Section 4.4.

1.101 "Test Energy" means non-firm Renewable Energy generated prior to the Commercial Operation Date, subject to immediate interruption, fluctuations or reduction/increase with no prior Notice, due to unit performance.

1.102 "Transaction" means the transaction relating to the purchase or sale of Renewable Energy as contemplated in this Agreement.

1.103 "Unit Contingent" means that the Renewable Energy (excluding Charging Energy but including Stored Energy) is intended to be supplied from the Facility as it is produced.

1.104 "Weather Hours" means the total hours in any Production Measurement Period, as applicable, in which the Facility is derated as a result of cumulative weather conditions which are outside historical average conditions for any applicable Month during the Production Measurement Period in which the deration occurs, calculated in accordance with Appendix K.

ARTICLE TWO: COMMERCIAL TERMS

2.1 Commercial Terms.

The following commercial terms apply to the Transaction that is the subject of this Agreement, each as more fully described herein:

Buyer: GPA	**Seller:** Hanwha Energy Corporation
Project: Hanwha Project B	
Delivery Point: The "Point of Interconnection" as defined in the Interconnection Agreement	
Guaranteed Annual Production (MWhs): As set forth in Appendix A	**Estimated Annual Production: (MWhs):** NOT APPLICABLE
Guaranteed Availability (%): NOT APPLICABLE	**Guaranteed Capacity (MWs):** NOT APPLICABLE
Delivery Period: Twenty-five (25) years from the Commercial Operation Date	**Contract Price ($/MWh):** See Appendix A
Renewable Energy Type: Unit Contingent (solar) and associated RECs	**Development Security:** As contemplated in Section 9.1
Day(s) of week: Monday through Sunday, including NERC holidays	**Hours:** Hour Ending 0100 – Hour Ending 2400, Monday through Sunday Chamorro Standard Time (CHST), Guam time
Commercial Operation Date: No later than 36 months after Effective Date.	
Test Energy: Seller agrees to sell and Buyer agrees to purchase all Test Energy from the Facility. The test period shall be up to six (6) months. . The price of such Test Energy for the first thirty days shall be the current LEAC Rate. The price thereafter shall be the Year 1 Contract Price set out in Appendix A. Test Energy shall be delivered in accordance with the Scheduling provisions contained herein. Both Parties agree that Seller will use Commercially Reasonable Efforts to pre-schedule the Test Energy, but Buyer shall nonetheless be obligated to accept all Test Energy up to 22.5 MW per hour of Test Energy for the period set forth above. Seller shall provide to Buyer all RECs associated with the Test Energy sold hereunder in accordance with Section 4.16.	

ARTICLE THREE: REPRESENTATIONS AND WARRANTIES

3.1 Mutual Representations and Warranties.

On the Effective Date of this Agreement, each Party represents and warrants to the other Party that:

(a) It is duly organized, validly existing and in good standing under the laws of the jurisdiction of its formation;

(b) It has all regulatory authorizations necessary for it to legally perform its obligations under this Agreement (other than permits or regulatory authorizations to be obtained by Seller for the construction, operation or maintenance of the Facility, which Seller reasonably anticipates it will be able to obtain in due course);

(c) The execution, delivery and performance of this Agreement are within its powers, have been duly authorized by all necessary action and do not violate any of the terms and conditions in its governing documents, any contracts to which it is a party or any law, rule, regulation, order or the like applicable to it, and the Agreement constitutes its legally valid and binding obligation enforceable against it in accordance with its terms, subject to any Equitable Defenses.

(d) It is not Bankrupt and there are no proceedings pending or being contemplated by it or, to its knowledge, threatened against it which would result in it being or becoming Bankrupt;

(e) There is not pending or, to its knowledge, threatened against it or any of its Affiliates any legal proceedings that could materially adversely affect its ability to perform its obligations under this Agreement;

(f) No Event of Default or potential Event of Default with respect to it has occurred and is continuing and no such event or circumstance would occur as a result of its entering into or performing its obligations under this Agreement; and

(g) It is acting for its own account, has made its own independent decision to enter into this Agreement and as to whether this Agreement is appropriate or proper for it based upon its own judgment, is not relying upon the advice or recommendations of the other Party in so doing, and is capable of assessing the merits of and understanding, and understands and accepts, the terms, conditions and risks of this Agreement;

3.2 Seller Representations and Warranties.

Seller affirmatively represents and warrants to GPA that:

(a) On the Effective Date of this Agreement, or in due course as required in accordance with the Financing Arrangement Deadline (as may be extended as provided in Section 4.3), Seller has (or reasonably expects to have in due course), good defensible title, or valid and effective leasehold rights in the case of leased property, to the Facility, free and clear of all liens, charges, claims, pledges, security interests, equities and encumbrances of any nature whatsoever other than the lien of current taxes not delinquent, liens, charges, claims, pledges, security, interests, equities and encumbrances relating to Facility Debt as provided for herein, or liens that in the aggregate do not materially detract from or interfere with the ability of Seller to deliver the Quantity of the Renewable Energy;

(b) All acts necessary to the valid execution, delivery and performance of this Agreement by Seller have or will be taken and performed as required under Seller's ordinances, bylaws, or other regulations including, but not limited to (i) the valid authority of the person

executing this Agreement to bind Seller and (ii) the Term of this Agreement does not extend beyond any limitation applicable to Seller imposed by relevant governing documents and applicable law; and

(c) Seller will have at the time of sale, title to and ownership of the RECs sold hereunder.

3.3 GPA Representations and Warranties.

GPA represents and warrants that:

(a) The Commission on Consolidated Utilities has made all certifications required by the Guam Public Utilities Commission and the Guam legislature in order for the valid execution, delivery and performance of this Agreement by GPA copies of which are attached hereto as Appendix L.

(b) Each of the PPA Approval and the ICA Approval is final, non-appealable and not subject to rehearing or other proceedings challenging its validity or enforceability.

(c) No authorizations, approvals or consents of any governmental or regulatory authority or agency or any other person, and no filings or registrations with any governmental authority or agency, are necessary for the execution, delivery or performance by GPA of this Agreement, or for the validity or enforceability thereof, except for any authorizations, approvals, consents or filings which have been made or obtained prior to the date hereof and are in full force and effect and are conclusive, binding and final.

(d) During the entire Term of the Agreement, all terms and conditions set forth in this Agreement shall be valid and enforceable against GPA.

(e) All legal, statutory and regulatory requirements and conditions necessary for the validity and enforceability of this Agreement and the obligations of GPA hereunder to purchase Renewable Energy, including, without limitation, the conditions and requirements as set forth in Title 12 of the Guam Code Annotated, Section 8306, have been satisfied, and at the time of the execution of the Agreement GPA further represents and warrants specifically as to the following: **NOTE TO GPA: GPA IS TO ENSURE THE RESOLUTIONS OF THE CCU ATTEST TO THE MATTERS SET FORTH BELOW**.

(i) Pursuant to the provisions of Public Law 30-66 (as codified in Title 12 of the Guam Code Annotated, Section 8104(n)), GPA is authorized to enter into this Agreement, together with any other agreement to be entered into by GPA and Seller as provided herein, and perform all the obligations imposed upon GPA as set forth herein, including, without limitation, the obligation to purchase Renewable Energy and pay all amounts due and owing to the Seller under the terms of this Agreement, and that no separate and specific appropriation or approval by *Liheslaturan Guahan* is required for such purpose.

(ii) This Agreement and the purchase of Renewable Energy by GPA at the time of the execution of the Agreement pursuant to the terms herein will not result in (A) costs to GPA which exceed the average cost of producing power under the islandwide power system owned and operated by GPA not inclusive of energy production from any backup diesel generators or other renewable energy sources, and (B) increased expenses and costs for GPA.

(iii) As set forth in the resolutions attached hereto as Appendix L, the Consolidated Commission on Utilities has certified that this Agreement is consistent with and does not violate any and all bond covenants applicable to and imposed upon

GPA and that the price to be paid by GPA for Renewable Energy as provided herein does not exceed GPA's actual current avoided cost.

GPA is not a party to a pooling agreement or any other agreement with the United States Department of Navy or any other federal agency, department or instrumentality ("Federal Government) which requires GPA to notify or obtain the approval of the Federal Government of this Agreement.

(iv) Any and all Renewable Energy to be purchased by GPA pursuant to the terms of this Agreement constitutes electrical power needed and required by GPA in connection with the operation and stability of the islandwide power system and to meet renewable energy portfolio standards which GPA is mandated to achieve and satisfy by law including without limitation, the mandates as set forth in Public Law 29-062 as codified in Title 12 of the Guam Code Annotated, Section 8311.

ARTICLE FOUR: PERFORMANCE REQUIREMENTS

4.1 Commercial Operation.

Seller shall achieve Commercial Operation of the Project no later than the Scheduled Commercial Operation Date except to the extent such date is extended pursuant to Section 4.2, in which case Commercial Operation shall occur on or prior to the Outside Commercial Operation Date. Commercial Operation shall be achieved as of the date on which each of the following conditions precedent has been satisfied or waived in writing by the Parties, as applicable ("Commercial Operation"):

(a) Seller shall have obtained all governmental and regulatory authorizations, including any applicable permits, required for the construction, ownership, operation and maintenance of the Project and for the sale of the Renewable Energy therefrom;

(b) Seller and Buyer shall have entered into the Interconnection Agreement;

(c) Seller shall have established SCADA information and real time data feed to enable GPA to view parameters or data points that relate to Renewable Energy data and other actual resource data for the Facility;

(d) The Microgrid Unit shall be capable of charging and discharging Renewable Energy;

(e) The Project shall in all other respects be capable of delivering the Renewable Energy to GPA at the Delivery Point;

(f) Seller shall perform at its cost a capacity test in accordance with the protocol outlined in Appendix I to determine the capacity of the Project ("Facility Test"). GPA shall receive the entire Renewable Energy from the Facility during such test. Renewable Energy deliveries during testing shall be measured at the Delivery Point.

GPA shall use all available Commercially Reasonable Efforts to assist Seller in achieving the Scheduled Commercial Operation Date. Seller shall present to GPA a certificate executed by its duly executed officer, and by an Independent Engineer as to items (c), (d) and (e), verifying that each of the foregoing conditions has been satisfied or waived in writing by the Parties and Commercial Operation shall be deemed to have occurred upon the delivery of such certificate to GPA unless GPA objects to such certificate within ten (10) Business Days of delivery thereof and such objections are either agreed by Seller or resolved in favor of GPA pursuant to Section 12.9 hereof. Upon any acceptance or deemed acceptance of Seller's certificate by GPA, all conditions, set forth above shall no longer be a condition precedent to Commercial Operation of the Project. If the Commercial Operation Date does not occur on or before the Outside Commercial Operation Date, as such date may be extended in accordance with Section 4.2 herein; either Party shall have the right to terminate the Agreement upon written Notice to the other Party. In the event of such termination by either Party, GPA shall be entitled to Termination Damages set forth in Section 4.4; provided, however, that in accordance with Section 4.2(c), GPA shall not be entitled to such Termination Damages if the Outside Commercial Operation Date is not achieved due to a Force Majeure event or a GPA Delay.

4.2 Extension of Commercial Operation Date.

(a) Planned Extension. The Parties agree that the Commercial Operation Date is expected to be No later than 36 months after Effective Date. (as extended pursuant to the terms of this Agreement, the "Scheduled Commercial Operation Date"). Seller may elect to extend the Commercial Operation Date beyond such date (the "COD Extension") by paying GPA for such extension (the "COD Extension Payment"). The COD Extension Payment shall be in the amount of fifty percent (50%) of the Shortfall Damages (based on ninety percent (90%) of the Minimum Production for the first Contract Year per day for

each day (or portion thereof) after but not including the date of the COD Extension until, but not including, the date on which the Project actually achieves Commercial Operation]. To extend the Commercial Operation Date, Seller must, as early as reasonably possible, but in no event later than fourteen (14) days prior to the first day of the proposed extension, provide GPA with Notice of its election to extend the Commercial Operation Date along with an estimate of the duration of the extension. The COD Extension Payment is in addition to and not to be considered part of the Development Security, and shall be paid to GPA at the time of the Notice hereunder. Seller's request to extend the Commercial Operation Date shall not be valid unless proper Notice and payment are timely received by GPA. No Event of Default shall be deemed to have occurred with respect to Seller's extension as provided herein, and GPA shall not have the right to terminate the Agreement or to receive Termination Damages with respect to such extension so long as Seller has provided the Notice, estimation and payment as provided in this Section 4.2(a). Seller may further extend the Commercial Operation Date beyond the original COD Extension, subject to the foregoing Notice, estimation and payment terms applicable to the original COD Extension.

Seller shall be entitled to a prompt refund, without interest, of any portion of the COD Extension Payment held by GPA which exceeds the amount required to cover the number of days by which the Commercial Operation Date was actually extended. In no event may Seller extend the Commercial Operation Date by more than ninety (90) days through the payment of the COD Extension Payment, except as provided in Section 4.2(b). In the event that the Project does not achieve Commercial Operation on or before the expiration of any COD Extension period as provided herein, either Party shall have the right to terminate the Agreement upon written Notice to the other, subject to any further extension rights pursuant to Sections 4.2(b) or (c) below. In the event of such termination by either Party in accordance with this provision, GPA shall be entitled to Termination Damages as set forth in Section 4.4 as its sole and exclusive remedy, subject to Section 4.2(c).

(b) Unplanned Extension/Additional Planned Extension. In the event that (i) the Project does not achieve Commercial Operation by the Scheduled Commercial Operation Date and Seller fails to provide sufficient Notice and/or payment in order to extend the Commercial Operation Date as provided in Section 4.2(a), or (ii) the Commercial Operation Date shall not have occurred within the ninety (90) day planned extension period provided under Section 4.2(a), then Seller may further extend the Commercial Operation Date by paying GPA damages ("Daily Delay Liquidated Damages"). The Daily Delay Liquidated Damages shall be in the amount of one hundred percent (100%) of the Shortfall Damages (based on ninety percent (90%) of the Minimum Production for the first Contract Year) per day for each day (or portion thereof) after but not including the earlier of the dates set forth in sub-clauses (i) or (ii) above, or until, but not including, the date on which the Project actually achieves Commercial Operation, and shall be payable within ten (10) Business Days following receipt of an invoice from GPA for any such Daily Delay Liquidated Damages. No Event of Default shall be deemed to have occurred with respect to Seller's extension as provided herein and GPA shall not have the right to terminate the Agreement with respect to such extension or to receive Termination Damages so long as Seller has extended the Commercial Operation Date and pays the Daily Delay Liquidated Damages as provided in this Section 4.2(b).

In no event may the Commercial Operation Date be extended more than one hundred and eighty (180) days through the payment of Daily Delay Liquidated Damages, without the express written consent of GPA. In the event that the Project does not achieve Commercial Operation on or before three hundred and sixty-five (365) days from the Scheduled Commercial Operation Date (as extended pursuant to this Agreement, the "Outside Commercial Operation Date"), then either Party shall have the right to terminate the Agreement upon written Notice to the other, subject to any further extension rights

pursuant to Section 4.2(c) below. In the event of such termination by either Party in accordance with this provision, GPA shall be entitled to Termination Damages as set forth in Section 4.4 as its sole and exclusive remedy, subject to Section 4.2(c).

(c) Additional Extension. The Scheduled Commercial Operation Date and the Outside Commercial Operation Date shall also be extended, without payment or other penalty, on a day-for-day basis for each day of delay caused by reason of Force Majeure (a "Force Majeure Extension") or by reason of GPA Delay. Any Force Majeure Extension or GPA Delay shall also extend the period of any planned or unplanned extensions pursuant to Sections 4.2(a) or (b) on a day-for-day basis for each day during the Force Majeure Extension or GPA Delay, and Seller shall not be required to pay any COD Extension Payments or Daily Delay Liquidated Damages, as applicable, for any days during the Force Majeure Extension or GPA Delay. Notwithstanding any other provision in this Agreement, if, due solely to a Force Majeure Extension and/or a GPA Delay, the Project does not achieve Commercial Operation on or before the Outside Commercial Operation Date, then the Parties by mutual agreement may terminate this Agreement without penalty or further obligation to either Party, and after one hundred and eighty 180 days following the Outside Commercial Operation Date, either Party may unilaterally terminate this Agreement without penalty or further obligation to either Party. For the sake of clarityin the event of any such termination, GPA shall not be entitled to Termination Damages.

4.3 Financing Arrangement Deadline.

Seller shall make Commercially Reasonable Efforts to secure a financing sufficient for the successful completion of the Project as and when required and procure a preliminary agreement customary for such financing (such as an engagement letter) no later than one (1) year after the Effective Date as extended day-for-day for any Force Majeure Extension or GPA Delay (the "Financing Arrangement Deadline"). After the execution of the preliminary agreement, Seller shall provide GPA with a copy of such agreement within three (3) Business Days. In the event that Seller fails to procure the execution of a preliminary agreement by the Financing Arrangement Deadline, GPA may terminate the Agreement and shall be entitled to Termination Damages set forth in Section 4.4 as its sole and exclusive remedy.

4.4 Termination Damages.

Prior to the Commercial Operation Date, Seller may terminate this Agreement at any time for its convenience. GPA shall be entitled to termination damages, payable solely from the Bid Security or the Development Security established in Section 9.1 ("Termination Damages"), in the amounts set forth in the table below, if: (a) subject to the last sentence of this Section 4.4, Seller terminates the Agreement prior to the Commercial Operation Date for any reason other than: (i) a Force Majeure event or (ii) an Event of Default by GPA; [(b) GPA terminates the Agreement as a result of Seller failing to meet any Financing Arrangement Deadline after the passage of a grace period of thirty (30) days (as extended day-for-day for any Force Majeure Extension or GPA Delay);] and/or (c) GPA terminates the Agreement as a result of Seller failing to achieve the Commercial Operation Date on or prior to the Scheduled Commercial Operation Date, as the same may have been extended pursuant to Section 4.2. The Termination Damages are designed to help compensate GPA for, among other things, transactions that it did not consummate because it relied on this Agreement with Seller, and GPA's potential failure to meet its applicable renewable energy portfolio requirements and do not constitute a penalty payment. Accordingly, Seller shall pay to GPA, from the Development Security, Termination Damages in the following amounts, based upon when the termination occurs:

Prior to Posting Date of Development Security pursuant to Section 9.1:	$0.00

[Up to Financing Arrangement Deadline]	100% of the Bid Security
[Up to six months following Financing Arrangement Deadline]	50% of Development Security
[From six months to twelve months following Financing Arrangement Deadline]	75% of Development Security
[From twelve months following Financing Arrangement Deadline]	100% of Development Security

No later than five (5) Business Days following the Financing Arrangement Deadline, GPA shall return the Bid Security to Seller, to the extent GPA has not validly claimed the Bid Security in respect of Termination Damages on or prior to such date. Notwithstanding the foregoing, in the event that Seller terminates this Agreement for any reason prior to the posting date for the Development Security as set forth in Section 9.1 herein, then Seller shall owe GPA no Termination Damages and such termination shall be without penalty to Seller.

4.5 Seller's and Buyer's Obligations.

Subject to Appendix H and Appendix C, Seller shall sell and deliver, or cause to be delivered, and GPA shall purchase and receive, or cause to be received, all Renewable Energy generated by the Facility (excluding Charging Energy but including Stored Energy when delivered, in each case, as set forth in Appendix C), at the Delivery Point, and GPA shall pay Seller the Contract Price for such Quantity of Renewable Energy (including Stored Energy) as measured by the Seller's Metering Equipment at the Delivery Point; provided that for quantities of Renewable Energy (including Stored Energy) in excess of the Estimated Annual Renewable Energy Amount, as shown in the third column of Appendix A, which are not make-up quantities for delivery deficiencies in prior Production Measurement Periods, the price payable by GPA shall be the lower of the Contract Price and the LEAC Rate.

For Seller's failure to deliver Renewable Energy as required hereunder, GPA's remedies shall be as set forth in Section 4.8. For GPA's failure to purchase and receive Renewable Energy (including Stored Energy) as required hereunder, Seller shall in addition have all other remedies available at law or in equity. Seller shall be responsible for any costs or charges imposed on or associated with the Renewable Energy (including Stored Energy) or its delivery up to the Delivery Point. GPA shall be responsible for any costs or charges imposed on or associated with Renewable Energy (including Stored Energy) or its receipt at and from the Delivery Point. Title to and risk of loss of Renewable Energy (including Stored Energy) from the Facility delivered to the Delivery Point shall transfer to GPA at the Delivery Point. Seller warrants that it will deliver to Buyer Renewable Energy (including Stored Energy) free and clear of all liens, security interests, claims and encumbrances or any interest therein or thereto by any person arising prior to the Delivery Point.

4.6 Operation of Facility.

Seller shall operate and maintain the Facility in accordance with Good Utility Practices and in accordance with the Agreed Ramp Rate as set forth in Appendix C.

4.7 Not Used.

4.8 Minimum Production.

The Facility is expected to produce a minimum number of MWhs of Renewable Energy (including Stored Energy) each Contract Year as set forth in the third column of Appendix A (such annual MWh production is the "Minimum Production"). Seller during the Delivery Period shall (i) during any Contract Year, deliver to GPA at least ninety percent (90%) of the Minimum Production (which calculated amounts are set forth in the fourth column

of Appendix A), and (ii) for any consecutive six (6) Contract Years during the Delivery Period, deliver to GPA at least ninety-five percent (95%) of the aggregate Minimum Production during such period (which shall include make-up amounts generated and delivered in any years in excess of one hundred percent (100%) of the Minimum Production for such year) (any such time period a "Production Measurement Period" and each such guaranteed amount of delivered Renewable Energy during any Production Measurement Period, the "Guaranteed Output"). Any shortfall of Renewable Energy (expressed in MWhs/year) from the applicable Guaranteed Output during a Production Measurement Period shall be deemed a "Deficiency Amount." For the avoidance of doubt, (i) Stored Energy delivered to the Delivery Point shall count towards Seller's achievement of the Minimum Production during each Production Measurement Period, and (ii) Charging Energy shall not be delivered by Seller and shall not count towards any Deficiency Amount as it is used to charge the Microgrid Unit as contemplated in Appendix C.

GPA shall be entitled to receive damages for any Deficiency Amount ("Shortfall Damages") which are not due to Excused Hours or Weather Hours (except, in the case of Weather Hours, as set forth below). Shortfall Damages shall be calculated as follows on an annual basis at the end of each Contract Year (and [in accordance with the example set forth in Schedule I to Appendix K].):

Shortfall Damages = Deficiency Amount x Incremental Price.

For purposes of clarity, if Actual Renewable Energy (including Stored Energy) for any given Contract Year is less than the Minimum Production for that year (even if due to Excused Hours or Weather Hours), there shall be a "Shortfall," and Seller shall be entitled to deliver to GPA Renewable Energy in the amount of such Shortfall in subsequent time periods (even if such make-up amounts are in excess of the Minimum Production for such subsequent year), and this Agreement may be extended as necessary for a period of up to six (6) months to allow Seller to make up any Shortfalls; however, there shall be no Shortfall Damages owing to GPA for such individual Contract Year unless such Actual Renewable Energy is less than the Guaranteed Output for the applicable Production Measurement Period, and such shortfall is not due to Excused Hours or Weather Hours (except, in the case of Weather Hours, as set forth below).

In the event Shortfall Damages are due for a Production Measurement Period of six (6) rolling Contract Years, then such Shortfall Damages shall be reduced by the amount of any Shortfall Damages paid for any Contract Year during such six (6) year Production Measurement Period. Seller's payment of Shortfall Damages shall be Seller's sole liability and obligation, and GPA's sole right and remedy, with respect to Seller's failure to deliver the Guaranteed Output during any Production Measurement Period.

To the extent any Deficiency Amount is due to Weather Hours, Seller's sole liability and GPA's sole remedy shall be to deliver thereafter Renewable Energy equal to such Deficiency Amount attributable to Weather Hours, calculated in accordance with Appendix K (which includes a sample calculation for a hypothetical Production Measurement Period). If any portion of a Deficiency Amount due to Weather Hours is not made up in the five (5) Contract Years beginning in the first Contract Year following the Contract Year in which the Weather Hours Deficiency Amount occurred, then Seller shall pay Shortfall Damages for the remaining Deficiency Amount. Notwithstanding the foregoing, with respect to any Deficiency Amount that is due to Weather Hours, Seller shall have the option, at any time prior to the expiration of the five (5) Contract Year make-up period, to pay any remaining associated Shortfall Damages in their entirety. If the Deficiency Amount arising as a result of Weather Hours occurs in the last five (5) years of the Delivery Period, then unless Seller exercises its option to pay the Deficiency Amount early, the Delivery Period shall be extended as necessary, for a period of up to six (6) months, to achieve a make-up period of five (5) Contract Years as described above. The Contract Price for such Renewable Energy shall be the Contract Price in effect in the Contract Year in which the Deficiency Amount due to Weather Hours accrued.

Seller shall be entitled to sell, and GPA shall purchase, quantities of Renewable Energy for which Shortfall Damages are paid hereunder, during any remaining Production Measurement Period during the Delivery Period. The price therefore shall be the Contract Price in effect at the time the Shortfall Damages accrued. During any Contract Year, all Renewable Energy delivered by Seller to GPA in excess of the Minimum Production shall be credited against makeup of any outstanding Deficiency Amounts, with oldest Deficiency Amounts made up first.

To the extent any Deficiency Amount is due to Excused Hours, Seller shall be excused from any liability with respect thereto.

Notwithstanding the foregoing, in the event that the Delivery Point is unavailable for any reason other than due to GPA's electric system, Seller's obligation to supply and sell, and GPA's obligation to accept and purchase, Renewable Energy shall be limited to such Renewable Energy that is actually deliverable from the Facility to the Delivery Point during such period except this paragraph shall not apply in the case of Excused Hours or an Event of Default by either Party.

4.9 Facility Testing.

In addition to the Facility Test referenced in Section 4.1(e), the capacity of the Facility shall be tested during each Contract Year during the Delivery Period (the "Annual Facility Test"). Seller shall notify GPA of the specific date on which it intends to conduct the Annual Facility Test at least ten (10) Business Days in advance and shall permit GPA to be present at such test. GPA shall have the right to receive copies of the results of the Annual Facility Test, which shall be conducted in accordance with the protocol set forth in Appendix I. Any dispute regarding the results of the Annual Facility Test shall be resolved as set forth in Section 12.9 of this Agreement. GPA shall receive, in accordance with Section 4.5, the entire Renewable Energy from the Facility during any Annual Facility Test or re-test. Renewable Energy deliveries during testing shall be measured at the Delivery Point.

4.10 Scheduling.

Seller agrees to supply at the Delivery Point all Renewable Energy produced by the Project, net of Renewable Energy self-generated and consumed at the Facility, and net of any generation losses prior to the Delivery Point, up to the Facility Capacity, in accordance with the scheduling and coordination procedures set out in Appendix H. GPA agrees to take at the Delivery Point all Renewable Energy tendered by Seller in accordance with the foregoing sentence. The Schedules and estimates provided pursuant to this Section 4.10 shall be made by Seller in good faith and based on information available to it at such time, but in no event shall such Schedules be binding on Seller nor shall Seller be liable for any inaccuracies in such Schedules.

4.11 Force Majeure.

To the extent either Party is prevented by Force Majeure from carrying out, in whole or part, its obligations under this Transaction and such Party (the "Claiming Party") gives Notice and details of the Force Majeure to the other Party as soon as practicable, then the Claiming Party shall be excused from the performance of its obligations with respect to such Transaction (other than the obligation to make payments then due or becoming due hereunder). The Claiming Party shall remedy the Force Majeure with all reasonable dispatch. The non-Claiming Party shall not be required to perform or resume performance of its obligations to the Claiming Party corresponding to the obligations of the Claiming Party excused by Force Majeure.

4.12 Facility Outages and Maintenance Scheduling.

(a) Planned Outages. Seller shall provide written Notice to GPA prior to conducting any Planned Outages of the Facility. Within ninety (90) days prior to the Commercial Operation Date, as the same may be extended in accordance with the provisions of Section 4.2, and on or before the first day of each subsequent Contract Year, Seller shall provide GPA with a schedule of such proposed Planned Outages. The proposed Planned Outages schedule shall be submitted electronically to GPA, using a reasonably acceptable format provided by GPA. Such format is subject to change from time-to-time during the Term of this Agreement by agreement of the Parties, but will generally describe the nature of the Outage, the expected duration, and any other pertinent information that will assist GPA in planning for the decreased output of the Facility as a result of the Outage.

GPA shall promptly review Seller's proposed schedule and may request modifications within thirty (30) days of GPA's receipt of such schedule. Changes to the schedule may

be requested by either Party and each Party shall make Commercially Reasonable Efforts to accommodate such changes, provided further that Seller shall have no obligation to agree to GPA's proposed modifications or revisions to any Planned Outage schedule.

Notwithstanding any of the foregoing, Seller shall not commence a Planned Outage that is expected to result in an Outage of ten percent (10%) or more of the Facility without notifying GPA of the Planned Outage at least five (5) Business Days prior to the start of such Planned Outage.

(b) Forced Outages. In the event of any Forced Outage, Seller shall promptly notify GPA of the same. Seller shall immediately notify GPA verbally and shall then, within twenty-four (24) hours thereafter, provide written Notice to GPA (the "Forced Outage Notice"). The Forced Outage Notice shall be submitted electronically to GPA, using a reasonably acceptable format provided by GPA. Such format is subject to change from time-to-time during the Term of this Agreement by agreement of the Parties, but will generally describe the nature of the Outage, the expected duration, and any other pertinent information that will assist GPA in planning for the decreased output of the Facility as a result of the Outage. Seller shall return the Facility to service as soon as possible, consistent with Good Utility Practices, after the Forced Outage ceases to exist.

(c) GPA Parts Inventory. To the extent GPA maintains an inventory of parts or components that are used or useful in the Facility and provided it can prudently do so under its own ordinary course operating practices and restrictions, GPA shall cooperate with Seller in a commercially reasonable manner by making such parts or components available to Seller at its request during the period of time Seller is obtaining replacement parts or components for the Facility in order to maximize output of Renewable Energy. If Seller obtains a replacement part or component from GPA, it shall at GPA's option either replace such part or component with the new part or component ordered by Seller or return the borrowed part or component to GPA at such time as Seller obtains the replacement. Seller shall bear the installation, transportation and labor charges relating to GPA's replacement parts or components, and if the parts or components are returned to GPA then Seller shall reimburse GPA for any damage to such parts or components while in Seller's possession.

4.13 Operating Status Reports.

From the Effective Date of this Agreement, through the date of Commercial Operation, Seller shall provide GPA with Monthly reports regarding material data pertaining to the operation of the Facility. The operations data is generally identified as performance, Outage, and risk data and shall be sent electronically to GPA using a reasonably acceptable format provided by GPA. The operations data report format may be modified by agreement of the Parties from time-to-time during the Term of this Agreement.

4.14 Resource Quality Reporting: Forecasting.

Seller shall provide to GPA at its request copies of non-proprietary resource quality data that could reasonably be expected to affect, in any material manner, the operation and/or productivity of the Facility, whether produced, compiled or otherwise generated by Seller or any third party in a Commercially Reasonable manner, so that GPA can evaluate the expected performance of the Facility. Seller shall provide such data as it is produced or otherwise made available to Seller. Upon Commercial Operation of the Facility, to the extent generated or procured by Seller, Seller shall also provide to GPA Monthly and day-ahead forecasting information for the Facility. Such information shall be in a format agreed to by the Parties and include, among other things: Seller's forecasts for the performance of the Facility based on Facility specifications, weather-based forecasting, and weather-related studies. Such information, which will be used by GPA solely for evaluation, Scheduling, and other purposes related to this Agreement, shall be provided as available. In no event shall the data and/or information provided to GPA pursuant to this Section 4.14 be binding upon Seller, nor shall Seller be liable for any penalties, charges or other damages based on the inaccuracy of such data or information.

4.15 Permit Violations.

Seller shall at all times during the Term of this Agreement maintain and comply with all applicable permits for the development, ownership and maintenance of the Facility in all material respects. As soon as practicable after the occurrence of any event known to Seller that would constitute or is reasonably likely to lead to a violation of any applicable permit, but in no event more than ten (10) Business Days thereafter, Seller shall provide GPA with written Notice of the same.

4.16 Change in Technical Requirements.

The Parties agree that, from and after the Effective Date, if Seller is required at any time to comply with new or modified technical or other performance requirements for the Facility or any material portion thereof (or in the manner any such facilities are to be operated or maintained) and such addition to or change in the above standards causes an increase in Seller's actual costs to perform in excess of $25,000 in the aggregate, then the Parties shall negotiate in good faith to agree upon an adjustment to the Contract Price and/or the Annual Microgrid Payment, as applicable, to compensate Seller for such increased costs. Such a change in the technical or performance requirements may arise as a result of the scheduling protocols or the communication protocols to be established by GPA pursuant to Appendix H or any other protocols or regulations established by GPA, requirements imposed by the transmission provider or pursuant to the Interconnection Agreement, requirements imposed by GPA or another Governmental Authority pursuant to or in connection with this Agreement, among other circumstances.

Seller will deliver prompt notice of the occurrence of a change in technical or performance requirements which has or is reasonably expected to result in the additional actual costs described above. If, on the date which is forty-five (45) days following Seller's delivery of notice to GPA, the Parties are unable to agree upon an adjustment to the Contract Price and/or the Annual Microgrid Payment, as applicable, which compensates Seller for such additional costs and is otherwise mutually acceptable, then Supplier may submit such dispute for resolution pursuant to Section 12.9.

4.17 Delivery of RECs.

(a) Use of North American Renewables Registry. At least ten (10) days prior to COD, Seller shall transfer to GPA the authority to create, own and transfer all Environmental Attributes associated with the Renewable Energy produced by the Facility, by executing and delivering the form entitled "Generator Owner's Designation of Responsible Party" published by NAR, wherein Seller shall designate GPA as the "responsible party" for all matters relating to the creation, ownership, and transfer of any RECS. Thereafter, GPA shall be responsible for all obligations relating to creating and transferring RECs and Seller shall have no further obligations or liabilities with respect thereto, provided, however, that Seller shall reimburse to GPA its costs of creating and maintaining the NAR account and NAR's fees charged to transfer the RECs, up to an aggregate maximum amount of $5,000 per annum. In the event this Agreement is terminated for any reason, the Parties agree to each consent to the termination of such designation in accordance with NAR procedures.

(b) GPA Registration as a QRE. GPA shall be the QRE for the Facility as required by NAR and shall comply with any and all NAR Operating Procedures relating to the registration and operation as a QRE and the reporting of generation data from the Facility to NAR. As the QRE, each month upon receipt of an invoice and associated interval metering data from Seller in accordance with Section 7.5 herein, GPA shall report such data to NAR within three (3) Business Days following receipt of such data. The Parties shall cooperate to ensure that the Seller Metering Equipment and the resulting interval metering data meet the NAR requirements for metering equipment and generation data.

(c) Change Event. During the Term, in the event that (i) the NAR Operating Procedures are amended or changed such that it becomes impossible for the Parties to utilize NAR as the REC tracking method and/or for GPA to continue as "responsible party" for purposes of

creating, owning and transferring RECs attributable to the Facility; (ii) the fees or charges imposed by NAR on either Seller or GPA to utilize the NAR REC tracking system are materially increased such that use of the NAR REC tracking system becomes uneconomic or infeasible; or (iii) the NAR REC tracking system is eliminated (each one individually, a "Change Event"), then the Parties shall promptly negotiate in good faith to reform the terms of this Agreement in order to give effect to the original intention of the Parties to the extent reasonable under the circumstances, including utilizing an alternative method for transferring RECs to GPA, but in no case shall Seller's cost with respect thereto exceed $5,000 per annum.

4.18 Ramp Rate Control Performance.

During the Delivery Period, Seller shall cause the Microgrid Unit to comply with the performance guarantees for ramp rate control set forth [below] (the "Ramp Rate Control Performance Guarantees").] If the Microgrid Unit System fails to meet the Ramp Rate Control Performance Guarantees over the time periods set forth [below], GPA may provide written notice to Seller of the failure to meet the Ramp Rate Control Performance Guarantees and a request for Seller to take steps needed for the Energy Storage System to meet the Ramp Rate Control Performance Guarantees. In response to such a notice, Seller shall, within two (2) weeks from the date of such notice, provide GPA with a written remedial action plan that provides a detailed description of Seller's course of action and plan to meet the Ramp Rate Control Performance Guarantees and shall take steps to implement such remedial action within six (6) months of the date of such action plan; provided, however, GPA shall not be entitled to such a remedial action plan if the failure to achieve the Ramp Rate Control Performance Guarantees is due to a Force Majeure event, GPA Delay or an Event of Default by GPA. Seller's sole obligation with respect to any deficiency in the Ramp Rate Control Performance Guarantees is to follow its remedial action plan.

If ramp rate is greater than 3 MW/minute seller shall reduce plant output until ramp rate is less than 3 MW/minute. If system issues remain, GPA reserves the right to restrict Seller's plant output until seller restores operation with a ramp rate less than 3 MW/minute. The Interconnection Agreement shall define conditions for Seller's plant reduction and implementation of GPA's restrictions.

ARTICLE FIVE: SELLER FAILURE

5.1 Seller Failure.

In the event Seller fails to deliver to GPA any Quantity of Renewable Energy to which GPA is entitled in accordance with the terms of this Agreement and instead sells such Quantity of Renewable Energy to which GPA is entitled to a third party in violation of this Agreement ("Seller Failure"), then Seller shall pay to GPA the "Seller Failure Damages," which shall mean the positive difference, if any, between the Replacement Price and the Contract Price for the period of such Seller failure, times such Quantity of Renewable Energy. GPA shall calculate the Seller Failure Damages and shall provide to Seller an invoice for such amount, including a written statement explaining in reasonable detail the calculation of such amount. Seller shall pay the Seller Failure Damages not later than ten (10) days following its receipt of such an invoice from GPA. If the Replacement Price is less than the Contract Price, then the Seller Failure Damages are deemed to be zero. The Seller Failure Damages represent the sole and exclusive remedy of GPA for Seller's failure as described herein.

ARTICLE SIX: EVENTS OF DEFAULT; REMEDIES

6.1 Events of Default.

An "Event of Default" shall mean, with respect to a Party (a "Defaulting Party"), the occurrence of any of the following:

(a) The failure to make, when due, any payment required pursuant to this Agreement if such failure is not remedied within three (3) Business Days after receipt of written Notice;

(b) Any representation or warranty made by such Party herein is false or misleading in any material respect when made or when deemed made or repeated, if such failure is not remedied within thirty (30) Business Days after receipt of written Notice, or such longer time, not to exceed sixty (60) Business Days, as is reasonably required to remedy such failure, provided the Defaulting Party is employing Commercially Reasonable Efforts to achieve the remedy;

(c) The failure to perform any material covenant or obligation set forth in this Agreement (except to the extent constituting a separate Event of Default and except for such Party's obligations to deliver or receive the Renewable Energy, the remedies for which are provided in Article Five) if such failure is not remedied within thirty (30) Business Days after written Notice, or such longer time, not to exceed sixty (60) Business Days, as is reasonably required to remedy such failure, provided the Defaulting Party is employing Commercially Reasonable Efforts to achieve the remedy;

(d) Such Party becomes Bankrupt (or if the Bankruptcy is involuntary, the failure of such Party to achieve dismissal of the Bankruptcy within ninety (90) days);

(e) A Merger Event occurs with respect to such Party;

(f) If during the Term of this Agreement there have occurred three (3) or more Seller Failures as that term is used in Section 5.1;

(g) With respect to Seller, a material permit violation occurs, such violation has or is reasonably likely to result in a material adverse effect on the Seller's ability to perform its obligations under this Agreement and such violation is not remedied within fifteen (15) Business Days after Notice by either GPA or the relevant permitting authority, or such longer time, not to exceed sixty (60) Business Days, as is reasonably required to remedy such failure, provided the Defaulting Party is employing Commercially Reasonable Efforts to achieve the remedy;

(h) With respect to Seller, failure to maintain the Development Security as required pursuant to this Agreement and the failure to reinstate the same within ten (10) Business Days after Seller's receipt of written Notice thereof from GPA.

6.2 Declaration of an Early Termination Date.

If an Event of Default with respect to a Defaulting Party shall have occurred on or after the Commercial Operation Date and be continuing, the other Party (the "Non-Defaulting Party") shall have the right but not the obligation to: (i) designate a day, no earlier than the day such Notice is effective and no later than twenty (20) days after such Notice is effective, as an early termination date ("Early Termination Date") to accelerate all amounts owing between the Parties and to liquidate and terminate this Agreement between the Parties; (ii) withhold any payments due to the Defaulting Party under this Agreement as setoff against termination costs and liabilities as determined herein (and until such amounts are determined); and (iii) suspend its performance under this Agreement.

6.3 Suspension of Performance and Other Remedies.

Except as otherwise expressly provided in this Agreement, if an Event of Default shall have occurred and be continuing, the Non-Defaulting Party, upon written Notice to the Defaulting Party, shall have the right (i) to suspend performance under this Agreement; and (ii) to the extent an Event of Default shall have occurred and be continuing to exercise any remedy available at law or in equity including any specific remedies set forth in this Agreement; provided, however, that any damages shall include only the direct actual damages incurred by the Non-Defaulting Party as provided in Section 8.1.

ARTICLE SEVEN: PAYMENT AND NETTING

7.1 Billing Period.

Unless otherwise specifically agreed upon by the Parties, the calendar Month shall be the standard period for all payments under this Agreement. The Annual MicroGrid Payment shall be divided into twelve equal monthly payments each Contract Year. No later than the tenth (10^{th}) day after the end of each Month, each Party will render to the other Party an invoice (in the case of Seller, such invoice being rendered in accordance with Section 7.5) for the payment obligations of non-invoicing Party, if any, incurred hereunder during the preceding Month.

7.2 Timeliness of Payment.

Unless otherwise agreed by the Parties, all invoices under this Agreement shall be due and payable in accordance with each Party's invoice instructions on or before the later of the tenth (10th) day of each Month, or if later the tenth (10th) day after receipt of the invoice or, if such day is not a Business Day, then on the next Business Day. Each Party will make payments by electronic funds transfer, or by other mutually agreeable method(s), to the account designated by the other Party. Any amounts not paid by the due date will be deemed delinquent and will accrue interest at the Interest Rate, such interest to be calculated from and including the due date to but excluding the date the delinquent amount is paid in full.

7.3 Disputes and Adjustments of Invoices.

A Party may, in good faith, dispute the correctness of any invoice or any adjustment to an invoice, rendered under this Agreement or adjust any invoice for any arithmetic or computational error within twelve (12) Months of the date the invoice, or adjustment to an invoice, was rendered. In the event an invoice or portion thereof, or any other claim or adjustment arising hereunder, is disputed, payment of the undisputed portion of the invoice shall be required to be made when due, with Notice of the objection given to the other Party. Any invoice dispute or invoice adjustment shall be in writing and shall state the basis for the dispute or adjustment. Except as otherwise provided in this Agreement, payment of the disputed amount shall not be required until the dispute is resolved. Upon resolution of the dispute, any required payment shall be made within two (2) Business Days of such resolution along with interest accrued at the Interest Rate from and including the due date to but excluding the date paid. Inadvertent overpayments shall be returned upon request or deducted by the Party receiving such overpayment from subsequent payments, with interest accrued at the Interest Rate from and including the date of such overpayment to but excluding the date repaid or deducted by the Party receiving such overpayment. Any dispute with respect to an invoice is waived unless the other Party is notified in accordance with this Section 7.3 within twelve (12) Months after the invoice is rendered or any specific adjustment to the invoice is made. If an invoice is not rendered within twelve (12) Months after the close of the Month during which performance of a Transaction occurred, the right to payment for such performance is waived.

7.4 Metering and Other Facilities.

Seller shall be responsible, at its sole expense, for providing the Seller Metering Equipment in accordance with Good Utility Practices. In accordance with the terms of the Interconnection Agreement, the Seller may elect to have GPA provide Seller with the Seller Metering Equipment; provided, however, the cost of such meters shall be borne solely by Seller at no cost to GPA. Seller shall be solely responsible for operating, maintaining, and repairing the Seller Metering Equipment at its own expense throughout the Term of this Agreement. Seller shall inspect and test the Seller Metering Equipment upon its installation and at least once every year at Seller's expense. Seller shall give GPA reasonable advance Notice of any test, and promptly provide GPA with the results of any such test. GPA may observe the test and conduct its own tests, at GPA's expense, to verify Seller's procedures and results.

Upon an inaccurate read of the Seller Metering Equipment or if Seller knows of any material inaccuracy or defect in Seller Metering Equipment, Seller shall notify GPA in writing within forty-eight (48) hours of such defect. Seller shall be solely responsible for adjusting, repairing, replacing or recalibrating such metering device as near as practicable to a condition of zero (-0-) error, and for paying any expenses associated with such adjustment, repair,

replacement or recalibration. If a metering device fails to register or is found upon testing to be inaccurate, an adjustment will be made correcting all measurements by the inaccurate or defective metering device in the following manner:

(a) In the event that an adjustment factor cannot be reliably calculated, the Parties shall use the measurements from GPA-owned meters if they are installed, fully operational and calibrated in accordance with Good Utility Practices. If for any reason the measurements cannot be obtained from GPA owned meters, the Parties shall use data from Seller's computer monitoring system to determine the relevant measurements. If Seller's computer monitoring system is found to be inaccurate by more than two (2) percent, the Parties shall estimate the amount of the necessary adjustment using the site meteorological information for the period of the inaccuracy based upon deliveries of Renewable Energy delivered to GPA at the Delivery Point from the Facility during periods of similar operating conditions when the Seller Metering Equipment was registering accurately. The adjustment will be made for the period during which inaccurate measurements were made.

(b) If the Parties cannot agree on the actual period during which the inaccurate measurements were made, the period during which the measurements are to be adjusted will be the shorter of: (1) the last one-half of the period from the last previous test of the metering device to the test that found the metering device to be defective or inaccurate; or (2) the one hundred and eighty 180-day period immediately preceding the test that found the metering device to be defective or inaccurate.

(c) Upon determination of corrected measurements, the required payment adjustment shall be made according to the procedures set forth in Section 7.3.

7.5 Invoices.

Seller shall maintain and read the Seller Metering Equipment for measuring the Renewable Energy (including Stored Energy) delivered hereunder. For review purposes, Seller shall furnish GPA with a written invoice reflecting the Contract Price and the interval data from the Seller Metering Equipment used to calculate that invoice; and any other charges due, within ten (10) Business Days after Seller reads the Seller Metering Equipment. Seller shall furnish GPA with a written invoice reflecting the applicable portion of the Annual Microgrid Payment the tenth (10^{th}) day after the end of each Month. Such invoices may be furnished to GPA by facsimile transmission or by such other method as the Parties agree.

ARTICLE EIGHT: LIMITATIONS

8.1 Limitation of Remedies, Liability and Damages.

EXCEPT AS SET FORTH HEREIN, THERE IS NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND ANY AND ALL IMPLIED WARRANTIES ARE DISCLAIMED. THE PARTIES CONFIRM THAT THE EXPRESS REMEDIES AND MEASURES OF DAMAGES PROVIDED IN THIS AGREEMENT SATISFY THE ESSENTIAL PURPOSES HEREOF. FOR BREACH OF ANY PROVISION FOR WHICH AN EXPRESS REMEDY OR MEASURE OF DAMAGES IS PROVIDED HEREIN, SUCH EXPRESS REMEDY OR MEASURE OF DAMAGES SHALL BE THE SOLE AND EXCLUSIVE REMEDY AND THE OBLIGOR'S LIABILITY SHALL BE LIMITED AS SET FORTH IN SUCH PROVISION AND ALL OTHER REMEDIES OR DAMAGES AT LAW OR IN EQUITY ARE WAIVED. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED HEREIN OR IN A TRANSACTION, THE OBLIGOR'S LIABILITY SHALL BE LIMITED TO DIRECT ACTUAL DAMAGES ONLY, SUCH DIRECT ACTUAL DAMAGES SHALL BE THE SOLE AND EXCLUSIVE REMEDY AND ALL OTHER REMEDIES OR DAMAGES AT LAW OR IN EQUITY ARE WAIVED. UNLESS EXPRESSLY HEREIN PROVIDED, NEITHER PARTY SHALL BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY OR INDIRECT DAMAGES, LOST PROFITS OR OTHER BUSINESS INTERRUPTION DAMAGES, BY STATUTE, IN TORT OR CONTRACT, UNDER ANY INDEMNITY PROVISION OR OTHERWISE. IT IS THE INTENT OF THE PARTIES THAT THE LIMITATIONS HEREIN IMPOSED ON REMEDIES AND THE MEASURE OF DAMAGES BE WITHOUT REGARD TO THE CAUSE OR CAUSES RELATED THERETO, INCLUDING THE NEGLIGENCE OF ANY PARTY, WHETHER SUCH NEGLIGENCE BE SOLE, JOINT OR CONCURRENT, OR ACTIVE OR PASSIVE. TO THE EXTENT ANY DAMAGES REQUIRED TO BE PAID HEREUNDER ARE LIQUIDATED, THE PARTIES ACKNOWLEDGE THAT THE DAMAGES ARE DIFFICULT OR IMPOSSIBLE TO DETERMINE, OR OTHERWISE OBTAINING AN ADEQUATE REMEDY IS INCONVENIENT AND THE DAMAGES CALCULATED HEREUNDER CONSTITUTE A REASONABLE APPROXIMATION OF THE HARM OR LOSS.

Notwithstanding the foregoing, if GPA is the Defaulting Party, the Parties agree that the actual damages recoverable to Seller hereunder on account of an Event of Default by GPA shall include loss of Tax Benefits on a grossed up after tax basis, using the highest applicable United States marginal personal income tax rate.

Any assets transferred to GPA as required by the Interconnection Agreement shall require a one year warranty on all construction work and assignment of any manufacturer warranties from the transfer of such assets; provided, however, that the obligations and liability of Seller pursuant to such warranty and obligation to assign shall be subject to any limitations and exclusions set forth in the Interconnection Agreement.

ARTICLE NINE: CREDIT AND COLLATERAL REQUIREMENTS

9.1 Development Security.

In order to secure Seller's obligations prior to Commercial Operation of the Facility, hereunder, Seller shall post the Development Security in the form of a Letter of Credit or cash deposit in the amount of $2,375,805 The Development Security shall be held by GPA as security for Seller's obligations prior to the Commercial Operation Date including its obligation to satisfy the Financing Arrangement Deadline, but GPA may draw on the Development Security at any time only in the amounts and according to the schedule set forth in Section 4.4. Seller shall post the Development Security in accordance with the following terms and conditions:

(a) Seller shall post the Development Security within ten business (10) days following the Effective Date of this Agreement.

(b) If the Development Security is posted as a Letter of Credit, it shall be in substantially the form attached hereto as Appendix [F-1].

(c) Any Development Security posted in cash shall bear simple interest at a rate equal to the Interest Rate. The calculation and payment of any such interest shall be made in accordance with the procedure specified in Section 9.3 of this Agreement.

9.2 Forfeiture of Development Security.

In the event that the Commercial Operation Date does not occur on or before the Scheduled Commercial Operations Date, as extended pursuant to the terms of this Agreement, and to the extent Seller does not remit any COD Extension Payment or Daily Delay Liquidated Damages payment when due, then GPA shall be entitled to proceed against the Development Security in accordance with the terms thereof, to the extent of the amount(s) due and owing from time to time. Seller acknowledges and agrees that forfeiture of all or a portion of the Development Security, as provided herein, represents reasonable compensation to GPA for, among other things, transactions that it did not consummate because it relied on this Agreement with Seller, and GPA's potential failure to meet its applicable renewable energy portfolio requirements as a result of Seller's failure to achieve Commercial Operation by the Scheduled Commercial Operation Date. Notwithstanding the foregoing, if Seller terminates this Agreement prior to the Commercial Operation Date for the sole purpose of selling the Renewable Energy to a third party, GPA shall be entitled to both the Development Security and any other remedies available at law or in equity to the extent that GPA's actual damages exceed the value of the Development Security.

9.3 Return of Development Security.

At the end of the Term or upon the termination of this Agreement following the settlement and payment of any damages owed as a result of such termination, GPA shall return to Seller any remaining portion of the Development Security still held by GPA and to which GPA has no claim pursuant to the terms of this Agreement. If the Development Security was posted as a Letter of Credit, GPA shall return the Letter of Credit to Seller and Seller shall be entitled to immediately cancel such Letter of Credit. If the Development Security was posted in cash, GPA shall return to Seller the balance of the Development Security, together with daily interest at the Interest Rate, from and including the date that the Development Security was posted until, but not including, the date on which the Development Security is returned by GPA.

9.4 Performance Security.

In order to secure Seller's obligations after Commercial Operation of the Facility and during the Delivery Period hereunder, Seller shall post security in one of the forms contemplated below, each of which is deemed acceptable by GPA (the "Performance Security"):

(a) A Letter of Credit or cash in the amount of $4,751,610; or

(b) A Payment and Performance Bond in the amount of $4,751,610; or

(c) A subordinated second lien on the Sponsor Interest and Seller agrees to take such action as is reasonably required in order to perfect GPA's security interest in, and lien on, such collateral and any and all proceeds resulting therefrom; provided, that concurrently with the grant of such lien, GPA shall enter into such subordination, inter-creditor and other agreements with the senior financing parties as they as may reasonably require pursuant to which GPA shall agree that their rights and remedies pursuant to their second lien shall be subordinated in all respects to the senior first lien held by the financing parties; provided further, for the avoidance of doubt, there shall be no lien granted on the Tax Equity Investor Interest.

The Performance Security shall be held by GPA as security for Seller's obligations after the Commercial Operation Date and during the Delivery Period, but GPA may draw on the Performance Security at any time only in the amounts actually due and payable by Seller to GPA pursuant to this Agreement. Seller may (i) post the Performance Security by posting a combination or one or more of the above acceptable forms of credit support in an aggregate amount of $4,751,609.95, and (ii) at any time elect to substitute any form of one or more of the above acceptable forms of credit support for any existing Performance Security in which case GPA shall return the replaced Performance Security and reasonably cooperate with Seller in the exchange or cancellation of such credit support.

Seller shall post the Performance Security in accordance with the following terms and conditions:

(a) Seller shall post the Development Security within ten (10) business days following the Commercial Operation Date.

(b) If the Performance Security is posted as a Letter of Credit, it shall be in substantially the form attached hereto as Appendix [F-1].

(c) If the Performance Security is posted as a Payment and Performance Bond, it shall be in substantially the form attached hereto as Appendix [F-2].

(d) Any Performance Security posted in cash shall bear simple interest at a rate equal to the Interest Rate. The calculation and payment of any such interest shall be made in accordance with the procedure specified in Section 9.5 of this Agreement.

9.5 Return of Performance Security.

At the end of the Term or upon the termination of this Agreement following the settlement and payment of any damages owed as a result of such termination, GPA shall return to Seller any remaining portion of the Performance Security still held by GPA and to which GPA has no claim pursuant to the terms of this Agreement. If the Performance Security was posted as a Letter of Credit or a Payment and Performance Bond, then GPA shall return the Letter of Credit or Payment and Performance Bond to Seller and Seller shall be entitled to immediately cancel such Letter of Credit or Payment and Performance Bond. If the Performance Security was posted in cash, GPA shall return to Seller the balance of the Performance Security, together with daily interest at the Interest Rate, from and including the date that the Performance Security was posted until, but not including, the date on which the Performance Security is returned by GPA.

ARTICLE TEN: GOVERNMENTAL CHARGES

10.1 Cooperation.

Each Party shall use Commercially Reasonable Efforts to implement the provisions of and to administer this Agreement in accordance with the intent of the Parties to minimize all taxes, so long as neither Party is materially adversely affected by such efforts.

10.2 Governmental Charges.

Seller shall pay or cause to be paid all taxes imposed by any Government Authority ("Governmental Charges") on or with respect to the Renewable Energy or this Agreement arising prior to the Delivery Point. GPA shall pay or cause to be paid all Governmental Charges on or with respect to the Renewable Energy or this Agreement at and from the Delivery Point (other than ad valorem, franchise or income taxes which are related to the sale of the Renewable Energy and are, therefore, the responsibility of the Seller). In the event Seller is required by law or regulation to remit or pay Governmental Charges, which are GPA's responsibility hereunder, GPA shall promptly reimburse Seller for such Governmental Charges. If GPA is required by law or regulation to remit or pay Governmental Charges which are Seller's responsibility hereunder, GPA may deduct the amount of any such Governmental Charges from the sums due to Seller under Article Seven of this Agreement. Nothing shall obligate or cause a Party to pay or be liable to pay any Governmental Charges for which it is exempt under the law.

ARTICLE ELEVEN: ASSIGNMENT

11.1 Buyer Assignment.

Buyer may not assign this Agreement or assign or delegate its rights and obligations under this Agreement, in whole or in part, without Seller's consent, not to be unreasonably withheld.

11.2 Seller Assignment.

Seller may perform any of the following, without the consent of the Buyer (1) transfer, pledge, encumber, or assign this Agreement or the accounts, revenues, or proceeds hereof, in connection with any financing or other financial arrangements for the Facility, (2) transfer or assign this Agreement to any of its Affiliates in connection with a transfer of the Facility to such Affiliate, (3) transfer or assign this Agreement to any person or entity succeeding to all or substantially all of the assets of such Party, and (4) transfer or assign this Agreement to _____ or to any of its Affiliates; provided, that Seller provides Buyer prior notice of any such transfer or assignment and, with respect to any transfer to an such assignee of Seller, (A) such assignee posts replacement credit support in accordance with this Agreement, and (B) such Affiliate enters into an assignment and assumption agreement, in form and substance reasonably satisfactory to Buyer, pursuant to which Affiliate assumes all of Seller's obligations hereunder and otherwise agrees to be bound by the terms of this Agreement. Seller agrees that it will provide written notice to Buyer of any assignment of this Agreement by Seller within five (5) Business Days of the date of such assignment.

Except as stated above, neither this Agreement nor any of the rights, interests and obligations hereunder shall be assigned by Seller without the prior written consent of Buyer, which consent shall not be unreasonably withheld. Any assignment of this Agreement in violation of the foregoing shall be, at the option of Buyer, void.

11.3 Liability After Assignment.

A Party's assignment or transfer of rights or obligations pursuant to this Article 11 shall relieve said Party from any liability and financial responsibility for the performance thereof arising after any such transfer or assignment.

11.4 Transfers of Ownership.

Subject to any rights of first offer or refusal under this Agreement, during the Term, Seller shall not sell, transfer, assign or otherwise dispose of its interest in the Facility to any third-party absent (1) a transfer of this Agreement to such third-party and (2) Seller entering into an assignment and assumption agreement, in form and substance reasonably satisfactory to Buyer, with such third-party.

11.5 Successors and Assigns.

This Agreement and all of the provisions hereof are binding upon, and inure to the benefit of, the Parties and their respective successors and permitted assigns.

11.6 Collateral Assignment by Seller.

In the event that Seller pursuant to Section 11.2 (1) transfers, pledges, encumbers or collaterally assigns this Agreement to Seller's lenders, Seller shall provide written notice to Buyer of such transfer, pledge, encumbrance or assignment, including the address of Seller's lenders. In connection with any financing or refinancing of the Facility, Buyer at Seller's request shall negotiate in good faith with Seller and Seller's lenders to agree upon a reasonable direct agreement with respect to this Agreement, which shall be in form and substance reasonably agreed to by Buyer, Seller and Seller's lenders, and which shall, among other terms. include provisions substantially as follows:

(a) The Parties shall not amend or modify this Agreement in any material respect without the prior written consent of the Seller's lenders;

(b) Prior to exercising its right to terminate this Agreement as a result of an Event of Default by Seller, Buyer shall give notice of such Event of Default by Seller to the administrative agent of Seller's lenders, which Buyer has been provided written notice of; and

(c) Seller's lenders shall have the right, but not the obligation, to cure an Event of Default on behalf of Seller in accordance with the provisions of this Agreement, provided that Seller's lenders shall be provided an additional forty-five (45) days, from the end of the cure periods provided pursuant to Section 6.1, to effect a cure of such Event of Default.

ARTICLE TWELVE: MISCELLANEOUS

12.1 Term of Agreement; Conditions Precedent.

(a) The Term of this Agreement shall commence on the Effective Date and shall remain in effect for the duration of the Delivery Period, as set forth in Section 2.1, unless earlier terminated by either Party in accordance with this Agreement herein (the "Term"); provided, however, that such termination shall not affect or excuse the performance of either Party under any provision of this Agreement that by its terms survives any such termination.

(b) This Agreement shall be effective on the Effective Date provided that the Parties' obligations hereunder shall be subject to the satisfaction of the following conditions precedent:

(i) Receipt by GPA of a final, non-appealable approval of this Agreement by the Guam Public Utilities Commission ("PPA Approval");

(ii) Execution of the Interconnection Agreement by the Parties;

(iii) Receipt by GPA of a final, non-appealable approval of the Interconnection Agreement by the Guam Public Utilities Commission ("ICA Approval"); and

GPA shall submit this Agreement for approval by the Guam Public Utilities Commission within thirty (30) days of the Effective Date. GPA shall also submit the Interconnection Agreement for approval by the Guam Public Utilities Commission within thirty (30) days of the execution of the Interconnection Agreement. Each Party shall use Commercially Reasonable Efforts to satisfy the conditions precedent prior to the End Date; provided that neither Party shall be obligated to execute the Interconnection Agreement except on terms acceptable to such Party in its sole discretion. Seller shall have the right in its sole discretion to waive the conditions precedent set forth in section 12.1(b) above.

Either Party has the right to terminate this Agreement by Notice, which will be effective five (5) Business Days after such Notice is given, if the conditions precedent set forth above have not been satisfied (or waived in accordance herewith) within [**to be determined based on date of signing – between 60-120 days consistent with proposed project schedule**] days after the Effective Date ("End Date"). If either Party exercises its termination right pursuant to this Section 12.1(b), no Termination Damages will be due or owing by either Party and Seller will be entitled to a return of any Development Security provided to GPA.

12.2 Insurance.

At all times during the Term of this Agreement, Seller shall maintain at its own expense insurance policies for the Facility and its tangible assets in such amounts and against such risks and losses as are consistent with Good Utility Practices and those policies listed below. Such insurance policies shall be maintained only with insurers rated at least A- VII by MVI Best or comparable ratings agency.

- Commercial General Liability with limits of $1,000,000 including products, completed operations, and contractual for this Agreement. GPA shall be an additional insured. Seller shall grant a waiver of subrogation in favor of GPA.

- Commercial Auto Liability in the amount of $1,000,000 combined single limit for bodily injury and property damage. GPA shall be an additional insured. Seller shall grant a waiver of subrogation in favor of GPA.

- Excess Liability with limits of $5,000,000. GPA shall be an additional insured. Seller shall grant a waiver of subrogation in favor of GPA.

- Workers Compensation and Employers Liability with statutory limits and $1,000,000/$1,000,000/$1,000,000 respectively. Seller shall add a waiver of subrogation endorsement in favor of GPA.

- Pollution Liability, when applicable, with limits for $5,000,000. GPA is to be an additional insured. Seller shall grant a waiver of Subrogation in favor of GPA.

- Builder's Risk or Installation Floater, when applicable, is to be furnished by Contractor.

- Property insurance that will keep the premises, property, improvements, structures, and machinery and equipment on the premises insured, at a minimum, against with an all risk property policy for full replacement value as determined from time to time. Such insurance shall be issued by financially responsible insurers duly authorized to do business in Guam, and shall contain the standard form of waiver of subrogation. Nothing contained herein shall be construed as creating any liability or responsibility on the part of GPA for the adequacy of insurance coverage on the premises. As to any insurable risks of loss or damage to the premises not required to be insured hereunder, Seller shall bear the cost of the same. Seller shall be deemed to be self-insured as to the deductible or co-insurance amount applicable to such insurance coverage and shall pay any deductible or co-insurance amount applicable in the event of such loss or damage.

At all times after achieving COD, Seller may discontinue or otherwise cancel each of the aforementioned policies, except the following insurance policies, which shall be maintained with the limits set forth below:

- Commercial General Liability with limits of $1,000,000.00 including products, completed operations, and contractual for this Agreement. GPA shall be an additional insured. Seller shall grant a waiver of subrogation in favor of GPA.

- Excess Liability with limits of $3,000,000.00. GPA shall be an additional insured. Seller shall grant a waiver of subrogation in favor of GPA.

- Property insurance that will keep the premises, property, improvements, structures, and machinery and equipment on the premises insured, at a minimum, against with an all risk property policy for full replacement value as determined from time to time. Such insurance shall be issued by any financially responsible insurer duly authorized to do business in Guam, and shall contain the standard form of waiver of subrogation. Nothing contained herein shall be construed as creating any liability or responsibility on the part of GPA for the adequacy of insurance coverage on the premises. As to any insurable risks of loss or damage to the premises not required to be insured hereunder, Seller shall bear the cost of the same. Seller shall be deemed to be self-insured as to the deductible or co- insurance amount applicable to such insurance coverage and shall pay any deductible or co-insurance amount applicable in the event of such loss or damage.

- Seller is also required to carry Business Interruption and Extra Expense insurance in the amount of $1,000,000.00.

If the Facility is lost or damaged due to a casualty, then only if and to the extent Seller is not required to use available insurance proceeds to prepay any Facility Debt then outstanding, Seller shall re-build the Facility promptly and in a commercially reasonable manner if and to the extent technically feasible and commercially reasonable in

light of the available insurance proceeds and subject to the procurement by Seller of the consent of any lender or financing party pursuant to the Financing Documents if required thereunder; provided, however, (i) if the time to re-build the Facility would result in less than five (5) years remaining in the Delivery Period then (A) Seller shall have the option in lieu of re-building the Facility to pay to GPA the Buyout Payment and terminate this Agreement with no further costs or penalties provided that the Buyout Payment shall not in any case exceed the available insurance proceeds remaining following full prepayment of the Facility Debt, or (B) if Seller nevertheless elects to re-build the Facility then GPA shall reimburse Seller for any deductibles payable by Seller under its property insurance, and (ii) regardless of when the casualty event occurs, if Seller re-builds the Facility then the Delivery Period shall be extended for the greater of one (1) year or two (2) times the length of the interruption of the sale of Renewable Energy (pro rated based on the Minimum Production for partial interruptions), and the Contract Price shall be the price in effect, without escalation, at the beginning of the re-building period.

Within ten (10) Business Days after receipt of a request for the same from GPA, Seller shall deliver to GPA a certificate of insurance for any or all policies maintained in accordance with this Section 12.2, which certificate shall include at least the following information: (i) the name of the insurance company, policy number and expiration date; and (ii) the coverage and limits on coverage, including the amount of deductibles or self-insured retentions.

Seller shall furnish certificates of insurance and waiver of subrogation endorsement to GPA prior to commencement of construction of the Facility showing evidence of such coverage, including the statement to the effect that cancellation or termination of the insurance shall not be effective until at least thirty (30) days after receipt of written Notice to GPA. At all times Seller's insurance shall be primary and non-contributory to any other insurance that may be carried by GPA. The statement of limits of insurance coverage shall not be construed as in any way limiting the Seller's liability under this Agreement. GPA shall be an additional insured on all liability coverage and certificates of insurance shall clearly indicate such.

12.3 Indemnity.

To the extent permitted by law, each Party shall indemnify, defend and hold harmless the other Party from and against any Claims arising from or out of any event, circumstance, act or incident first occurring or existing during the period when control and title to the Renewable Energy is vested in such Party, unless a Claim is due to such Party's willful misconduct or gross negligence. To the extent permitted by law, each Party shall indemnify, defend and hold harmless the other Party against any Governmental Charges for which such Party is responsible under Article Ten. Notwithstanding anything to the contrary contained in this Agreement, no individual representative of either Party shall have any personal liability to the other Party as a result of the breach of any representation, warranty, covenant or agreement contained herein.

12.4 Site Access and Inspection of Records.

Seller shall provide GPA with reasonable access to the Facility site for purposes of review and inspection during regular business hours within a reasonable time after a request for the same is made by GPA. During such reviews and inspections, GPA representatives shall be permitted to review such records relating to the Facility and reasonably related to the performance of this Agreement, including Facility maintenance and operations logs. GPA shall have access to the Facility site for the limited purposes described herein, but Seller shall at all times remain responsible and liable for the control and operation of the Facility and the Facility site. GPA representatives shall follow Seller's safety procedures when accessing the Facility site and shall conduct themselves in a manner that will not interfere with the operation of the Facility. Seller will provide GPA with information about such safety procedures to enable GPA to comply with this requirement.

12.5 Audit.

Subject to Section 7.3, each Party has the right, at its sole expense and during normal working hours, to examine copies of the records of the other Party to the extent reasonably necessary to verify the accuracy of any statement, charge or computation made pursuant to this Agreement.

12.6 Confidentiality.

The Parties will make Commercially Reasonable Efforts to safeguard Confidential Information against disclosure by employing the same means to protect such Confidential Information as that Party uses to protect its own non-public, confidential or proprietary information, and otherwise in accordance with the provisions of this Section 12.6. Specifically, no receiving Party shall itself, or permit its employees, consultants and/or agents to disclose to any person, corporation or other entity the Confidential Information without the prior written consent of the Party providing the Confidential Information, except a receiving Party may distribute the Confidential Information to its and its Affiliates' board members, officers, employees, agents, consultants, actual or potential investors, actual or potential purchasers, actual or potential Facility lenders or financing parties, and others who have a need for such Confidential Information.

The Parties acknowledge, however, that a Party may need to disclose the Confidential Information in connection with its regulatory filings or to otherwise satisfy its governmental and regulatory requirements. In the event that a Party intends to disclose any of the Confidential Information to its regulatory authorities including, but not limited to, the Guam Public Utilities Commission, the FERC, or any employee, staff member, consultant, and/or agent of the foregoing, it shall give the other Party prompt prior written Notice of its intention so that the other Party may seek a protective order or other appropriate remedy. In addition, each Party specifically agrees not to use the other Party's name in connection with this Agreement or the Facility in any press releases, public meetings or hearings, or other public communications, including any release to any newswire service, without the express written consent of the other Party. The Parties anticipate that at some future time it may be in the best interests of one or both of them to disclose Confidential Information to the media and the Parties anticipate entering into a subsequent agreement that will govern the terms of such disclosure. The Parties expressly agree, however, that unless and until such subsequent agreement is executed between the Parties, the terms of this Agreement shall be binding with respect to such disclosure.

In the event that any Party receiving the Confidential Information becomes legally compelled (by deposition, interrogatory, request for documents, subpoena, civil investigative demand or similar process) to disclose any of the Confidential Information, the legally compelled Party shall give the other Party providing the Confidential Information prompt prior written Notice of such requirement so that the providing Party may seek a protective order or other appropriate remedy and/or waive compliance with the terms of this Agreement. In the event that such protective order or other remedy is not obtained, the providing Party waives compliance with the terms hereof.

Each Party acknowledges that the unauthorized disclosure of any Confidential Information may cause irreparable harm and significant injury that may be difficult to ascertain. Each Party therefore agrees that specific performance or injunctive relief, in addition to other legal and equitable relief, are appropriate remedies for any actual or threatened violation or breach of this Agreement, **although neither Party shall be entitled to any special, consequential, indirect or punitive damages as a result of a breach of this Agreement, whether a claim is based in contract, tort or otherwise**. The Parties agree that the respondent in any action for an injunction, specific performance decree or similar relief shall not allege or assert that the initiating Party has an adequate remedy at law in respect to the relief sought in the proceeding, nor shall the respondent seek the posting of a bond by the Party initiating the action. Under no circumstances will either Party's directors, management, employees, agents or consultants be individually liable for any damages resulting from the disclosure of Confidential Information in violation of the terms of this Agreement.

12.7 Notices.

All notices, requests, statements or payments ("Notices") shall be made as specified on Appendix B attached hereto and incorporated herein by reference. Notices (other than with respect to scheduling) shall, unless otherwise specified herein, be in writing and may be delivered by hand delivery, United States mail, overnight courier service or facsimile. Notice by facsimile or hand delivery shall be effective at the close of business on the day actually received, if received during business hours on a Business Day, and otherwise shall be effective at the close of business on the next Business Day. Notice by overnight United States mail or courier shall be effective on the next Business Day after it was sent. Notices relating to Facility operations and Scheduling, as required pursuant to Appendix H, may be given electronically and shall be deemed effective upon receipt; otherwise,

electronic notices shall not be effective unless affirmatively acknowledged in writing (including by reply e-mail) by the receiving Party. A Party may change its addresses by providing Notice of same in accordance herewith.

12.8 Purchase Option.

(a) Transfer During the Delivery Period. In the event that Seller desires to sell the Facility during the Delivery Period, Seller shall provide prior written Notice of the same to GPA, and agrees to engage in discussions with GPA during an exclusivity period with GPA if GPA desires to purchase the Facility. Within ninety (90) days following Seller's Notice to GPA of its intent to sell the Facility, GPA may deliver to Seller an indicative purchase price at which it would be willing to purchase the Facility. If GPA does not deliver the indicative purchase price within ninety (90) days, then Seller shall be free to transfer the Facility under any terms and conditions at any time thereafter. If GPA delivers the indicative purchase price within ninety (90) days, then the Parties shall negotiate exclusively for a period of up to sixty (60) days after GPA delivers the indicative purchase price. If no binding agreement is entered into by the Parties during such sixty (60)-day period then Seller shall be free to transfer the Facility to any person on materially comparable terms, including price, better than GPA's indicative offer, and neither Party shall have any further liability or obligation to the other Party in connection with such sale or as a result of the terminated negotiations. If Seller does not transfer the Facility on such basis within one (1) year following the end of the sixty (60)-day exclusive negotiation period, then the procedure in this paragraph shall apply to any subsequent sale of the Facility during the Term of this Agreement.

(b) Transfer or Extension of Delivery Period. GPA, by Notice delivered to Seller at least one hundred and eighty (180) days prior to the end of the Delivery Period, may either (i) extend the Term of this Agreement on a year-to-year basis, in which case the Contract Price during the extension of the Term shall be eighty percent (80%) of the LEAC Rate in effect from time to time during such extension (whereupon either Party may thereafter terminate this Agreement on one hundred and eighty (180) days' Notice prior to the end of any extension year), or (ii) purchase the Facility from Seller at eighty percent (80%) of the Appraisal Price, within thirty (30) days of the determination of the Appraisal Price. If GPA fails to send such Notice then this Agreement shall terminate in accordance with the terms hereof.

12.9 Alternative Dispute Resolution. All disputes arising under this Agreement are subject to the provisions of this Section 12.9.

(a) If a dispute, controversy or claim arises out of, relates, or is in connection with, this Agreement, or the breach, termination or validity thereof, whether sounding in contract, tort, unfair competition, equity, or other legal form, it shall be settled solely in the manner provided for in this Section 12.9. A meeting of the Parties shall be held within ten (10) Business Days after either Party gives the other Party written Notice of the dispute. The Notice shall set forth in reasonable detail the aggrieved Party's position and its proposal for resolution of the dispute. A representative of each Party who has authority to resolve the dispute shall be in attendance at all meetings. If the dispute is not resolved within thirty (30) days after the first meeting of the Parties, or such other period of time as to which the Parties agree, the dispute shall be settled by arbitration in the manner provided in this Section 12.9). A Party's failure to comply with this Section 12.9 shall entitle the other Party to recover its costs and reasonable attorney's fees in any judicial proceedings that circumvent this dispute resolution provision. Settlement discussions undertaken under this Section 12.9 shall be privileged and confidential and no position taken or communication made by a party during or in connection with said settlement discussions may be presented as evidence in the ensuing arbitration should settlement fail to achieve a negotiated result.

(a) Arbitration. Any disputes between the Parties and/or their respective representatives involving or arising under a Claim relating to the terms of this Agreement, or the breach thereof, may be submitted to binding arbitration, whether such Claims sound in contract, tort or otherwise. The arbitration shall be conducted in accordance with the Federal Arbitration Act and the then prevailing Commercial Arbitration Rules of the American Arbitration Association. The validity, construction, and interpretation of this Agreement to arbitrate and all procedural aspects of the arbitration conducted pursuant hereto shall be decided by the arbitrator(s). Submission shall be made upon the request of either Party. Within twenty (20) calendar days of the receipt by the respondent of service of the Notice of arbitration, the Parties shall select one (1) arbitrator by mutual consent. If the Parties are unable to agree upon a single arbitrator, there shall be three (3) arbitrators. Specifically, in the event the Parties cannot agree upon a single arbitrator, both the claimant and the respondent shall appoint one (1) arbitrator within ten (10) calendar days after written Notice by either Party that three (3) arbitrators shall be necessary. The two (2) arbitrators so appointed shall then select the third arbitrator within twenty (20) calendar days, who shall be the chairperson, of the tribunal. The chairperson shall be a person who has over eight (8) years of experience in energy-related transactions, and none of the arbitrators shall have been previously employed by either Party or have any direct interest in either Party or the subject matter of the arbitration, unless such conflict is expressly acknowledged and waived in writing by both Parties. The chairperson shall be bound to schedule and hear the dispute in its entirety within three (3) Months after his/her appointment and shall render the panel's decision within thirty (30) calendar days after the hearing concludes. It is agreed that the arbitration proceeding shall be conducted in Honolulu, Hawaii, or another neutral location mutually agreed to by the Parties; provided, however, either Party may provide all witnesses, deponents and other ancillary personnel by video telecast or other electronic media, it being the intent of the Parties to minimize expenses of conducting the arbitration. It is further agreed that the arbitrator(s) shall have no authority to award consequential, treble, exemplary, or punitive damages of any type or kind regardless of whether such damages may be available under any law or right, with the Parties hereby affirmatively waiving their rights, if any, to recover or claim such damages. The compensation and any costs and expenses of the arbitrators shall be borne equally by the Parties. Any arbitration proceedings, decision or award rendered hereunder and the validity, effect and interpretation of this arbitration provision shall be governed by the Federal Arbitration Act. The award shall be final and binding on the Parties and judgment upon any award may be entered in any court of competent jurisdiction. The Parties agree that all information exchanged as a result of any proceeding as described herein shall be deemed Confidential Information.

(b) Judicial Relief. Either Party may petition a court of appropriate jurisdiction, as described in Section 12.11, for non-monetary relief relating to any claim of breach of this Agreement in order to prevent undue hardship relating to any such claimed breach pending the appointment of an arbitration panel as described in this Section 12.9.

12.10 Governing Law.

THIS AGREEMENT AND THE RIGHTS AND DUTIES OF THE PARTIES HEREUNDER SHALL BE GOVERNED BY AND CONSTRUED, ENFORCED AND PERFORMED IN ACCORDANCE WITH THE LAWS OF GUAM**,** WITHOUT REGARD TO PRINCIPLES OF CONFLICTS OF LAW.

12.11 Jurisdiction and Costs.

Subject to the mandatory arbitration provisions herein, with respect to any proceeding in connection with any claim, counterclaim, demand, cause of action, dispute and controversy arising out of or relating to this Agreement, the Parties hereby consent to the exclusive jurisdiction of the local and federal courts in the Territory of Guam. Both Parties waive any right to trial by jury in such action. In the event such judicial proceedings are

instituted by either Party, the prevailing Party shall be entitled to award of its costs and reasonable attorneys' fees incurred in connection with such proceedings.

12.12 Financial Accounting Standards.

Under the latest interpretations of the Financial Accounting Standards Board's Interpretation No. 46(R) (FIN No. 46(R)), "Consolidation of Variable Interest Entities," GPA may be required to consolidate a Seller's entity for which GPA has entered into a long-term power purchase agreement. Seller agrees to provide all information needed in order for GPA to determine whether or not the special purpose entity which owns the Seller's generating facility must be consolidated by GPA under FIN No. 46(R). If it is determined that GPA needs to consolidate such special purpose entity, Seller agrees to provide all information needed to comply with the consolidation requirements of FIN 46(R) in a timely manner every calendar quarter. If GPA is required to consolidate the special purpose entity that owns the Seller's generating facility in its financial statements, Seller agrees to provide access to any needed records and personnel, as requested, so GPA's independent auditor, Deloitte & Touche LLP, can conduct financial statement audits in accordance with generally accepted auditing standards, as well as internal control audits in accordance with Section 404 of the Sarbanes-Oxley Act of 2002.

12.13 Forward Contract.

The Parties intend that in any relevant proceedings, each be regarded as a forwards trading merchant in respect of this Agreement and that each Transaction be a forwards contract for purposes of the United States Bankruptcy Code, 11 U.S.C. §§ 101 et seq., as amended from time to time.

12.14 General.

No delay of a Party in the exercise of, or the failure to exercise, any rights under this Agreement shall operate as a waiver of such rights, a waiver of any other rights under this Agreement or a release of the other Party from any of its obligations under this Agreement. Any provision declared or rendered unlawful by any applicable court of law or regulatory agency or deemed unlawful because of a statutory change will not otherwise affect the remaining lawful obligations that arise under this Agreement; and provided, further, that if such an event occurs, the Parties shall use their best efforts to reform this Agreement in order to give effect to the original intention of the Parties. The term "including" when used in this Agreement shall be by way of example only and shall not be considered in any way to be in limitation. The headings used herein are for convenience and reference purposes only. The indemnity provisions of this Agreement shall survive the termination of this Agreement for the period of the applicable statute of limitations. The audit provisions of this Agreement shall survive the termination of this Agreement for a period of twelve (12) Months. This Agreement shall be binding on each Party's successors and permitted assigns.

12.15 Entire Agreement; Amendment.

This Agreement, together with any appendices, schedules, and any written supplements hereto constitutes the entire agreement between the Parties relating to the subject matter hereof. This Agreement shall be considered for all purposes as prepared through the joint efforts of the Parties and shall not be construed against one Party or the other as a result of the preparation, substitution, submission or other event of negotiation, drafting or execution hereof. Except to the extent herein provided for, no amendment or modification to this Agreement shall be enforceable unless reduced to writing and executed by both Parties.

12.16 Appendices.

The following Appendices are included in this Agreement for all purposes:

Appendix A	Contract Price and Minimum Production
Appendix B	Notice Addresses
Appendix C	Ramp Rate Control and Microgrid

Appendix D	Independent Engineers
Appendix E	[Not Used]
Appendix F	Form of Letter of Credit
Appendix G	[Not Used]
Appendix H	Scheduling and Coordination
Appendix I	Base Conditions and Facility Test Protocol
Appendix J	Interconnection Agreement
Appendix K	Additional Terms regarding Ramps Rates and Dispatch Down
Appendix L	Resolutions of Consolidated Committee on Utilities

12.17 Special Provisions.

It is the policy of GPA not to discriminate on the basis of age, race, sex, color, national origin, or disability in its hiring and employment practices, or in admission to, access to, or operation of its programs, services, and activities. With regard to all aspects of this Agreement, Seller certifies and warrants it will comply with this policy. No person shall be excluded from participation in, be denied benefits of, be discriminated against in the admission or access to, or be discriminated against in treatment or employment in GPA's contracted programs or activities, on the grounds of such person's handicap or disability, age, race, color, religion, sex, national origin, or any other classification protected by federal or Guam law; nor shall any person be excluded from participation in, be denied benefits of, or be otherwise subjected to discrimination in performance of contracts with GPA or in the employment practices of GPA's contractors. Accordingly, all persons entering into contracts with GPA shall, upon request, be required to show proof of such nondiscrimination and to post notices of non-discrimination in conspicuous places that are available to all employees and applicants.

Seller hereby represents that Seller has not been retained or retained any persons to solicit or secure a contract from GPA upon an agreement or understanding for a contingent commission, percentage, or brokerage fee, except for retention of bona fide employees or bona fide established commercial selling agencies for the purpose of securing business. Breach of the provisions of this section is, in addition to a breach of this Agreement, a breach of ethical standards, which may result in civil or criminal sanction, debarment or suspension from being a contractor or subcontractor under any other contract with GPA and any Government Authority.

It shall be a breach of ethical standards for any person to offer, give or agree to give any employee or former employee, or for any employee or former employee to solicit, demand, accept or agree to accept from another person, a gratuity or an offer of employment in connection with any decision, approval, disapproval, recommendation, preparation of any part of a program requirement or a purchase request, influencing the content of any specification or procurement standard, rendering of advice, investigation, auditing or in any other advisory capacity in any proceeding or application, request for ruling, determination, claim or controversy or other particular matter, pertaining to any program requirement of a contract or subcontract or to any solicitation or proposal therefor. It shall be breach of ethical standards for any payment, gratuity or offer of employment to be made by or on behalf of a subcontractor under a contract to the prime contractor or higher tier subcontractor or a person associated therewith, as an inducement for the award of a subcontractor or order. Breach of the provisions of this paragraph is, in addition to a breach of this Agreement, a breach of ethical standards, which may result in civil or criminal sanction, debarment or suspension from being a contractor or subcontractor under any other contract with GPA and any Governmental Authority.

Seller warrants that no person providing services on behalf of Seller or in its employment who has been convicted of a sex offense under the provisions of Chapter 25 of Title 9 of the Guam Code Annotated, or convicted of an offense

defined in Article 2 of Chapter 28 of Title 9 of the Guam Code Annotated regardless of the jurisdiction in which the conviction was obtained, shall provide services on behalf of Seller relative to this Agreement. If any person employed by Seller and providing services under this Agreement is convicted subsequent to the date of this Agreement, then Seller warrants that it will notify GPA of the conviction within twenty-four hours of the conviction, and will immediately remove such convicted person from providing services under this Agreement. If Seller is found to be in violation of any of the provisions of this paragraph, then GPA shall give Notice to Seller to take corrective action. Seller shall take corrective action within twenty-four hours of Notice from GPA, and Seller shall notify GPA when action has been taken. If Seller fails to take corrective steps within twenty-four hours of Notice from GPA, then GPA in its sole discretion may suspend this Agreement temporarily.

12.18 Waiver of Immunity.

To the extent that GPA may in any jurisdiction claim for itself or its assets or revenues immunity from suit, execution, attachment (whether in aid of execution, before judgment or otherwise) or other legal process and to the extent that in any such jurisdiction there may be attributed to GPA or its assets or revenues such immunity (whether or not claimed), GPA agrees not to claim and irrevocably waives such immunity to the full extent permitted by the laws of such jurisdiction.

IN WITNESS THEREOF, the Parties hereto made and executed this Agreement, signed by their duly authorized officers or individuals, as of the dates listed below.

APPENDIX B

NOTICE ADDRESSES

APPENDIX C

RAMP RATE CONTROL & MICROGRID

I. Description of Storage Unit

A. Specifications. The Facility shall include the Storage Unit as more fully described in the technical specifications set forth in Schedule C-1 attached hereto ("Storage Technical Specifications").

B. Operations. The operation of the Storage Unit shall at all times be subject to the operating restrictions and limitation set forth in Schedule C-2 attached hereto ("Storage Operating Restrictions"). At no time will Seller be expected to operate the Storage Unit in a manner that is inconsistent with the Storage Operating Restrictions notwithstanding any contrary terms in this Agreement.

C. Metering. Seller will install and maintain a separate meter for the Storage Unit and the operation and maintenance of such meter shall be governed by section 7.4 of this Agreement. The Storage Unit will not serve station use and Seller shall separately meter station use.

D. Augmentation. Seller shall be entitled to determine the actions necessary to achieve the Guaranteed Storage Output (as defined below) from time to time, including without limitation, whether to augment the batteries included in the Storage Unit solely as determined by Seller in its discretion.

E. Ramp Rate Control. The Storage Unit shall be operated such that the charging and output of the Storage Unit does not exceed 1% of the Project's nameplate capacity per minute; provided that Seller shall only be obligated to achieve such ramp rate as set forth in the table below on an average basis during each Contract Year ("Agreed Ramp Rate").

Contract Year	Agreed Ramp Rate
1	98.00%
2	97.90%
3	97.80%
4	97.70%
5	97.60%
6	97.50%
7	97.40%
8	97.30%
9	97.20%
10	97.10%
11	97.00%
12	96.90%
13	96.80%
14	96.70%
15	96.60%
16	96.50%
17	96.40%
18	96.30%
19	96.20%

20	96.10%
21	96.00%
22	95.90%
23	95.80%
24	95.70%
25	95.60%

F. Ramp Rate Control Performance

Energy Storage System will control the ramping rate under 1% of the Facility Capacity (i.e. 600 kW) per minute and the control period [for the ramping rate] will be no more than 1 second. Detailed ramping control algorithm will be finalized through discussions between GPA and Seller after the final design of the Energy Storage System is put in place but no later than one (1) month before the commissioning test of the Facility will start.

Evaluation of Performance Verification:

During the Delivery Period, on an annual basis, Seller shall carry out the evaluation process for the performance verification of the Energy Storage System, including power test and 1% ramp-rate control test in the presence of GPA, once every year with annual data storage in the Facility database and GPA SCADA. [Note: specify what is to be measured and equation below.]

$$\left| \frac{\sum_{t-\Delta t}^{t} PV_i(x)}{\Delta t} - \frac{\sum_{t-2\Delta t}^{t-\Delta t} PV_i(x)}{\Delta t} \right| > P_{ramp}$$

Where:

- Δt = 60 seconds
- $PV_i(x)$: PV generation at time t
- i = 1,2,3, ….., 60 seconds
- P_{ramp}: active power considering ramp rate limit per 1min window

Ramp Rate Control shall be based on a plus or minus (±) 1% of rated power of 60MW plant ("Measured Value"). Ramp Rate Control Failure means a plus or minus (±) 2% of Measured Value.

Ramp Control Penalty:

Penalty will apply to failure to meet the 1% ramp per minute rate for both under and over power. Ramp-Control must be controlled within 1 second. The failure percentage is as below:

- Failure Percentage (FP) = (E1 – E2)

Symbol	Item	Unit	Remarks
E1	Guaranteed value of Succeed Ramp-Rate	%	Proposal (offer) shown in table below

E2	Output of Ramp Rate Controlled	%	1% ramping requirement with 2% measurement error

If FP is greater than 0 (zero), then Penalty shall be calculated as follow:

- Under Power Failure Penalty = (AF_U) *(C_U)*(FP_U)
- Over Power Failure Penalty= (AF_O) *(C_O)*(FP_O)

Symbol	Item	Value	Unit
C_U	Nominal Ramp Down Cost	1.96	$/min/MW
C_O	Nominal Ramp Up Cost	0.49	$/min/MW

The penalty is calculated only for the portion exceeding the guaranteed value.

Where:

- Failure Power of Under Power (FP_U) = |Ramp Rate Required Power – CP| [MW]
- Failure Power of Over Power (FP_O) = |CP – Ramp Rate Required Power| [MW]
- Controlled Power (CP) =1 minute Average Power of 1% Ramp Rate Controlled by 1 second
- Acceleration Factor of Under Power (AF_U) = 0.5
- Acceleration Factor of Over Power (AF_O) = 0.5

G. Time Shifting. As described herein, the Storage Unit will be charged during the day and discharged during the night and in this manner will provide GPA with delayed deliveries of Renewable Energy.

E. Communication Protocols. Seller and GPA shall mutually agree (in writing) upon communication protocols to allow GPA to have access to SCADA information and a real-time data feed with respect to the Facility.

II. Delivery of Stored Energy for Dispatch

A. Charging. During the Delivery Period, Seller shall (i) operate and maintain the Storage Unit, (ii) charge the Storage Unit with a portion of the Renewable Energy generated by the Project (referred to as Charging Energy), and (iii) then shall store, discharge and deliver the Stored Energy to the Delivery Point. Charging Energy shall be drawn from the Renewable Energy generated by the Project and Stored Energy when delivered shall count towards the Minimum Production of the Project each Contract Year. In no case shall Seller be penalized for a reduction in the Renewable Energy delivered based on Charging Energy used to charge the Storage Unit.

B. Discharging. Seller shall sell and deliver, or cause to be delivered, and GPA shall purchase and receive, or cause to be received, all Stored Energy discharged by the Storage Unit, at the Delivery Point, and GPA shall pay Seller the Annual Storage Payment as compensation for Seller's operation of the Storage Unit and deliver of such Quantity of Stored Energy to the Delivery Point.

Stored Energy shall be discharged each day during the Delivery Period beginning from a time out of the 6 options as follows: 6 pm, 7 pm, 8 pm, 9 pm, 10 pm and 11 pm local time and shall be delivered to the Delivery

Point except during any Excused Hours and Weather Hours. The Discharge Energy shall be fixed as 5MW and the Delivery Period ends once all remaining Energy in the Microgrid has been discharged until the designated SOC of the Microgrid has been met.

If GPA desires to change the daily start time of the dispatch of the Storage Unit at any time during the Delivery Period, then GPA shall deliver Notice to Seller of such proposed change at least seven (7) days prior to the date on which Seller is being asked to implement such change ("Dispatch Instruction"). Seller shall not be obligated to accept and implement Dispatch Instruction requested by GPA if (i) such Dispatch Instruction is not consistent with the Operating Parameters, Good Utility Practices, any Planned Outages, applicable law or any limits set forth in any permit or approval received by Seller in connection with the Facility, or (ii) implementation of such dispatch instructions would limit, interfere with or prevent Seller's operation and maintenance of the Facility and/or its performance of its obligations under this Agreement, including without limitation, Seller's obligations with respect to the Guaranteed Dispatch Rate and/or Minimum Production and any make-up amounts Seller reasonably expects to deliver in any Contract Year, or (iii) implementation of such dispatch instructions would limit, interfere with or prevent Seller's performance of its obligations under the Interconnection Agreement. Any Dispatch Instruction delivered by GPA shall remain in effect until another valid Dispatch Instruction is delivered by GPA to Seller in accordance herewith.

Contract Year	Estimated Annual Stored Energy to be discharged from the Storage Unit and delivered to the Delivery Point referred to herein as the "Guaranteed Dispatch Rate"
1	6,570
2	6,554
3	6,501
4	6,466
5	6,431
6	6,415
7	6,362
8	6,327
9	6,293
10	6,276
11	6,223
12	6,188
13	6,153
14	6,136
15	6,084
16	6,049
17	6,015
18	5,997
19	5,945
20	5,910
21	5,875
22	5,857
23	5,805
24	5,771
25	5,736

The annual estimate of Stored Energy to be delivered shall be subject to the terms set forth in part II.C below.

EAST\151029886.4

C. Guaranteed Storage Output. The Storage Unit is expected to allow Seller to deliver a minimum number of MWhs of Stored Energy each Contract Year as set forth above (such annual MWh production is the "Guaranteed Dispatch Rate").

Seller during the Delivery Period shall (i) during any Contract Year, deliver to GPA at least ninety percent (90%) of the Guaranteed Dispatch Rate, and (ii) for any consecutive six (6) Contract Years during the Delivery Period, deliver to GPA at least ninety percent (90%) of the aggregate Guaranteed Dispatch Rate during such period (which shall include make-up amounts generated and delivered in any years in excess of one hundred percent (100%) of the Guaranteed Dispatch Rate for such year) (any such time period a "Storage Measurement Period" and each such guaranteed amount of delivered Stored Energy during any Stored Measurement Period, the "Guaranteed Storage Output"). Any shortfall of Stored Energy (expressed in MWhs/year) from the applicable Guaranteed Storage Output during a Storage Measurement Period shall be deemed a "Storage Deficiency Amount."

The Annual Storage Payment for the following Contract Year shall be adjusted for any Storage Deficiency Amount which is not due to Excused Hours or Weather Hours (except, in the case of Weather Hours, as set forth below) ("Shortfall Adjustment"). The Shortfall Adjustment will be calculated as set forth below:

Adjusted Annual Storage Payment = (Storage Deficiency Amount/Guaranteed Dispatch Rate) x Annual Storage Payment

For purposes of clarity, Seller shall be entitled to deliver to GPA Renewable Energy or Stored Energy in the amount of such Storage Shortfall in subsequent time periods (even if such make-up amounts are in excess of the Guaranteed Dispatch Rate for such subsequent year), and this Agreement may be extended as necessary for a period of up to six (6) months to allow Seller to make up any Storage Deficiency Amount; however, there shall be no Shortfall Adjustment for such individual Contract Year unless such Stored Energy delivered hereunder is less than [ninety percent (90%) of the] Guaranteed Storage Output for the applicable Storage Measurement Period, and such shortfall is not due to Excused Hours or Weather Hours (except, in the case of Weather Hours, as set forth below).

In the event Shortfall Adjustment applies to a Storage Measurement Period of six (6) rolling Contract Years, then such Shortfall Adjustment shall be reduced by the amount of any Shortfall Adjustment paid for any Contract Year during such six (6) year Storage Measurement Period. The Shortfall Adjustment to the Annual Storage Payment shall be Seller's sole liability and obligation, and GPA's sole right and remedy, with respect to Seller's failure to deliver the Guaranteed Output during any Storage Measurement Period.

To the extent any Storage Deficiency Amount is due to Weather Hours, Seller's sole liability and GPA's sole remedy shall be to deliver thereafter Renewable Energy or Stored Energy equal to such Storage Deficiency Amount attributable to Weather Hours, calculated in accordance with Appendix K (which includes a sample calculation for a hypothetical Storage Measurement Period). If any portion of a Storage Deficiency Amount due to Weather Hours is not made up in the five (5) Contract Years beginning in the first Contract Year following the Contract Year in which the Weather Hours Storage Deficiency Amount occurred, then a Shortfall Adjustments shall be applied for the remaining Storage Deficiency Amount. Notwithstanding the foregoing, with respect to any Storage Deficiency Amount that is due to Weather Hours, Seller shall have the option, at any time prior to the expiration of the five (5) Contract Year make-up period, to elect to apply any remaining Shortfall Adjustment in its entirety. If the Storage Deficiency Amount arising as a result of Weather Hours occurs in the last five (5) years of the Delivery Period, then unless Seller exercises its option to apply any remaining Shortfall Adjustment early, the Delivery Period shall be extended as necessary, for a period of up to six (6) months, to achieve a make-up period of five (5) Contract Years as described above.

Seller shall be entitled to sell, and GPA shall purchase, quantities of Stored Energy for which Shortfall Adjustments are paid hereunder, during any remaining Storage Measurement Period during the Delivery Period. During any Contract Year, all Renewable Energy delivered by Seller to GPA in excess of the Guaranteed Dispatch Rate shall be credited against makeup of any outstanding Storage Adjustment, with oldest Storage Adjustment made up first.

To the extent any Storage Adjustment is due to Excused Hours, Seller shall be excused from any liability with respect thereto.

D. Remedies. For Seller's failure to deliver Stored Energy as required hereunder, GPA's remedies shall be as set forth in part II.C above. For GPA's failure to purchase and receive Stored Energy as required hereunder, Seller shall in addition have all other remedies available at law or in equity.

E. Title and Risk of Loss. Seller shall be responsible for any costs or charges imposed on or associated with the Stored Energy or its delivery up to the Delivery Point. GPA shall be responsible for any costs or charges imposed on or associated with Stored Energy or its receipt at and from the Delivery Point. Title to and risk of loss of Stored Energy from the Facility delivered to the Delivery Point shall transfer to GPA at the Delivery Point. Seller warrants that it will deliver to Buyer Stored Energy free and clear of all liens, security interests, claims and encumbrances or any interest therein or thereto by any person arising prior to the Delivery Point.

III. Compensation for Storage Unit Operations

Compensation to Seller for the operation of the Storage Unit during the Delivery Period shall consist of an Annual Storage Payment as set forth in Appendix A. The Annual Storage Payment shall be paid in accordance with Sections 7.1, 7.2 and 7.5 of this Agreement.

The Annual Storage Payment shall only be subject to reduction or offset for, and GPA's sole remedy for Seller's failure to deliver Stored Energy and Seller's operation of the Storage Unit shall be, the application of any Shortfall Adjustment in accordance with Section II.C above.

EAST\151029886.4

Schedule C-1
Technical Specifications for Storage Unit

- Microgrid Capacity: 20MW PCS, 32.5MWh usable energy (Actual installed capacity shall be determined at later stage)
- The Microgrid will normally perform the ramp rate control as required, but if the Power Plant output exceeds 22.5MW, it will charge the excess amount into the Microgrid.
- The Microgrid will also force charge the Microgrid if the weather conditions are not sufficient enough to make the Power Plant to reach production amounts above 22.5MW to ensure that the Microgrid will discharge every year the agreed on discharge amount.

EAST\151029886.4

Schedule C-2
Operating Parameters for Storage Unit

- The output that the Facility delivers to the grid shall be limited to 22.5MWac throughout the Delivery Period.
- [Seller to provide additional Operating Parameters]

FORM OF LETTER OF CREDIT

(Provided is sample which may be replaced by Bank / Financial Institution Form)

(*Bank or Financial Institution*)

_____, 201__

Irrevocable Standby Letter of Credit No. ____

Beneficiary:
Guam Power Authority
P.O. Box 2977
Guam 96932-2977
Attn:
Applicant:

Dear _____:

We hereby establish for the account of (*Company Name*) ("Applicant") our irrevocable standby letter of credit in your favor for an amount of USD 4,000,000 (Four Million United States Dollars). Applicant has advised us that this letter of credit is issued in connection with the Renewable Energy Purchase Agreement, dated as of _____, 2012, by and between the Applicant, and Guam Power Authority (the "Beneficiary"). This letter of credit shall become effective immediately on the date hereof and shall expire on _____ [*the date that is XX days after the Effective Date of the PPA*] (such date, or such later date(s) as determined by Applicant in accordance with the next succeeding sentence, the "Expiration Date"). The Expiration Date can be extended on one or more occasions by written notice to us from the Applicant, provided that such written notice is received at least 10 days prior to the Expiration Date. This letter of credit is subject to the following:

1. Funds under this letter of credit shall be made available to Beneficiary against its draft drawn on us in the form of Annex 1 hereto, accompanied by (a) a certificate in the form of Annex 2 hereto, appropriately completed and signed by an authorized officer of Beneficiary, dated the date of presentation, and (b) the original of the letter of credit (the "Accompanying Documents") and presented at our office located at (*Bank/Financial Institution Address*) attention _____. (or at any other office which may be designated by us by written notice delivered to you). A presentation under this letter of credit may be made only on a day, and during hours, in which such office is open for business (a "Business Day"). If we receive your draft and the Accompanying Documents at such office on any Business Day, all in strict conformity with the terms and conditions of this letter of credit, we will honor the same by making payment in accordance with your payment instructions on the third succeeding Business Day after presentation.

2. This letter of credit shall terminate upon the earliest to occur of (i) our receipt of a notice in the form of Annex 3 hereto signed by an authorized officer of Beneficiary, accompanied by this letter of credit for cancellation, or (ii) our close of business at our aforesaid office on the Expiration Date, or if the Expiration Date is not a Business Day, then on the succeeding Business Day. This letter of credit shall be surrendered to us by you upon the earlier of presentation or expiration.

EAST\151029886.4

3. This letter of credit is issued and subject to the International Standby Practices 1998 (ISP98) International Chamber of Commerce Publication No. 590, and as to matters not addressed by ISP98, shall be governed by and construed in accordance with the laws of the State of New York and application of U.S. Federal Law.

4. This letter of credit sets forth in full our undertaking, and such undertaking shall not in any way be modified, amended, amplified or limited by reference to any document, instrument or agreement referred to herein, except for Annexes 1, 2 and 3 hereto and the notices referred to herein; and any such reference shall not be deemed to incorporate herein by reference any document, instrument or agreement except as otherwise provided in this paragraph 5.

5. Communications with respect to this letter of credit shall be in writing and shall be addressed to us at the address referred to in paragraph 1 above, and shall specifically refer to this letter of credit no. _____.

Very truly yours,

_____

APPENDIX F-2

To be provided

APPENDIX G

NOT USED

APPENDIX H

SCHEDULING AND COORDINATION PROCEDURES

The Parties acknowledge that as of the Effective Date GPA has not yet established protocols for scheduling (firm or intermittent) power to permit solar projects to participate in GPA's scheduling process. As soon as practicable, Seller and GPA shall establish such protocols by mutual agreement in writing. Seller shall use Commercially Reasonable Efforts to comply with all additional reasonable protocols issued by GPA relating to available resources during the Delivery Period, and GPA shall consult with Seller (and take into account and accommodate Seller's reasonable comments) in connection with the preparation of any such additional protocols. The foregoing shall be subject to Section 4.16 of this Agreement.

1.1 General

(a) Notices. Seller shall submit to GPA notices and updates required under this Agreement regarding the Project's status, including, but not limited to, outage requests, forced outages and forced outage reports. If a web based system is not available, Seller shall promptly submit such information to GPA (in order of preference) telephonically, by electronic mail, or facsimile transmission to the personnel designated to receive such information. **Need to include PSCC requirements for Hourly Reports, Daily Production Reports, etc.**

(b) GPA Settlements. GPA shall be responsible for all settlement functions within GPA related to the Project.

(c) Resource Data Template. Seller shall provide the data to the GPA that is required for GPA's resource data template (or successor data system) for the Project consistent with this Agreement. Neither Party shall change such data without the other Party's prior written consent.

(d) Annual Delivery Schedules. No later than forty-five (45) days before (A) the first day of the first Contract Year and (B) the beginning of each calendar year for every subsequent Contract Year during the Delivery Term, Seller shall provide a non-binding forecast of each month's average-day expected Actual Renewable Energy for the following calendar year.

(e) Monthly Delivery Schedules. Ten (10) Business Days before the beginning of each month during the Delivery Term, Seller shall provide a non-binding forecast of each day's average expected Actual Renewable Energy for the following month ("Monthly Delivery Forecast") .

(f) Daily Delivery Schedules. By 5:30 AM Guam Prevailing Time on the Business Day immediately preceding the date of delivery, Seller shall provide GPA with a non-binding forecast of the Project's available energy (a "Day-Ahead Forecast"). A Day-Ahead Forecast provided in a day prior to any non-Business Day(s) shall include Schedules for the immediate day, each succeeding non-Business Day and the next Business Day. Each Day-Ahead Forecast shall clearly identify, for each hour, Seller's estimate of the Project's available energy. Seller may not change such Schedule past the deadlines provided in this section except in the event of a Forced Outage or Schedule change imposed by GPA, in which case Seller shall promptly provide GPA with a copy of any and all updates to such Schedule indicating changes from the then-current Schedule. These notices and changes to the Schedules shall be sent to GPA's on-duty scheduling coordinator. If Seller fails to provide GPA with a Day-Ahead Forecast as required herein, then for such unscheduled delivery period

only GPA shall rely on the delivery Schedule provided in the Monthly Delivery Forecast or GPA's best estimate based on information reasonably available to GPA and Seller shall be liable for Scheduling and delivery based on such Monthly Delivery Forecast or GPA's best estimate.

(g) Hourly Delivery Schedules. Notwithstanding anything to the contrary herein, in the event Seller makes a change to its Schedule on the actual date of delivery for any reason, including Forced Outages (other than a scheduling change imposed by GPA), that results in a change to its deliveries (whether in part or in whole), Seller shall notify GPA immediately by calling GPA's on-duty scheduling coordinator. Seller shall notify GPA of Forced Outages in accordance with this Agreement. Seller shall keep GPA reasonably informed of any developments that are reasonably expected to affect either the duration of the outage or the availability of the Project during or after the end of the outage.

1.2 Dispatch Down/Curtailment.

(a) GPA shall have the right to order Seller to curtail deliveries of Renewable Energy from the Project to the Delivery Point pursuant to a Notice of a Dispatch Down as defined in Appendix K delivered to Seller, provided that the value attributable to any Renewable Energy [in an aggregated quantity of more than _2% of the Minimum Production for any Contract Year] which is not delivered during such curtailment periods, whether for transmission unavailability, operational dispatch or pre-set ramping parameters or otherwise, shall be reimbursed to Seller as provided below.

(b) GPA shall have the right to order Seller to curtail deliveries of Stored Energy from the Microgrid Unit to the Delivery Point pursuant to a Notice of a Dispatch Down as defined in Appendix K delivered to Seller, provided that GPA shall remain obligated to pay Seller the complete Annual Microgrid Payment without adjustment notwithstanding such curtailments, whether for transmission unavailability, operational dispatch or pre-set ramping parameters or otherwise.

(c) Seller shall have the right in its discretion to make up any curtailed quantities of Renewable Energy as a result of a Dispatch Down ("Dispatch Down Makeup Production"), for which it is not reimbursed pursuant to this Appendix H, in the first and any subsequent Contract Year in which at least the Minimum Production is delivered and to extend the Term to the extent necessary, but not to exceed six (6) months, to make up any curtailed quantities. The Contract Price for the Contract Year in which the make-up occurs shall apply to Dispatch Down Makeup Production up to the Minimum Production amount for the Contract Year in which the Dispatch Down originally occurred. For production quantities in excess of the Minimum Production for the Contract Year in which the Dispatch Down originally occurred, the price will be the lesser of the then current LEAC Rate or the Contract Price in the Contract Year in which the make-up occurs. Production in excess of Minimum Production for any Contract Year will first be applied to any previous years' Deficiency Amounts, then to Dispatch Down Makeup Production, then treated under this Agreement as production in excess of Minimum Production.

(d) GPA shall provide to Seller all technical information necessary to justify and support each Dispatch Down.

(e) GPA shall pay Seller, on the date payment would otherwise be due in respect of the month in which any such curtailment in excess of 2% of Minimum Production for such Contract Year occurred], an amount equal to the product of the Contract Price times the amount of Renewable Energy that Seller could reasonably have delivered to

GPA but for such curtailment ("Lost Revenue"). During the Contract Year-end annual true-up process, any payments made by GPA to the Seller for production (MWh) in excess of the Minimum Production for that Contract Year, whether such production results from actual generation surpluses or Lost Revenue, will be adjusted to reflect the lesser of the Contract Price for the then current Contract Year or then current LEAC Rate. For purposes of clarification, for any given Contract Year, GPA will not be required to pay the Contract Price on amounts of production beyond the Minimum Production if the Contract Price for that Contract Year is higher than the LEAC Rate for that Contract Year. Seller agrees to reduce the Project's Renewable Energy as set forth in such a Notice of Dispatch Down that meets the requirements set forth herein.

(f) For purposes of clarification, no curtailment by GPA, as a result of a warranted failure of or defect in the interconnection facilities transferred by Seller to GPA pursuant to the Interconnection Agreement, during the one-year warranty term thereof, shall count against the 2% curtailment threshold set forth above. During the one-year warranty term of the interconnection facilities transferred, any curtailment by GPA which results from such failure of or defect in the interconnection facilities transferred will not be eligible for reimbursement by GPA to Seller, Lost Revenue payments, or Dispatch Down Makeup Production in future Contract Years.

1.3 Outage Notification.

(a) Planned Outages. Seller shall schedule Planned Outages in accordance with Good Utility Practices and with the prior written consent of GPA, which consent may not be unreasonably withheld, conditioned or delayed. Nonetheless, the Parties acknowledge that in all circumstances, Good Utility Practices shall dictate when Planned Outages should occur. Seller shall notify GPA of Seller's proposed Planned Outage schedule for the Project for the following calendar year by submitting a written Planned Outage schedule no later than October 1st of each year during the Delivery Period. The Planned Outage schedule is subject to GPA's concurrence, which concurrence may not be unreasonably withheld, conditioned or delayed. GPA shall promptly respond with its approval or with reasonable modifications to the Planned Outage schedule and Seller shall use its Commercially Reasonable Efforts in accordance with Good Utility Practices to accommodate GPA's requested modifications. Notwithstanding the submission of the Planned Outage schedule described above, Seller shall also submit a completed form of outage notification to GPA no later than fourteen (14) days prior to each Planned Outage and reasonably appropriate outage information or requests to GPA. Seller shall contact GPA with any requested changes to the Planned Outage schedule if Seller believes the Project must be shut down to conduct maintenance that cannot be delayed until the next scheduled Planned Outage consistent with Good Utility Practices. Seller shall not change its Planned Outage schedule without GPA's concurrence, not to be unreasonably withheld, conditioned or delayed.

(b) Forced Outages. Within two hours of any Forced Outage Seller shall submit a completed form of outage notification to GPA in accordance with the instructions shown on the agreed form and shall submit outage information to GPA. Seller shall not substitute Renewable Energy from any other source for the output of the Project during a Forced Outage.

(c) Coordination with GPA. GPA shall cooperate with Seller in arranging and coordinating all Project outages.

1.4 Operations Logs and Access Rights.

(a) Operations Logs. Seller shall maintain a log of all material operations and maintenance information on a daily basis. Such log shall include, but not be limited to, information on power production, efficiency, availability, maintenance performed, outages, results of inspections, manufacturer recommended services, replacements, and control settings or adjustments of equipment and protective devices. Seller shall maintain this information for at least two (2) years and shall provide this information electronically to GPA within five days of GPA's request.

(b) Access Rights. GPA, its authorized agents, employees and inspectors shall have the right of ingress to and egress from the Project during normal business hours upon reasonable advance notice and for any purposes reasonably connected with this Agreement.

APPENDIX I

BASE CONDITIONS AND FACILITY TEST PROTOCOL

[Since this bid is opened to different renewable resources GPA is requiring bidders to provide their own test protocols for GPA's review and approval.]

APPENDIX J
INTERCONNECTION AGREEMENT
(TO BE PROVIDED UPON ITS EXECUTION)

APPENDIX K

ADDITIONAL TERMS REGARDING WEATHER HOURS AND DISPATCH DOWN

WEATHER HOURS

For each applicable period, Seller shall calculate (1) the expected production of the Facility using the historical Weather Data from "WeatherBank PGUM_2004-PRES_solar data" provided in bid Amendment 2 (the "Expected Historical Production") and (2) the expected production of the Facility using the actual Weather Data (the "Expected Actual Production"). Seller than then obtain the quotient, rounded to the fourth decimal place (the "Production Factor"), equal to the Expected Actual Production divided by the Expected Historical Production. If the Production Factor is greater than one (1), then no Weather Hours shall be deemed to have occurred. However, if the Production Factor is less than one (1), then Weather Hours shall be deemed to have occurred. The portion of any Deficiency Amount (as defined in the Agreement) attributable to such Weather Hours shall be the difference equal to (A) the aggregate Minimum Production amount for that period minus (B) the product of (x) the Production Factor and (y) the aggregate Minimum Production amount for that period. The Deficiency Amount due to weather shall not be penalized.

The Deficiency Amount due to weather shall be audited annually by an independent auditor to be selected and the cost shared by both Parties.

DISPATCH DOWN

Buyer shall pay Seller, on the date payment would otherwise be due in respect of the day in which any curtailment is initiated by GPA for reasons of Dispatch Down, an amount equal to the Contract Price times the amount of Renewable Energy that Seller could reasonably have delivered to Buyer but for such Dispatch Down. The determination of the curtailed amount associated with any Dispatch Down shall be calculated as follows:

1) Identification of weather conditions for the period of Dispatch Down
   For any period the Facility was Dispatched Down, Seller shall document the Weather Data associated therewith. ("Weather Data" means solar irradiation, wind speed, and ambient temperatures.)

2) Curtailed amount calculation
   a. Seller shall use PVSyst energy simulation software or other software as agreed by the Parties to generate hypothetical generation amounts for the Dispatch Down period (curtailed amount MWh) by utilizing the Weather Data.

   b. In addition to "Annual Facility Test" (as described in Section 4.9 of this Agreement), GPA shall be entitled to check the accuracy of the equipment associated with the Weather Data once in each Contract Year as agreed with Seller.

Issues for Decision

Resolution No. 2018-05:

AUTHORIZATION OF INCREASE OF ENGINEERING, PROCUREMENT, AND CONSTRUCTION MANAGEMENT CONTRACT AMOUNT

What is the project's objective? Is it necessary and urgent?

Stanley Consultants was contracted in March 2017 through GPA RFP-17-001 as the Engineering, Procurement and Construction Management (EPCM) Contractor for the New 120-180 MW Power Plant in March 2017. As the EPCM, Stanley is providing the technical and contractual support in the new IPP procurement development and will support procurement activities including contract negotiations. The increase in contract cost will cover services through September 2018.

Where is the location?

The new power plant proposed siting is adjacent to the Harmon Substation.

How much will it cost?

GPA is requesting a $650,000 increase for technical services to develop procurement documents and support procurement activities.

When will it be completed?

Additional costs are for services through September 2018. The contract has a term of 5 years from March 2017.

What is its funding source?

CIP Funds

CONSOLIDATED COMMISSION ON UTILITIES
Guam Power Authority | Guam Waterworks Authority
P.O. Box 2977 Hagatna, Guam 96932 | (671) 648-3002 | guamccu.org

RESOLUTION NO. 2018-05

RELATIVE TO AUTHORIZATION OF INCREASE FOR ENGINEERING, PROCUREMENT, AND CONSTRUCTION MANAGEMENT CONTRACT AMOUNT

WHEREAS, Stanley Consultants was selected through GPA RFP-17-001 as the Engineering, Procurement and Construction Management (EPCM) Contractor for the New 120-180 MW Power Plant in March 2017; and

WHEREAS, in October 2016 the PUC Docket 17-06 approved the initial funding of $750,000 for the procurement development of the new power plant from 2014 Bond Funds – LNG Startup Bond Project; and

WHEREAS, Stanley and its subcontractors have completed several tasks which include

- an initial kick off meeting on site to discuss new plant scope and contract options,
- draft bid documents and contracts including the Request for Qualifications and Technical Bid documents,
- continued technical discussions for IPP scope and support for current land rezoning efforts,
- scope development for geotechnical services; and

WHEREAS, additional funds are required to complete the bid documents to incorporate

- final land details including upcoming preliminary geotechnical studies and environmental and archaeological studies,
- incorporate additional LNG details to support secondary fuel infrastructure requirements for the fuel supply line and at the power generating facility,
- address regulatory requirements and conditions,
- support procurement activities including responses to bidder questions; and

RESOLUTION NO: 2018-05

WHEREAS, GPA estimate funding requirements through September 30, 2018 is an additional $650,000.

WHEREAS, GPA has an approved FY'2018 CIP budget of $800K for IPP Procurement/Construction Management (EPCM Scope); and

WHEREAS, GPA continues to work with Stanley to develop the additional funding requirements through contract award and for services as Owner's Engineer and construction management support activities during construction which will require PUC approval; and

WHEREAS, the increase contract cost exceeds the GPA General Manager's approval authority.

NOW, THEREFORE, BE IT RESOLVED, by the CONSOLIDATED COMMISSION ON UTILITIES, the GOVERNING BODY of the GUAM POWER AUTHORITY as FOLLOWS:

1. The CCU authorizes GPA to increase the Stanley EPCM contract by $650K for a contract total of $1.4M for consulting and technical services through September 2018.
2. The CCU authorizes the GPA General Manager to petition the PUC for approval to increase the Stanley EPCM contract by an additional $650K for a contract total of $1.4M for consulting and technical services through September 2018.

RESOLVED, that the Chairman certifies and the Board Secretary attests to the adoption of this Resolution.

DULY AND REGULARLY ADOPTED AND APPROVED THIS 27th DAY OF FEBRUARY 2018.

Certified by:

JOSEPH T. DUENAS
Chairperson
Consolidated Commission on Utilities

Attested by:

J. GEORGE BAMBA
Secretary
Consolidated Commission on Utilities

RESOLUTION NO: 2018-05

I, J. George Bamba, Secretary for the Consolidated Commission on Utilities (CCU), as evidenced by my signature above do certify as follows:

The foregoing is a full, true, and accurate copy of the resolution duly adopted at a regular meeting of the members of Guam Consolidated Commission on Utilities, duly and legally held at a place properly noticed and advertised at which meeting a quorum was present and the members who were present voted as follows:

8000 South Chester Street ❯ Suite 500 ❯ Centennial, CO 80112
303.799.6806 ❯ stanleyconsultants.com

February 7, 2018

This scope of work is the basis for the budget forecast submitted to GPA on February 2, 2018.

Tranche 1 to $750,000

- **Support Land rezoning – schedule item MI3-1901**. This scope includes work by RiMS and Stanley in support of the property rezoning legislature effort and work by EA Engineering, Science and Technology to perform environmental property surveys and Archeology Inventory survey. January 1 through March 31.

- **Project Management activity PM000**. This scope of work includes support conference calls, coordinate response to GPA questions and requests, prepare meeting minutes, periodic reports, monthly reports and invoices, manage the internal team and subcontractors. Ongoing through March 31.

- **Incorporate comments for Integrated Power Producer (IPP) Issue for Bid (IFB) documents Package – schedule item MI3-1030**. Pond, Stanley Consultants and K&M Advisors will incorporate GPA comments and discussed changes into documents in preparation for CCU and PUC review and comments. CCU comments will be incorporated prior to submittal to PUC. February 5 through March 31.

- **Evaluate RFQ responses – schedule item MI3-1009**. Stanley Consultants and K&M Advisors personnel will support GPA in the evaluations of the submitted RFQ proposals and recommend the selection of the most qualified IPP proponents and document the reasons for disqualifications. This is planned to be a large effort as many responses are expected; several that may be outside the RFQ requirements. Evaluations to take place at GPA offices. March 23 to April 6.

Tranche 2 to $1,500,000

- **Support Land rezoning – schedule item MI3-1901**. This scope includes work by RiMS and Stanley in support of the property rezoning legislature effort. This also includes the remaining environmental survey work by EA Engineering, Science and Technology to perform property surveys and Archeology Inventory survey. April 1 through June 1.

- **Project Management activity PM000**. Support conference calls, coordinate response to GPA questions and requests, prepare meeting minutes, periodic reports, monthly reports and invoices, manage the internal team and subcontractors. Ongoing through January 31, 2019.

- **Respond to PUC questions about the IFB documents and process. Schedule item MI3-1036**. April 3 to April 23,

- **Incorporate Land information and PUC comments into the IFB documents. Schedule items MI3-1040 and MI31902**. Pond, Stanley Consultants and K&M Advisors will incorporate PUC comments and discussed changes into IFB documents in preparation for issuing for bid by GPA procurement. April 13 through May 18.

- **Support IPP IFB questions during bid process – Schedule item MI3-1052**. Stanley Consultants, Pond and K&M Advisors will support GPA in the response to bidder questions during the IFB proposal development period. Support GPA with preparation of addendums added during the proposal development period. May 15 to September 6.

- **Develop IPP IFB proposal review, evaluation, and recommendations. Schedule item MI3-1060**. Stanley Consultants, K&M Advisors and Pond will support GPA procurement and personnel in the review and evaluation of submitted IPP IFB proposals. This will include rankings and a recommendation for selection. Review and evaluation of proposals to take place at GPA offices. September 6 to November 1.

- **Provide procurement – negotiations support to GPA with the selected proponent to reach contractual agreement. Schedule item MI3-1070**. November 1 through January 31, 2019.

- **Respond to requests for information and questions from the CCU during the contract approval. Schedule item MI3-107**1. December 18 to January 3, 2019.

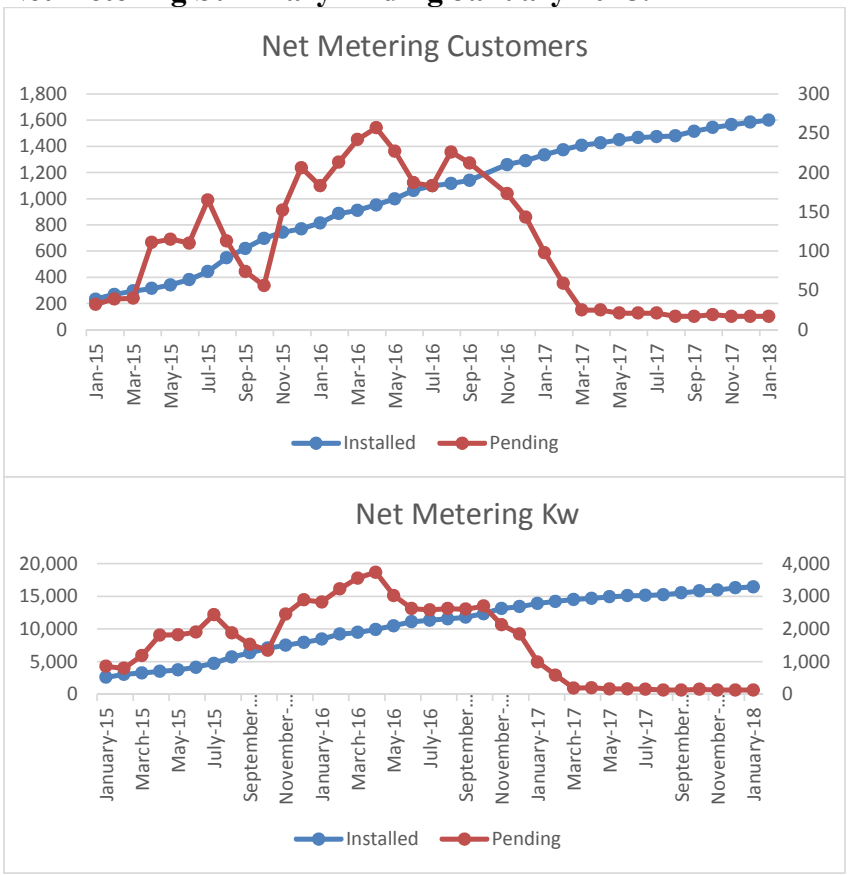
- **Respond to requests for information and questions from the PUC during the contract approval. Schedule item MI3-1073**. January 3 to January 31, 2019.

- **Support GPA in responding to questions and comments during the protest period.** December 18 to January 9, 2019

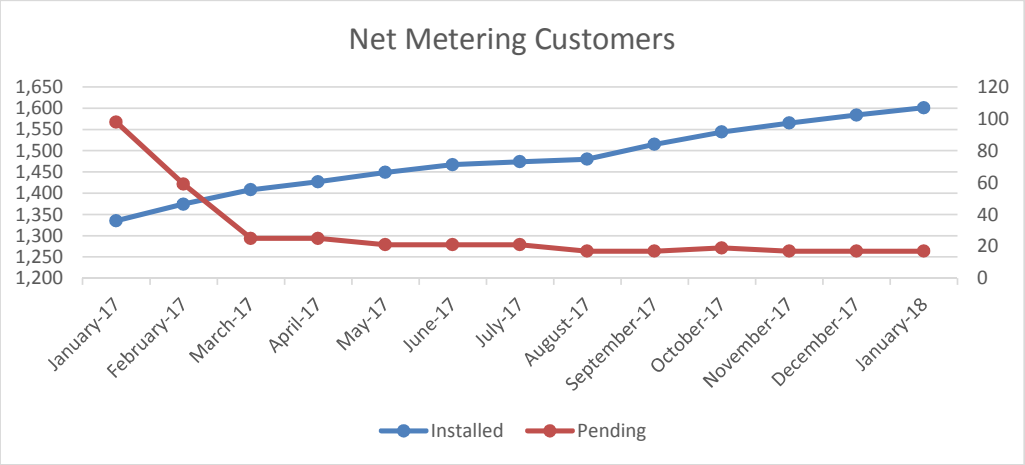
GUAM POWER AUTHORITY
ATURIDÅT ILEKTRESEDÅT GUAHAN
P.O.BOX 2977 • AGANA, GUAM U.S.A. 96932-2977

TO: **Consolidated Commission on Utilities**

FROM: **General Manager**



DATE: **February 22, 2018**



SUBJECT: **General Manager's Report**

1. **Generation System Update:** The following summarizes the expected generation capacity situation for March 2018. The peak demand for March is estimated at 248 MW. GPA plans to do chemical cleaning of both Cabras 1 & 2 steam units in March thru early April. The cleaning is necessary in order to improve plant availability and reliability.

March 2018 Capacity Available:	**332 MW**
March 2018 Projected Demand	**248 MW**
Available Reserve Margin	**84 M**

2. Net metering Summary Ending January 2018:

Description: Net Metering Ending January 2018	**Count**	**Kw**	
Active	**1,601**	**16,430**	
Pending	17	129	
Totals:	1,618	16,559	
Service:	**Count**	**KW**	**Kw/Customer**
Residential	1,519	13,689	9.0
Others	82	2,741	33.4
Total:	1,601	16,430	10.3
% Residential	**94.9%**	**83.3%**	
Estimated 12 Months Revenue Impact:	**$3,056,023**		

3. Renewable Energy Production Summary Thru January 2018:

Energy Production Source:	Kwh	Oil Barrels Avoided	Fuel Cost Avoided
NRG Total Production beginning Oct 2015	111,336,380	186,156	$10,238,598
Net Metering Estimated Production beginning Jan 2015	53,077,366	88,746	$4,881,045
Wind Power Production beginning Jan 2016	828,109	1,385	$76,154
Renewables Total:	**165,241,855**	**276,287**	**$15,195,797**

4. Demand Side Management (DSM) Program Expenses Thru January 2018:

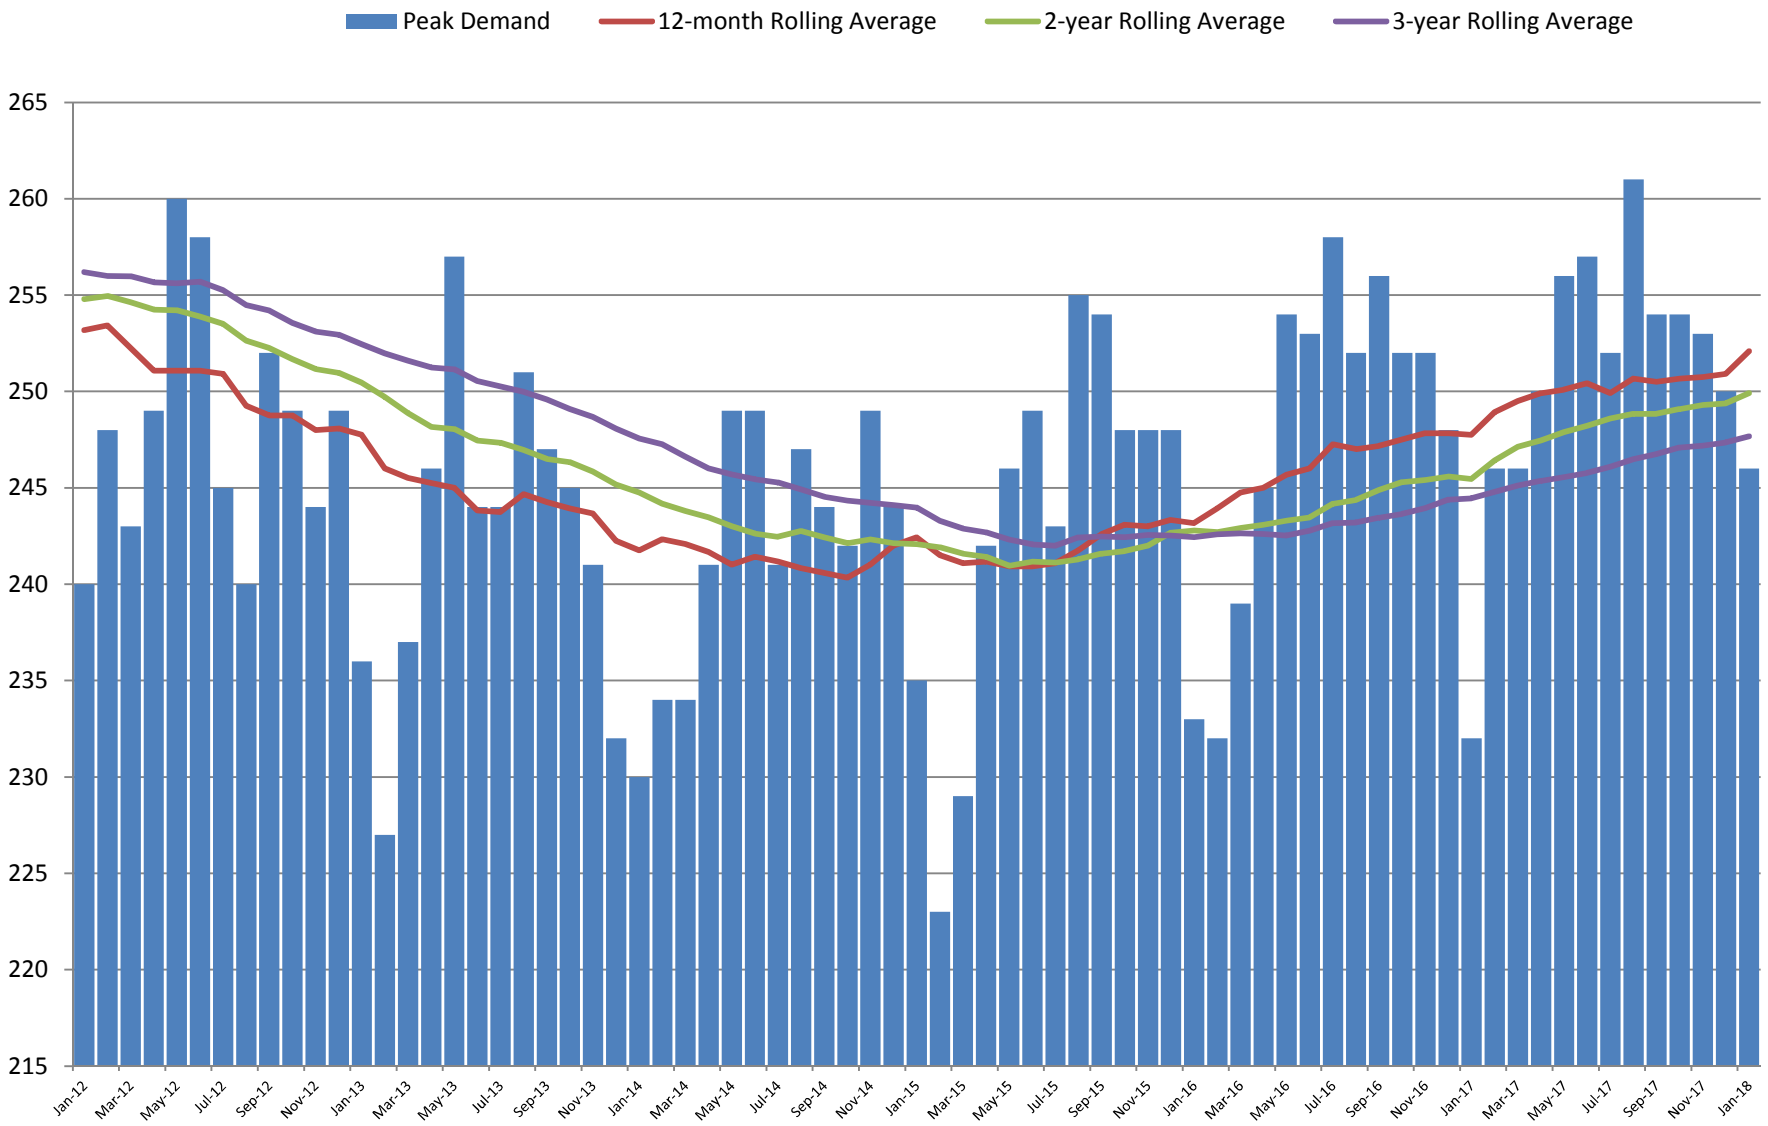
All Expenses – Fiscal Year

Description	FY16	FY17	FY18 as of January '18	Total to Date
Regular/OT Pay	$11,348.80	$22,256.00	$4,690.09	$38,294.89
Other Contractual	$28,278.50	$73,010.05	$2,885.00	$104,173.55
Paid Rebates–Split AC	$154,700.00	$557,275.00	$367,200.00	$1,079,175.00
Paid Rebates–Central AC	$3,400.00	$8,200.00	$800.00	$12,400.00
Paid Rebates–Washer/Dryer	$2,800.00	$7,425.00	$1,800.00	$12,025.00
Total Expenses	200,527.30	$668,166.05	$377,375.09	$1,246,068.44

5. **Phase II Renewables:** The PUC is expected to deliberate the approval of the KEPCO-LG 60 MW Power Purchase Agreement at its February 22nd Meeting. The HANWHA 60 MW PPA contract is before the CCU for approval this month. If CCU approves, the PUC may approve the project in their March 2018 meeting.

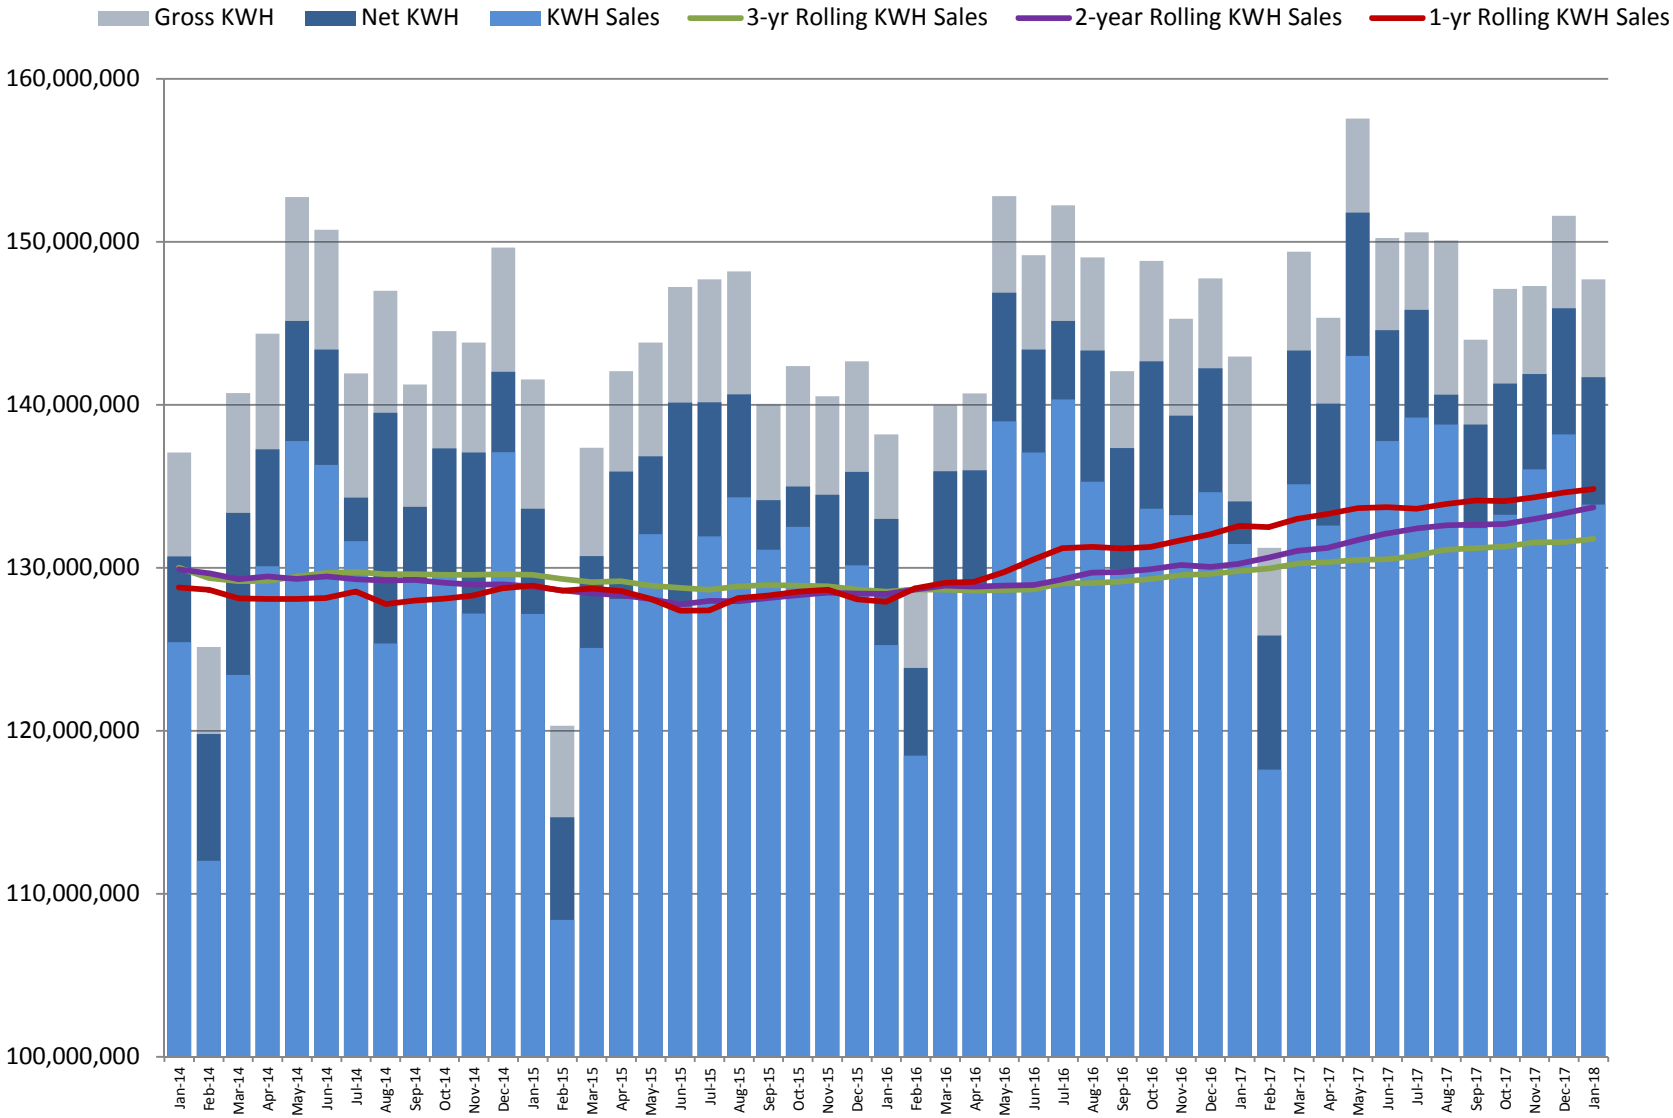
6. **Phase III Renewables Bid**: The bid has been issued. The bid request is for about 40MW of solar PV renewables to be constructed on Navy leased land. The energy produced would be stored in batteries during the day and released at nighttime to meet peak time load. The bid price opening date for acceptable proposals is set for April 17, 2018.

7. **PUC Agenda for February 22, 2018:**
    - **GPA Docket 18-06, Petition to Approve Phase II Renewable Award to KEPCO-LG CNS Consortium**
    - **GPA Docket 18-07, Petition to Approve Piti Substation GIS Maintenance Award to AYM International**



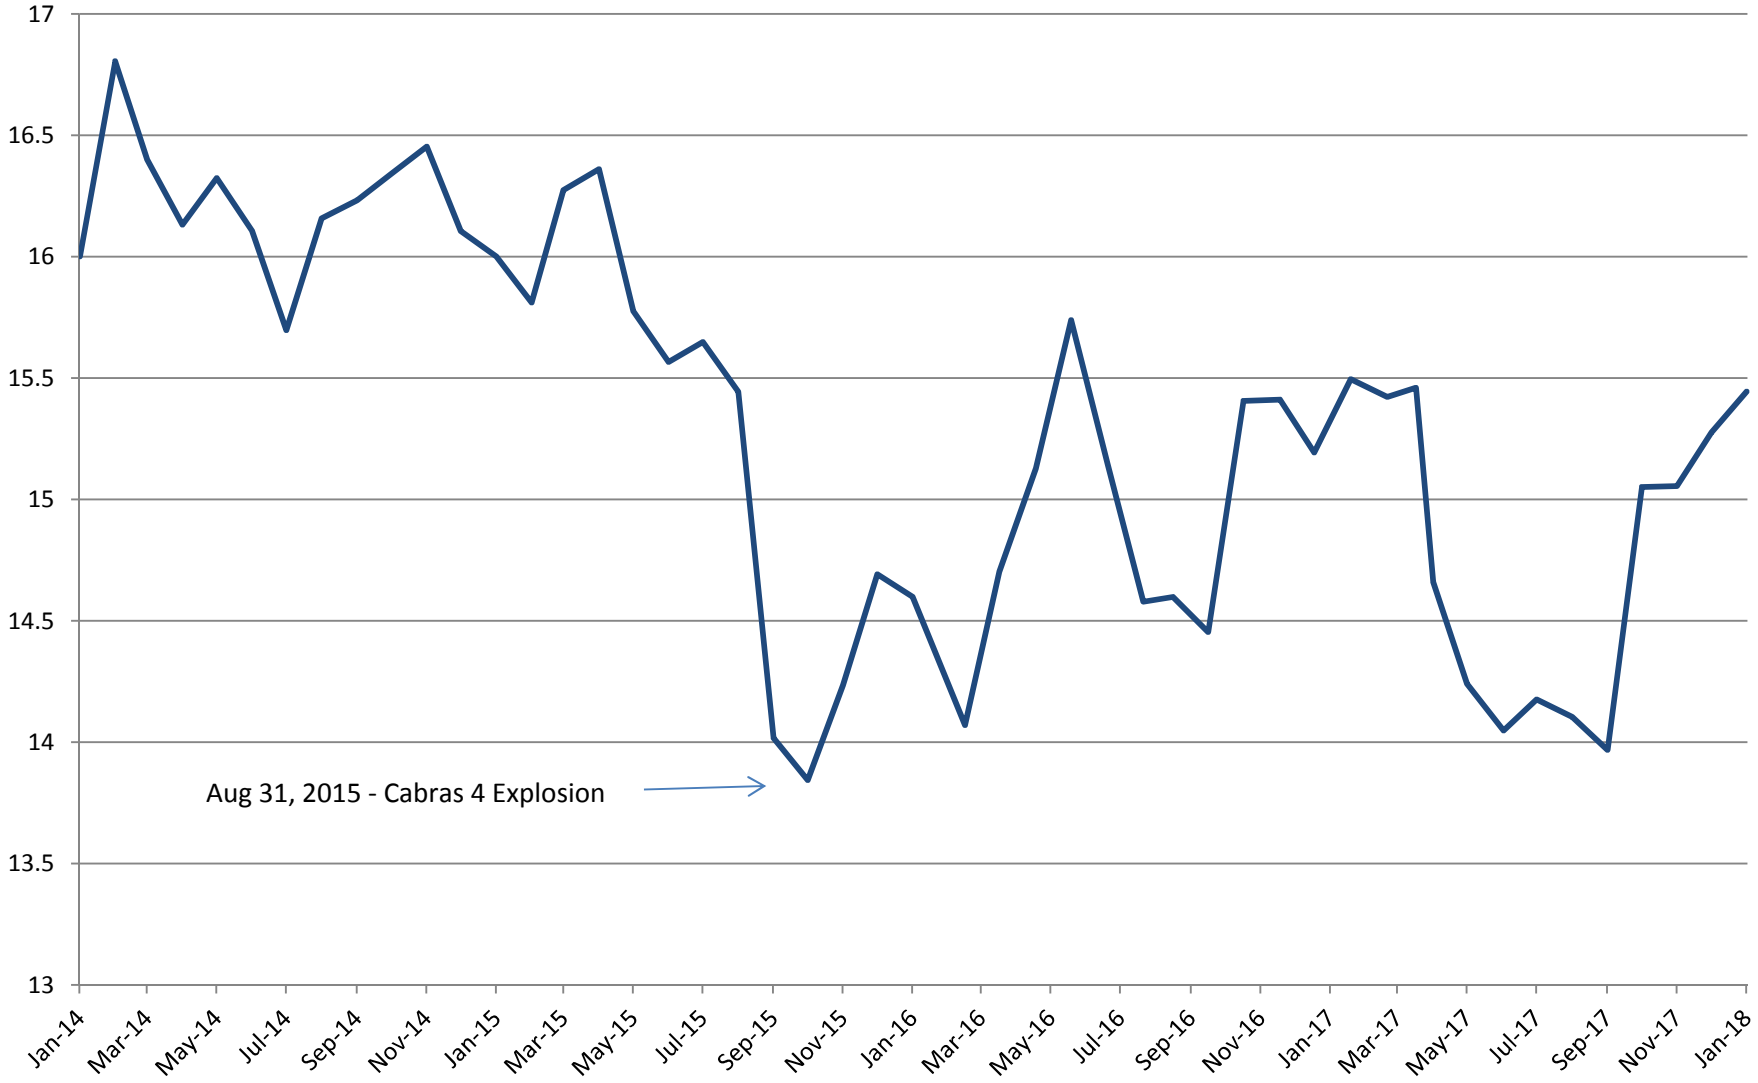
8. **New Power Plant Procurement:**
    - The rezoning effort for the land for the new power plant continues. Senator Ada held a public hearing on Bill-223-34 on February 9th. He has noted he will introduce the bill to be deliberated in the Legislature's February session.

9. **Employees Briefings:** We conducted employee briefings on February 19th and 20th. Twice a year we update our employees/team on the progress of the utility and where we are heading.

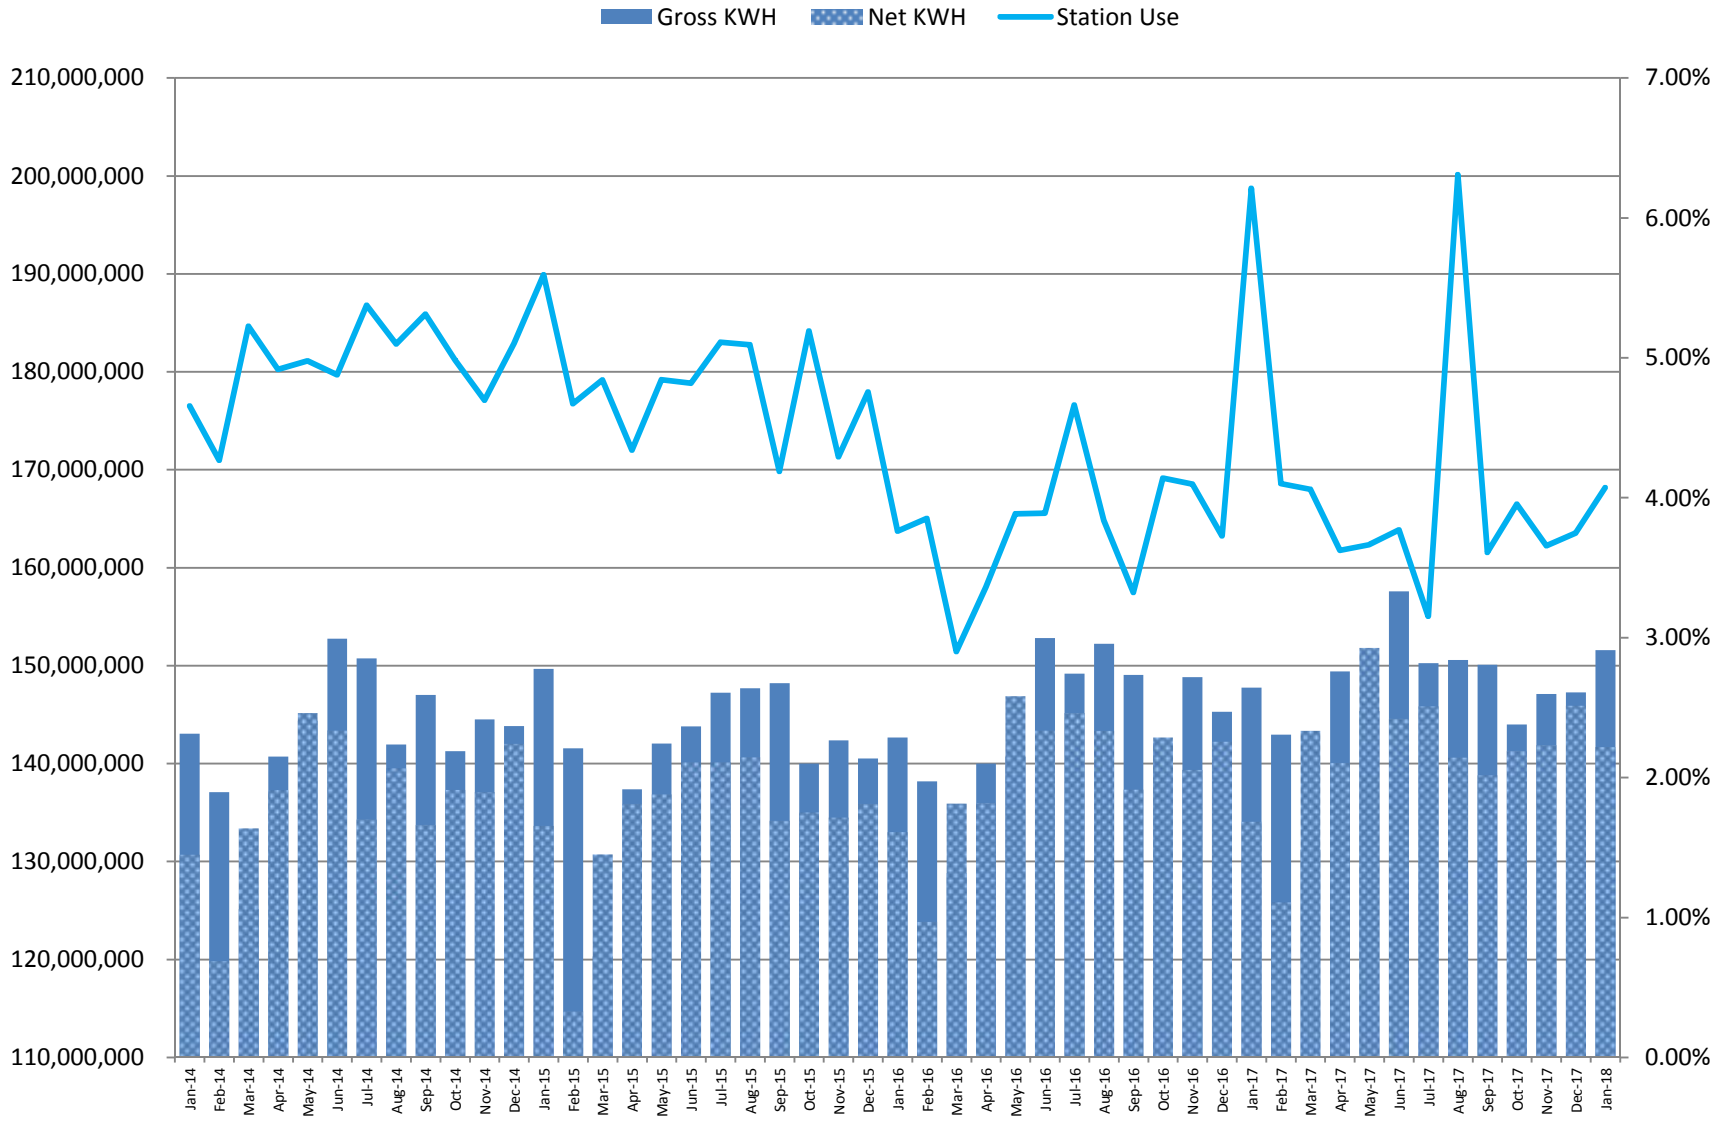


10. **Key Performance Indicators:** The following pages provide updated information thru January 2018.

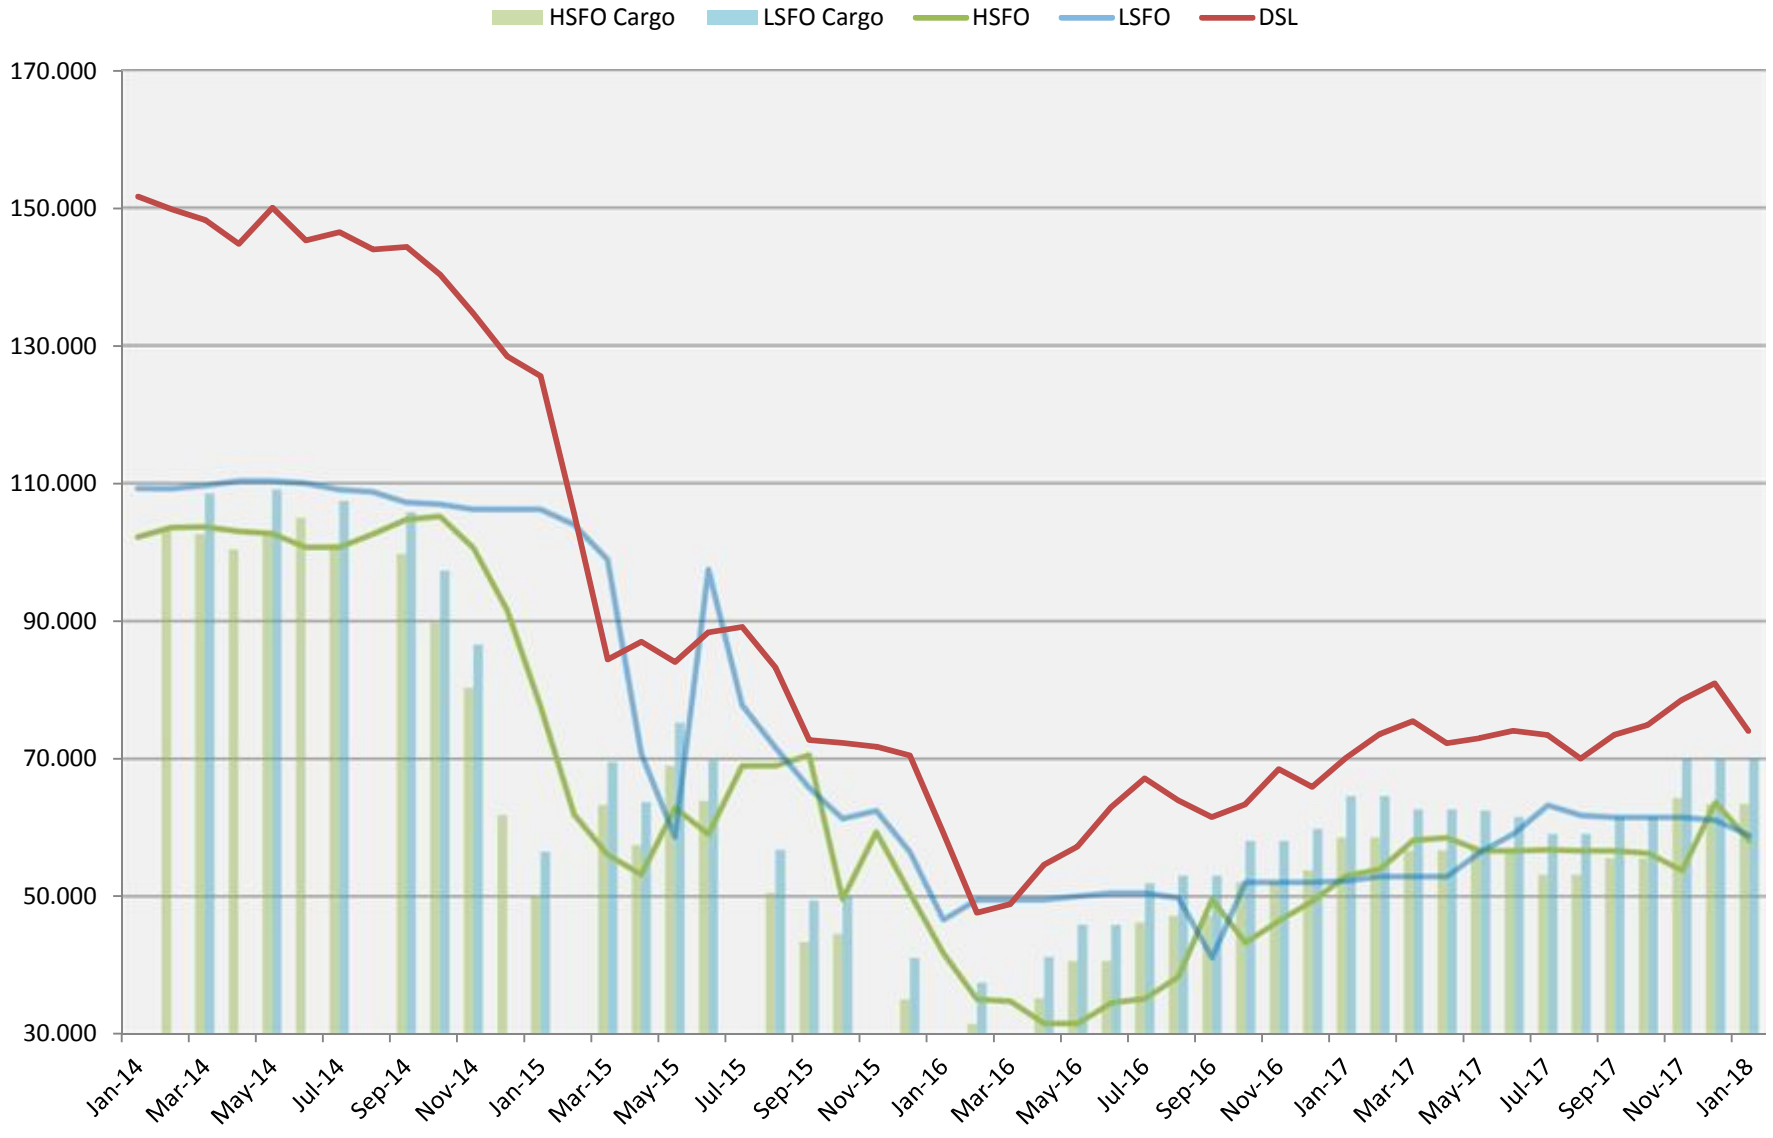
John M. Benavente, P.E.



Historical Monthly Peak Demand
January 2012 - January 2018



Historical KWH Sales
January 2014 - January 2018



SYSTEM GROSS HEAT RATE
(KWH/Gal)
January 2014 - January 2017

Gross and Net Generation (KWH)
January 2014- January 2018

Fuel Cargo and Fuel Consumption Costs ($/bbl)
January 2014 - January 2018

Guam Power Authority

50th Anniversary

~Celebrating 50 Years Powering Our Island Community~

May 15, 2018

Communications-Public Information Office

Why Celebrate 50 Years?

- GPA should be eager to mark the accomplishments of the Authority and share the momentous occasion across our island community.

- GPA's anniversary campaign is planned to recognize all GPA operations, honor & thank current & past employees and leadership; show appreciation to employee's families, retirees; and thank leaders & the community.

- Goal: *To reflect on the history of GPA and its positive impact on the community; continue to promote GPA's mission and build goodwill.*

50th Anniversary Planning Committee

- **Planning Committee with Chair and Co-Chair**
- **Art Perez - Advisor**
- **Patti Diego - Advisor**

Suggested Events

1. Proclamation Signing
2. GPA Employee Breakfast Briefing(s)
3. '50 Days of GPA' – March 26 to May 15 **= 50 days**
4. GPA TimeLine Wall - featuring 50 Years/5 decades of GPA operations on Guam
5. Promotional items
6. Produce an air historical-testimonial video montage – to incorporate past (retired) and present employees, GPA leadership, GPA governance (board/CCU) members
7. GPA Time Capsule Event – to be opened in 2043 (25 years) or 2068 (50 Years)
8. Guam Museum – connection – (eg. Brass Plate from Tanguisson)
9. Family Picnic and/or Evening Banquet Event
10. GPA Executive Management/CCU Members – factual, inspirational quotes; color photos and text mounted on walls
11. Media Rounds
12. UOG/CIS Conference

Communications Objective and Logo

- Only adding an anniversary "element" to an existing GPA logo
- Draft a statement that summarizes the purpose behind the 50th anniversary celebration, which serve as its theme.

- A theme can be as simple as "50 Years of Innovation" or "50 Years of Powering Guam"

(Other/Relatable)

Suggested Events:

1. GPA can build its 2018 Liberation Day parade float to commemorate the 50th anniversary. Parts or segments can be preserved and re-used at the GovGuam Labor Day Picnic in September

2. For 2018 GovGuam Labor Day - on the GPA-side, re-purpose parts from Liberation Day Float in decorations

3. 2018 GPA/PPW – October – overlay GPA 50th anniversary history to call attention to GPA's 50-year celebration.

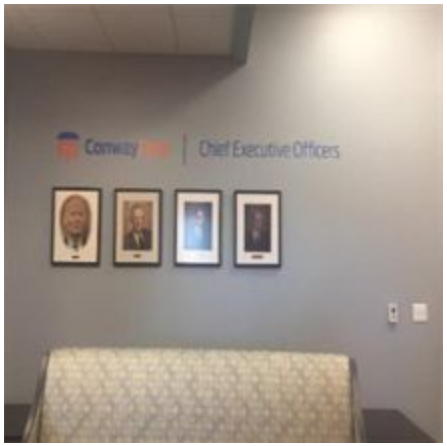
4. December 2018 – send 'thanks' for sharing in the celebration by producing a year-end greeting card with design sourced from 50-Year TimeLine Wall

5. GPA Semi-Centennial Garden of Fruit Trees at Fadian –to commemorate the GPA 50th Anniversary for years to come. This decoration will beautify the organization's headquarters while reminding visitors that the organization has a long, trusted history; incorporate Semi-Centennial Logo

Example: GPA TimeLine Wall

1. Showcase employees and events from over the 50 years GPA has existed

2. Share photos and stories from the past.



3. Constructed in panels / or phases – unveiling event(s) opportunities

Events: Inspirational Quotes

1. Design to match TimeLine Wall
2. Features: GPA Executive Management/CCU Members
3. Factual, inspirational quotes mounted on wall
4. Color photos
5. Text

‘Free’ Advertising/Publicity Opportunities:

1. Incorporate use of GPA ’50 Year’ logo on all official correspondence ‘tags’ in 2018
2. Celebrate 50 Years in monthly GPA Ratepayer newsletter
3. Celebrate 50 Years in internal GPA Employee newsletter
4. Additional ‘text’ on GPA Energy Statement
5. Visit to Radio Talk Show
6. Visit to Television Talk Show
7. Posting activities on all social media
8. GPA Employee Tshirts

Net Metering Stakeholder Discussions

Public Meeting Dates

- 2016 August 11
- 2016 September 7
- 2016 October 27
- 2017 February 28
- 2017 May 9
- 2018 February 1

2016 August 11

- GPA presented Black & Veatch's Report regarding NEM:
  - NEM Cross-subsidies by Non-NEM Customers
  - Proposed NEM Rates for NEM Energy into the Grid
  - Proposed NEM Rates for Grid Services
- CCU addressed Stakeholders for feedback and input
  - B&V Report is not CCU policy
  - CCU wishes to shape policy on thorough discussions with Stakeholders including GPA, Consultant, NEM System Customers and the Solar PV Industry inputs

2016 September 7

- GPA solicited inputs from the Stakeholder Community regarding B&V's NEM Report and B&V recommendations.
- Chairman Duenas remarked that all stakeholder and customer comments are well taken. The CCU welcomes feedback from the stakeholder community including data and comments about the B&V NEM Report. GPA has not decided on B&V's recommendations. Only after meaningful dialog with the Stakeholder community will the CCU decide on its recommendations regarding Net Metering Policy.
- Commissioner Bamba expressed his position as a renewable energy proponent and his personal research regarding what other markets are doing. Bamba stated that Guam is not only market struggling with ramifications of net metering. Furthermore, Bamba pointed out that when the sun goes down NEM customers still need to access GPA system unless they have their own battery storage units.
- Commissioner Sanchez declared that GPA is currently the largest supplier of renewable energy and the CCU/GPA are committed to renewable energy. Renewable energy stakeholders should hold these types of discussions on how to increase economically viable renewable energy while ensuring energy resiliency and power supply. The sun does not always shine, but customers demand that power be available when they want it and as much as they want it. The PUC envisioned that at the 1000 customer mark there would be enough information to start having meaningful conversations. Sanchez called for the renewables industry to help and provide feedback on costs and capabilities. Sanchez challenged the group to do what 36 other communities are doing – review the NEM policy as applied, see what we like, what we don't like and see if we can agree what changes we can agree to that benefit everyone.
- About 50-60 stakeholders and customers submitted written and oral testimony regarding potential changes to NEM program.

2016 September 7

- Stakeholder oral and written testimony largely expressed the following ideas on the Value of Solar (VOS). (Value of Solar) Excess Net Metered Energy saves the Authority on the following (NEM bears these costs):
  - Maintenance costs for generations, labor costs, poles, hardware e.g. lines, substations, transformers. No down time for generators (excess power reduces need to run generators);
  - Line loss reduction (serves nearby customers instead of through transmission lines, substations, transformers etc.);
  - Insurances costs;
  - Costs associated with fuel and fuel shipments; costs is levelized and constant;
  - Helps GPA reach its energy portfolio; reduces need for additional renewable projects;
  - Savings to environment; reduces carbon footprint, savings through efficiency.
- Bill Hagen's (Pacific Solar) submitted written testimony referring to the Minnesota Value of Solar breakdown:
  - Avoided Fuel Costs (purchase of fuel from polluting sources);
  - Avoided Plant O&M;
  - Avoided Plant Fixed;
  - Avoided Generations Capacity Costs (additional generation);
  - Avoided Reserve Capacity Costs;
  - Avoided Transmission/Distribution Costs;
  - Avoided Environment Costs.

2016 September 7

- MRE stated that less than 1% grid penetration was too early to modify GPA's NEM policy. Hawaii stopped NEM - and now, it is being revived – making modifications only after 20% penetration. Stakeholders stated that GPA should follow other jurisdictions and allow for between five to 21 percent penetration rate to gather more information on benefits and true costs.
- Stakeholders remarked that the B&V report was skewed to GPA. Various Stakeholders called for an industry report considering the Value of Solar (VOS). MRE's JV suggested that his company review the B&V report and perform their own VOS Study.
- Stakeholders remarked that NEM customers bear the following costs:
  - Investments in PV technology;
  - Finance costs;
  - Insurance costs;
  - Maintenance costs;
  - NEM customers do not get full retail; GPA charges full retail for NEM energy to other customers.
- Stakeholders posited that the NEM program promotes economic benefits:
  - Employment through PV companies
  - Direct Tax Revenues through jobs, fees, licenses, insurance, financing, services, sales etc.
  - Indirect benefits through purchase of goods and services, mortgages and investments into local communities.

2016 September 7

- Stakeholders suggested that GPA consider subsidies/incentives for home storage systems to help during peak hours.
- In aggregate, NEM customers cited that the B&V recommendations do not allow them to recoup their investment that they made in good faith. Stakeholder requested that a grandfather provision be made part of any future NEM policy. Customers also agreed that we should be fair to each of the constituencies represented at the roundtable discussion.

2016 October 27

- The emphasis at this meeting was focused, at the direction of Stakeholders, with interpretations on Guam Public Laws 27-132 and 30-141 regarding net metering:
  - PUC policy call relative to analysis of rate impact to GPA and non-NEM customers when the NEM program reaches 1000 NEM customers
  - A move to review the data and determine the lay of the land
- CCU committed to extending this discussion to continue as CCU and Stakeholders get better acquainted with the issues.
- A Stakeholder raised the issue of compensation being applicable to third-party solar lease providers to GPA customers. *(Graham was to research this issue as per CCU Chair)*

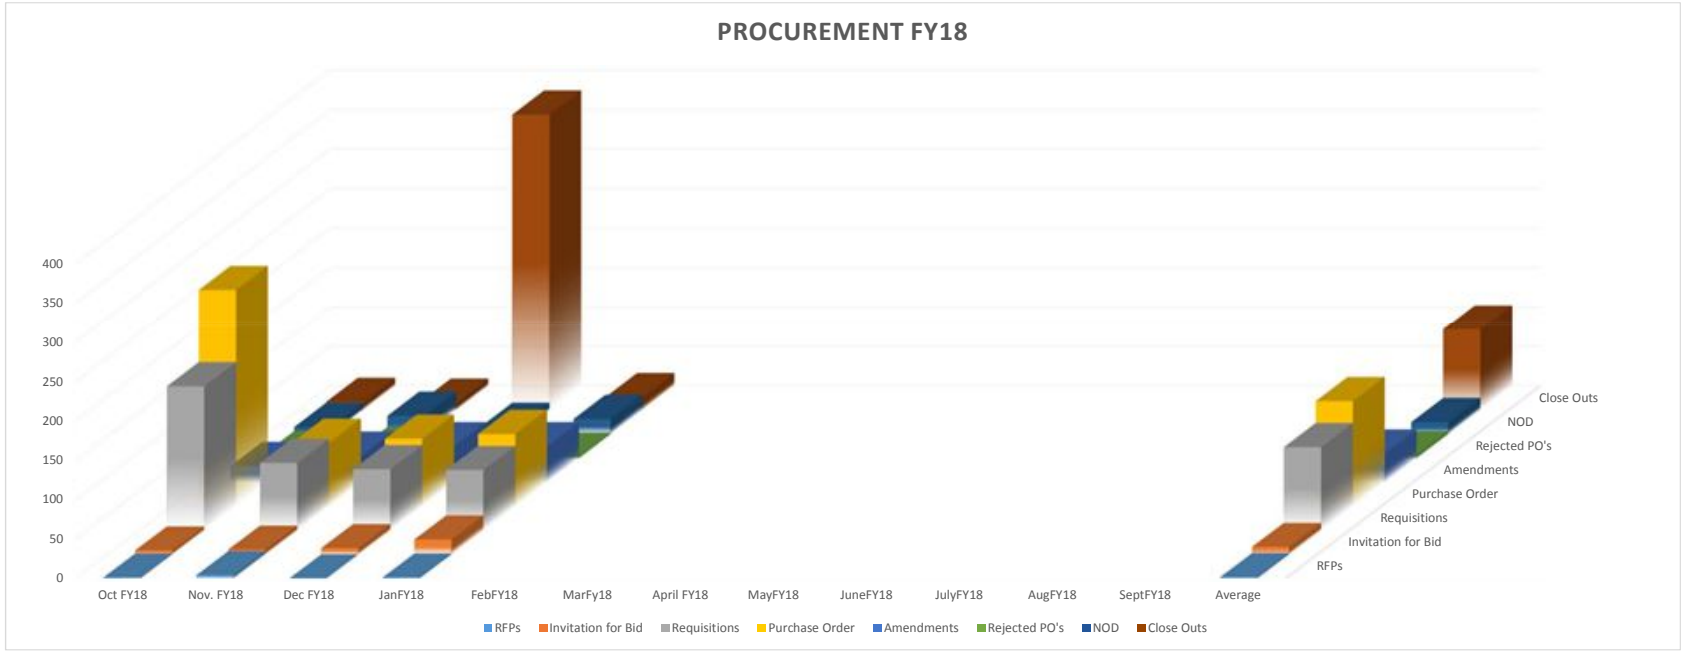
2017 February 28

- CCU continued the dialog between NEM stakeholders, CCU, and GPA. CCU invited Stakeholders to present at the next NEM Stakeholder Meeting.
- Stakeholders requested that existing NEM customers be grandfathered at the full-retail credit until they pay off their investments. Additionally, any reduction in the NEM credit should be phased in.
- Jeff Voacolo (JV) from MRE volunteered to present on Value of Solar at the next NEM Stakeholder Meeting.

2017 May 9

- At this meeting Jeff Voacolo (MRE) and Ben Norris (Clean Power Research) presented on MRE paying for and conducting a Guam-Specific Study for the Value of Solar. Jeff Voacolo (MRE) stated:
  - MRE paying for the study
  - This is a Guam-specific study for the value of solar
  - Hired Ben Norris (Clean Power Research)
  - Should take 60-90 days for report.
- Norris presented elements of the intent and methodology of his VOS study:
  - Value must distinguish between utility-avoided costs and societal benefits
  - Clean Power Research is neutral vis-à-vis net metering
  - Considers solar+energy storage
  - Input Data Request
    - Financial Data (WACC)
    - Hourly Loads
    - Hourly Marginal Costs
    - Heat Rates (Diesel Units Displaced by Solar)
    - Fuel Price Forecast
    - Hourly Solar Generation from Utility-Scale Plant
    - Hourly Solar Generation from “Many” Small, Distributed Resources (With No Net Metering)

2018 February 1



- At this meeting no Stakeholders showed up.
- The CCU Chairman related that MRE's JV could not provide his Value of Solar Study. Although JV had requested additional time, the CCU has provided more than adequate time.
- The Chairman reported: in the May 9, 2017 meeting, JV stated that it should take 60 to 90 days for his report to be completed. After some time, JV requested information from GPA.
  - GPA provided MRE's JV with the information requested initially and subsequently.
  - Both SPORD Manager and AGMETS had asked JV via email whether he had all the information he needed.
  - JV's response was that he had.
- Therefore, the CCU considers the matter closed. CCU required GPA to make recommendations regarding VOS and modifications to the NEM program.

NEM Stakeholder Meeting Attendance

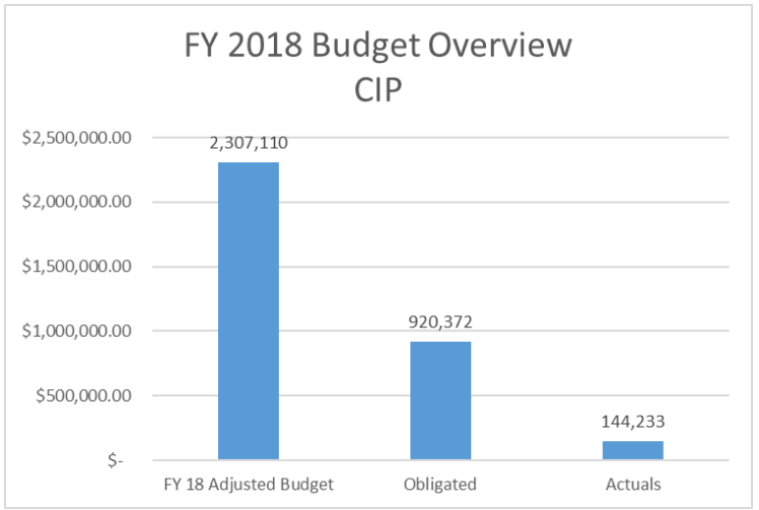
Staffing Report as of January 31, 2018 - PREPARED BY: J.Aguigui

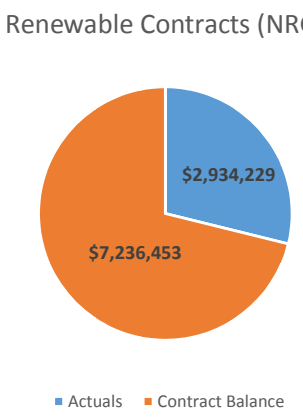
SPORD CCU Report

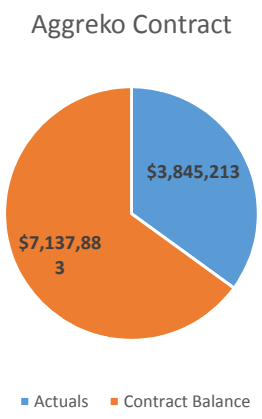


January 2018

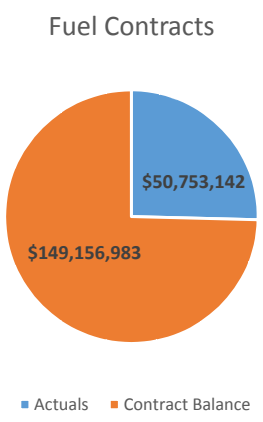
SPORD FY 2018 Budget Status

- SPORD O&M:



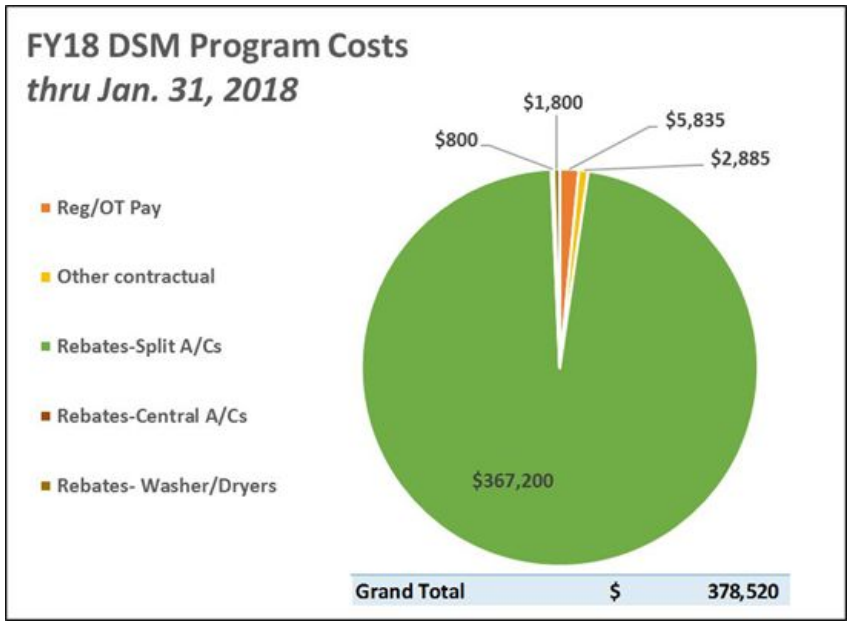


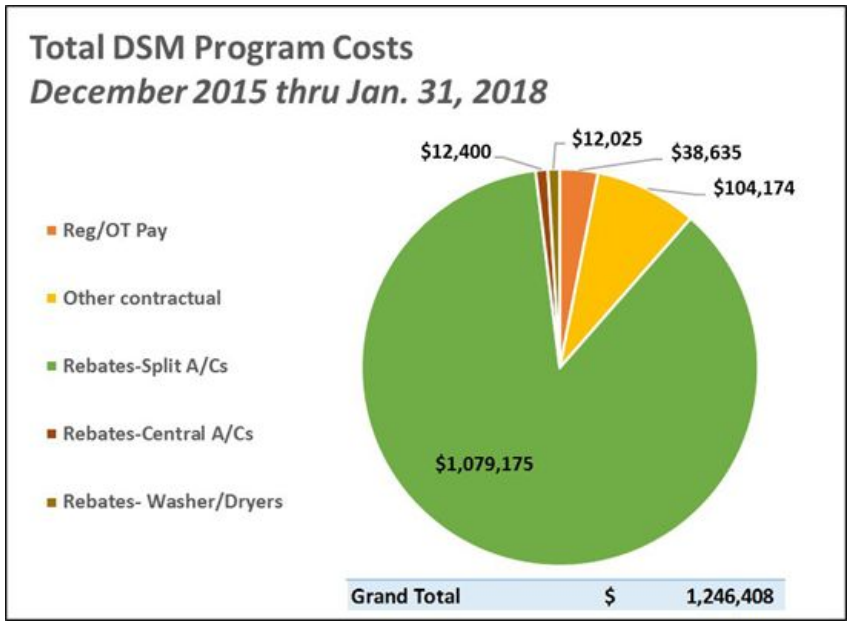
- CIP



SPORD FY 2018 Budget Status

- Major Contracts (Non-O&M)





SPORD Manages $221,063,903 in Non-O&M Fuel and PPA Contracts

SPORD FY 2018 Budget Status

- DSM Expenses

DSM Requires a New Funding Source

FY16	FY17	Q1 FY18	FY18 Forecast	
			Low	High
$ 200,527.30	$ 668,166.05	$ 343,315.09	$ 1,373,260.36	$ 1,923,855.29

- DSM Running Total Estimates: $480,000 remaining balance
- Requesting $750,000 Additional Funding for FY 2018

- Low Forecast based on 4 X Q1 Expenses
- High Forecast assumes FY17 Quarter over Quarter Growth holds for FY 2018.

Ongoing Activities

- Contract Performance Management (IPP, PMC, Agrekko)
- Generation Fuel Supply & Fuel Farm Management
- DSM Rebate Processing
- Renewables (Wind Turbine Maint & DOAg MOA, NRG Invoicing, NRG ramping and technical issues)
- Smart Grid/Network Support
- Project Management (*See January Project Activities*)

Project Activities

No.	Project Description	January 2018 Activities	Status / Est. Completion
1	Energy Storage System (Phase I)	GPA reviewing 100% design. Clearing and Grading work commenced in November 2017 and is on-going. Construction is 17% completed.	August 2018
2	Renewable Energy Resource Phase II	KEPCO PPA approved by CCU(. GPA finalizing negotations with Hanwha.	~ Dec 2019 2 years after contract signing (Commerical Operation)
3	New Power Plant Bid (EPCM)	Request for Qualification announced on January 16, 2018. Proposals due on March 22, 2018. Technical specification are being reviewed and updated based on discussions on the	Jan 2018 (Issue RFP Step 1 Solicitation)
4	DSM Marketing	DSM Marketing continues. Initiated work with Adztech/Jay Merril on DSM Survey, scheduling initial survey activities in February.	Continuous
5	DSM Rebate Program	Processed over 140 equipment in applications for rebates totaling ~ $31K	Continuous
6	Wireless Network Expansion	Commenced Southern Expansion in collaboration with GWA: 30% Assessment of GWA Well Locations: Completed Assessment of Existing Tropos Units: 20%	To be Updated Completed Continuous
7	Performance Metrics Automation Project	Presentation on iDashboard provided to GM. GPA contiues to work with consultant on automating reports and formating.	Mar-18
8	Electric Grid Analysis Software	Additional training for users	Mar 2018
9	Services to Develop Business Performance Indices using iDashboards	Dashboard builds 95%	Dec 2017
10	Supervisory Control and Data Acquisition (SCADA) System	Change Order Approved for October 2018 Completion and hardware costs	Oct 2018

Project Activities

No.	Project Description	January 2018 Activities	Status / Est. Completion
11	Mobile Workforce Management System	Bid Evaluation Ongoing	Feb 2018 (Bid Award)
12	Consulting Services for Smart Grid Analytics Enabled Distribution System Planning, Technical, and Economic Feasibility Studies	RFP evaluation completed for sole bidder. Bidder did not qualifiy. Committee recommendation to rebid.	Feb 2018 (Rebid)
13	TEMES Piti # 7 ECA Expiration & Transition to GPA	Transition completed. Pending Technical Assessment report from LEIDOS.	Transisition Completion Date: Nov 2017
14	MEC Piti &8 and #9 - ECA Expiration	ESA & Technical Assessment pending completion of discussions with LEIDOS/BWSC. Bid Document Preparation for New IPP Procurement. Data Compilation in Progress.	Jan 2018 (Bid Docs) Mar/Apr 2018 (ESA &Tech Assessment Report)
15	Planning Software Upgrades & Training (Capacity Expansion/ Portfolio Optimization / Stochastics)	Training of 2 SPORD Engineers for PO use commenced 10/3/2017. Upcoming task: Configuration and management of database, training for - SPORD - PSCC	Start Date: Oct 2017 Completion Date: Sept 2018
16	Generation Software (GADS open software)	Installation at Generation Division completed. Database configuration in progress. Training completed on Nov. 15, 2017.	Nov 2017
17	IFB for ULSD Supply for Baseloads and Peaking Units	Solicitation in progress	Start Date: Nov 2017 Est. completion: FY2018
18	Contract for Lease of Bulk ULSD Storage	196KB continues ongoing repairs for availability in Feb 2018. GPA is leasing alternate tanks in the interim.	Early 2018 (Tank Available)
19	EV Infrastructure	Developing fast charge station scope for Mangilao offices.	Sept 2018

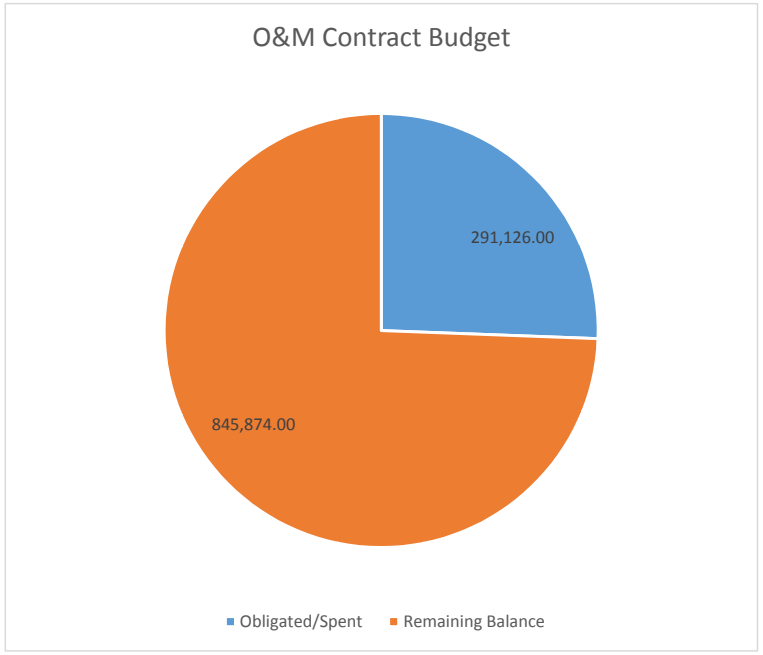
Project Activities

No.	Project Description	January 2018 Activities	Status / Est. Completion
20	Consulting Support, new procurements for Piti 7,8,9	Data compilation and bid document preparation (GPA side) in progress. Awaiting LEIDOS recommendations and draft.	Start: October 2017, Announce in Jan/Feb 2018 Completion: August 2018
21	Fuel Conversion Plan	Initial discussion commenced, detailed discussions in November after submission of Assessment Report. Data Requests being addressed.	Start: October 2017 Completion: June 2018
22	Fuel Bulk Storage Facility Assessment	Consultant Site Visits for ESA and Technical Inspeciton completed. Reports due January 2018.	Start: Sept 2017 End: January 2018
23	Design and Engineering Consulting for Remote Start of GPA Plants	Engineering Project Management team reviewed scope. Dratt of assessment and implementation plan completed.	August 2018
24	Renewable Energy Resource Phase III	Completed pre-bid conference and site visits January 23-24 2018.	(Mar 2018) Tech Proposal Due
25	Utility Energy Services Contract (UESC)	Kicked off discussions with UOG, Guam Energy Office, Dept. of Navy, and GPA team on project development and opportunities. Discusssed DSM Model House. UOG Campus Assessment, Discussion on Solar Rooftop on DOE campuses.	
26	IFB for ULSD Supply & Delivery Services for GPA Plants	Restructuring of Bid Package for Re-Solicitation in progress	Start: Feb 2018 Completion: FY2019 Contract Start: Jan 01, 2019
27	IFB for RFO Supply to Baseload Plants	Solicitation in progress	Start: November 2017 Est. Completion: FY2018 Contract Start: TBD
28	IFB for Petroleum Inspection Services	Solicitation in progress	Start: November 2017 Est. Completion: FY2018 Contract Start: Jun 01, 2018
29	RFO Storage Lease	Lease extension approved by CCU. For PUC review and approval	Start: November 2017 Est. Completion: Mar 2018 Contract Start: Aug 1, 2018

Planned Procurements

- Piti #7 Additional Procurements
  - Pending Technical Assessment of plant potential procurements may include Maintenance Services Contract or a Re-capitalization Contract.
- Piti #8 and #9
  - Developing solicitation for re-capitalization contract after expiration of ECA in Jan 2019.
- IPP Contracts for up to 180 MW Generation Resources
  - Technical Documents being drafted..
- ULSD Supply & Delivery to Baseload and Peaking Units
  - Solicitation in progress

Planned Procurements



- MV90 Integration and Training Services
  - Bid announced January 2018
- Engineering Analysis Trainings Services
  - Processing Documents through PMM to be solicited in February 2018

Planning & Regulatory CCU Report

January 31, 2018

Planning & Regulatory O&M Contract Budget

- Revenue Funded
- Target
  - 7.41% O&M Obligated by November 16, 2017
  - 19.28 O&M Obligated as of Nov. 30, 2017 (actual)
  - 19.36 O&M Obligated as of Dec. 31, 2017 (actual)
  - 25.60 O&M Obligated as of Jan. 31, 2018 (actual)
  - 30.09% O&M Obligation by February 28, 2018

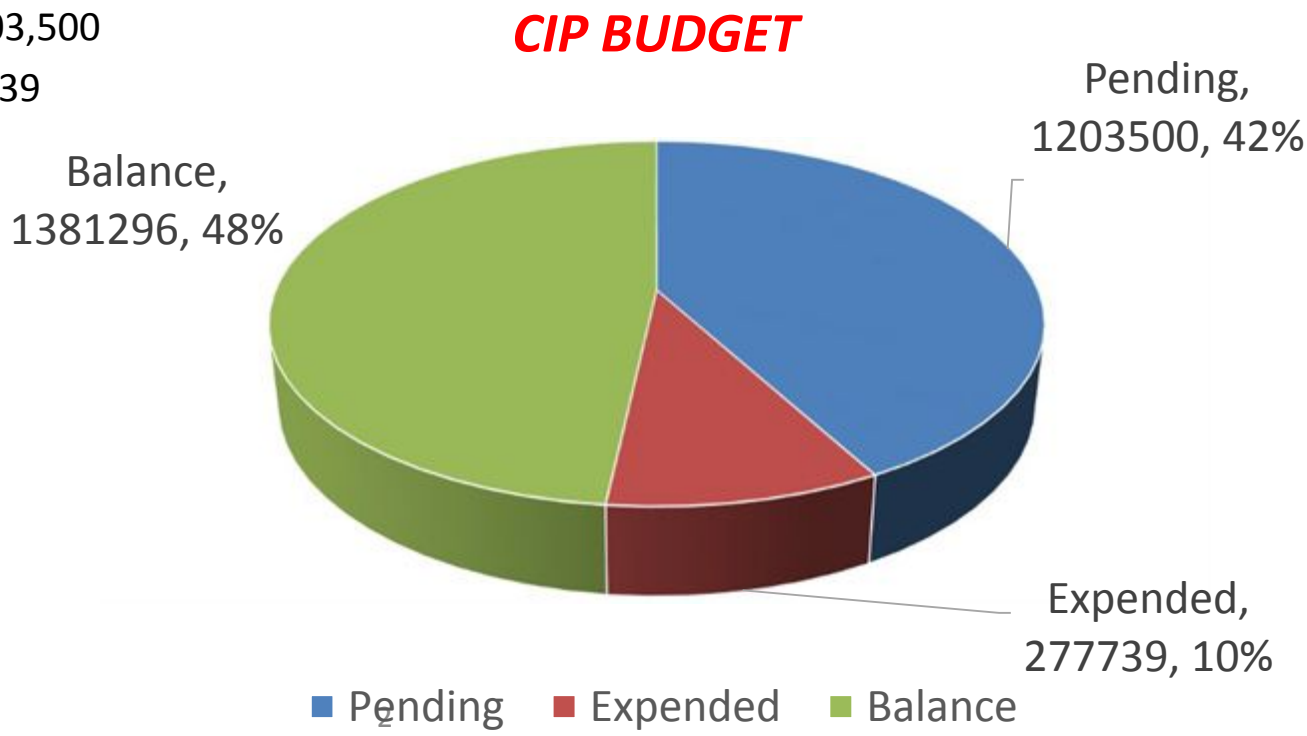
P&R Weekly & Monthly Inspection Reports

- Best Management Practices (BMP) Report Summary [Weekly]
- Generation Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]
- T&D Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]

- GPA is responsible to employees, the island environment, and the community to take all reasonable steps necessary to prevent spills from its facilities in order to protect human health and the environment

P&R Inspection Report Purpose



- The purpose of these inspections is to catch discrepancies and violations internally and correct them before inspections by Guam EPA and US EPA
- Regulatory Agencies can conduct scheduled or un-scheduled (surprise) inspections any time
- Any major discrepancies or violations cited can lead to issuance of a Notice of Violation (NOV), possible fines, and/or other enforcement action
- P&R conducts routine SPCC inspections in compliance with the requirements of 40CFR 112.7(a)(3)(ii), Discharge Prevention Measures

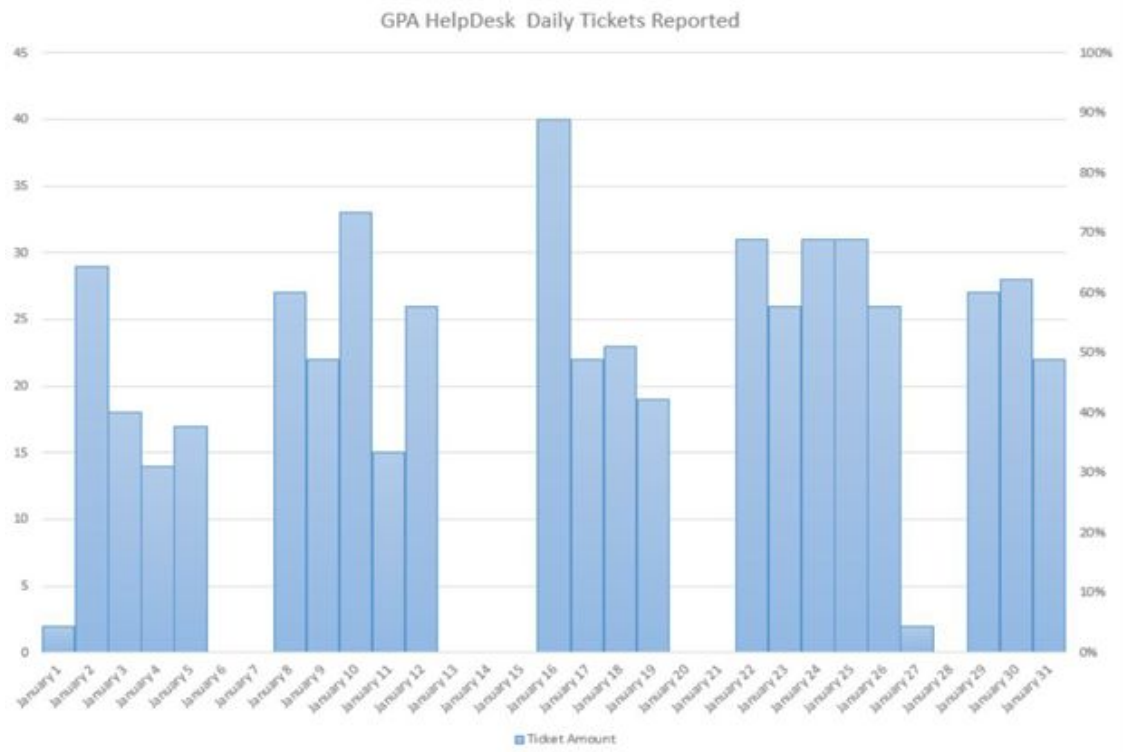
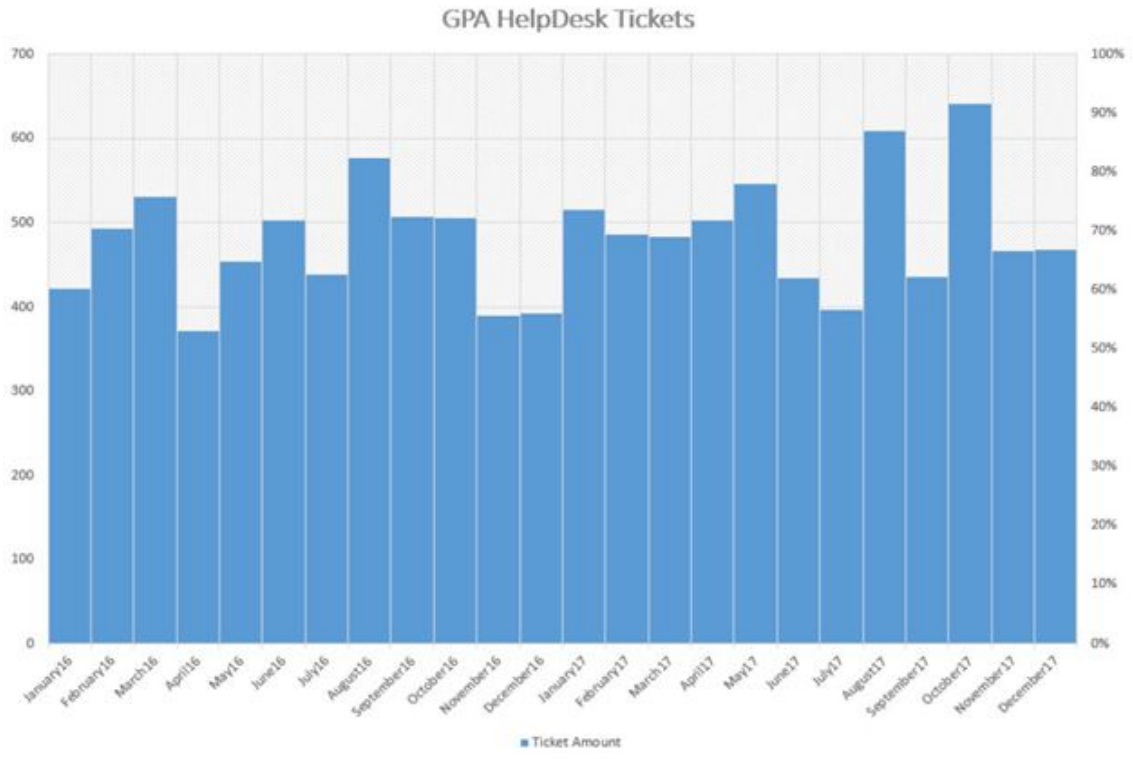
GPA INFORMATION TECHNOLOGY
JANUARY 2017



SUMMARY:

The Information Technology Department continues to improve services, monitoring processes and system infrastructure utilization as guided by Cyber-Security initiatives and regulatory compliance. We strive and continue to improve all areas. Computer Services continues to seek new technology with networking, system access and utilization. We also strive to meet target levels of uptime, to include the IBM i-Series AS400, Virtual Machine environment, (VMware V-Sphere), (Blade Servers and Disk Array Storage), and Physical Servers, (non-Virtual Machines).



INCIDENT CALL SUMMARY:

The significance to record and utilize the Helpdesk Incident Handling Tool (ChangeGear) is to manage, track and measure workloads and assignments of customer reported IT incidents. The tracking of incidents is paramount. Measurements will be used for IT Customer Feedback survey in the future.

JANUARY 2018 TICKETS

22 MONTH COMPARATIVE

MAJOR APPLICATION ISSUES FOR January 2018

1. ORACLE CUSTOMER CARE & BILLING
   No system issue reported.

2. LANDIS & GYR AMI METERS (SMART METERS)
   No system issue reported.

3. ORACLE JDE
   No system issue reported.

4. METER DATA MANAGEMENT SYSTEM (MDMS)
   No system issue reported.

5. SHORETEL VOIP PHONE SYSTEM
   No system issue reported.

6. EMAIL EXCHANGE SERVER
   No system issue reported.

7. ONLINE PAYMENT SYSTEM (PAYGPA.COM)
   No system issue reported.

ONGOING PROJECT UPDATES:

Network Penetration Testing and Vulnerability Assessment: Project to provide network testing and vulnerability assessment to benchmark GPA and GWA's network and host systems. This will also include IT Controls Systems testing and Business Impact Analysis for GPA and GWA critical IT systems. PO has been issued and work has been started. Expected completion by April 2018.

SMS Emergency Outage Notification: Project to provide SMS text alerts for Emergency Outages notification for customers and emergency response agencies. Awaiting next steps from operations. In testing process at the moment with PSCC.

Pay by Phone Project: Working with vendor for Pay by Phone system to allow customers to call after hours and make automated payments to their GPA account. Ongoing testing.

Mobile APP Project: Project to create a mobile payment APP for ANDROID and APPLE IOS smartphones. This will allow customers to review their accounts and make payments from their Smartphones. Both Android and iOS versions have been released and are live.

Oracle Business Intelligence (BI) Project: Project to install Oracle's BI tool to allow for reporting from CC&B and JDE. Expected completion by December 2017. Currently ongoing.

Customer Care & Billing (CC&B) Upgrade: Upgrade of the current Oracle CC&B program from version 2.4 to version 2.5. The current version of CC&B 2.4 will be end of life by Sept. 30, 2017 and support thereafter will be limited. Expected completion by September 2018.

Disaster Recovery Site: Project to procure a Disaster Recovery (DR) site to provide redundancy for critical GPA applications and databases in case of disruption of the primary Fadian Data Center. Expected completion by March 2018.

Physical Security: Project to provide additional surveillance monitoring for Fadian, T&D, Dededo CT and Transportation Warehouse. RFP has been issued with closing date of March 7, 2018.

GPWA Website Upgrades: Project to revamp GPA and GWA websites for GUAMPOWERAUTHORITY.COM, PAYGPA.COM, GUAMWETERWORKS.ORG and PAYGWA.COM. RFP is pending release. Expected to be completed in 160 days.

Monthly Project Report

January 2018

Grow together and WIN

Unrestricted

Project Progression Summary

The last reporting period captured for Project No. GPA-066-16 was September 2017. Issues with TAA, equipment TPM certification, Taiwan customs, shipping has been the center of all discussions since.

Collaboratively, GPWA, Benson Guam and Siemens have arrived to a solution. Leveraging Dell Federal and in coordination with their local representative Data Management Resources (DMR), we have come to terms. In summary, Benson/Siemens will purchase the equipment from Dell Federal, who in turn will ship the equipment directly to Taiwan. Siemens Taiwan will receive the equipment for configuration, test and factory acceptance test purposes only. Upon completion, GPWA will conduct FAT acceptance in Taiwan. Upon completion and acceptance of the FAT, Siemens will ship the equipment to GPWA for Phase II – Site Installation and Integration.

Project Continuation

October 10, 2017 – GPA-SCADA-RFI-11 – Response to GPWA Transmittal No. 29 – Updated Proposed Schedule

October 12, 2017 – GPWA Transmittal No. 31 – Updated Project Schedule

October 25, 2017 – GPWA Transmittal No. 32 – SCADA RFI No. 1

October 31, 2017 – GPWA Transmittal No. 33 – Response to GPA-SCADA-D-001-1

November 1, 2017 – GPWA Transmittal No. 34 – Government of Guam Holidays

December 6, 2017 – GPA-SCADA-RFI-12 – Official Submission of SCADA Architecture

December 13, 2017 – GPA-SCADA-RFI-13 – Final Quote – Cisco Equipment

December 13, 2017 – GPA-SCADA-RFI-14 – Request for Approval of Hardware Specifications

December 14, 2017 – GPWA Transmittal No. 35 – Response to GPA-SCADA-RFI-12

December 22, 2017 – GPA-SCADA-E-005-1 – Consolidated Hardware List

GPWA SCADA EMS Project Bid No. GPA 066-16

Project Director: Charles Wu
Project Manager: Jonathan Chargualaf
Contract Administrator: Monito Co

Updates & Accomplishments for the Month of: January 2018

1. 01/12/18 - GPWA Transmittal No. 37 – Approval of all Hardware / Disapproval of Monitor due to resolution requirement
2. 01/12/18 – GPA-SCADA-E-005-2 – New Proposed Monitor to meet bid specifications
3. 01/12/18 – GPWA Transmittal No. 38 – Approval of all Hardware including new monitor
4. 01/10/18 – GPA-SCADA-RFI-15 – Request to purchase equipment pending official processing of GPA Change Order No.3 and GWA Change Order No. 4 to align with project schedule
5. 01/12/18 – GPWA Transmittal No. 39 – Approval to Purchase Equipment
6. 01/17/18 - GPA-SCADA-E-005-3 – Clarification of Dell 18.5” LED KMM and approval request
7. 01/18/18 – GPWA Transmittal No. 40 – Approval of Dell 18.5” LED KMM
8. 01/18/18 – GPWA Transmittal No. 41 – Revision of Anigua Analog and Status Points
9. 01/18/18 – GPWA Transmittal No. 42 – Request for Factory Acceptance Test Agenda and Procedures
10. **01/30/18 - DATA MANAGEMENT RESOURCES (DMR) Reports Equipment Order has been processed.**

Resource	Upcoming Tasks / Open Items	TCD/ECD

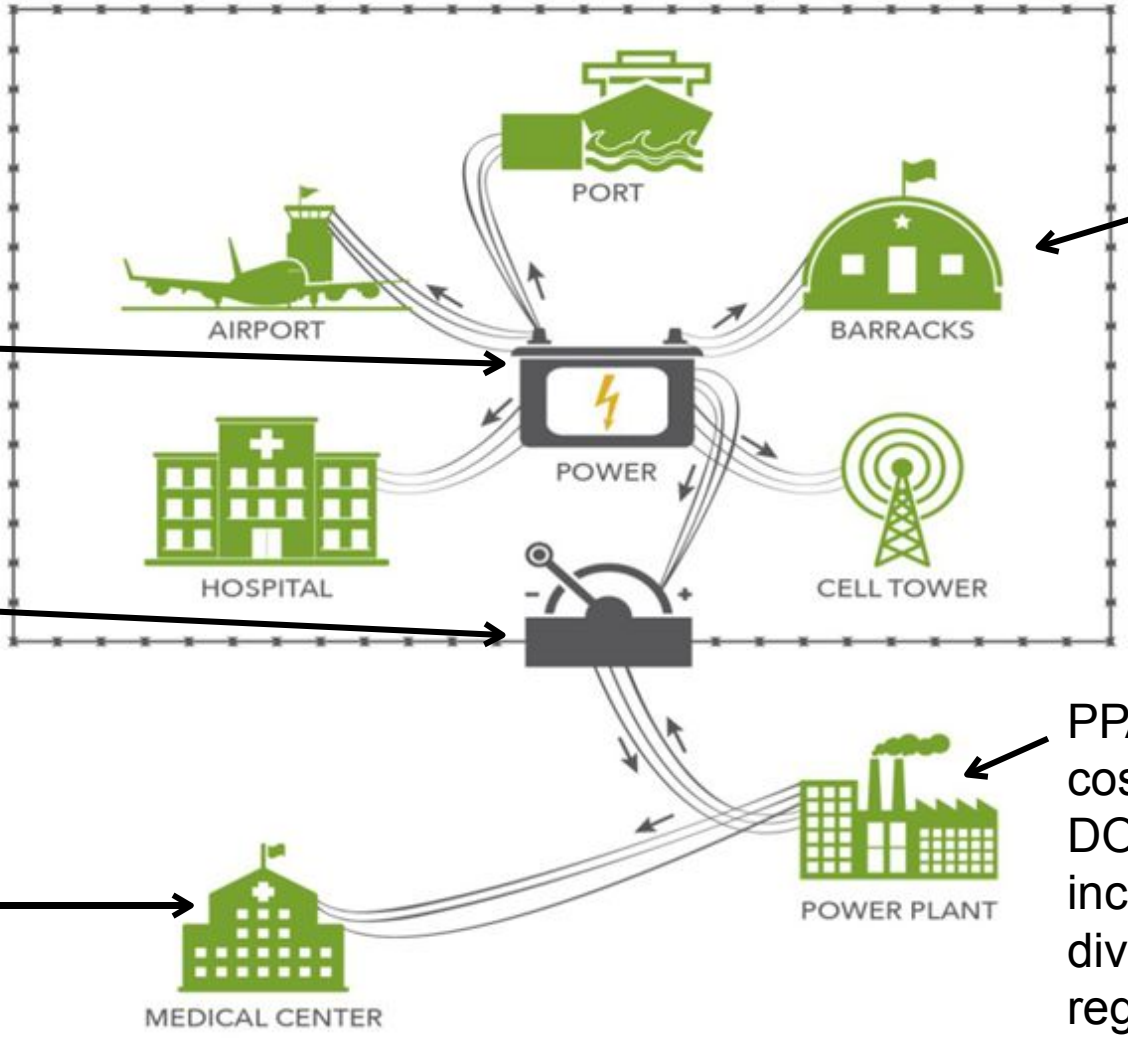
GUAM Project Brief

14 February 2018

Overall Classification: UNCLAS

Energy Security Framework

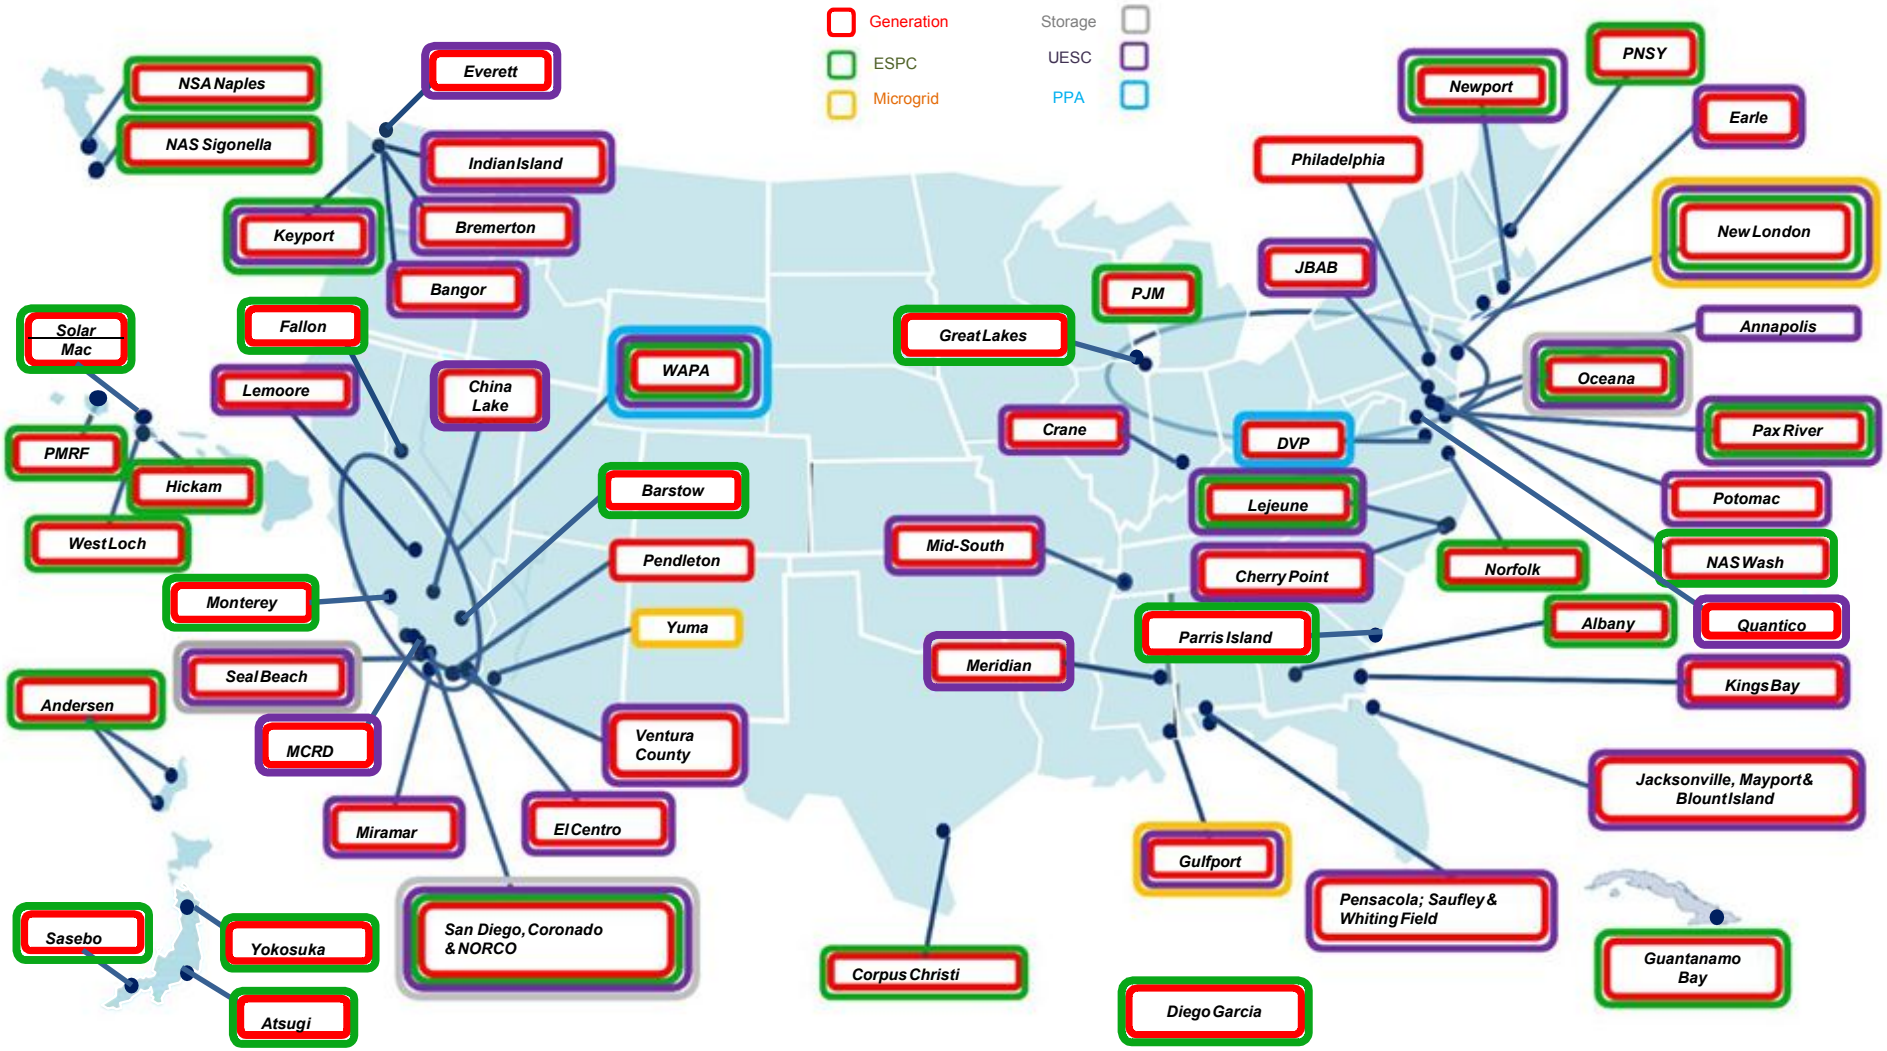


Holistic Approach to Energy Security

Critical assets powered by distributed energy resources and energy storage

Islanding microgrid capabilities

Potential community microgriding capabilities



ESPCs / UESCs make buildings and utilities more efficient producing long-term cost savings

PPAs can provide cost stability for the DON and help to incentivize the diversification of regional energy sources

REPO Projects

(as of September 2017)

*Projects completed, in-progress and planned

Guam Project Description & Background

- **Location:** 5 project sites at Joint Region Marianas (JRM)
- **Technology:** Ground Mounted Photovoltaic Systems with Battery Energy Storage System (BESS)
- **Potential PV Power Capacity:** ~38 MW_{DC}
- **Potential BESS Capability:** ~160 MWh
- **Potential Land Availability:** ~164 acres
- **Acquisition Model:** 2 (On-base generation for Utility Offtake, GPA)
- **NEPA:** Performed Environmental Assessment (EA)

Win-Win

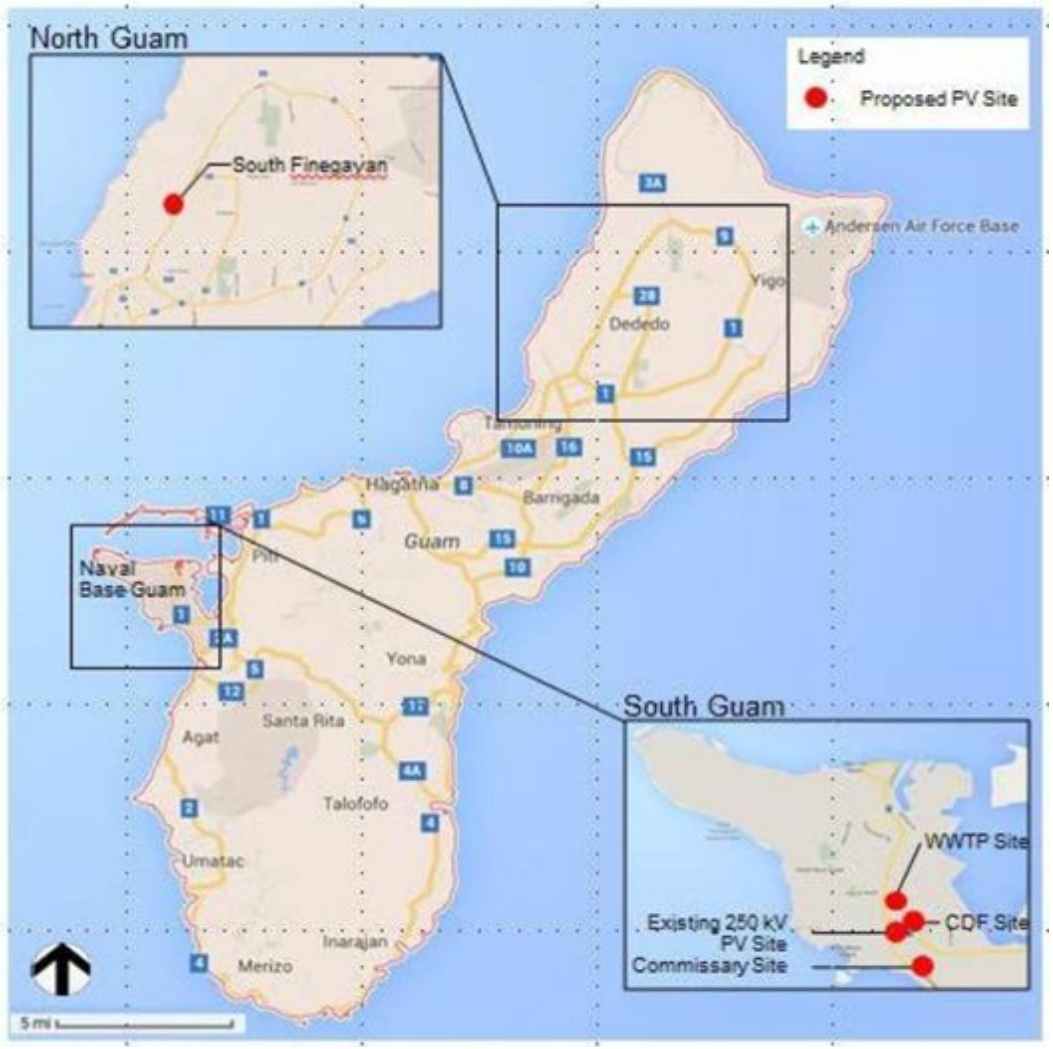
The project will benefit the DON and the broader Guam community.

The Base

In the event of a off-base grid outage, the energy system will feed electricity to the base without disruption to ensure mission operations are not compromised or threatened. Further, the system enables island mode operation with black start capabilities.

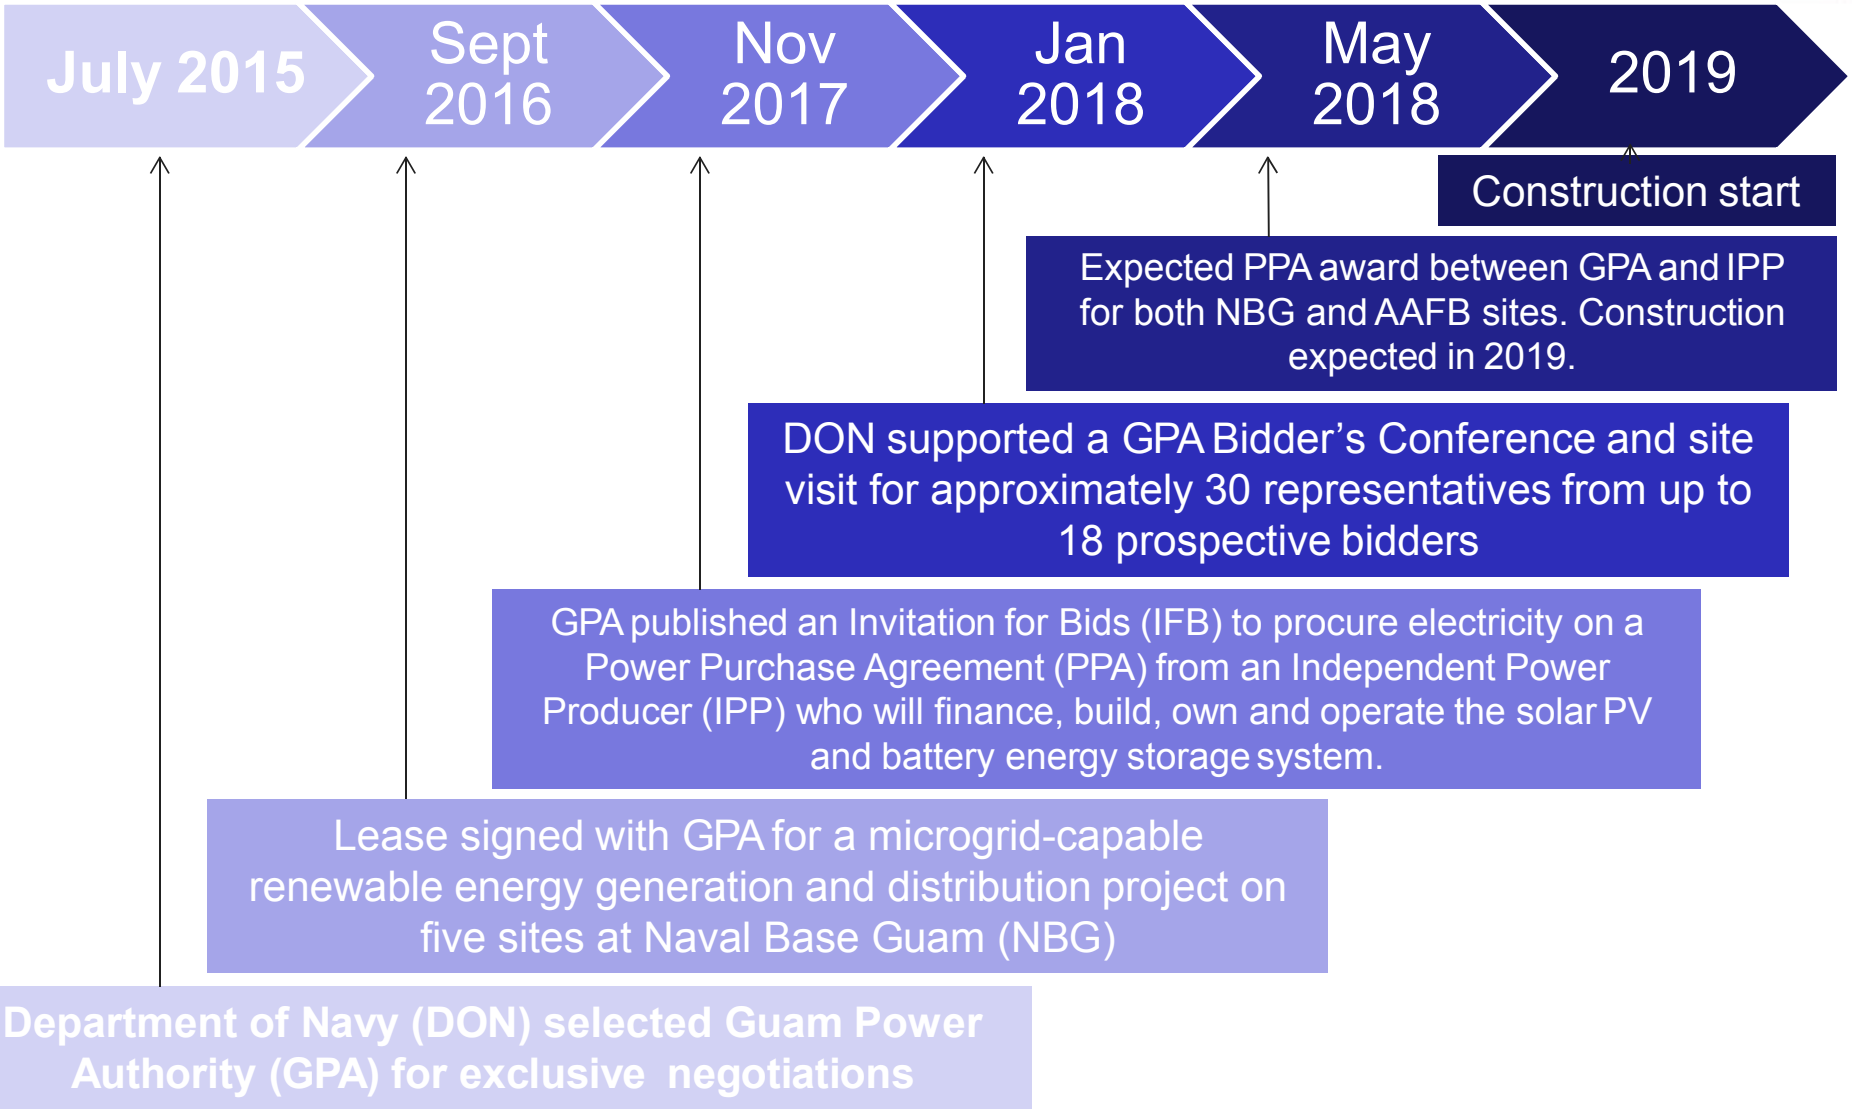
Guam

The energy system presents mutually benefiting opportunities through power quality improvement to the Guam community, NBG and AAFB. Under the “One Guam” initiative, the DON is committed to improving the quality of life for the people of Guam as well as the military who call Guam “home.” Implementing the PV and BESS energy system will positively impact and unite the community and protect the land, via energy security.



Site Plan

Northern Guam



1. S. Finnegayan Housing Area

Southern Guam

1. Existing PV Site
2. WW Treatment Plant
3. CDF Area
4. Commissary Site

Project Timeline

In-Kind Considerations

- **Direct access to 38 MW solar PV and Battery Energy Storage system providing**
  - Power quality improvement
  - Black start capability
  - Island mode operation
  - Access to firm power for entire installation during grid outage via automated switching
  - Redundant feeders
  - Switching station and isolation devices
  - Altered length and operating voltages of underground subtransmission lines to match installation loads
  - Protective and Control relays
  - New switchgear and fiber optic telemetry

FINANCIAL STATEMENT OVERVIEW
December 2017

Attached are the financial statements and supporting schedules for the month and fiscal year ended December 31, 2017.

Summary
The increase in net assets for the month ended was $0.1 million as compared to the anticipated net decrease of $0.3 million projected at the beginning of the year. The total kWh sales for the month were 3.71% more than projected and non-fuel revenues were $0.4 million more than the estimated amount. O & M expenses for the month were $4.6 million which was $1.7 million under our projections for the month. Other expenses for the month such as interest expense, IPP costs, (net of interest income and other income) totaled to $3.1 million, which was $0.9 million less than the projected amount. There were no other significant departures from the budget during the period.

Analysis

Description	Previous Month	Current Month	Target
Quick Ratio	2.03	1.74	2
Days in Receivables	41	41	52
Days in Payables	24	35	30
LEAC (Over)/Under Recovery Balance -YTD	$15,977,766	$16,797,412	$9,021,347
T&D Losses	4.91%	4.90%	7.00%
Debt Service Coverage	2.03	2.19	1.75
Long-term equity ratio	13%	13%	30 – 40%
Days in Cash	136	154	60

The Quick Ratio has been a challenge for GPA historically. However, over the last two fiscal years, the influx of cash has continued to improve this ratio. GPA has current obligations of approximately $86 million and approximately $150 million in cash and current receivables. Debt Service Coverage ratio is calculated using the methodology in use before the Fiscal Year 2002 change in accounting practice.

Financial Statement
December 2017
Significant Assumptions

The significant assumptions in the financial statements are as follows:

- Accrual cutoff procedures were performed at month end
- An inventory valuation is performed at year-end only
- Accounts Receivable includes accruals based on prior months' usage.

Issues for Decision

Resolution No. 2018-06:

What is the project's objective and is it necessary and urgent?

The Consolidated Commission on Utilities has determined that is a prudent and reasonable business practices to maintain insurance coverage on GPA's assets to the extent practical. The Guam Power Authority's bond indenture agreement requires GPA to "secure and maintain property insurance on all facilities constituting the System against risks of loss or damage…to the extent that such insurance is obtainable at reasonable cost." The indenture further requires GPA to carry insurance "of a scope and nature as that usually carried in the industry."

The contract review protocol established by the Public Utilities Commission requires that all contracts in excess of $1.5 million be authorized by the PUC in advance of the procurement.

How does it cost?

GPA's current property insurance costs exceed $6.4 million and this procurement will exceed the PUC contract review threshold.

When will this start?

GPA's property insurance policy including boiler and machinery coverage is expiring on November 1, 2018 and a re-bidding of the policies is required under Guam procurement regulations.

CONSOLIDATED COMMISSION ON UTILITIES
Guam Power Authority | Guam Waterworks Authority
P.O. Box 2977 Hagatna, Guam 96932 | (671)649-3002 | guamccu.org

RESOLUTION NO. 2018-06

RELATIVE TO PETITION THE PUBLIC UTILITIES COMMISSION FOR AUTHORIZATION TO BEGIN PROCUREMENT FOR PROPERTY INSURANCE

WHEREAS, the Consolidated Commission on Utilities has determined that is a prudent and reasonable business practices to maintain insurance coverage on GPA's assets to the extent practical; and

WHEREAS, the Guam Power Authority's bond indenture agreement requires GPA to "secure and maintain property insurance on all facilities constituting the System against risks of loss or damage…to the extent that such insurance is obtainable at reasonable cost"; and

WHEREAS, the indenture further requires GPA to carry insurance "of a scope and nature as that usually carried in the industry"; and

WHEREAS, GPA's property insurance policy including boiler and machinery coverage is expiring on November 1, 2018 and a re-bidding of the policies is required under Guam procurement regulations; and

WHEREAS, the contract review protocol established by the Public Utilities Commission requires that all contracts in excess of $1.5 million be authorized by the PUC in advance of the procurement;

WHEREAS, GPA's current property insurance costs exceed $6.4 million and this procurement will exceed the PUC contract review threshold; and

WHEREAS, GPA desires to issue its insurance bid as soon as possible in order to allow sufficient time for insurance vendors to prepare their bids; and

WHEREAS, GPA has submitted its draft invitation for bids to the Consolidated Commission on Utilities for review and authorization to forward to the PUC; and

NOW THEREFORE, BE IT RESOLVED BY THE CONSOLIDATED COMMISSION ON UTILITIES, AS THE GOVERNING BODY OF THE GUAM POWER AUTHORITY, AS FOLLOWS:

1. After careful review and scrutiny of the GPA draft Invitation for Bids for property insurance coverage to include boiler and machinery coverage, the Consolidated Commission on Utilities has determined that property insurance costs are a prudent expense and the GPA General Manager is authorized to submit the bid document to the Public Utilities Commission for their approval in accordance with the contract review protocol.

2. Final approval from the Consolidated Commission on Utilities is required before a property insurance contract is executed.

RESOLVED, that the Chairman certifies and the Secretary attests to the adoption of this Resolution.

DULY AND REGULARLY ADOPTED AND APPROVED THIS 27TH DAY OF MARCH, 2018.

PROPERTY INSURANCE BID

Ladies and Gentlemen:

The Guam Power Authority ("GPA") invites qualified insurance, reinsurance intermediaries and underwriters to submit their credentials for the placement and servicing of the GPA's property insurance program for the term November 1, 2018 to November 1, 2021. The current contract term of the incumbent insurance, reinsurance intermediaries and underwriters will expire on October 31, 2018. This tender is open to qualified incumbent and non-incumbent insurance and reinsurance entities.

Insurance services will be for a three-year term with two one-year option and insurance policies may be written for a three-year term with annual renewals or the standard one-year policy with annual renewals.

GPA is looking for Property, Boiler & Machinery, Catastrophe, Terrorism, Business Interruption and Cyber liability coverage.

The deadline to submit proposals is **2:30 p.m. August 1, 2018** to give GPA enough time for discussion and negotiations to meet GPA target selection deadline of August 20, 2018. GPA is undertaking this procurement through the multi-step bidding process.

Please convey your questions and inquiries in writing to GPA no later than **June 15, 2018** so that you may have proper responses in time for the **2:30 p.m. August 1, 2018** submittal deadline.

Please submit your bid according to the detailed instructions and requirements herein; types of insurance underwriting information as set forth in the Appendices thereto.

Thank you for your interest.

Sincerely,

John Benavente
General Manager

DUE: **August 1, 2018 (2:30 p.m.)**

OVERVIEW: THE GUAM POWER AUTHORITY

The Guam Power Authority (The Authority) was created in 1968 as a public corporation and autonomous instrumentality of the Government of Guam. Since that time the Authority has maintained and expanded the island wide power system on Guam. The Authority now has 469 megawatts of generation capacity, 663 miles of transmission and distribution lines, 29 substations, $1.1 billion in assets, and $333 million in annual revenues. GPA currently serves approximately 51,000 customers with the U.S. Navy being the largest representing about 17% of revenues.

The Guam Power Authority was changed into a public corporation of the Government of Guam in 2002 and is governed by a five-member publicly elected Commission – the Consolidated Commission on Utilities (CCU). The CCU retains contracting authority, establishes policies and has control over the selection of top management of the Authority.

The Authority is regulated by the Guam Public Utilities Commission – a rate setting body made up of Commissioners appointed by the Governor of Guam. The PUC has established rules of operation that are similar to those of other jurisdictions within the United States. The PUC has broad regulatory authority over GPA including approval of any contracts that might have an impact on GPA's rates.

SECTION I: INTRODUCTION:

The Guam Power Authority (GPA), hereinafter referred to as GPA, invites qualified insurance, reinsurance intermediaries, carriers and underwriters, hereinafter referred to as Bidder(s), to participate in a Multi-Step Bid (MSB) for Property Insurance Coverage. Minimum Property Insurance coverage specifications are described later in this MSB.

The bidder shall be responsible, at a minimum, for the following services:

- Respond to e-mails and voice mails within 24 hours.
- Provide certificates of insurance within 3 business days.
- Provide notice of claims to underwriters (carriers) and facilitate claims communication in coordination with GPA and underwriters (carriers).
- All other services deemed necessary by GPA.

GPA is hereby inviting bids for Property insurance contracts (policies) on a long-term basis (e.g., three years) with a term to commence November 1, 2018 to November 1, 2021. GPA understands that most insurance policies have 12-month terms, so GPA is not requiring three-year policies. GPA fully expects to stay with the selected insurance program for at least three years renewing on an annual basis.

The Technical and Price Proposals are due on or before the Cut-off Date of Receipt of Proposals which is **2:30 p.m., August 1, 2018.**

The bid evaluation shall be a two-step process. Step one will involve a Technical Proposal that consists of bidder qualifications and insurance coverage offered. This will allow GPA to establish a Qualified Bidders List (QBL). Step two will involve the evaluation of the Price Proposal (Priced Offers) from the Bidders identified on the QBL.

STEP ONE: TECHNICAL OR QUALITATIVE PROPOSALS

Interested bidders at minimum should provide the following information:

Bidder's Firm information including:

- Years in business
- Total property and total liability insurance premiums placed annually
- Ownership legal structure and ownership details
- Office location that would serve GPA
- Claims, loss control/engineering and other core services performed
- List of Power Generation accounts serviced by the account team
- Key personnel who would be placing and servicing the GPA's program
- Biography, certificates, designations, and licenses of account team and key personnel
- Other information that the respective firm believes GPA should consider
- Any key alignments with other insurance entity or intermediary (retail, wholesale, reinsurance, Lloyds, etc.)
- Bidder's experience with electric utilities or Energy Companies, especially those with hurricane or earthquake exposure and boiler & machinery exposure.
- Copies of currently active Licenses of all intermediaries
- Primary (Fronting) Carriers' or underwriters' Certificate of Authority to Transact business on Guam
- Most recent AM Best rating for Primary (Fronting) Carrier

Insurance coverage terms including but not limited to:

- Full policy forms and applicable endorsements
- If multi-year agreements, endorsements, continuity credits, or similar pricing mechanisms are used to offer reduced pricing; a detailed explanation of situations that may lead to any applicable penalties or increases of premium during the policy term must be attached.
- Explanation of any and all exceptions to the minimum coverage specifications
- Explanation of any and all enhancements exceeding minimum specifications
- Explanation of any and all coverage deficiencies not meeting minimum coverage specifications
- Specifically noting which requested coverage enhancements have been achieved, which cannot be achieved and, if applicable, detail any additional enhancements that were obtained.
- Fronting carrier or Primary insurers must be rated A- or better by AM Best with minimum financial size of VII or greater.
- Identification of Lead markets utilized to achieve the 20% commitment or market support.
- This insurance shall be governed by and construed in accordance with the laws of The Territory of Guam and the exclusive jurisdiction of the Territory of Guam courts. Should the policy require an arbitration clause then the seat of arbitration shall be Guam.
- Premium pricing should not be included in the Technical and Qualitative proposal, and should be separately packaged and submitted with the "Price Proposal".

STEP TWO: PRICE PROPOSALS

- All Premiums and optional coverage pricing must be submitted on the format outlined in this MSB. and must be submitted in a separate sealed envelope marked "Price Proposal"
- Price Proposal format as outlined in this bid must be used, and Price Proposal must be signed by person authorized to bind contracts on behalf of bidder.

- If multi-year agreements, endorsements, continuity credits, or similar pricing mechanisms is used to offer reduced pricing; a detailed explanation of situations that may lead to any applicable penalties or increases of premium during the policy term must be attached.

Price proposals from unqualified Bidders shall be returned, unopened, after the Technical Proposal evaluation. GPA will perform a comprehensive evaluation of each price proposal submitted from the QBL and select the BIDDER with the best proposal. If the selected bidder cannot bind the terms as proposed within GPA's timeframe, at any time and its sole discretion GPA reserves the right to:

- Go to the next BIDDER or
- Cancel the bid

Table 1: Bid Milestones indicate the projected start and end dates for milestones in the Bid Process. GPA reserves the right to change the Bid Milestones at any time and at its sole discretion. All changes to the Bid Milestones shall be communicated to all bidders via an Amendment or Official Correspondence from GPA. It is the sole responsibility of the bidder to promptly register for the MSB at GPA and provide accurate correspondence addresses and email addresses and to check promptly for any updates to the bid or the Bid Milestones.

SECTION II: INSTRUCTIONS AND PROCEDURES FOR BIDDERS:

1. INTRODUCTION

This is a multi-step bid procurement. The Technical and Price Proposals should both be submitted on or before the Cut-off Date of Receipt of Proposals, **2:30 p.m., August 1, 2018**. In Step One, only the submitted Technical Proposals will be evaluated. Bidders whose qualifications and technical proposal have been satisfied will be qualified for Step Two. In Step Two, the Bidder with the best proposal will be considered for award.

2. TIME AND SCHEDULE

The deadline for the submission of bids is **August 1, 2018 at 2:30 p.m.** One (1) Original and five (5) copies of all responsive materials must be received by GPA (not postmarked) no later than that date and hour. It is advisable to hand deliver or use courier services to expedite delivery of your bid, as Guam is served by several such courier services. It is bidder's responsibility to ensure the bid is received as required above. Late bids will not be considered.

3. PREPARATION AND SUBMISSION OF PROPOSALS

Envelopes containing proposals shall be sealed and marked on the face with the name and address of the Bidder, the Proposal Number and the time and date of submission. Prices should be in a separately sealed envelope. Telegraphic proposals with not be considered, nor will modifications by telegraph of proposals already submitted be considered. Proposals shall be delivered and received at the place of opening on or before the opening date and time. Proposals received through the mail will not be accepted if such mail is received at the address showing after the submission date and time. Proposals will not be opened publicly.

All submittals must strictly conform to the Multi Step Bid rules and any addenda.

One (1) Original and five (5) copies of each proposal must be submitted including all addenda, if any. Any and all documentation (proposed insurance policy forms and endorsements) will assist towards Bidder's evaluation and must be furnished with each proposal.

The proposal must be submitted before **August 1, 2018 at 2:30 p.m.** in a sealed envelope indicating the MSB number and addressed as follows:

TO: Guam Power Authority
GPWA Procurement Office
Gloria B. Nelson Public Service Building
688 Route 15
1st Floor, Room 101
Fadian, Guam 96913

Attn: Jamie L.C. Pangelinan
Supply Management Administration

Examination of MSB Document: Bidder shall examine the MSB Documents to inform themselves of all conditions and requirements for the execution of the proposed work. Ignorance on the part of Bidder of any part of the MSB will in no way relieve him/her of the obligation and responsibly assumed under the Contract.

Familiarity with Laws: Bidder is assumed to be familiar with Federal and Local laws, ordinances, rules and regulations that in any manner affect the work. Ignorance on the part of Bidder of any part of the MSB will in no way relieve him/her of the obligation and responsibly assumed under the Contract.

3. EXPLANATION TO BIDDERS

No oral explanation regarding the meaning of the specifications will be made and no oral instructions will be given before the award of the proposal. Discrepancies, omissions, or doubts as to the meaning of the specifications must be communicated in writing to the named procurement contact individual of the Guam Power Authority for interpretation. Bidder should act promptly and allow sufficient time for a reply to reach them before the submission of their proposals. Interpretation, if required, shall be made in the form of an amendment to the specifications, which will be forwarded to all prospective Bidders, and its receipt by the Bidder should be acknowledged on the proposal form. All questions, questions, queries should be received by GPA no later than the **cutoff date for the receipt of questions 6/15/2018 at 4:00 p.m**. Submit written queries, questions, and requests for clarification to:

TO: Guam Power Authority
GPWA Procurement Office
Gloria B. Nelson Public Service Building
688 Route 15
1st Floor, Room 101
Fadian, Guam 96913

Attn: Jamie L.C. Pangelinan
Supply Management Administration
Email: jcpangelinan@gpagwa.com

4. CLARIFICATION ON MULTI STEP BID

Each Bidder must carefully examine the MSB and all addenda. If any Bidder (a) finds any discrepancies, omission or ambiguities in the MSB documents, (b) is uncertain as to the intent or meaning of any provision of the MSB, or (c) has any question regarding the MSB, the Bidder must promptly notify GPA in writing no later than **Friday 6/15/2018 at 4:00 p.m.** at the address specified for submission of proposal. Replies to such notices may be made in the form of addenda, which will be issued simultaneously to all prospective Bidders.

5. FORM

All bids must be in writing and submitted in a sealed envelope and must be signed by an officer of the bidder having authority to bind the bidder's insurance contracts as proposed. The bids should respond in an organized fashion to all requirements of this Invitation for Bid.

6. MODIFICATION OR WITHDRAWAL OF BIDS

Bids may be modified or withdrawn prior to submittal date. Any bid withdrawal, or modification received at GPA after the due date is late and, as such, renders the underlying bid in compliance only as to that which is on hand at the submittal date and hour.

7. RECORDING BIDS.

Bids and modifications shall be submitted to GPA officials on or before **August 1, 2018 at 2:30 p.m**. in a sealed envelope indicating the MSB number and addressed as follows:

To: Guam Power Authority
GPWA Procurement Office
Gloria B. Nelson Public Service Building
688 Route 15,
1st floor, Room 101
Fadian, Guam 96913

Attn: Jamie L.C. Pangelinan
Supply Management Administration

Bidders shall be responsible for ensuring the written bid (and all required documents) is received by the due date and hour. Any bid received after the due date and hour is late and will not be considered by GPA. After the due date and hour, a Register of Bids shall be prepared which shall include for all initial bids the name of each bidder, the number of modifications received, if any, and an indication of the coverage proposed, i.e. coverage of all risks of loss (a) as requested by GPA, (b) less than GPA request, and/or (c) alternate coverage as requested.

8. CONFIDENTIAL DATA

Bidders should designate trade secrets or other proprietary data to be confidential. The Guam procurement laws and regulations shall govern confidentiality.

9. AWARD

Determination of the winning bidder shall be made on or about August 31 - September 1, 2018. GPA intends to have all discussions and negotiations completed no later than August 31, 2018, after which date the Bid Evaluation Committee and the General Manager shall prepare their final report and recommendations. Appropriate notification of award shall be issued promptly after the CCU and PUC approval.

10. CANCELLATION OF INVITATION; DELAYS

GPA reserves the right to cancel or to withdraw this MSB, to delay determination on this MSB, or to reject all bids, in whole or in part, at any time prior to final award. The reasons for the cancellation, delay or rejection shall be made a part of the procurement file and shall be available for public inspection.

11. INSPECTION OF GPA PROPERTIES

Prospective bidders may inspect GPA properties on **May 22 -23, 2018**. These dates will be the only times available for on-site inspections. Please note that proposals are due on or before **August 1, 2018 at 2:30 p.m.** so plan accordingly if you plan to attend these inspections. GPA will provide a representative to conduct the inspections and answer questions on-site. Please advise the Supply Management Administrator, Ms. Jamie Pangelinan, if you plan to inspect the properties. Each person that plans to inspect GPA properties must be cleared by Homeland Security through GPA. Therefore, each person must submit a copy of their Passport to GPA a minimum of 5 business days prior to the inspection date to get security clearance to be allowed on GPA property.

12. SUMMARY OF SERVICES

All bidders should include a summary of how they envision servicing GPA account. Policy servicing should be identified specifically with a list and delivery timeline of services offered. Bidders should also identify the "Account Executive" that will be assigned to GPA and their support team along with frequency of visits, etc.

13. CCU and PUC APPROVAL

Contracts will be subject to the written approval of the Consolidated Commission on Utilities and the Public Utilities Commission on Guam.

14. REPRESENTATION REGARDING GRATUITIES AND KICKBACKS.

The bidder or contractor represents that it has not violated, is not violating, and promises that it will not violate the prohibition against gratuities and kickbacks set forth in Section 11-206 (Gratuities and Kickbacks) of the Guam Procurement Regulations.

15. REPRESENTATION REGARDING CONTINGENT FEES.

Contractor represents that it has not retained a person to solicit or secure a territorial contract upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, except for retention of bona fide employees or bona fide established commercial selling agencies for the purpose of securing business.

16. BID BOND

Along with the Bid Proposals on or before August 1, 2018 at 2:30 p.m., all bidders shall submit to GPA a bid bond in the amount of TEN THOUSAND U.S. DOLLARS (U.S. $10,000) made payable to the Guam Power Authority. In lieu of a bid bond, bidders may submit US currency valued at TEN THOUSAND U.S. DOLLARS (USD 10,000) in the form of cash in USD, bank draft, certified check, or by wire transfer to Guam Power Authority, Routing/Transit #121405115, Account No. 0601-026246, Bank of Guam, Hagatna, Guam. Bidders with unselected bids will have bid bonds returned with written notices of rejection. Bid bonds submitted in cash or certified check will be returned by wire transfer. Bidders shall advise GPA of bank, location and account number to facilitate delivery. In the absence of a telegraphic address, bid bonds will be returned by mail in check form payable to bidder. The bidder with the acceptable bid will have bid bond returned within ten business days of delivery of Insurance Binders for selected insurance policies by GPA. For the purposes of this solicitation, the bid bond is being required as an indication of "good faith" by the bidder and is in the best interest of GPA in accordance with the procurement laws, rules and regulations of the Government of Guam and GPA.

SECTION III: INSURANCE COVERAGE SPECIFICATIONS

1. INSURANCE COVERAGE

GPA seeks coverage for "all risks of loss" basis coverage to include but not limited to the following lines of business:

a. Property
b. Boiler and Machinery breakdown

c. Catastrophe Coverage including earthquake, flood, wind, and tsunami
d. Business Income/Extra Expense
e. Terrorism, both certified and non-certified acts; quoted on an optional basis
f. Cyber liability

The property, boiler & machinery, catastrophe, business income/extra expense, and terrorism is placed under one cover. GPA is seeking comparable or superior coverage to include all of the above coverage. Terrorism shall be quoted on an optional basis.

Acceptability of any and all proposals will be evaluated as to their overall economic value.

Primary Insurance Carriers or Fronting Carriers must have at least an A.M. Best Rating of A-, VII or greater to be considered.

Reinsurance companies or underwriters must be of demonstrated size and capacity to underwrite a Property program of the size of GPA.

2. BID FORMAT

Bidders are free to submit their bids in a convenient format, however, at a minimum; the bids should provide:

Bidder's Firm information including:

- Years in business
- Total property and total liability insurance premiums placed annually
- Ownership legal structure and ownership details
- Office location that would serve GPA
- Claims, loss control/engineering and other core services performed
- List of Power Generation accounts serviced by the account team
- Key personnel who would be placing and servicing the GPA's program
- Biography, certificates, designations, and licenses of account team and key personnel
- Other information that the respective firm believes GPA should consider
- Any key alignments with other insurance entity or intermediary (retail, wholesale, reinsurance, Lloyds, etc.)
- Bidder's experience with electric utilities or Energy Company, especially those with hurricane or earthquake exposure and boiler & machinery exposure.
- Copies of currently active Licenses of all intermediaries
- Primary (Fronting) Carriers' or underwriters' Certificate of Authority to Transact business on Guam
- Primary (Fronting) Carriers' or underwriters' Most recent AM Best rating

Insurance coverage terms including but not limited to:

- Explanation of any exceptions to the minimum coverage specifications
- Explanation of any coverage enhancements exceeding minimum specifications
- Explanation of any coverage deficiencies not meeting minimum coverage specifications
- Specifically noting which requested coverage enhancements have been achieved, which cannot be achieved and, if applicable, detail any additional enhancements that were obtained.
- Identification of Lead markets utilized to achieve the 20% commitment or market support. Lead markets and/or carriers must be rated A- or better by AM Best with minimum financial size of VII or greater.

- This insurance shall be governed by and construed in accordance with the laws of The Territory of Guam and the exclusive jurisdiction of the Territory of Guam courts. Should the policy require an arbitration clause then the seat of arbitration shall be Guam.
- Proposed policy forms and applicable endorsements in their entirety must be attached to proposals.
- Firm quotes or written confirmation of at least 20% support from insurers, underwriters, or reinsurers.

In order to show bidder's reliability and responsibility, bidder should substantiate its insurer financial capacity and industry reputation to honor and service the size and type of insurance proposed. Bidder should identify its service team, lead market, underwriters, and or insurers represented in as much detail as practical. All proposals must have, at a minimum, 20% of total lines substantiated by firm quotes from proposing underwriters, insurers, or reinsurers. Bidder should include proof of firm quotes either by signed/stamped slips or letters from underwriters, insurers, or reinsurers.

If bidder fails to supply information requested by GPA concerning the bidder's insurer's financial capacity and rating, which GPA may request any time prior to award, GPA shall base determination of responsibility on any available information, or GPA may find bidder non-responsive.

- RATING DATA

Information about GPA and its experience in peril exposure and risk retention and/or transfer is contained in the Rating Data attachment. Prospective bidders requiring additional rating data should address their inquiry to the Procurement Officer identified in this bid. Replies with significant data will be furnished to all persons who, on record, have registered for this multi-step bid (MSB) and have agreed in writing by signing the Non-Disclosure Agreement.

SECTION IV: CONTRACT TERMS

GPA is hereby inviting bids for insurance contracts (policies) on a multi-year or long-term basis (e.g., three years) with term to commence November 1, 2018 to November 1, 2021. GPA understands that most insurance policies have 12-month terms, so GPA is not requiring three-year policies. GPA fully expects to stay with selected insurance program for at least three years renewing on an annual basis.

Insurance policies proposed are acceptable for 12-month terms or 36-month terms billed annually.

Bidders will need to furnish the proposed contract which shall include at a minimum the following:

- Detailed description of the coverage terms proposed including but not limited to:
  - Any exceptions to the minimum coverage specifications outlined in this MSB
  - Specifically noting which requested coverage enhancements have been achieved, which cannot be achieved and, if applicable, detail any additional enhancements that were obtained.
- Premiums for proposed coverage comparable to the expiring coverage as set out in Appendix A, and, any incremental premiums resulting from coverage enhancements. Also, detail any premium increases or decreases for optional limits and deductibles requested in the coverage specifications.
- Lead markets that are utilized to achieve the 20% commitment. Fronting carriers or Primary insurers must be rated A-, VII or better by AM Best.

SECTION V: EVALUATION OF BIDS

In evaluating bids, GPA will consider which proposal offers the most robust and comprehensive insurance coverage available in the market by reputable and highly rated underwriters and carriers with the financial capacity to honor insurance terms for a program the size and quality as the Guam Power Authority with its assets of $1.1 Billion. GPA

reserves the sole right to determine the acceptability and ranking of bids in any respect to meet GPA's needs. In the evaluation process, the following factors will be considered:

CRITERIA	POINTS
• Ability to service GPA/past and current performance of similar contracts	5
• Utility, Municipality, and other large program insurance experience	5
• Intermediary, Underwriter, Insurance Carrier personnel and qualifications	10
• Industry reputation, Client References	10
• Financial capacity and current AM Best rating of carriers and re-insurers	20
• Breadth of Policy coverage and extent of restrictions or exclusions	40
• Additional coverages	10
TOTAL POINTS	100

2. Bank of Guam

Policy Period:

From the 1st of November 2018 to the 1st of November 2019 both days at 00:01 hours Local Standard Time at the locations of the Property Insured.

- GPA expects to go through renewals each year.

Property and Interest Insured

Material Damage

Real and personal property including Buildings, Furniture, Fixtures and Equipment, Law and Ordinance Coverage for all property, Contents, Plant, Fuel Stocks, Transmission and Distribution lines on Generating Premise and within 1,000 feet of premises, Underground Transmission and Distribution lines, Machinery and Boilers of every kind, nature and description (including improvements and betterments) owned, leased, acquired, used or intended for use by the insured, or hereafter Erected, Installed or Acquired including whilst in the Incidental Course of Construction, Erection, Installation and Assembly and Real and Personal Property of Others in the Insured's Care, Custody, and Control and including Property in the Care, Custody, and Control of Third Parties and the Insured's liability imposed by law or assumed by contract (by an officer of the Insured) for such Property and/or at the option of the Insured Personal Property of the Insured's Officials and Employees while on the Premises of the Insured and/or Contractors' and Vendors' interests in property covered to the extent of the Insured liability imposed by law or assumed by contract, (by an officer of the Insured) and/or Property in Transit and/or Storage including Raw Materials, Expediting Expenses, Valuable Paper, Bullion, Manuscripts, Drawings, Blueprints and/or Specifications, Leasehold Interest and Records, Accounts Receivable, Electronic Data Processing Equipment, Computer Equipment, Computer Date and Media, Petroleum Products which are liquid form at normal atmospheric pressures and temperatures while such products are in underground storage, and foundations,

piers or other supports of brick, stone or concrete, and shafts, tunnels, and dams, and all structural parts and all appurtenant structures and equipment at the side of underground power houses, and cables, wires and underground conduit and underground Transmission and Distribution lines.

Territorial Limits

Various locations in Guam and whilst in inland transit

Sum Insured

USD $300,000,000 each and every occurrence in respects Property Damage/Business Interruption/Extra Expense combined for 100% subject to sub-limits stated below.

Optional Limits: USD 400,000,000 and USD 500,000,000

Sub-limits

Business Interruption – USD $5,000,000 each and every occurrence

Extra Expense – USD $15,000,000 each and every occurrence

Earthquake, Flood, Windstorm, Cyclone, Typhoon, and Tsunami – USD $100,000,000 each and every occurrence

Debris Removal – USD $10,000,000 or 10% of loss whichever the greater

Seepage of pollution – USD $5,000,000

Ingress/Egress – 30 days and limited to loss occurring within five (5) statute miles of the insured's premises

Military/Civil Authorities Clause – 30 days and limited to loss occurring within five (5) statute miles of the insured's premises

Protection and Preservation of Property – USD $1,000,000 each and every occurrence

Underground Transmission and Distribution Lines – USD $35,000,000

Property in the Incidental Course of Construction – USD $25,000,000

Certified and Non-Certified Acts of Terrorism – USD $200,000,000

Basis of Valuation:

Replacement Cost value for all property regardless of age or condition. See attached property schedule for values.

Retentions:

- Property damage
  - USD $2,500,000 each and every occurrence in respect of all perils other than Earthquake, Flood, Wind, and Tsunami (for 100%) for locations with a declared estimated Replacement Cost value equal to or greater than USD $10,000,000

- USD $1,000,000 each and every occurrence in respect all perils other than Earthquake, Flood, Wind, and Tsunami (for 100%) for locations with a declared estimated Replacement Cost value less than USD $10,000,000
- USD $10,000,000 each and every occurrence in respect of Earthquake, Flood, Wind, and Tsunami (for 100%);
- Business Interruption: 60 days each and every occurrence
- Extra expense: 60 days each and every occurrence

Co-insurance

None

Additional Coverages:

- Cyber Liability Coverage
  Limits: USD 5,000,000 each claim and in the aggregate
  Deductible: USD 50,000 each claim

Underwriting Information

Please find attached a list of underwriting information

Property Schedule is replacement cost

Issues for Decision

Resolution No. 2018-07:

Authorizing the Management of Guam Power Authority (GPA) to Amend the Energy Conversion Agreement (ECA) for the the Piti #8 and #9 Slow Speed Diesel Power Plant to Extend the Contract Term for Five (5) Additional Contract Years

What is the project's objective? Is it necessary and urgent?
GPA's current ECA with Marianas Energy Company expires January 2019. The ownership of Piti #8 and #9 will transfer to GPA upon ECA expiration. GPA does not have the means to operate and maintain this plant reliably. Notably, GPA neither has the O&M supply chain nor experienced personnel. Currently the most reliable baseload units, Piti #8 and #9 are critical for assuring adequate, uninterrupted power supply. The loss of Piti #8 and #9 increases fuel consumption by over $200,000 at peak loads of up to 277 MW.

GPA will issue a new contract solicitation for the management, operation and maintenance of the power plant. However, in the interim, GPA and customers benefit significantly by extending the Energy Conversion Agreement for following:

- **Retain O&M expertise of the units at a critical time**. There are very few land-based slow speed diesel plants; extending MEC contract retains critical expertise allowing for proper cross-training once the new contract is awarded (cross training will start once the extension period commences, and before the new contract commences; overlap between MEC employees and new IPP employees ensures critical knowledge and skills are documented and transferred). GPA has a slim margin for reserve generation in the next few years with Piti #8 and #9 prior to the new power plant commissioning.
- **Retain relationship with OEM and allow GPA (and MEC) to contract with OEMs and key suppliers for critical repairs, upgrades and upcoming conversion o ULSD**. MEC's strategic advantage includes supply chain relationships with OEMs and key suppliers. Without an extension, GPA cannot smoothly undertake key capital improvement projects such as conversion to ULSD, turbo-charger upgrades, and cylinder liner/injection system upgrade recommended by preliminary Plant Assessment Review studies.
- **Efficient Procurement Process**. MEC can ensure that there is adequate inventory, and can also expedite procurement of necessary equipment and services in case of emergency.
- **Allows efficient operation and maintenance of the plant throughout the period when GPA completes projects related to environmental compliance, as well as during the award, construction and installation of new power plant.**

Where is the location?
The Piti #8 and #9 Power Plant is located in Cabras, Guam.

How much will it cost?

	Re-Capitalization Fee	1	2	3	4	5

Per Year	$7,066,897
Per Month	$588,908

The RFP/BID responses:
If approved, GPA will complete discussions and formalize extension negotiations in the 2nd quarter of 2018, followed by the issuance of a bid for a new ECA.

What is its funding source?
Revenue Funds.

CONSOLIDATED COMMISSION ON UTILITIES
Guam Power Authority | Guam Waterworks Authority
P.O. Box 2977 Hagatna, Guam 96932 | (671) 648-3002 | guamccu.org

RESOLUTION NO. 2018-07

RELATIVE TO AUTHORIZATION OF PITI 8&9 CONTRACT EXTENSION

WHEREAS, in 1996 under an Energy Conversion Agreement (ECA), GPA contracted an Independent Power Producer for a Build, Operate and Transfer (BOT) project to construct Piti 8 & 9 Power Plant, perform twenty-years of Operation and Maintenance (O&M), and transfer ownership of the plant to GPA at the end of the contract term; and

WHEREAS, Marianas Energy Company currently manages and operates the plant under the ECA which will expire in January 2019; and

WHEREAS, the Piti 8 & 9 Power Plant contains two slow speed diesel units providing 88 MW of production capacity which is 42% of GPA's total baseload capacity; and

WHEREAS, GPA does not have the staff to manage, operate, and maintain the Piti 8 & 9 Power Plant upon the transfer date of January 2019; and

WHEREAS, GPA proposes a private-public partnership to maintain high efficiency and reliability necessary to support the Island Wide Power System (IWPS); and

WHEREAS, GPA intended to solicit for a new IPP contract but was only recently able to complete a site inspection of the plant performed by specialists in slow speed technology that identifies necessary life extension, safety, and environmental projects required for continued plant operation; and

WHEREAS, the delay in this task has prevented the earlier completion of the bid documents and may impact the transition to a new IPP contract by the current contract expiration date; and

WHEREAS, GPA has experienced delays in contract awards due to procurement protests which may impact the transition schedule; and

RESOLUTION NO: 2018-07

WHEREAS, without a contract extension, MEC will not continue to manage and operate the power plant beyond January 2019; and

WHEREAS, land-based slow speed diesel plants are unique, and there may be challenges in seeking or retaining employees having specialized skills in the operation and maintenance of these units; and

WHEREAS, the continued reliability of the MEC power plant is crucial to the IWPS especially since the loss of the Cabras 3&4 Power Plant and the aged condition of the Cabras 1&2 Power Plant; and

WHEREAS, prior to operation of the New Power Plant, an outage of both Piti 8 & 9 is estimated to cost customers an additional $221,658 in fuel expenses per day assuming a system peak of 277 MW, all other units available, a $60/bbl RFO cost, and an $80/bbl ULSD cost; and

WHEREAS, sustained outages of Piti 8 & 9 will result in increased use of the Cabras 1&2 power plant and less efficient Combustion Turbine Power Plants; and

WHEREAS, with the recommended capital investments and planned conversion from RFO to ULSD fuel, GPA will benefit if the plant is managed by the firm that has an established relationship with OEMs and Key Suppliers; and

WHEREAS, an extended period of cross-training and transitioning prior to expiration of the ECA and before a new IPP contract commences will ensure that the plant will continue to be operated and maintained by qualified personnel; and

WHEREAS, GPA and MEC have mutually agreed to a 5-year extension of the contract starting in January 2019 pursuant to Article 32 of the ECA; and

WHEREAS, approval is requested to allow the General Manager to extend the ECA with MEC for an additional 5 years, and to petition the PUC for approval of the contract extension.

NOW, THEREFORE, BE IT RESOLVED, by the CONSOLIDATED COMMISSION ON UTILITIES, the GOVERNING BODY of the GUAM POWER AUTHORITY as FOLLOWS:

1. The CCU authorizes GPA to extend the Energy Conversion Agreement for management, operations, and maintenance of Piti 8 & 9 power plant with Marianas Energy Company with the following contract provisions:
    a. Term: 5 years

b. Fees:
   i. Annual Fixed Recapitalization Fee of $7,067,000 for $35,334,000 of priority projects needed to ensure plant reliability, and the fuel conversion to ultra-low sulfur diesel (Attachment A) to comply with USEPA regulations.
   ii. Fixed O&M Fee = $6.3720/kW per month estimated at $10,085 million annually
   iii. Variable O&M Fee = $0.0024/kWh estimated at $2,245 million annually
c. Performance Guarantees
   i. Heat Rate – 7,720 BTU/KWH (HHV)
   ii. Availability – 90%
d. Other requirements
   i. Annual Performance Test (Heat Rate)
   ii. ULSD Fuel Conversion

2. The General Manager is authorized to petition the PUC for approval of the extension.

RESOLVED, that the Chairman certifies and the Board Secretary attests to the adoption of this Resolution.

DULY AND REGULARLY ADOPTED AND APPROVED THIS 27th DAY OF MARCH 2018.

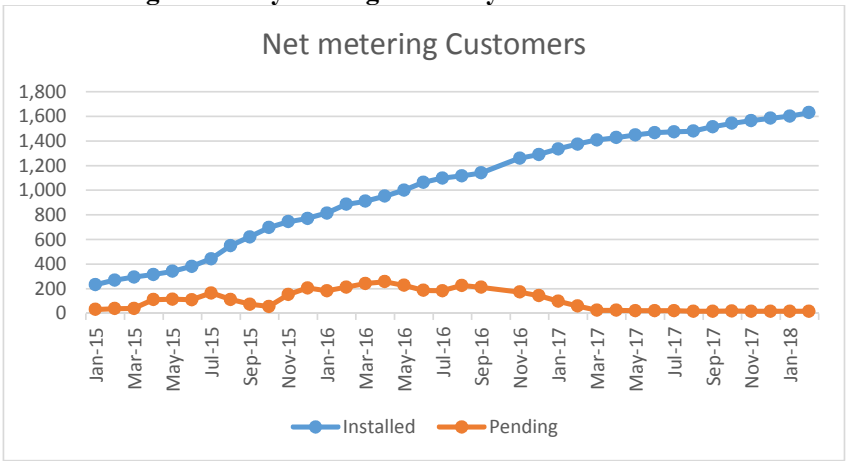
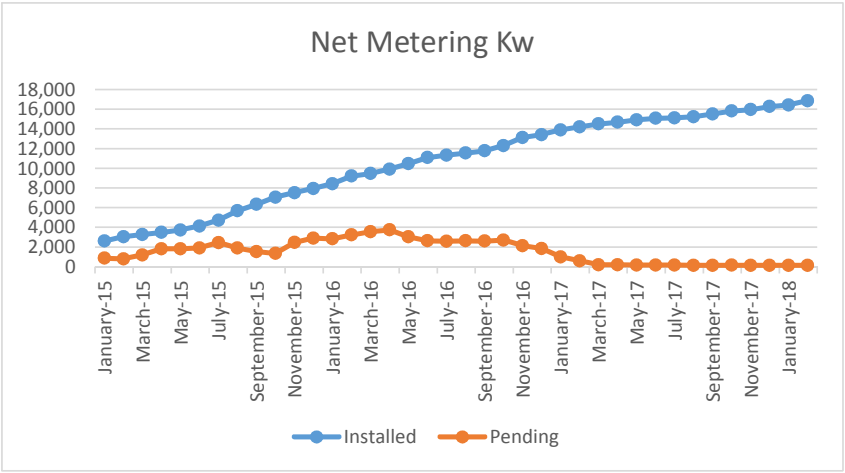
TO: **Consolidated Commission on Utilities**

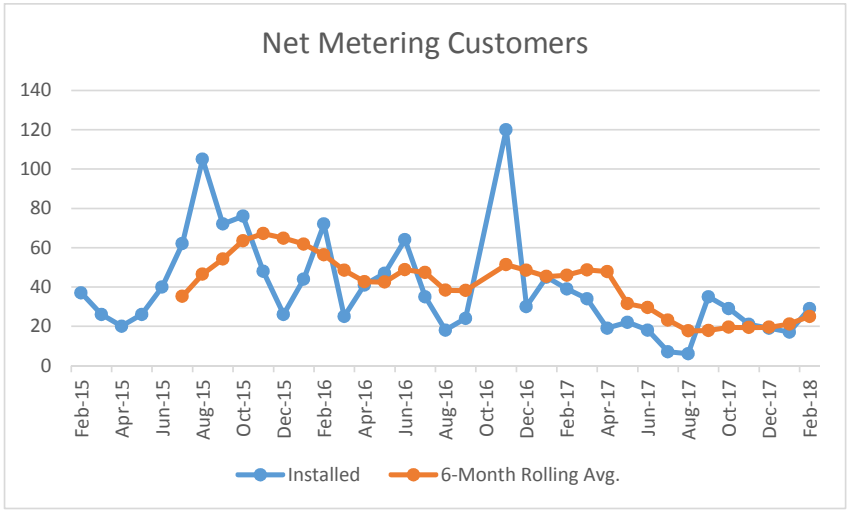
FROM: **General Manager**



DATE: **March 22, 2018**



SUBJECT: **General Manager's Report**



1. **Generation System Update:** The following summarizes the expected generation capacity situation for April 2018. The peak demand for March is estimated at 250 MW. The main transformer change-out and the chemical cleaning of Cabras 2 steam boiler are scheduled to be completed on March 26th. GPA is then scheduled to do chemical cleaning of Cabras 1 steam boiler thereafter thru early April. The chemical cleaning is necessary in order to improve plant availability and reliability.

April 2018 Capacity Available:	**338 MW**
April 2018 Projected Demand	**250 MW**
Available Reserve Margin	**88 MW**

2. Net metering Summary Ending February 2018:

Net Metering Summary Ending February 2018:

Description:	**Count**	**Kw**
Active	**1,630**	**16,849**
Pending	17	129
Totals:	1,647	16,978

Service:	**Count**	**KW**	**Kw/Customer**
Residential	1,544	13,689	8.9
Others	86	3,160	36.7
Total:	1,630	16,849	10.3
% Residential	**94.7%**	**81.2%**	
Estimated 12 Months Revenue Impact:	**$3,143,332**		

3. Renewable Energy Production Summary Thru February 2018:

Energy Production Source:	Kwh	Oil Barrels Avoided	Fuel Cost Avoided
NRG Total Production beginning Oct 2015	115,335,182	192,842	$10,606,332
Net Metering Estimated Production beginning Jan 2015	55,772,399	93,252	$5,128,882
Wind Power Production beginning Jan 2016	867,531	1,451	$79,779
Renewables Total:	**171,975,112**	**287,545**	**$15,814,993**

4. Demand Side Management (DSM) Program Expenses Thru January 2018:

All Expenses – Fiscal Year

Description	FY16	FY17	FY18 as of February	Total to Date
Regular/OT Pay	$11,348.80	$22,256.00	$6,761.02	$40,365.82
Other Contractual	28,278.50	$73,010.05	$2,885.00	$104,173.55
Paid Rebates-Split AC	$154,700.00	$557,275.00	$435,825.00	$1,147,800.00
Paid Rebates-Central AC	$3,400.00	$8,200.00	$800.00	$12,400.00
Paid Rebates-Washer/Dryer	$2,800.00	$7,425.00	$2,800.00	$12,025.00
Total Expenses	200,527.30	$668,166.05	$449,071.02	$1,317,764.37

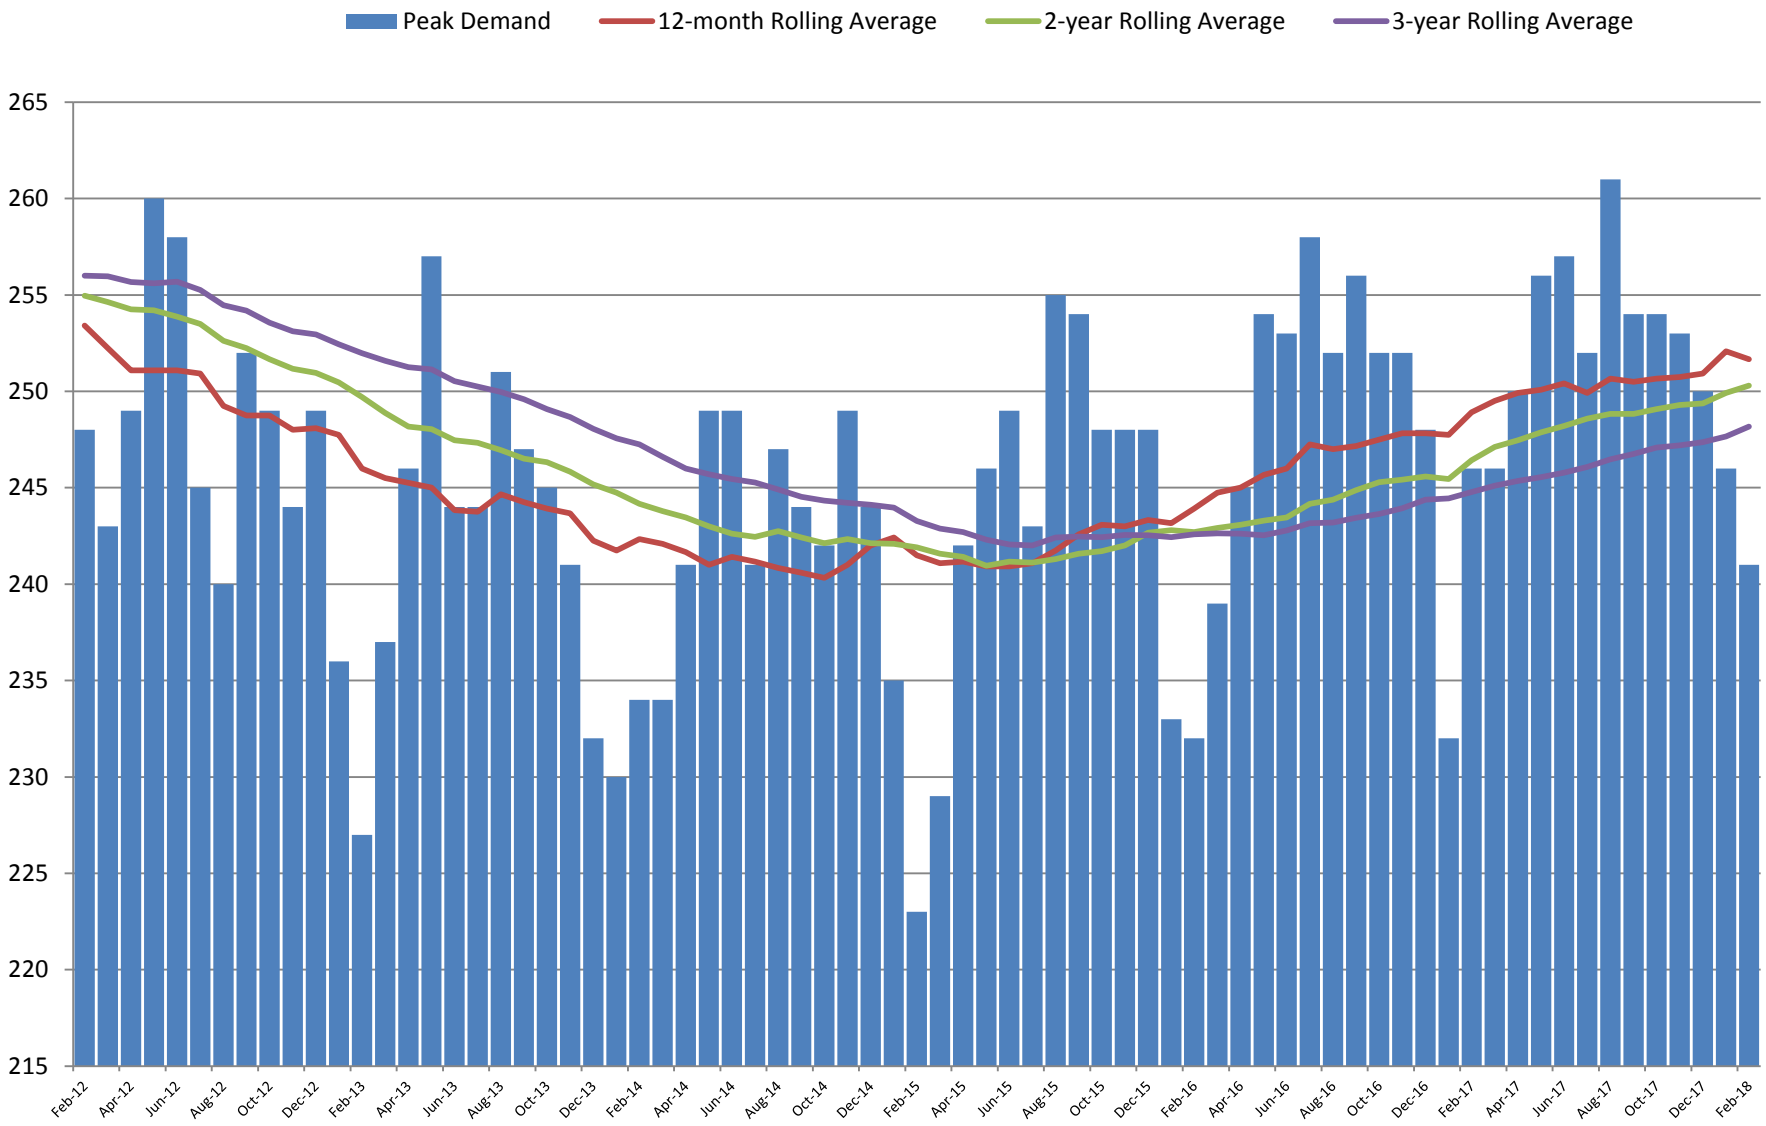
5. **Net Metering Customer Credit Recommendation:** We continue to prepare GPA's recommendation for CCU's approval but would need more time and now plan to bring our recommendation forward during the May CCU work Session. We are preparing a comprehensive analysis of the demographics of the 1630 customers and need more time to gather the data needed to complete our report. A public meeting for Net Metering is scheduled for Wednesday, April 18, 2018 from 4:00 pm to 6:00 pm here at the Gloria B. Nelson Public Service Building in Fadian. This meeting will allow MRE to present their value of solar (VOS) report. We will review MRE's VOS report before making a final recommendation.

6. **Phase II Renewables:** The PUC conditionally approved the KEPCO-LG 60 MW Power Purchase Agreement at their February 22nd Meeting. It is anticipated the PUC will approve the 60 MW HANWHA project at their March 29th meeting.

7. **Phase III Renewables Bid**: The bid has been issued. The bid request is for about 40MW of solar PV renewables to be constructed on Navy leased land. The energy produced would be stored in batteries during the day and released at nighttime to meet peak time load. The bid price opening date for acceptable proposals is set for April 17, 2018.

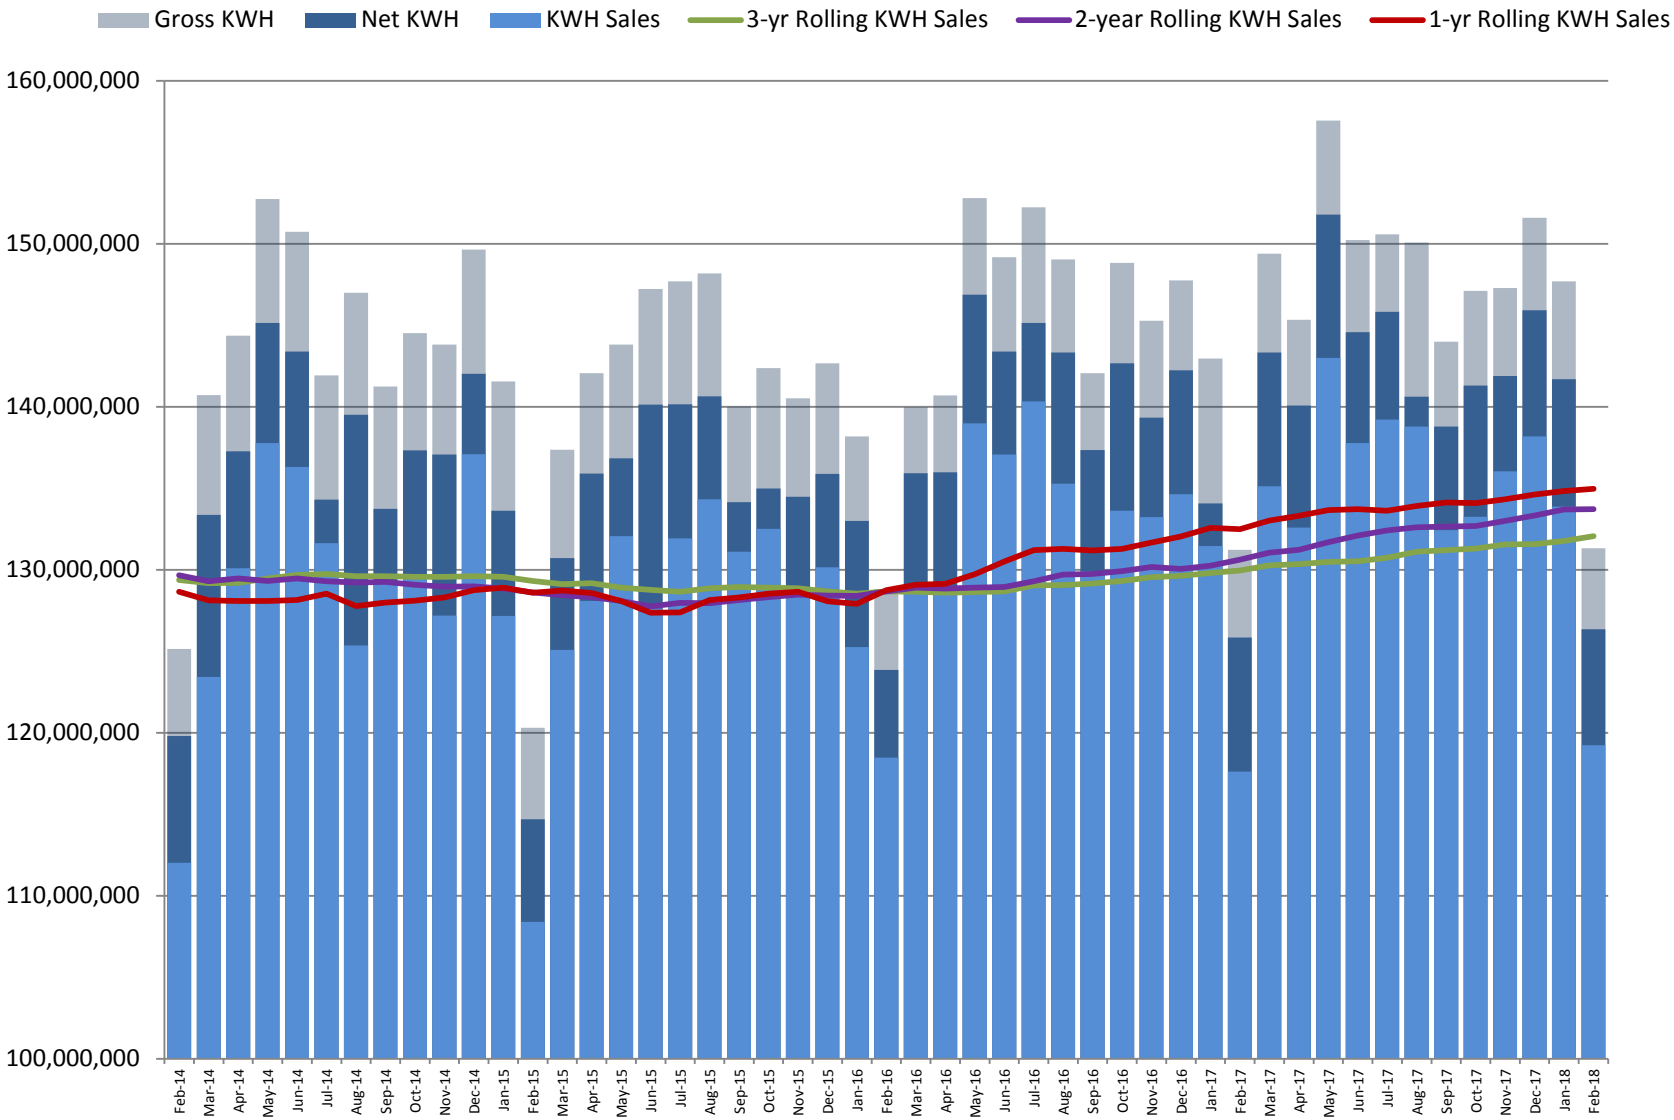
8. **PUC Agenda for March 29, 2018 regular meeting:**
    - **Docket 18-06, Petition to Approve Phase II Renewable Award to KEPCO-LG CNS Consortium**
    - **Docket 18-08, Petition to Approve Phase II Renewable Award to HANWA ENERGY CORPORATION**
    - **GPA Docket 18-09, Petition to Increase EPCM Contract**
    - **GPA Docket 18-10, Petition to Approve Contract Extension for Tristar Terminals Guam, Inc.**
    - **GPA Docket 18-11, Petition to Approve GPA's Use of Bond Financing Savings for GPA's "Bringing Energy Savings to Schools" (BESTS) and Demand Side Management Program**

9. **New Power Plant Procurement:** The rezoning of the land for the new power plant is pending Legislative action. Bill-223-34 has not been introduced for deliberation during this March's regular session due to all the special session on GovGuam finances and seems that the bill will more likely be brought up in the April session.



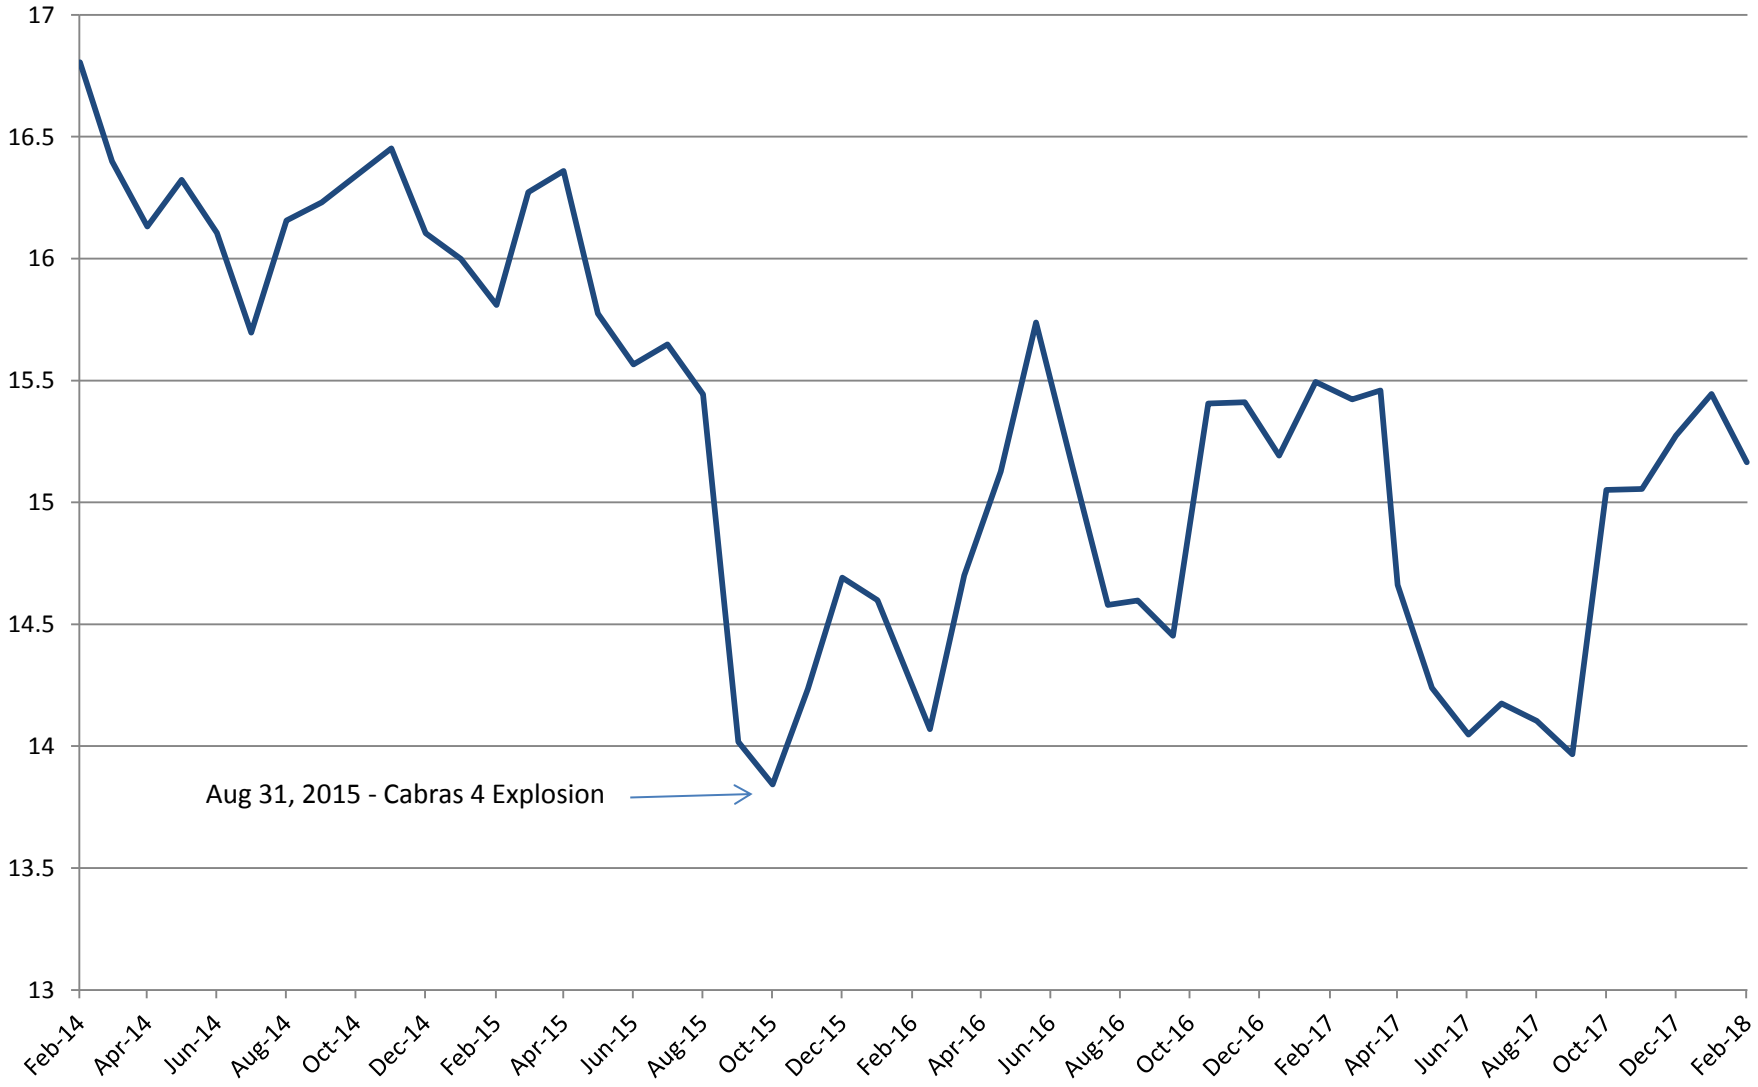
10. **Moody's Rating:** Our bond rating was changed from stable outlook to negative outlook because of the fiscal situation of the Government of Guam. We had discussions with Moody's prior to the change indicating to them that GPA will not be adversely impacted but to no avail. The downgrade was not under any control or failure of GPA and although disappointing, GPA will move on and time should prove GPA's point.

11. **GPA's 50th Anniversary Celebration:** Work continues towards the celebration of GPA's 50th anniversary. A proclamation signing is being scheduled for May 8, 2018 combined with a "roll Call" of the 4th cycle GPA Apprentice Graduates here at our Gloria B. Nelson Facility. The comprehensive suggested listing of programs and events will be presented to the CCU in the April work session.

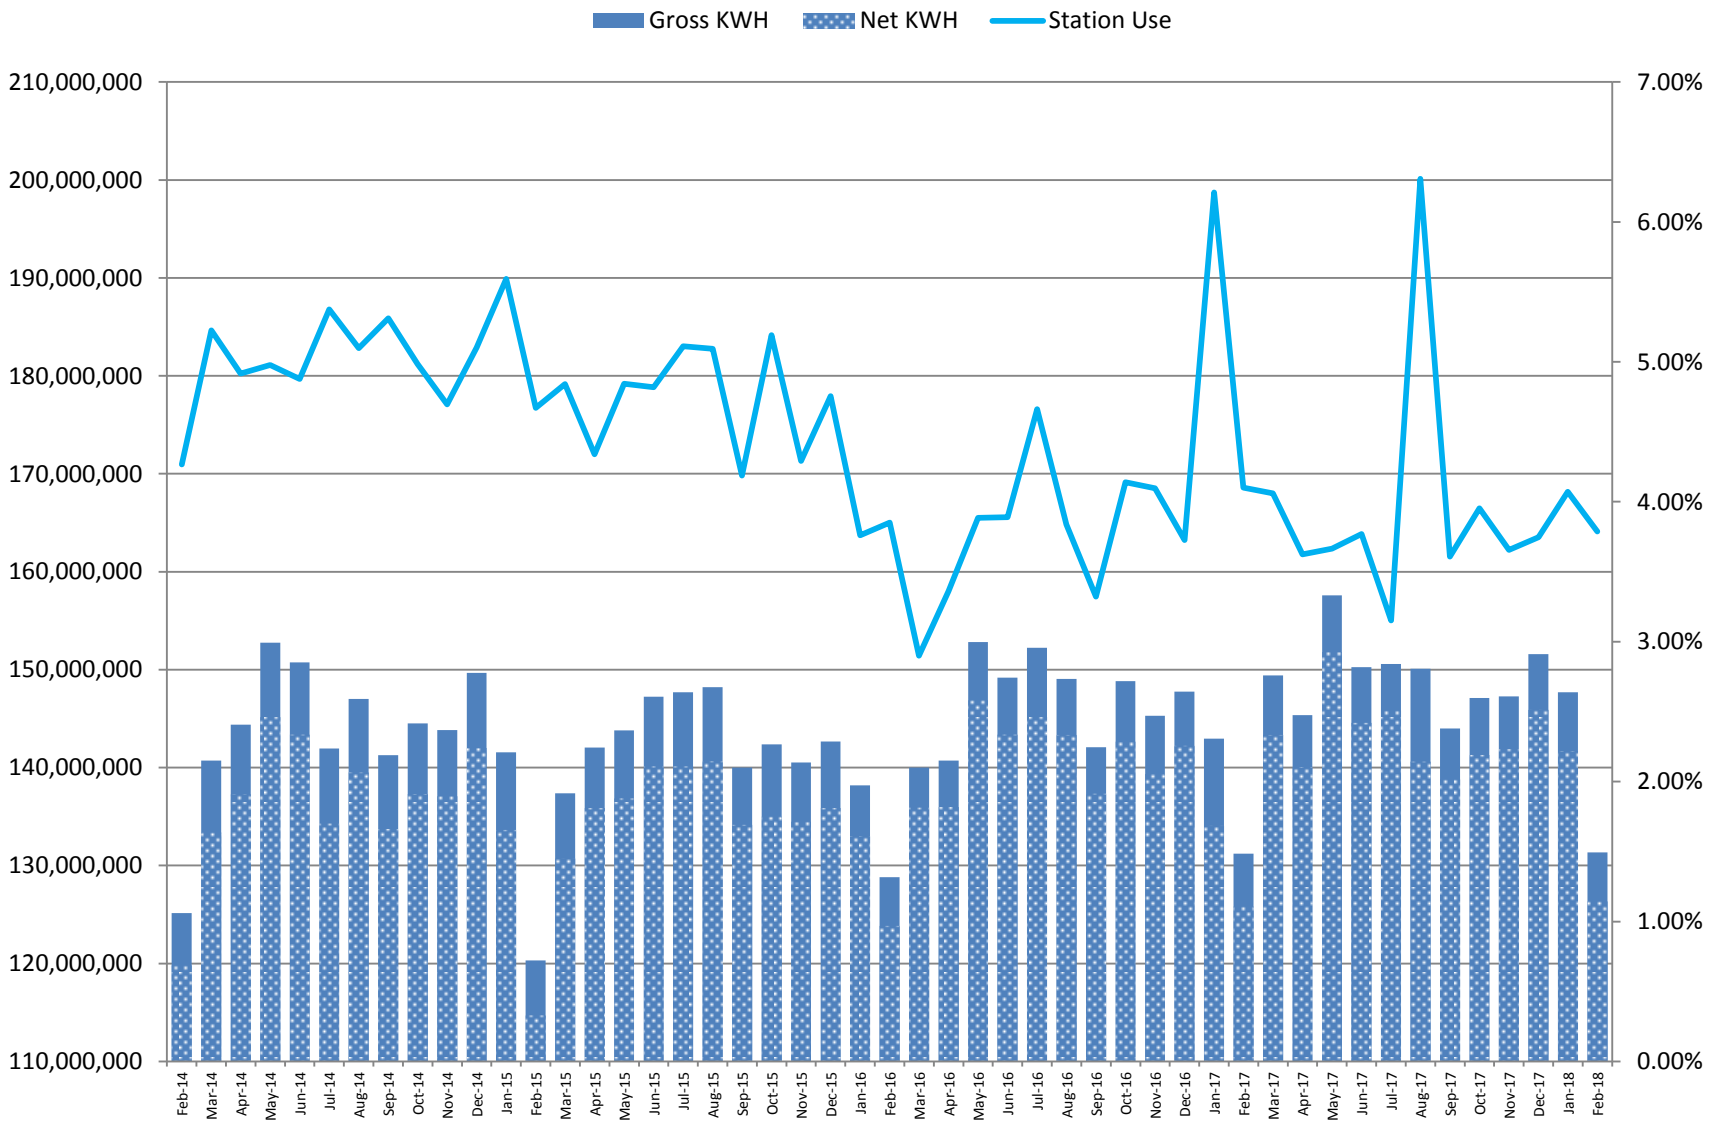


12. **Key Performance Indicators:** The following are updated indicators thru February 2018.

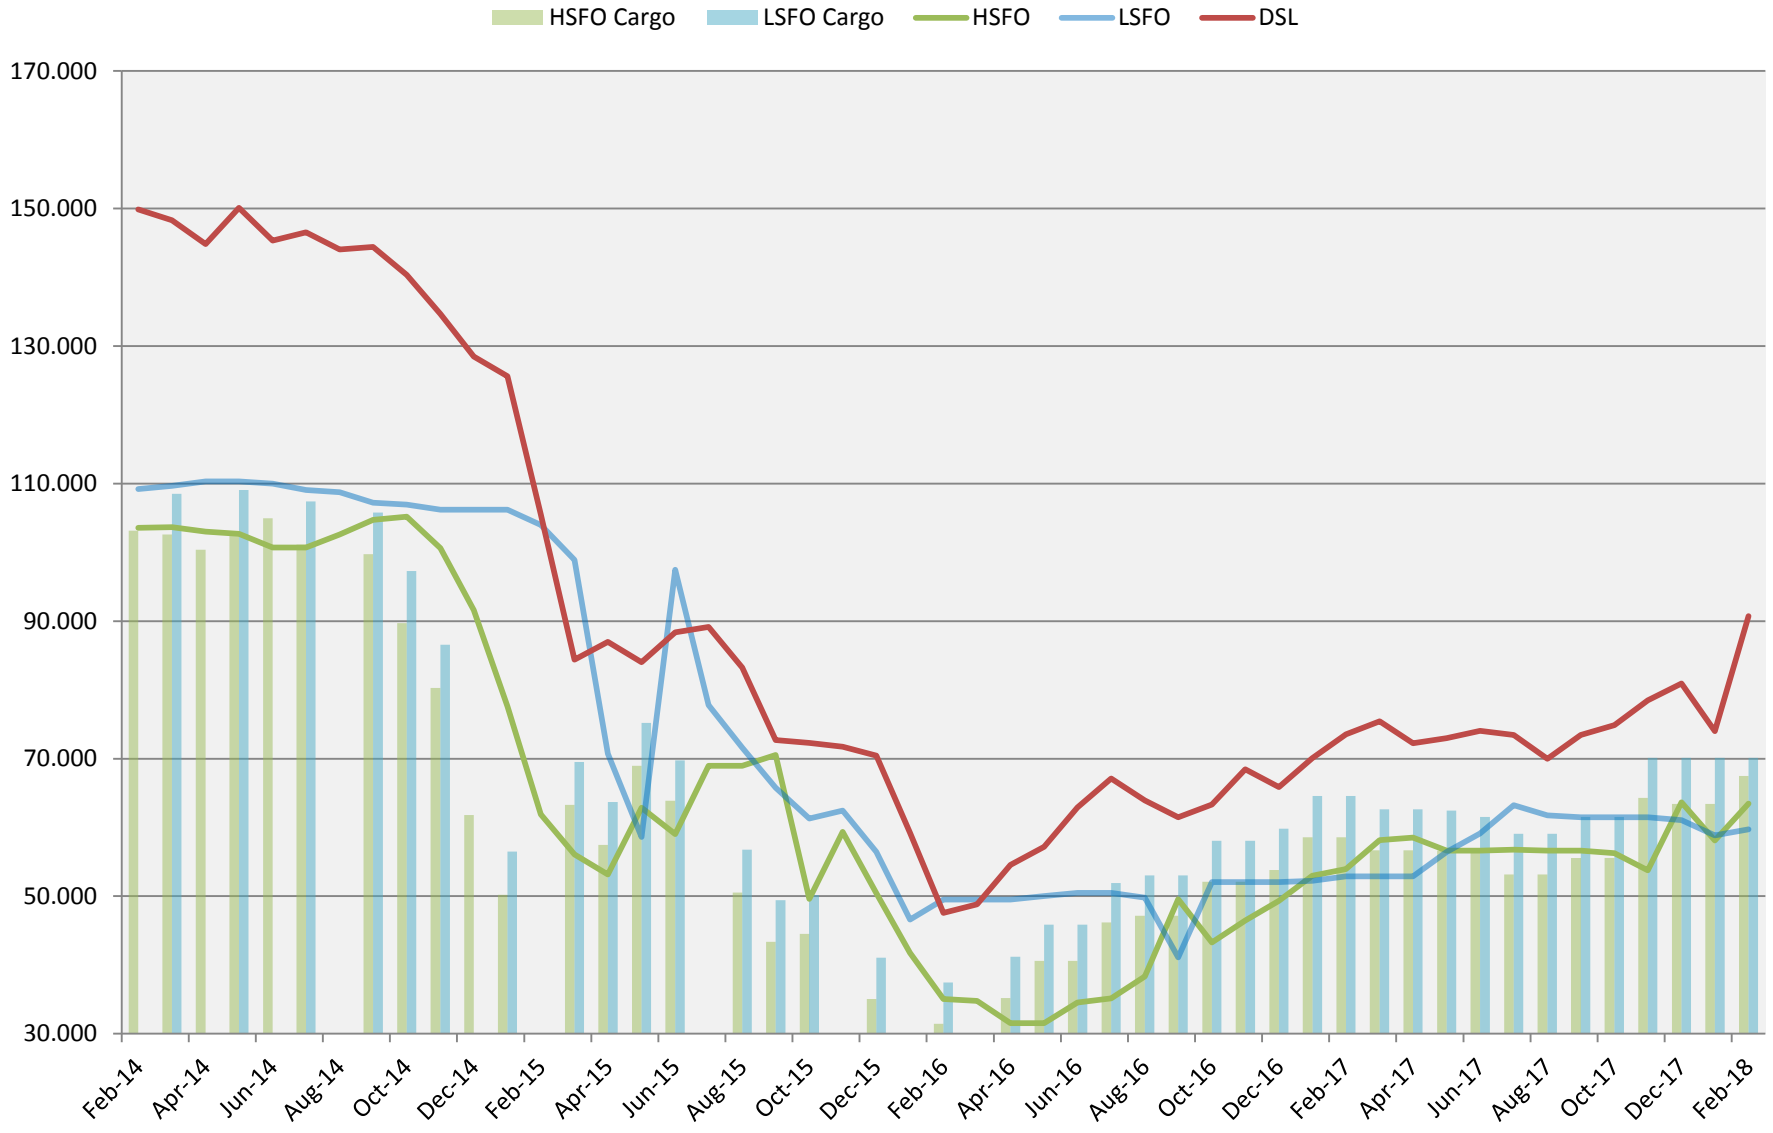
John M. Benavente, P.E.



Historical Monthly Peak Demand
February 2012 - February 2018



Historical KWH Sales
February 2014 - February 2018



SYSTEM GROSS HEAT RATE
(KWH/Gal)
January 2014 - January 2017

Gross and Net Generation (KWH)
February 2014- February 2018

Fuel Cargo and Fuel Consumption Costs ($/bbl)
February 2014 - February 2018

TOTAL:	6,380	77%	1,174	14%	496	6%	197	3%	8,247	100%

Government Accounts Receivable: CSD reports invoices for the month of Jan 2018, for 71 active government accounts with an overall total of $4,857,000.14. 68 accounts were current (96%), 3 account arrears (4%). 9 fax/emails issued to government accounts totaling $1,641,770.80. Jan 2018 invoices, 67 accounts paid in full.

CREDIT AND COLLECTION

Delinquent Ratio: As of Feb 2018 the authority reported a total 48,481 active customers. The "Delinquent Ratio" was recorded at 9.35% with 4,532 total delinquent accounts, total arrears of 2,537,754.49; 1,646,062.51; 3,281 (6.77% / 28-45 days) category; 266,648.89; 1,233 (2.54%/ 46-60 days); and 625,043.09; 423 (0.87% / Over 90 days).

Bankruptcy: During Feb 2018 the Bankruptcy reports one (1) customer account filed, totaling $636.38. Chapter 13.

Damage Claim: The Damage claim committee received five (5) Damage claim at $3,128.04 for the month of Feb 2018.

COMMAND CENTER

Meter Changed Outs: For the month of Feb 2018, there were a total of sixty-five (65) meters changed outs due to defective meter non-communicating.

ACTIVE DELINQUENT – NON PAYMENT

COMMAND CENTER /DISCONNECTIONS/RECONNECTIONS/

Single Phase Meters: Credit and Collection issued orders to Command Center to perform remote disconnect/reconnect for a total of 1,375 customers; 649(47%) were disconnected; 714(52%) deferred; 12(1%) incompletes.

3 Phase Meters: Credit and Collection issued orders to Disconnect Reconnect crew to perform truck roll out disconnect/reconnect for a total of 42 customers; 13(31%) were disconnected; 28(67%) deferred; 1(2%) incompletes.

PLANNING & REGULATORY DIVISION REPORT

The following summarizes P&R's activities for the month of February 2018

INSPECTIONS/MONITORING

- Best Management Practices (BMP) Weekly Inspection/Report – Cabras Power Plant
- Spill Prevention, Control and Countermeasures (SPCC) Inspection/Report - Cabras, CT, Diesel, Piti 7 Power Plants and Substations
- Took oil samples from old OCB and transformers at Harmon and Barrigada Substations to verify PCB concentration levels

REPORTING

- New Source Performance Standards (NSPS) Monthly– Submitted reports to GEPA for Macheche CT, Yigo CT, Talofofo, Manenggon and Tenjo Diesel Plants.
- Preparation of TIER II report to be submitted to GEPA for review and GM signature
- Hazardous Waste Report submitted to GEPA.

ENVIRONMENTAL RESPONSE

- Responded to transformer leak GHURA 501 in Dededo

AGGREKO

- Meeting with Aggreko and Guam EPA to discuss results of emission testing and Aggreko plans to show continuous compliance with emissions

ENERGY STORAGE SYSTEM PROJECT (ESS)

- coordinated with Lorraine regarding comments from Guam EPA on removal of above ground storage tanks and piping.
- Reviewed reports from Contractor.
- Took part in site visit with Guam EPA, SPORD, and Contractor. EPA had questions regarding removal of 3 storage tanks along with corresponding secondary containment and piping. EPA wanted to confirm that disposal will be done properly to which the contractor affirmed that it would.

FUEL SWITCHING SERVER REPLACEMENT

- IT completed replacement and cloning of server. Full restoration is currently pending.

LEIDOS ASSESSMENT REPORTS

- Reviewed Environmental Site Assessment report for Piti 8 & 9 (MEC)
- Reviewing Condition Assessment report for Piti Unit 7

NAVY TIE IN PROJECT

- Participated in Site Visit with Navy and their Contractors on their project which require outage of GPA 24" RFO supply line. Attended with SPORD and Project Management

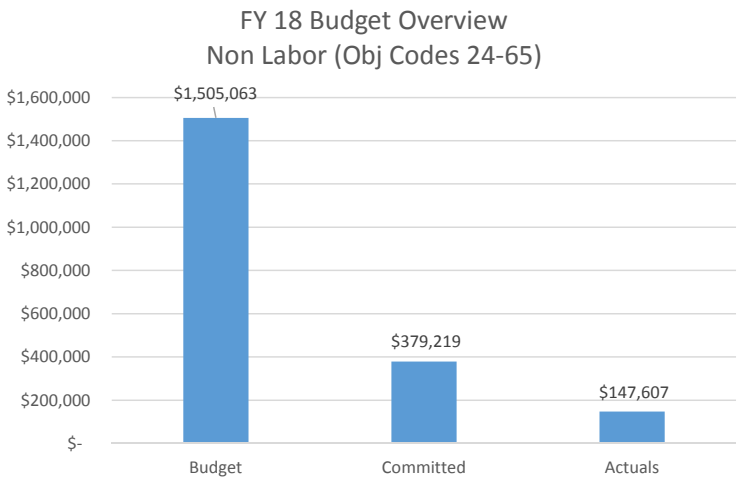
PORT AUTHORITY OF GUAM INCIDENT

- Witnessed air sampling by IHP at Cabras Power Plant. Plant grounds were negative for hazardous gases
- Attended meeting to discuss current SOP to monitor SO2 air quality at Port Area when Cabras units start up. Attended with GPA Safety. Also in attendance was Guam EPA.

WASTE DISPOSAL

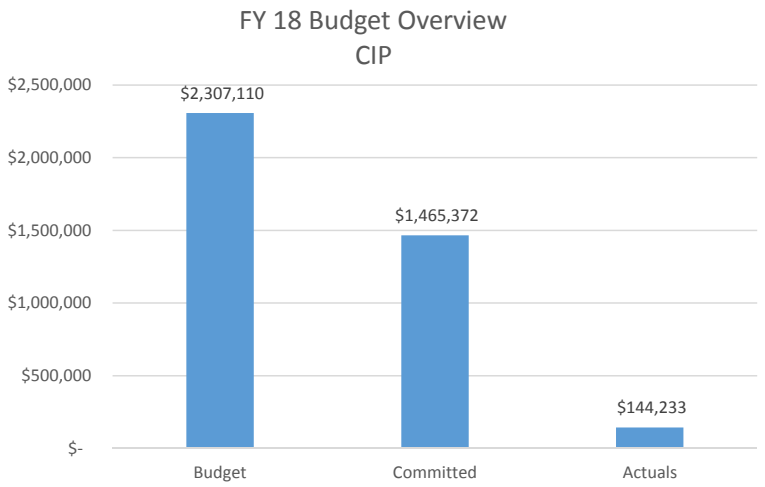
- Monitoring of UNITEK and GRESCO used oil disposal to the WOF
- Disposed of GPA used light bulbs

OTHERS



- Prepared and submitted RFP bid to procurement for the Annual Emission testing, and O & M for CEMS and RICE MACT
- Preparation of Bid Documents for the HAZMAT Mitigation (Removal and Disposal) Project for Tanguisson and Dededo Diesel Power Plant
- Provided E&TS with summary of impact the re-designation of Tanguisson area and the rest of the Island to Attainment/Unclasiffiable has on permitting of new plant.
- Attended training at IHP with Safety on the use of hand held air monitoring devices. Requested for quotation from IHP for Air Monitors and calibration kit.

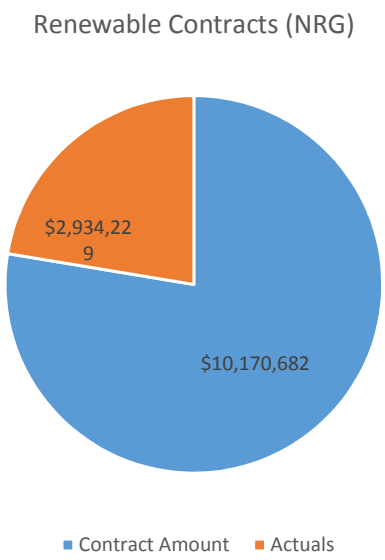
SPORD CCU Report



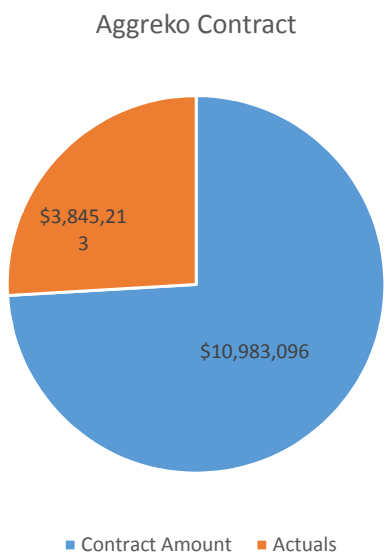
February 2018

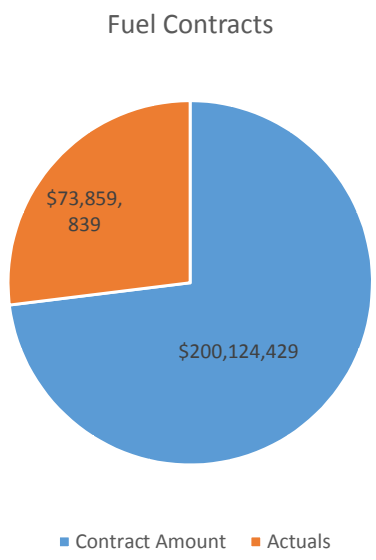
SPORD FY 2018 Budget Status

- SPORD O&M:



- CIP

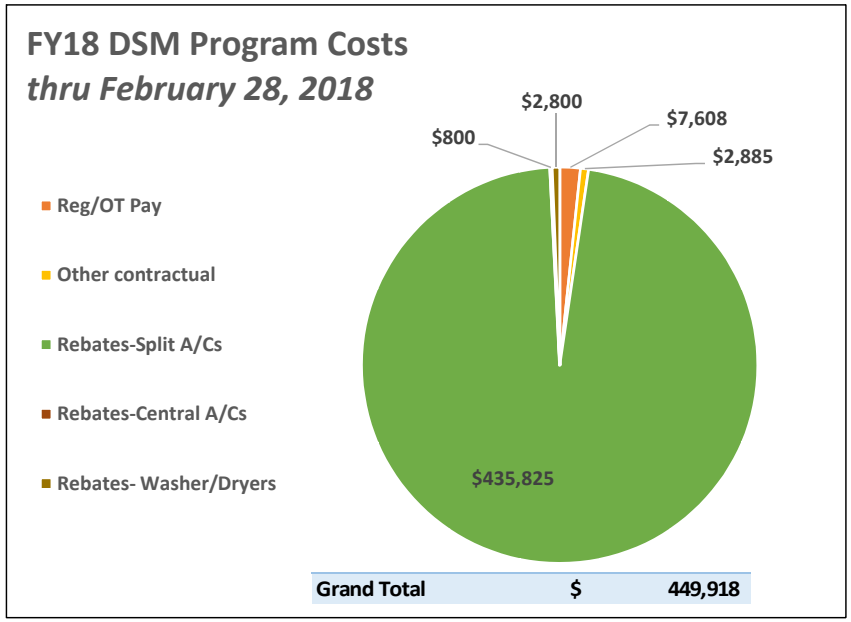


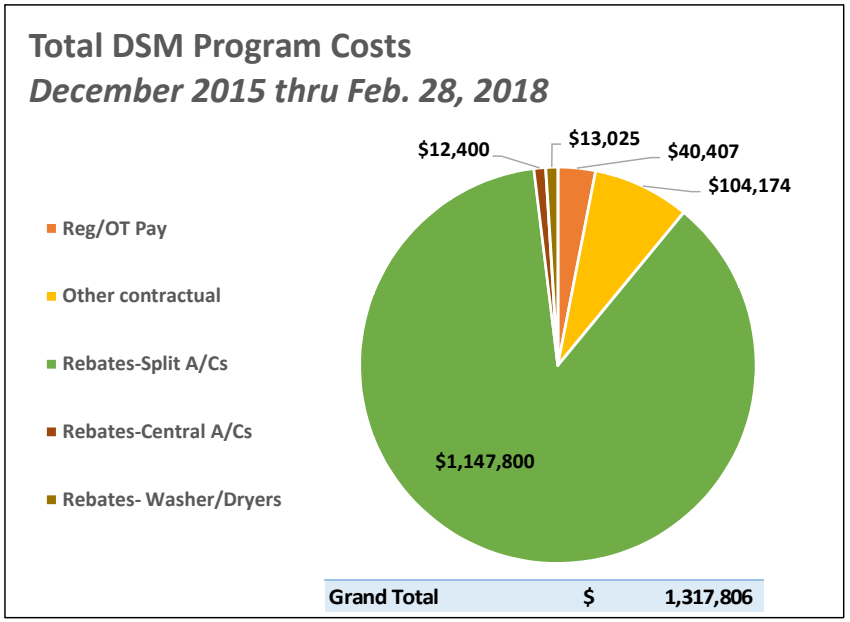


2

SPORD FY 2018 Budget Status

- Major Contracts (Non-O&M)





3

SPORD FY 2018 Budget Status

- DSM Expenses

Ongoing Activities

- Contract Performance Management (IPP, PMC, Agrekko)
- Generation Fuel Supply & Fuel Farm Management
- DSM Rebate Processing
- Renewables (Wind Turbine Maint & DOAg MOA, NRG Invoicing)
- Smart Grid/Network Support
- Project Management
  - Procurement
  - *February Project Activities*

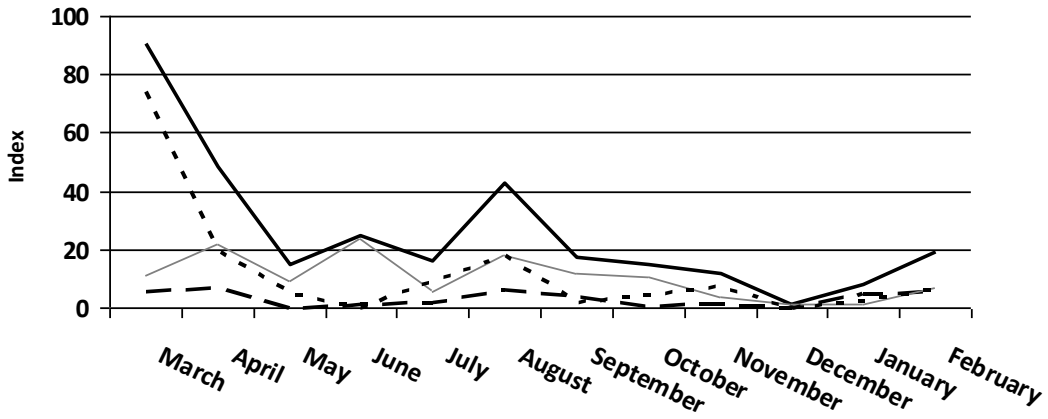
Project Activities

No.	Project Description	February 2018 Activities	Status / Est. Completion
1	Energy Storage System (Phase I)	Revised 100% design drawings to be submitted early March. Clearing and grading permit work commenced in November 2017. Foundation permit work	August 2018
2	Renewable Energy Resource Phase II	Hanwha's PPA approved by CCU. KEPCO's PPA was filed with PUC and pending offical approval. Hanwha's PPA will be filed with the PUC in March.	KEPCO PV plant COD is Oct 2020. Hanwha's COD is anticipated for 1st qtr of 2020.
3	New Power Plant Bid (EPCM)	Request for Qualification announced on January 16, 2018. Proposals due on April 5, 2018. Technical specification are being reviewed and updated based on discussions on the	April 5, 2018 (Qualifications Due)
4	DSM Marketing	DSM Marketing continues. Initiated work with Adztech/Jay Merril on DSM Survey, scheduling initial survey activities in February.	Continuous
5	DSM Rebate Program	Processed over 326 equipment in applications for rebates totaling ~ $69K	Continuous
6	Wireless Network Expansion	Commenced Southern Expansion in collaboration with GWA: 30% Assessment of GWA Well Locations: Completed Assessment of Existing Tropos Units: 20% Router Equiqment and Accessories purchase	To be Updated Completed Continuous Mar-18
7	Performance Metrics Automation Project	Presentation on iDashboard provided to GM. GPA contiues to work with consultant on automating reports and formating.	Mar-18
8	Electric Grid Analysis Software	Additional training for users	Mar 2018
9	Services to Develop Business Performance Indices using iDashboards	Dashboard builds 95%	Ongoing
10	Supervisory Control and Data Acquisition (SCADA) System	Change Order Approved for October 2018 Completion and hardware costs Equiment on Order	Oct 2018
11	Mobile Workforce Management System	Bid Evaluation Completed, Price Proposal Opening March 20, 2018	May 2018 (Bid Award)
12	Consulting Services for Smart Grid Analytics Enabled Distribution System Planning, Technical, and Economic Feasibility Studies	RFP evaluation completed for sole bidder. Bidder did not qualifiy. Committee recommendation to rebid. Waiting on Acknowledgement from sole-bidder	April 2018 (Rebid)



Project Activities

No.	Project Description	February 2018 Activities	Status / Est. Completion
13	TEMES Piti # 7 ECA Expiration & Transition to GPA	Transition completed. Environmental Assessment Report received and submitted to key managers and divisions. Condition Assessment Report under review.	[Completed] [Completed] Copmletion Date: March 2018
14	MEC Piti &8 and #9 - ECA Expiration	Environmental Assessment Report received and submitted to key managers and divisions. Condition Assessment on-going; report expected within 30 days of completion of Assessment. Data Compilation in progress.	[Completed] March 2018 December 2018
15	Planning Software Administration/Maintenance	Training of 2 SPORD Engineers for PO use commenced 10/3/2017. Upcoming task: Configuration and management of database, training for - SPORD - PSCC	Start Date: Oct 2017 Completion Date: Sept 2018
16	Generation Software (GADS open software)	Pending data entry from Generation & SPORD.	[On-going work]
17	IFB for ULSD Supply for Baseloads and Peaking Units	Solicitation in progress	Start Date: Nov 2017 Est. completion: FY2018
18	Contract for Lease of Bulk ULSD Storage	196KB tank repairs completed	27-Feb-18
19	EV Infrastructure	Developing fast charge station scope for Mangilao offices.	Sept 2018
20	Consulting Support, new procurements for Piti 7,8,9	Piti 7 - Management Contract (under Generation) awarded. No IPP bid. Piti 8&9 - Bid documents in progress, scheduled for approval this month.	[Commenced] Bid documents completion: March 2018 Bid Process Start Date: 2nd quarter of 2018 upon CCU/PUC approval
21	Fuel Conversion Plan	Initial discussion commenced, detailed discussions in November after submission of Assessment Report. Data Requests being addressed.	Start: October 2017 Completion: June 2018

Project Activities

No.	Project Description	February 2018 Activities	Status / Est. Completion
22	Fuel Bulk Storage Facility Assessment	Consultant Site Visits for ESA and Technical Inspeciton completed. Reports due January 2018.	Start: Sept 2017 End: January 2018
23	Design and Engineering Consulting for Remote Start of GPA Plants	Engineering Project Management team reviewed scope. Dratt of assessment and implementation plan completed.	August 2018
24	Renewable Energy Resource Phase III	Completed pre-bid conference and site visits January 23-24 2018.	(Mar 2018) Tech Proposal Due
25	Utility Energy Services Contract (UESC)	Kicked off discussions with UOG, Guam Energy Office, Dept. of Navy, and GPA team on project development and opportunities. Discusssed DSM Model House. UOG Campus Assessment, Discussion on Solar Rooftop on DOE campuses.	
26	IFB for Delivery Services for GPA Plants	Bid canceled. Requirements to be included in the ULSD Supply solicitation	IFB Canceled Feb 2018
27	IFB for RFO Supply to Baseload Plants	Solicitation in progress	Start: November 2017 Est. Completion: FY2018 Contract Start: Sep 1, 2018
28	IFB for Petroleum Inspection Services	Re-Solicitation in progress	Start: November 2017 Est. Completion: FY2018 Contract Start: Jun 01, 2018
29	RFO Storage Lease	Lease extension approved by CCU. For PUC review and approval	Start: November 2017 Est. Completion: Mar 2018 Contract Start: Aug 1, 2018
30	GPA Fuel Farm RFO Repair & Upgrade	c/o Engineering Project Mgt	Solicitation in progress
31	GPA Fuel Farm ULSD Pipeline Upgrade	c/o Engineering Project Mgt	Bid Specs Preparation in progress
32	Tk 1934 & Tk1935 API 653 Internal Inspection	c/o Engineering Project Mgt	Bid Specs Preparation in progress
33	Milsoft Systems Software Services	Solicitation in progress	Continuous
34	MV90 Integration Services	Solicitation in progress	Dec-18
35	SCADA Workstations and Monitors	Solicitation in progress	May 2018 (Bid Award)

Engineering Large Customer and Net Metering Tracking

Date Received	Customer Name	Work Order Number(s)	Location	KVA	Meter Qty	Status
05/07/14	Port Authority of Guam	412337	Piti			Upgrades of existing facilities, includes line relocations and service conversions from overhead to underground 75% completed. Currently on hold pending Port Authorty direction for final removal.
12/20/13	CoreTech International	Multiple	Dededo	250	50	Lada Estates, 450 kVA, Phase I 100% Completed 242 units energized, Phase II 300 kVA, applications received for 93 units, Phase II 100% Completed. Phase III on hold due to Labor and Permit issues.
01/27/15	TG Engineers PC	422182-85, 90-93, 96-98	Agana Heights	100	11	11 Unit Apartment, 100 kVA, 98% Completed
06/02/15	Docomo Pacific Inc.	Multiple	Various Locations Islandwide	50		New Comm Towers and Power Supplies, 10 sites, 9 completed
05/13/15	CoreTech International Towers	426021	Tamuning	3300	104	New condominiums, 2-1500kVA and 1 300 kVA, Tower 101 100% Completed, Tower 102, 103, and 104 are 45% completed, currently on hold. Temporary power pending for Community Center, 100% Completed. First 52 Service Orders for Tower 101 is 100% completed.
05/11/16	Korando Corp (DPW Bile Pigua Bridge)	437716	Merizo			Bile and Pigua Bridge Reconstruction - 65 % Completed, Route 25/26 Road Widening, currently on hold.
12/09/16	Maeda Pacific	443952	Harmon			Route 1 and Route 3 road improvements - 100% completed, involves new underground 34.5kV and 13.8kV lines and the removal of overhead ples and lines. Pulling of wires intiated 10/9/17. Final Termination and testing Completed. Energizing of new underground 13.8kV and 34.5 kV lines completed. Pending return of materials.
Pending	New Nikko Expansion	Pending	Tumon	1500	1	New Nikko Expansion, pending submittal of work order application. Redesign of primary feed ongoing.
03/10/17	Best Housing Corp Ltd	446924-30	Mangilao	60	6	New 6-Unit Townhome, 50% completed
06/01/17	GWA Pump Stations 2 and 3	450278-9	Santa Rita	150	2	New GWA Pump Stations. 20% Completed.
06/01/17	WM Eng Office Building	450280	Tamuning	150	1	New office building. 100% Completed. Released to T&D.
07/17/17	Keystone Pacific Realty Corp	451488	Hagatna	100	10	New apartment. 92% Completed. Pending additional applications.
07/17/17	Grand Rock Corp.	451490, 1	Santa Rita	50	4	100% Completed. Released to T&D.
08/07/17	Matsumoto, Akiyoshi	452146-49, 51, 4, 6	Tumon	60	7	New 6 Unit Apartment with Common Meter. 5% Completed.
08/17/17	Micronesian Community Corp.	Pending	Mangilao	130	13	New 13 unit subdivison, 10% completed
09/11/17	Grand Harvest Inc.	453016,19,22,24-30,32,34,35,38,40	Dededo	225	17	New 17 Unit Apartment, 100 % Completed. Release t o T&D.
10/02/17	Sumitomo Mitsui (Baza Gardens Waste water)	453369	Yona	300	1	Baza ardens Wastewater Treatment Plant Improvements, 0% Completed
01/25/18	Precision Systems Inc.	456547, 60	Tamuning			Primary Underground Conversion. Removal of three spans of overhead primary and 1 ea. power pole. 95% completed.
02/06/18	Guam Waterworks Authority	Pending Application	Dededo	25	1	Santa Ana Sub. Pump Station. 100% Completed and released to T&D.
03/01/18	Docomo Pacific Inc., New Data Center	Pending Application	Talafofo	3000	1	New Data Center. Planned to come off P-260 and P-262. 0% Completed. Still in Desgn Phase.

P&R Weekly & Monthly Inspection Reports

- Best Management Practices (BMP) Report Summary [Weekly]
- Generation Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]
- T&D Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]

- GPA is responsible to employees, the island environment, and the community to take all reasonable steps necessary to prevent spills from its facilities in order to protect human health and the environment

P&R Inspection Report Purpose

- The purpose of these inspections is to catch discrepancies and violations internally and correct them before inspections by Guam EPA and US EPA
- Regulatory Agencies can conduct scheduled or un-scheduled (surprise) inspections any time
- Any major discrepancies or violations cited can lead to issuance of a Notice of Violation (NOV), possible fines, and/or other enforcement action
- P&R conducts routine SPCC inspections in compliance with the requirements of 40CFR 112.7(a)(3)(ii), Discharge Prevention Measures

Issues for Decision

Resolution No. 2018-09:

Relative to Authorizing the Guam Power Authority to purchase two Pressure Diggers

What is the project's objective and is it necessary and urgent?

The objective of the project is to replace salvaged Pressure Diggers and to provide reliable equipment to give the Authority's Transmission & Distribution personnel the capability and capacity to perform new pole installations to support customer growth and to maintain the power system in a safe and efficient manner. Unavailable equipment translates to extended outages and longer response times.

Existing pressure diggers to be salvaged:

Official #	Description	Year	Repair Assessment
1349	Digger(Diamond Rio)	27 years (1991)	Complete replacement of digging unit and engine overhaul.
1535	Digger(Kenworth)	25 years (1993)	Complete replacement of digging unit.

Where is it at?

Pressure Diggers will service the transmission and distribution system island wide.

How much will it cost?

Item	Vendor	Qty	Unit Cost	Extended Cost
Pressure Diggers	Morrico Equipment	2	$516,999.00	$1,033,998.00

When will it be completed?

Delivery is set at 400 days after Notice to Proceed

What is its funding source?

FY17 General Plant Capital Improvement Revenue Funds

The RFP/BID responses:

One bid was received from Morrico Equipment

Resolution No. 2018-09

AUTHORIZING THE GUAM POWER AUTHORITY TO PURCHASE TWO PRESSURE DIGGERS

WHEREAS, the Guam Power Authority seeks to procure two new Pressure Diggers to replace existing diggers to be salvaged; and

WHEREAS, the new Pressure Diggers will give the Authority's Transmission & Distribution personnel the capability and capacity to perform new pole installations to support customer growth and to maintain the power system in a safe and efficient manner; and

WHEREAS, two Pressure Diggers within the current fleet are beyond their life expectancies and require extensive repairs on the engines and digging units; and

WHEREAS, the Procurement Officer has provided adequate public announcement to procure two new Pressure Diggers through Bid Invitation No. GPA-055-18 providing the technical specifications for the Pressure Diggers and the information required of each offeror; and

WHEREAS, Morrico Equipment was the sole bidder for GPA's consideration; and

WHEREAS, the GPA Evaluation Committee determined Morrico Equipment to be the only responsive bidder for supply of two Pressure Diggers at a cost of $1,033,998.00; and

WHEREAS, GPA will utilize Revenue Capital Funds to procure the Pressure Diggers; and

WHEREAS, GPA is seeking approval from the Consolidated Commission on Utilities to award a contract to Morrico Equipment for the purchase of two pressure diggers.

NOW, THEREFORE, BE IT RESOLVED, by the CONSOLIDATED COMMISSION ON UTILITIES, the GOVERNING BODY of the GUAM POWER AUTHORITY as FOLLOWS:

1. After careful consideration, the Consolidated Commission on Utilities finds the procurement of two Pressure Diggers with Morrico Equipment to be reasonable and prudent.
2. The General Manager of the Guam Power Authority is hereby authorized an increase in obligating authority up to $1,033,998.00 for the purpose of procuring two Pressure Diggers from Morrico Equipment.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

DULY AND REGULARLY ADOPTED AND APPROVED THIS 20th DAY OF APRIL 2018.

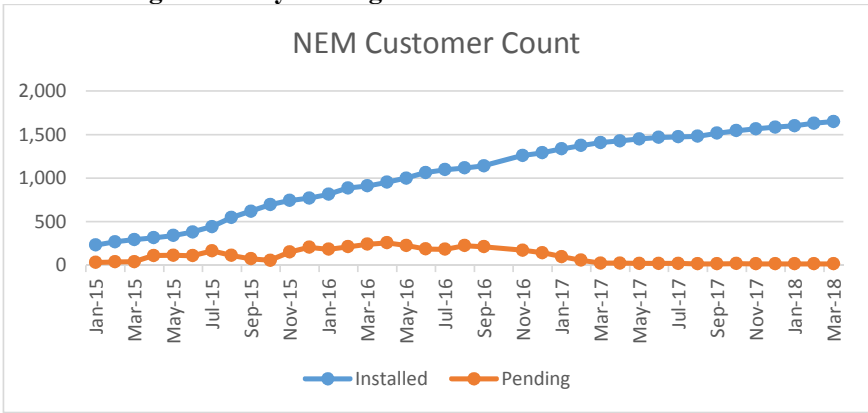
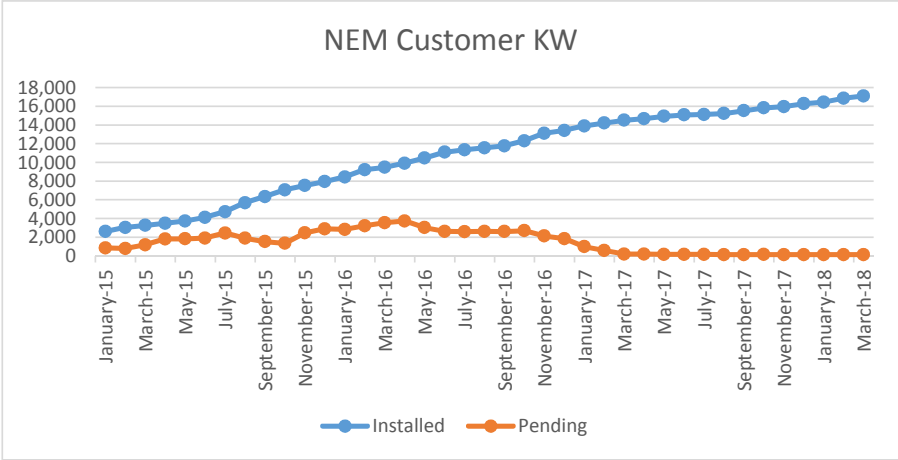
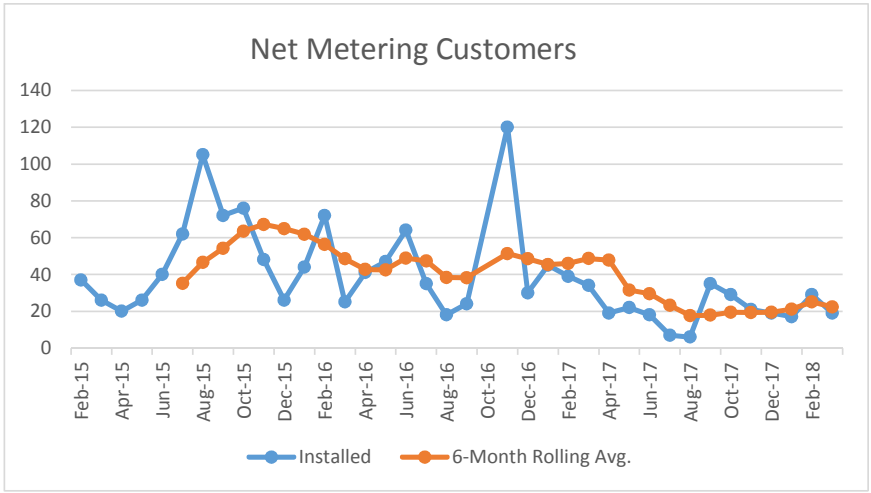
FROM: **General Manager**



DATE: **April 19, 2018**



SUBJECT: **General Manager's Report**



1. **Generation System Update:** The following summarizes the expected generation capacity situation for May 2018. The peak demand for May is estimated at 254 MW. GPA is scheduling the chemical cleaning of the Cabras 1 steam boiler for the end of May. The system is now heading into the higher peak months of the summer. Last year, the peak demand was 261 MW on August 1, 2017.

May 2018 Projected Capacity:	**373 MW**
May 2018 Projected Demand	**254 MW**
Projected Reserve Margin	**119 MW**

2. Net Metering Summary Ending March 2018:

3. Renewable Energy Production Summary Thru March 2018:

Energy Production Source:	Kwh	Oil Barrels Avoided	Fuel Cost Avoided
NRG Total Production beginning Oct 2015	120,289,445	201,126	$11,061,931
Net Metering Estimated Production beginning Jan 2015	59,160,124	98,917	$5,440,421
Wind Power Production beginning Jan 2016	895,916	1,498	$82,389
Renewables Total:	**180,345,485**	**301,541**	**$16,584,741**

4. Demand Side Management (DSM) Program Expenses Thru March 2018.

All Expenses – Fiscal Year

Description	FY16	FY17	FY18 as of March 31	Total to Date
Regular/OT Pay	$11,348.80	$22,256.00	$9,540.94	$43,145.74
Other Contractual	$28,278.50	$73,010.05	$2,885.00	$104,173.55
Bank Fees	$155.00	$1,032.06	$190.00	$1,377.06
Paid Rebates– Split AC	$154,700.00	$557,275.00	$552,925.00	$1,264,900.00
Paid Rebates– Central AC	$3,400.00	$8,200.00	$800.00	$12,400.00
Paid Rebates– Washer/Dryer	$2,800.00	$7,425.00	$3,800.00	$14,025.00
Total Expenses	$200,682.30	$669,198.11	$570,140.94	$1,440,021.35

SUMMARY

DESCRIPTION	AMOUNT
Initial DSM Budget FY'16	$1,806,014.00
Interest Income as of Mar 18	$3,900.94
Total Expense	$1,440,021.35
Ending Balance as of Mar 18	$369,893.59
Addtl. Budget: Approved (FY'18)	$1,139,189.00
Total Ending Balance as of Apr 18:	**$1,509,082.59**

5. **Net Metering Customer Credit Recommendation:** The last public hearing on Net Metering was conducted on April 18, 2018. Marianas Renewable Energy presented their Value of Solar Study. GPA will now proceed in providing the CCU with its analysis and recommendation at the May work session.

6. **Phase II Renewables:** The PUC has approved the entire 120 MW of PV Renewables by KEPCO and HANWHA. GPA would now proceed to sign a Power Purchase Agreement with each of these companies.

7. **Phase III Renewables Bid**: The bid has been issued. The bid request is for about 40MW of solar PV renewables to be constructed on Navy leased land. The energy produced would be stored in batteries during the day and released at nighttime to meet peak time load. The technical proposals are required by June 19, 2018. The opening date of prices of acceptable technical proposals has been set for August 1, 2018.

8. **PUC March 29, 2018 regular meeting resulted in the following:**
    - **Docket 18-06, Petition to Approve Phase II Renewable Award to KEPCO-LG CNS Consortium (approved)**
    - **Docket 18-08, Petition to Approve Phase II Renewable Award to HANWHA ENERGY CORPORATION (approved)**
    - **GPA Docket 18-09, Petition to Increase EPCM Contract (approved $600,000)**
    - **GPA Docket 18-10, Petition to Approve Contract Extension for Tristar Terminals Guam, Inc. (Dock Fees approved; Pipeline part require additional information)**
    - **GPA Docket 18-11, Petition to Approve GPA's Use of Bond Financing Savings for GPA's "Bringing Energy Savings to Schools" (BESTS) and Demand Side Management Program (approved)**

    Dockets to be considered at the April 26th PUC meeting:
    - **GPA Docket 18-12, Petition to Approve Invitation for Bid (IFB) for Property Insurance**
    - **GPA Docket 18-13, Petition to Approve the Piti 8 & 9 Contract Extension with Marianas Energy Corporation**

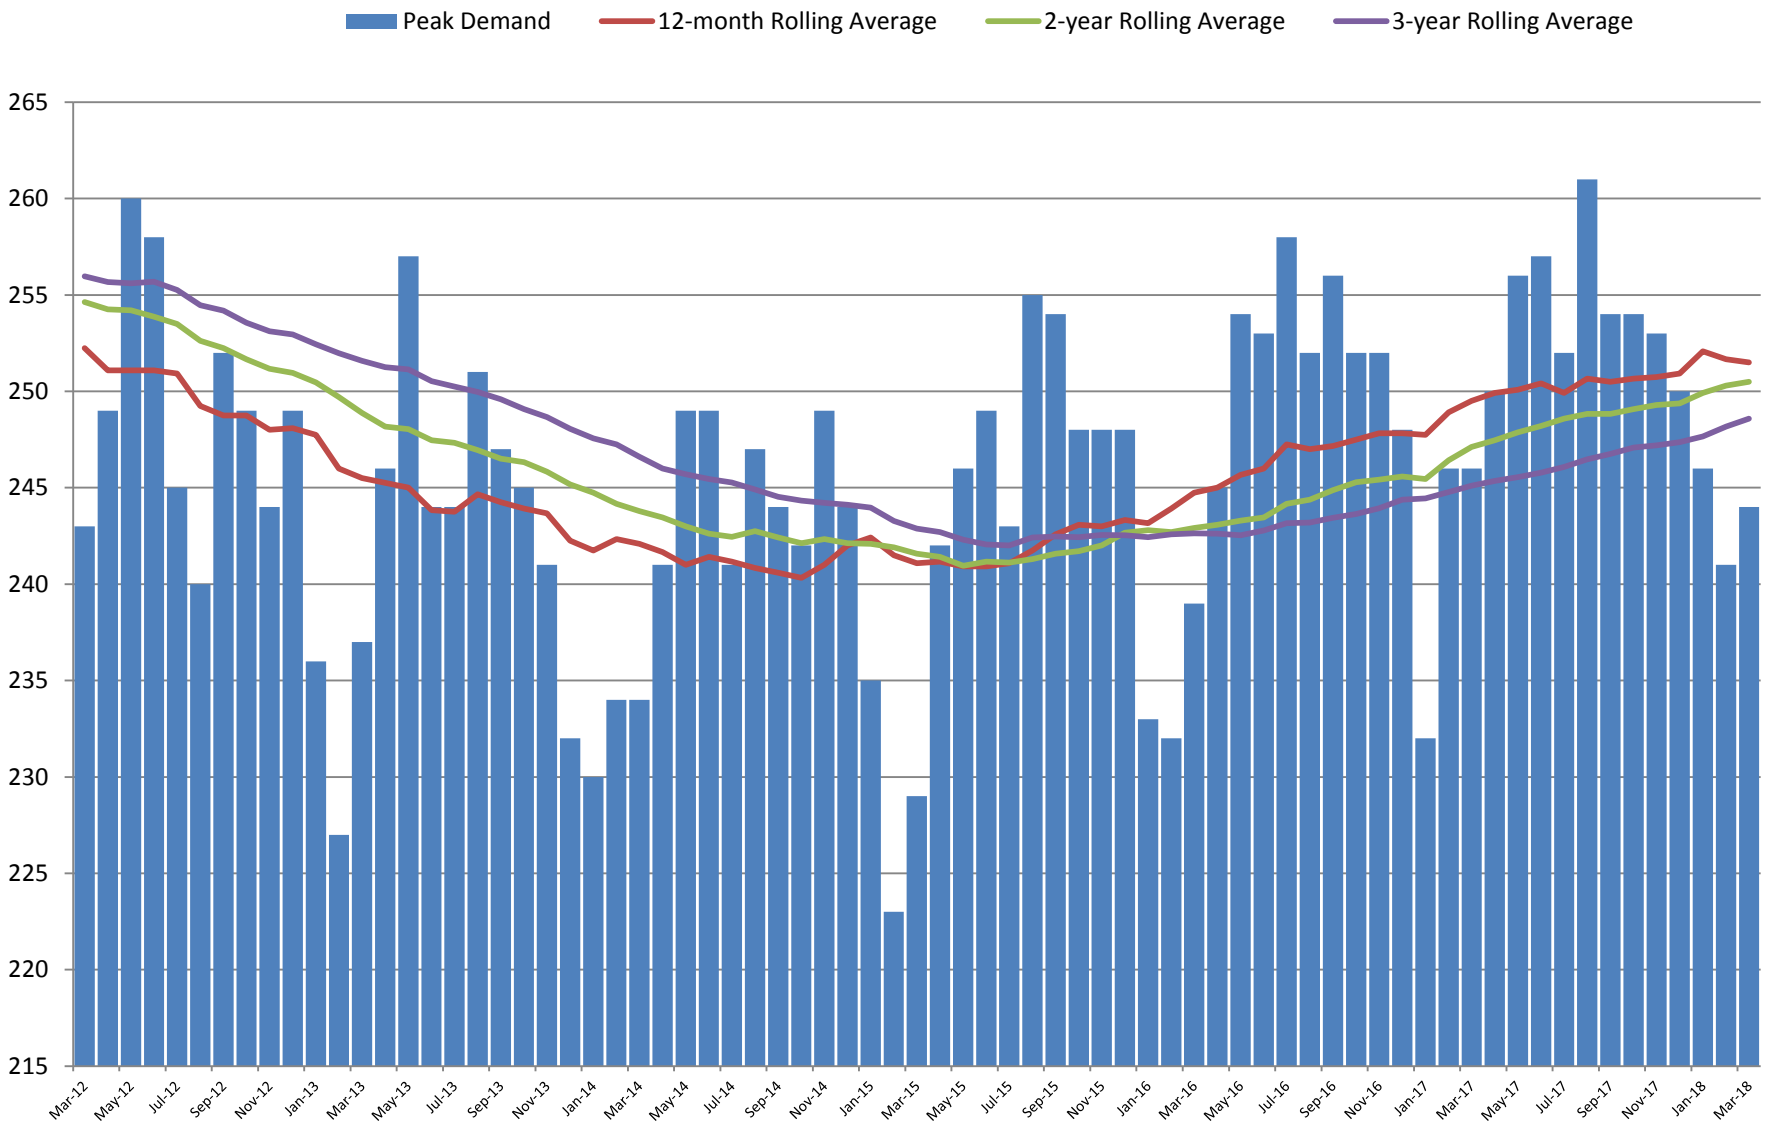
9. **New Power Plant Procurement:**

    - The rezoning of the land for the new power plant is still pending Legislative action. It seems Bill 223-34 would be brought up for deliberation at next week's session. The land rezoning is the critical path at this point for construction of the new power plant.
    - Multi-Step Bid Invitation No. 034-18 was opened on April 5, 2018. Eighteen (18) proponents submitted their technical and financial information. The evaluation team should have a short list of proponents which met the required financial and technical experience delineated in the bid by the end of April 2018. The short-listed proponents would be provided the technical specifications for them to prepare their technical and priced proposals over the next several months which is the next step of the process.

10. **Standard & Poor's Rating:** Our bond rating was not changed despite the situation of the Government of Guam. They did note that they will be monitoring negative Government impact on receivables which certainly will trigger a negative action.

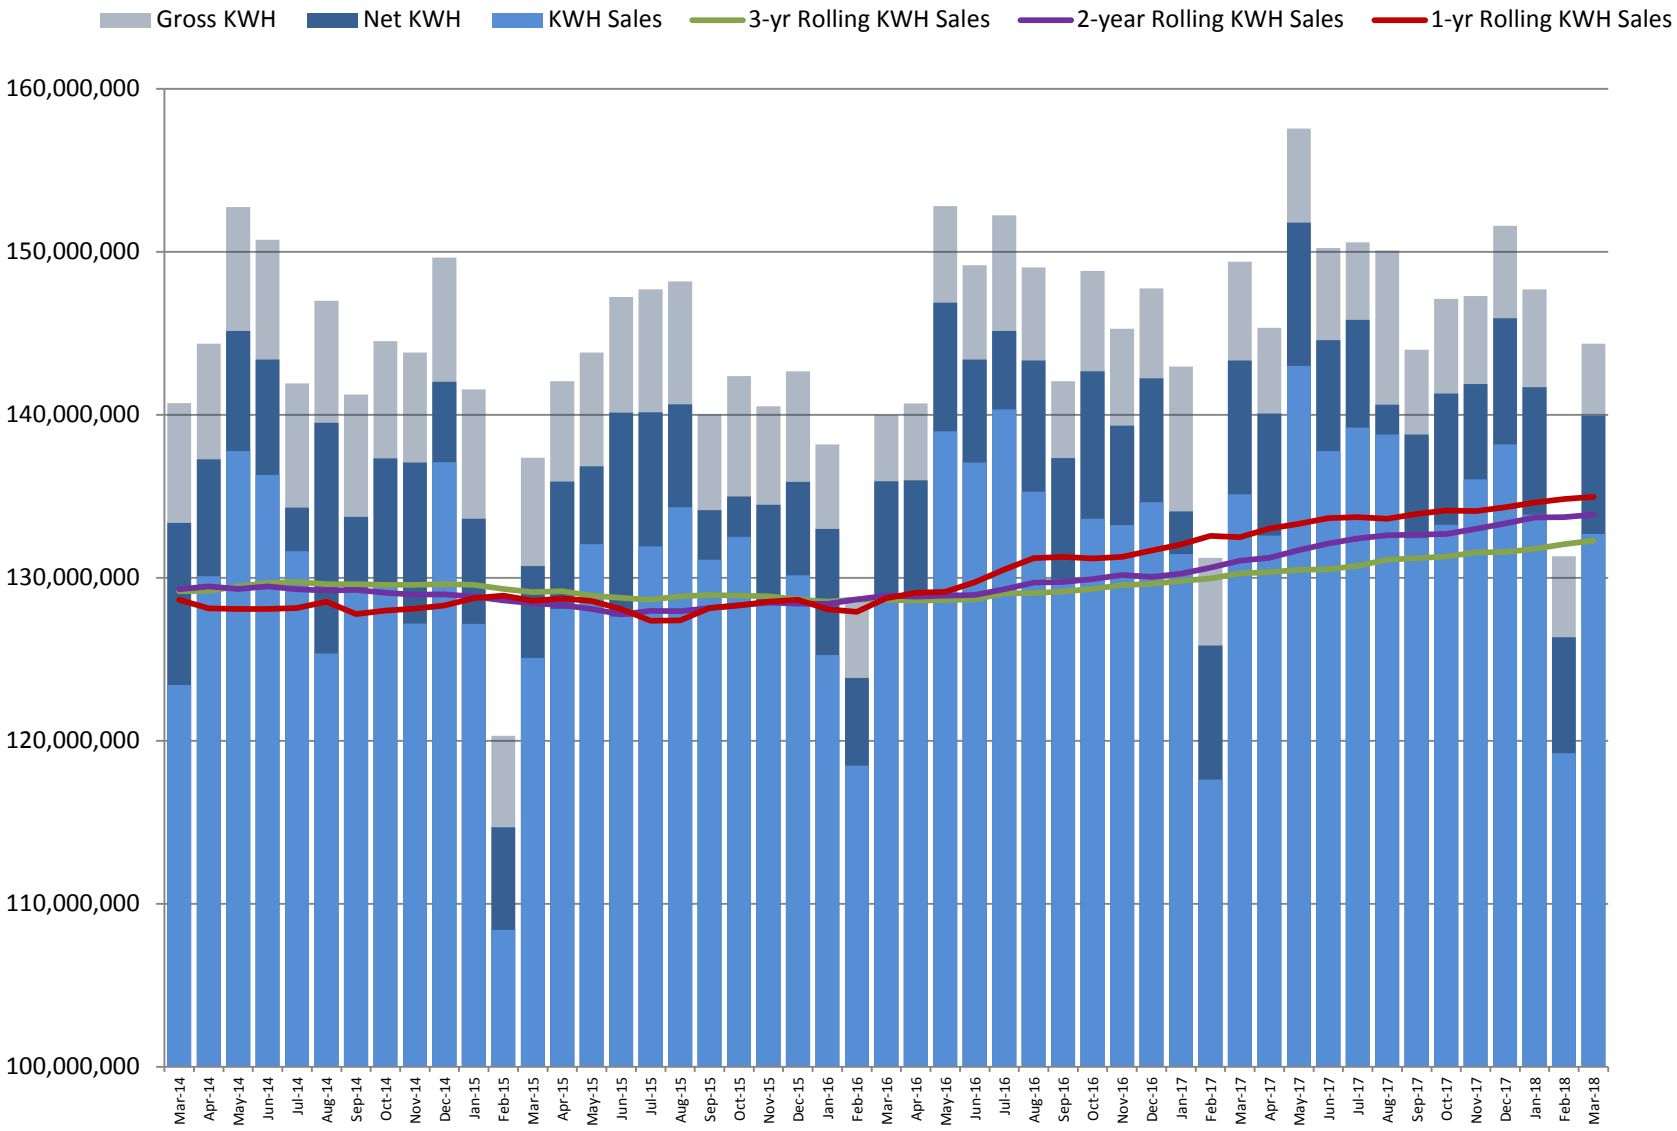
11. **GPA's 50th Anniversary Celebration:** The proclamation signing is scheduled for May 8, 2018 in the CCU conference room. The proclamation kicks off our 50th anniversary program.

12. **Energy Storage System (ESS) Commissioning:** The Hagatna 24 MW and Talofofo 16 MW ESS is on schedule for commissioning in August 2018. These batteries will significantly improve power quality in the system in addition to helping reduce short term outages cause by generating and renewable PV trips. There will also be a reduction in fuel operating cost resulting from not having to run combustion turbines to provide spinning reserves during daytime hours.



13. **Supervisory Control and Data Acquisition (SCADA) Commissioning:** The new SCADA system in Fadian is on track for commissioning in October 2018. The new system is the latest technology for the GPA power and GWA water and wastewater system. The factory testing of the system's major component is scheduled for early May in Taiwan.

14. **BEST SCHOOLS Program:** A kickoff meeting was held with GDOE Superintendent Jon Fernandez on April 2, 2018. The contract to conduct the evaluation of the GDOE schools has been signed. GPA should have the study and make its appropriate recommendations within the next 4 months.



15. **Key Performance Indicators:** The following are updated indicators thru March 2018. Sales continued to be strong. Fuel oil prices have risen but have been remaining in the $60 to $70 per bbl. range.

John M. Benavente, P.E.

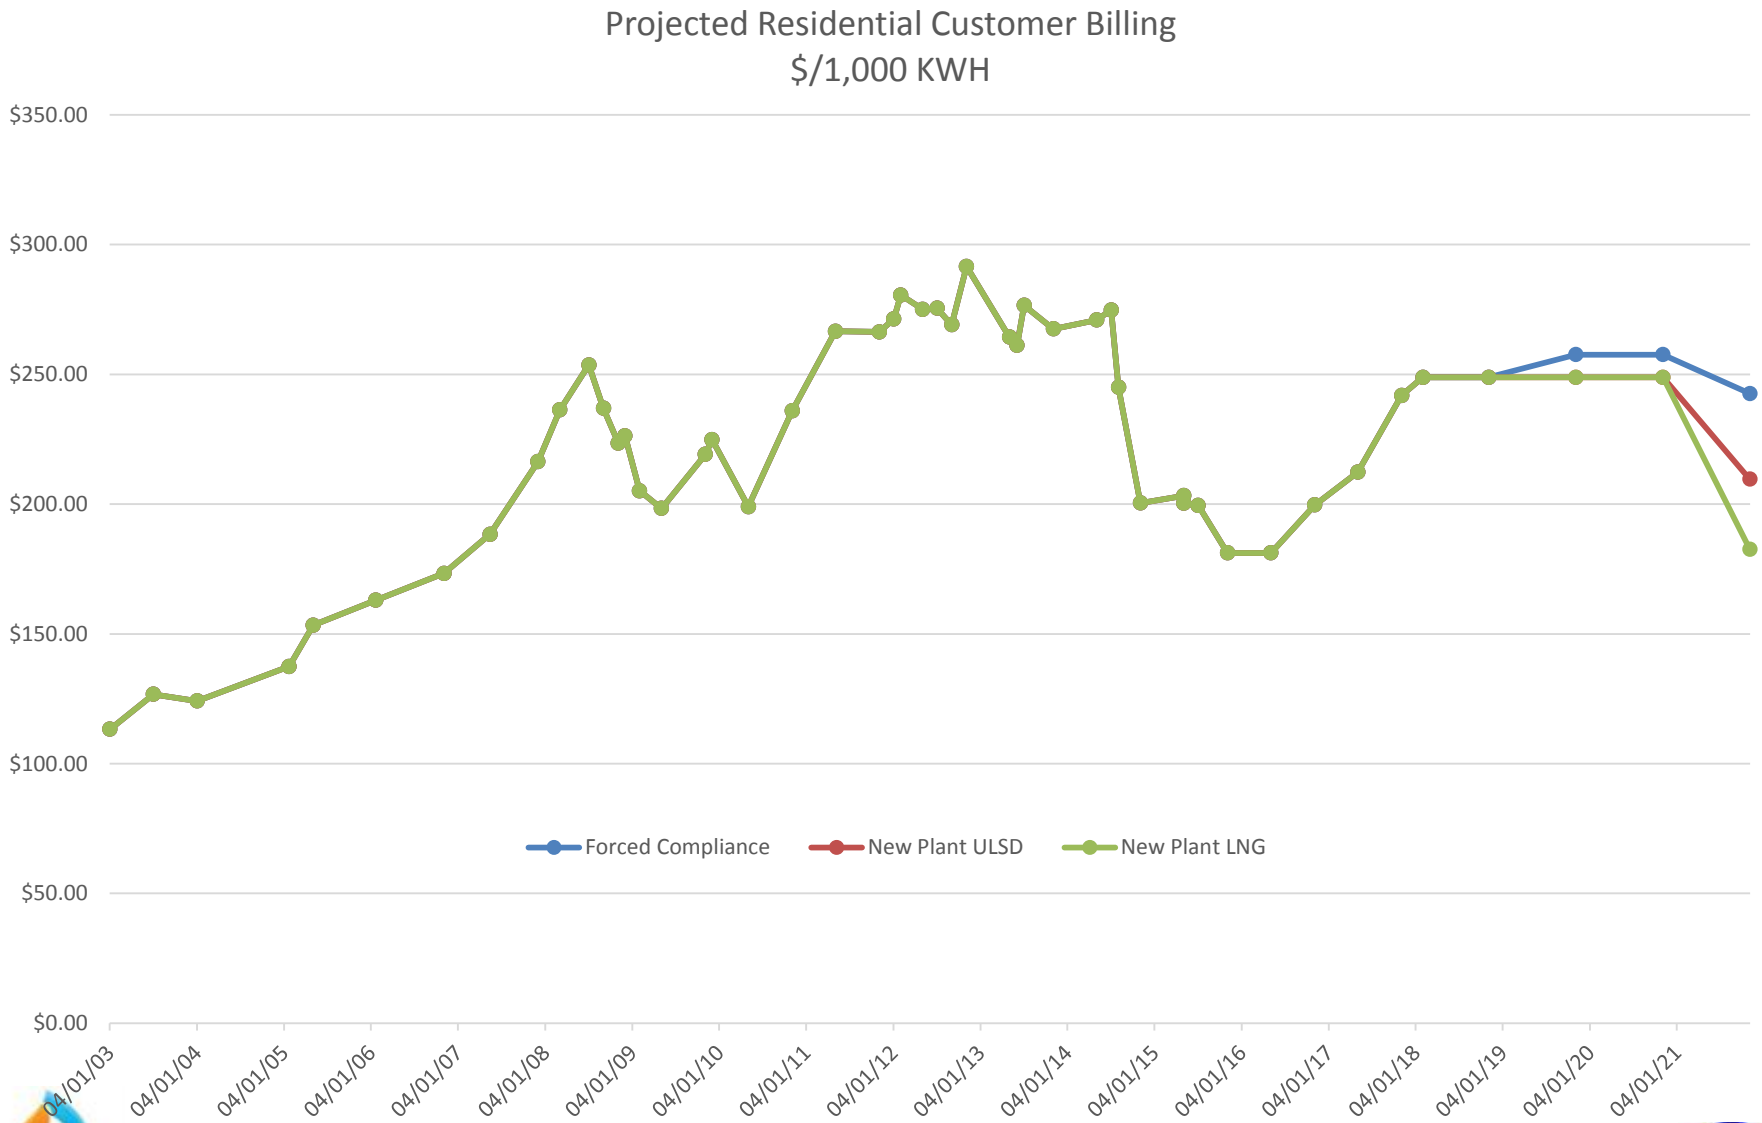
185 MW of Power Purchase Agreements (PPA)

Projected Commissioning NLT 2021



- Power Purchase agreement with KEPCO-LG-CNS Mangilao Solar, LLC for 60 MW of Solar PV, 25 Year contract at $0.0855/KWH with an annual escalator of 1 %.
- Power Purchase agreement with HANWHA for 60 MW of Solar PV, 25 Year contract at about $0.0825/KWH with an annual escalator of 1 %.
- Phase III Bid for 40 MW Solar PV on Navy Land for full load shifting, estimated at $0.12/KWH with an annual escalator of 1%

Cost and Savings Per Scenario

FY 2018 Fuel Oil Prices:
$65/Barrel - Residual Fuel Oil (RFO)
$85/Barrel - Ultra Low Sulfur Diesel (ULSD)
$58/Barrel – Natural Gas Price Equivalent

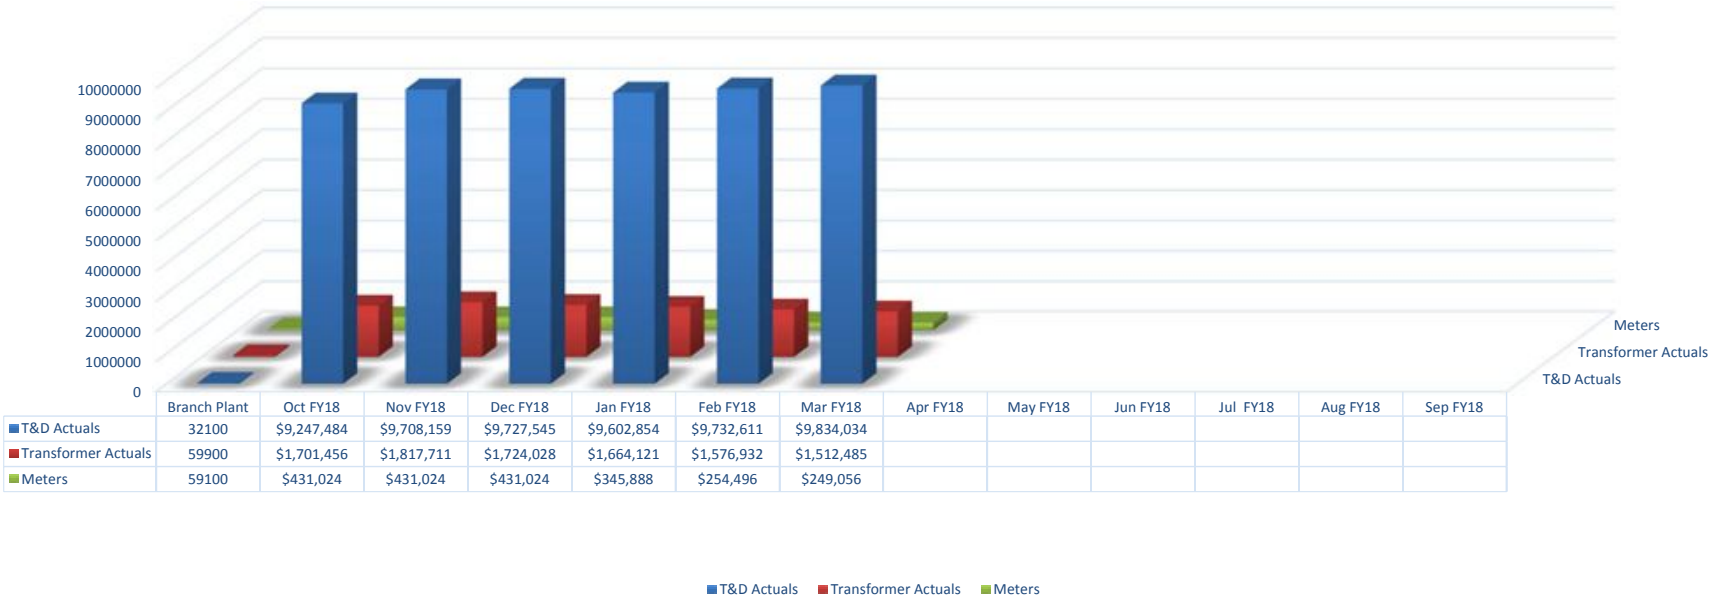
This table is provided to show that without a new power plant, GPA will not be able to meet load growth by 2022. Furthermore, as shown, because we lack adequate base load capacity, GPA's fuel related cost to provide additional energy to new customers will continue to drive its total energy cost higher because energy production would come from costlier less efficient standby units. The lack of new units which could work with intermittent renewables will result in limited solar PV additions into the grid thereby limiting cost saving opportunities.



Summary of System Generating Capacity With No New Baseload					**With New 180MW**
Description (MW)	**FY 2015**	**FY2017**	**FY2018**	**FY2021**	**FY2022**

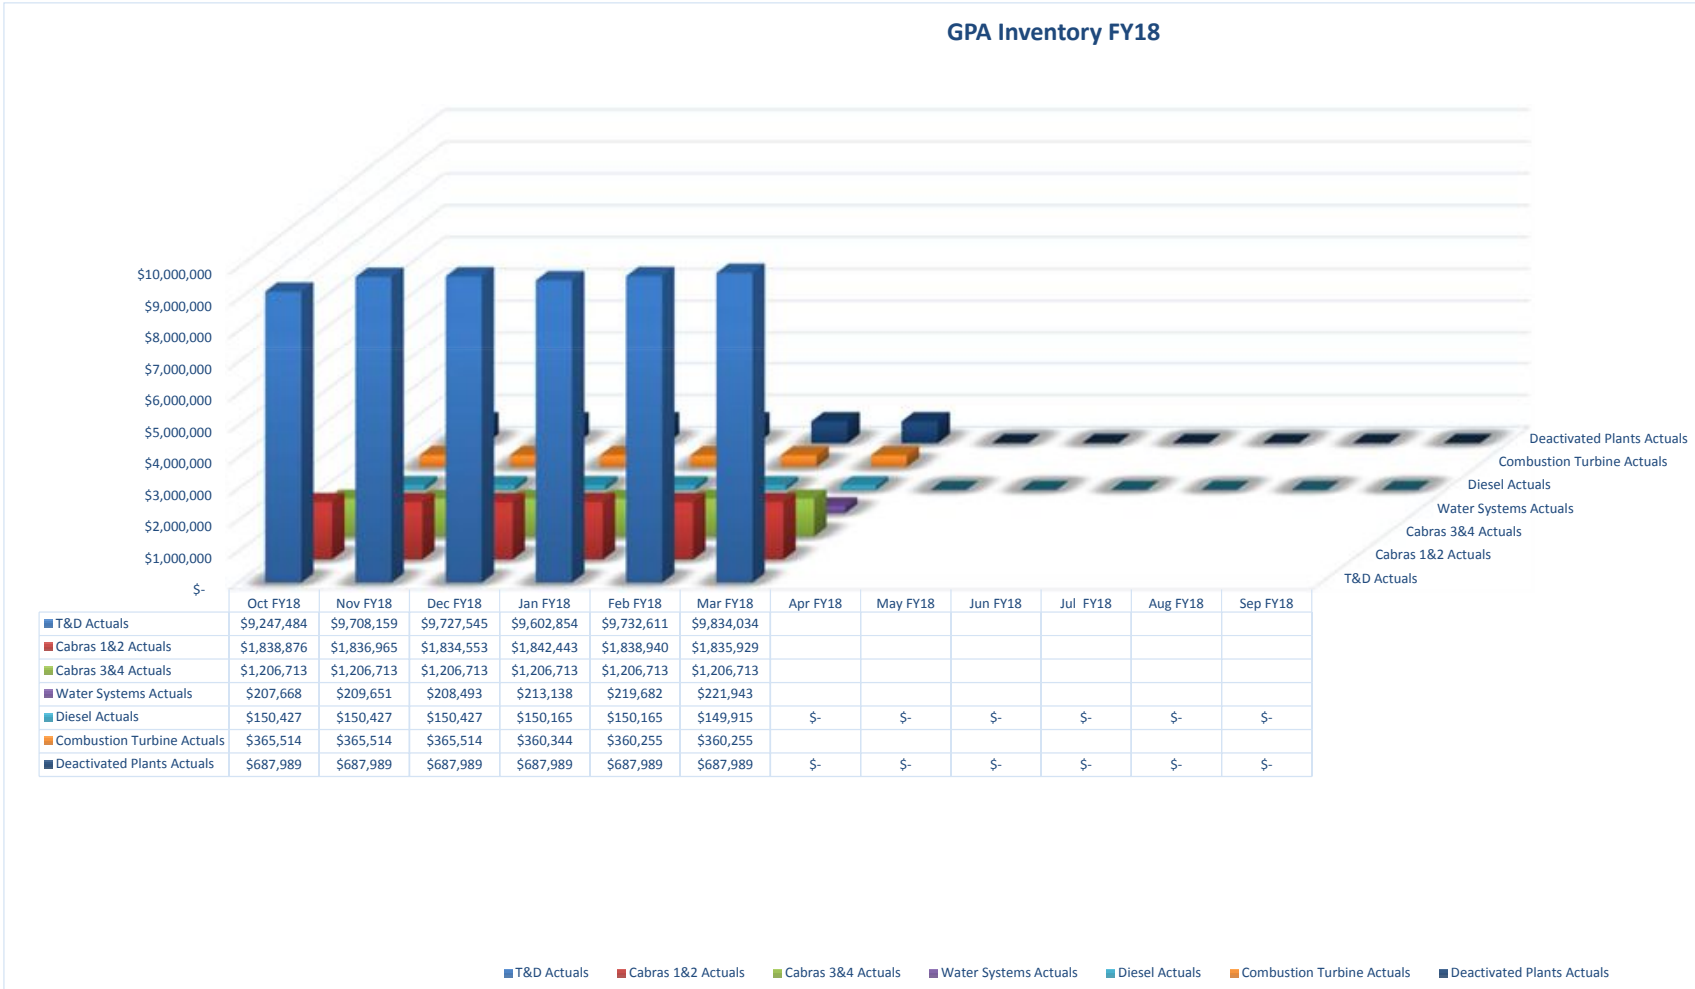
% Energy from Emergency/Peaker	2.0%	16.5%	16.5%	11.4%	1.0%

Summary



- GPA Approved to contract for 120 MW of Solar PV Renewables
- Phase III Renewables award later this year at estimated $0.12/kWh
- USEPA would most likely force compliance by converting existing units to ULSD within a 2 year timeframe if we don't contract for a new power plant soon. We will need to fund conversion in addition to experiencing higher LEAC cost.
- The highest monthly residential bill for the average 1,000 KWH consumer has been about $291. Our near term plans could drop bill as low as $182.
- GPA plants are aged and the Cabras units are constantly having boiler tube leaks. We will need to spent millions to keep units running.
- GPA needs new base load units to provide reliable and low cost energy.
- GPA needs new fast reacting flexible generation units in order to incorporate low cost renewable energy to hedge against rising fuel cost.

Government Accounts Receivable: CSD reports invoices for the month of Feb 2018, for 73 active government accounts with an overall total of $4,704,401.42. 69 accounts were current (95%), 4 accounts arrears (5%). 8 fax/emails issued to government accounts totaling $1,942,614.84. Feb 2018 invoices, 67 accounts paid in full.

CREDIT AND COLLECTION

Delinquent Ratio: As of March 2018 the authority reported a total 48,452 active customers. The "Delinquent Ratio" was recorded at 7.57% with 3,668 total delinquent accounts, total arrears of 2,403,260.01; 1,736,806.52; 3,639 (7.51% / 28-45 days) category; 263,332.95; 308 (0.64%/ 46-60 days); and 36,193.08; 47 (0.10% / Over 90 days).

Bankruptcy: During Mar 2018 the Bankruptcy reports seven (7) customer accounts filed, totaling $1,205.46. Chapter 7, six (6) $1,043.26; Chapter 13, one (1) $162.20.

Damage Claim: The Damage claim committee received one (1) Damage claim at $350.00 for the month of Mar 2018.

COMMAND CENTER

Meter Changed Outs: For the month of Mar 2018, there were a total of forty-four (44) meters changed outs due to defective meter non-communicating.

ACTIVE DELINQUENT – NON PAYMENT

COMMAND CENTER /DISCONNECTIONS/RECONNECTIONS/

Single Phase Meters: Credit and Collection issued orders to Command Center to perform remote disconnect/reconnect for a total of 1,192 customers; 549(46%) were disconnected; 635(53%) deferred; 8(1%) incompletes.

3 Phase Meters: Credit and Collection issued orders to Disconnect Reconnect crew to perform truck roll out disconnect/reconnect for a total of 26 customers; 2(8%) were disconnected; 21(81%) deferred; 3(11%) incompletes.

Engineering Capital Improvement Projects

Submitted herewith are the January to March 2018 Progress and Compliance Reports for the following projects:

	Project Name	Engineering Section
1	Distribution System Improvements	Distribution
2	Tumon Bay Lateral Underground Conversion	Distribution
3	Line Reclosing and Load Profiling	Distribution
4	Distribution System Improvements II	Distribution
5	Fire Protection Upgrades at Power Plants	Project Management
6	GPA-GWA Multi-Purpose Facility (Fadian)	Project Management
7	Dededo Combustion Turbine Return to Service	Project Management
8	Facilities Physical Security	Project Management
9	Macheche Combustion Turbine Return to Service	Project Management
10	Yigo Combustion Turbine Return to Service	Project Management
11	Remote Start Capability of Generation Peaking Units	Project Mangement
12	Generator Protection Upgrade with Fault Recorders	Substation/Transmission
13	Piti 115 kV GIS Major Maintenance	Substation/Transmission
14	Substation Major Refurbishment - Power Transformer	Substation/Transmission
15	Agat Shoreline Pole Restoration Project	Substation/Transmission
16	System Protection Improvement & Capacitor Bank Controllers	Substation/Transmission
17	Dededo Substation Capacitor Bank	Substation/Transmission
18	Network Communications - Fiber to Fadian Complex	Substation/Transmission

SPORD (FJI)	RENEWABLES	Phase II - KEPCO/LG CNS	2/27/18 (2018-04)	PENDING	10/1/2020	9/25/2045	Final start dates pending. Also pending contract signing date ~ mid May 2018

ONGOING PROCUREMENT

Responsible	PROJECT	Description	Bid or RFP	Bid/RFP No	Announced	Bid Opening / Due	Notes
SPORD (RAC)	SCADA	SCADA Workstations	Bid	GPA-049-18	2/13/2018	3/14/2018	Award Recommendation memo for approval submitted 3/27/2018. Delivery May 2018
SPORD (FJI)	NEW POWER PLANT	Geotechnical Services	RFP	Resolicitation GPA-RFP-18-002	(2/6/2018) 3/20/18	4/20/2018	Bid resolicited due to no proposals received in original solicitation.
SPORD (RAC)	SMART GRID	MV90 Integration Services	RFP	GPA-RFP-18-001	1/30/2018	3/6/2018	(Evaluation Completed - Approval Memo for award submitted - 3/30/2018)
SPORD (RAC)	PLANNING	Milsoft Systems Software Services	RFP	GPA-RFP-18-003	2/1/2018	3/7/2018	(Evaluation Completed - Approval Memo for award submitted - 3/28/2018)
SPORD (ANF)	FUEL	Petroleum Inspection Services	MS Bid	GPA-014-18	1/30/2018	5/2/2018	Step 2 - Price bid
SPORD (FJI)	NEW POWER PLANT	Build, Operate & Transfer Contract for 120-180MW of New Generation Capacity. **(PHASE I - REQUEST FOR QUALIFICATIONS)**	MS Bid	GPA-034-18	1/16/2018	4/5/2018	Step I - Closing of Qualifications. (18 proposals recevied on 4/5/18)

ONGOING PROCUREMENT (continued)

SPORD (ANF)	FUEL	Supply of Residual Fuel Oil No. 6	MS Bid	GPA-009-18	11/16/2017	4/13/2018	04/04/2018- Finance revised insurance requirements. Phase I- Closing of Technical Proposal to be extended.
SPORD (ANF)	FUEL	Supply of Diesel Fuel Oil No. 2	MS Bid	GPA-008-18	11/16/2017	4/20/2018	Bid specs changed to include delivery-awaiting final review by Fuel Committee and Legal. Phase I- Closing of Technical Proposal to be extended.
SPORD (JTL)	RENEWABLES	Renewable Energy Resource Phase III	MS Bid	GPA-007-18	11/16/2017	4/17/2018	Step I - Closing of Technical Proposal
SPORD (RAC)	SMART GRID	Mobile Workforce Management System (MWMS) **RE-BID**	MS Bid	GPA-023-17	10/5/2017	3/20/2018	(Evaluation Completed - Approval Memo for award submitted - 3/21/2018)
ENGINEERING	FUEL	GPA Tank Farm RFO Pipeline Upgrade - Design / Build	Bid	GPA-047-18	2/8/2018	9/30/2018	To repair existing RFO lines at the Bulk Fuel Farm

DEVELOPING PROCUREMENT

Responsible	PROJECT	Description	Bid or RFP	CCU Meeting	Projected Start	Projected Completion	Status
SPORD (MAT)	IPP Contract	Piti #8&9 IPP Contract	MS Bid				PENDING. Extension of current ECA aproved by CCU and will be filed to PUC for approval; bid document preparation for a new contract (after extension period or in case Extension is disapproved) in-progress.
SPORD (FJI)	NEW POWER PLANT	Build, Operate & Transfer Contract for 120-180MW of New Generation Capacity. **(PHASE II - TECHNICAL SPECIFICATIONS)**	MS Bid				Pending final bid documents.
ENGINEERING	FUEL	GPA Tank Farm DFO Pipeline Upgrade - Design / Build	Bid		2/8/2018	11/30/2018	Preparation of bid specs in progress. To install new diesel line from Navy Tie-in to the Bulk Fuel Tanks and replace diesel line to TEMES CT
ENGINEERING	FUEL	Tank 1935 API 653 Internal Inspection	Bid		5/1/2018	5/31/2019	Preparation of bid specs in progress. Budgetted for FY 2018.
SPORD (RAC)	ELECTRIC VEHICLE	Electric Vehicle Charging Stations	Bid		May-18	Sep-18	
SPORD (RAC)	SMARTWORK SYSTEMS	Smartworks Systems Software Services	RFP		Jun-18	Continous	

Project Activities

No.	Project Description	March 2018 Activities	Status / Est. Completion	RFP/Bid No
1	Energy Storage System (Phase I)	Revised 100% design drawings to be submitted early April. Clearing and grading permit work commenced in November 2017. Foundation permit work commenced in January 2018. Construction is 26% completed.	September 2018	MS Bid GPA-082-15
2	Renewable Energy Resource Phase II	PUC ratifies KEPCO contract (Docket 18-06) and approves HANWHA contract (Docket 18-08) on March 29, 2018.	KEPCO PV plant COD is APR 2021. Hanwha's COD is anticipated for 1st qtr of 2020.	MS Bid GPA-070-16
3	New Power Plant Bid (EPCM)	Request for Qualification announced on January 16, 2018. Proposals deadline extended to April 5, 2018 due to questions and clarificaitons. Technical specifications are being reviewed and updated based on public hearings and technology neutral requirements.	Jan 2018 (Issue RFP Step 1 Solicitation) Apr 2018 (	MS GPA-034-18
4	DSM Marketing	Supported the 2018UOG Sustainability Conference at the Hyatt.	Continuous	
5	DSM Rebate Program	Processed over 540 equipment in applications for rebates totaling ~ $117K	Continuous	
6	Wireless Network Expansion	Commenced Southern Expansion in collaboration with GWA: 30% Assessment of GWA Well Locations: Completed Assessment of Existing Tropos Units: 100% Router Equiqment and Accessories purchase	Dec-18 Completed Completed Arrival - April 30th	 GPA-019-18
7	Performance Metrics Automation Project	Presentation on iDashboard provided to GM. GPA contiues to work with consultant on automating reports and formating.	Mar-18	
8	Electric Grid Analysis Software	Additional training for users Training on Planning and Analysis Cases	Completed Jun-18	GPA-064-16
9	Services to Develop Business Performance Indices using iDashboards	Dashboard builds 95%	Ongoing	GPA-RFP-16-008
10	Supervisory Control and Data Acquisition (SCADA) System	Change Order Approved for October 2018 Completion and hardware costs Equipment on Order Factory Acceptance Test	Oct 2018 (SCADA COD) May 2018 (Factory Acceptance Test)	GPA-066-16

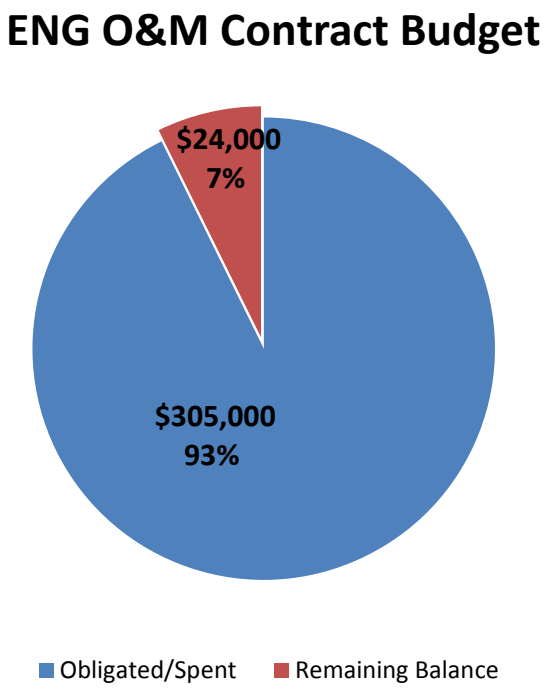
Project Activities

No.	Project Description	March 2018 Activities	Status / Est. Completion
11	Mobile Workforce Management System	Bid Evaluation Completed, Clevest recommendation memo submitted for approval March 21, 2018	May 2018 (Bid Award)
12	Consulting Services for Smart Grid Analytics Enabled Distribution System Planning, Technical, and Economic Feasibility Studies	RFP evaluation completed for sole bidder. Bidder did not qualifiy. Committee recommendation to rebid. Sole-bidder Acknowledgement.	April 30, 2018 (Rebid)
13	TEMES Piti # 7 ECA Expiration & Transition to GPA	Transition completed. Environmental Assessment Report completed. Condition Assessment Report completed by LEIDOS, under GPA review.	[Completed] [Completed] [Completed, under review]
14	MEC Piti &8 and #9 - ECA Expiration	Environmental Assessment Report completed. Condition Assessment due 2nd week of April. Data Compilation in progress.	[Completed] April 2018 December 2018
15	Planning Software Administration/Maintenance	Upcoming tasks: Configuration and management of database, training for - Call-off Consulting for CapEx configuration, CapEx and PO runs for IRP - Configuration and management of DB; Training for SPORD and PSCC	Start Date: Oct 2017 Completion Date: Sept 2018
16	Generation Software (GADS open software)	Pending data entry from Generation & SPORD.	[On-going work]
17	IFB for ULSD Supply for Baseloads and Peaking Units	Solicitation in progress. Bid package revised to include delivery requirements.	Start Date: Nov 2017 Est. completion: FY2018
18	Contract for Lease of Bulk ULSD Storage	196KB tank repairs completed	27-Feb-18
19	EV Infrastructure	Developing fast charge station scope for Mangilao offices.	Sept 2018
20	Consulting Support, new procurements for Piti 7,8,9	Piti 7 - Management Contract (under Generation) awarded. No IPP bid. Piti 8&9 - Bid documents in progress, awaiting decision on Extension of ECA. If extended - will revise bid scope accordingly; if extension disapproved, will proceed with filing for approval of Bid.	[Commenced] Bid documents completion: March 2018 Bid Process Start Date: 2nd quarter of 2018 upon CCU/PUC approval

Project Activities

No.	Project Description	March 2018 Activities	Status / Est. Completion
21	Fuel Conversion Plan	Discussions on-going.	Start: October 2017 Completion: June 2018
22	Fuel Bulk Storage Facility Assessment	Draft report submitted, under GPA review.	Start: Sept 2017 End: January 2018
23	Design and Engineering Consulting for Remote Start of GPA Plants	c/o Engineering Project Mgt	August 2018
24	Renewable Energy Resource Phase III	Completed pre-bid conference and site visits January 23-24 2018.	(Mar 2018) Tech Proposal Due
25	Utility Energy Services Contract (UESC)	Kicked off discussions with UOG, Guam Energy Office, Dept. of Navy, and GPA team on project development and opportunities. Discusssed DSM Model House. UOG Campus Assessment, Discussion on Solar Rooftop on DOE campuses.	
26	IFB for Delivery Services for GPA Plants	Bid canceled. Requirements to be included in the ULSD Supply solicitation	IFB Canceled Feb 2018
27	IFB for RFO Supply to Baseload Plants	Solicitation in progress	Start: November 2017 Est. Completion: FY2018 Contract Start: Sep 1, 2018
28	IFB for Petroleum Inspection Services	Re-Solicitation in progress	Start: November 2017 Est. Completion: FY2018 Contract Start: Jun 01, 2018
29	RFO Storage Lease Agreement w/ Tristar	4-Year Lease extension approved by CCU. For PUC review and approval	Start: November 2017 Est. Completion: Mar 2018 Contract Start: Aug 1, 2018
30	GPA Fuel Farm RFO Pipeline Repair & Upgrade	c/o Engineering Project Mgt	Solicitation in progress
31	GPA Fuel Farm ULSD Pipeline Upgrade	c/o Engineering Project Mgt	Bid Specs Preparation in progress

Project Activities



No.	Project Description	March 2018 Activities	Status / Est. Completion
32	Tk 1934 & Tk1935 API 653 Internal Inspection	c/o Engineering Project Mgt	Bid Specs Preparation in progress
33	Milsoft Systems Software Services	Award Recommendation memo (Milsoft - Vendor) for approval submitted 3/28/2018	Continuous
34	MV90 Integration Services	Award Recommendation memo (Itron - Vendor) for approval submitted 3/30/2018	Dec-18
35	SCADA Workstations and Monitors	Award Recommendation memo for approval submitted 3/27/2018	May 2018 (Delivery)
36	Grant Proposal Development and Proposal Application Management Services	Solicitation process complete. Contract signed Feb. 20, 2018. Project activities commences following month	Feb 2018 (Contract signed)
37	Pipeline Lease Agreement w/ Tristar	4-Year Lease extension approved by CCU. For PUC did not approve and requested for clarification on Index referenced. (Docket 18-10)	Start: November 2017 Est. Completion: Mar 2018 Contract Start: Aug 1, 2018
38	Dock Use Agreement w/ Tristar	4-Year Extension approved by CCU. PUC approved on March 29, 2018 (Docket 18-10)	Start: November 2017 Est. Completion: Mar 2018 Contract Start: Aug 1, 2018

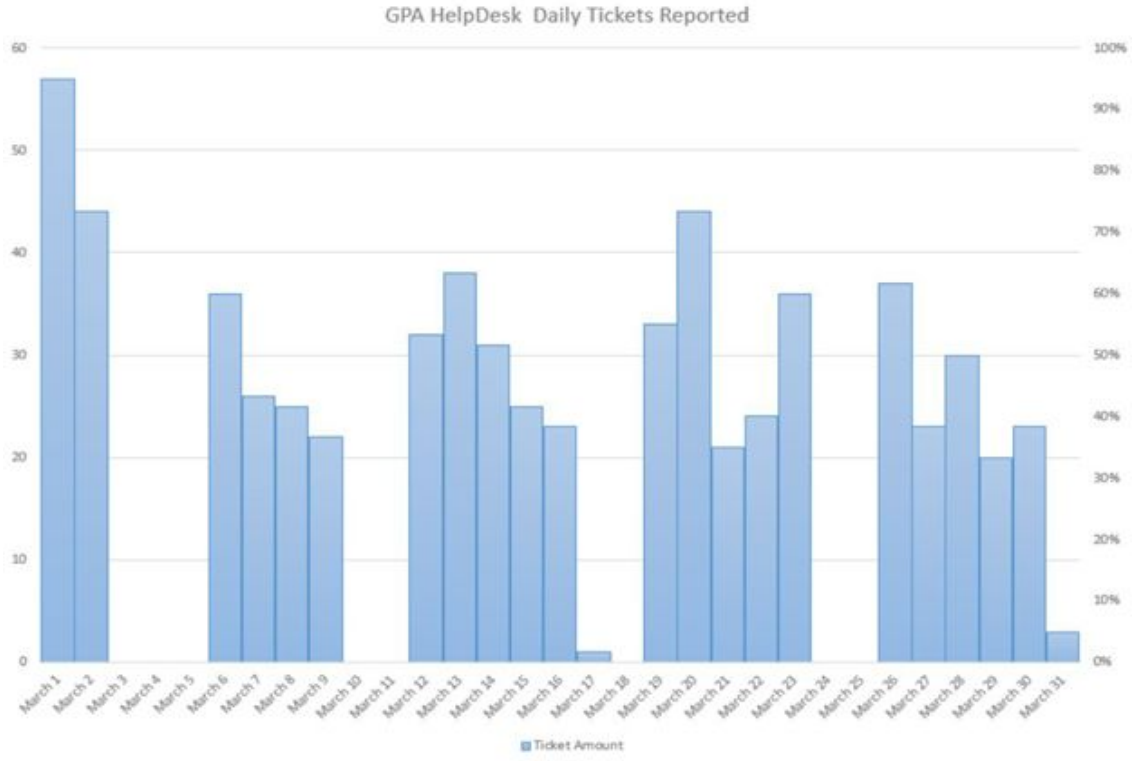
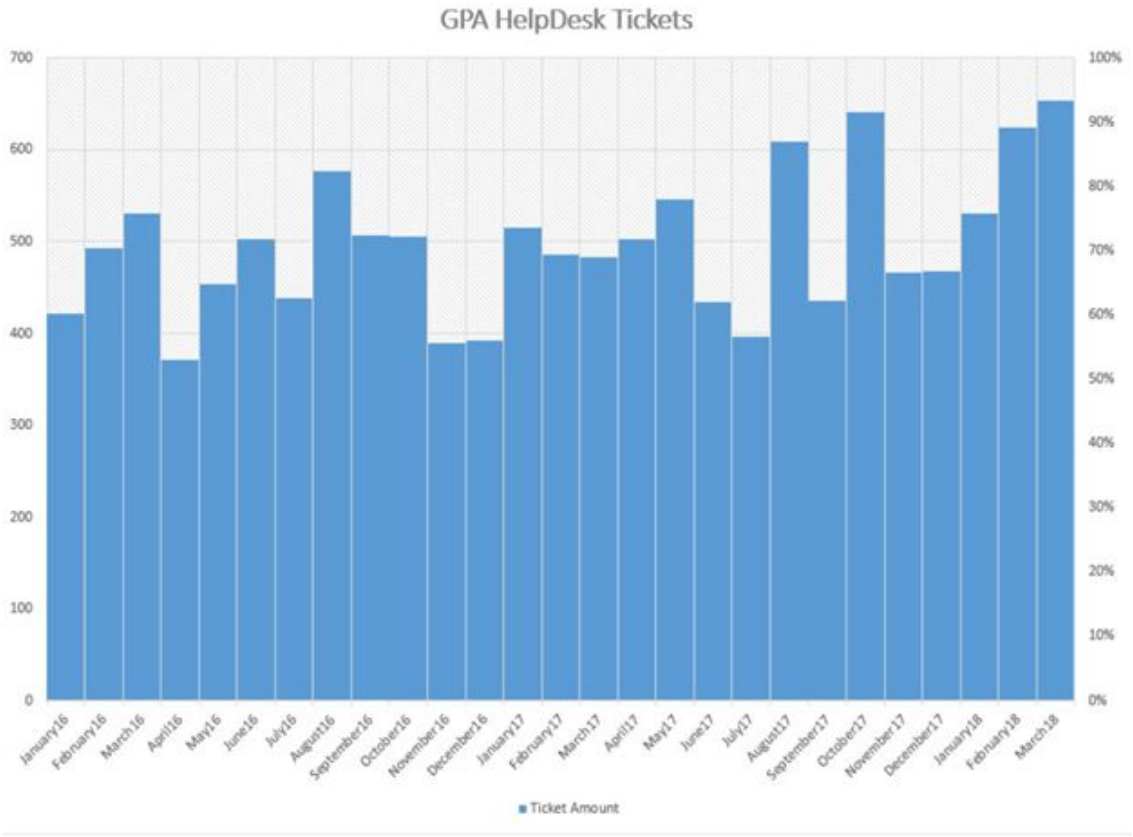
GPA INFORMATION TECHNOLOGY

MARCH 2018



SUMMARY:

The Information Technology Department continues to improve services, monitoring processes and system infrastructure utilization as guided by Cyber-Security initiatives and regulatory compliance. We strive and continue to improve all areas. Computer Services continues to seek new technology with networking, system access and utilization. We also strive to meet target levels of uptime, to include the IBM i-Series AS400, Virtual Machine environment, (VMware V-Sphere), (Blade Servers and Disk Array Storage), and Physical Servers, (non-Virtual Machines).

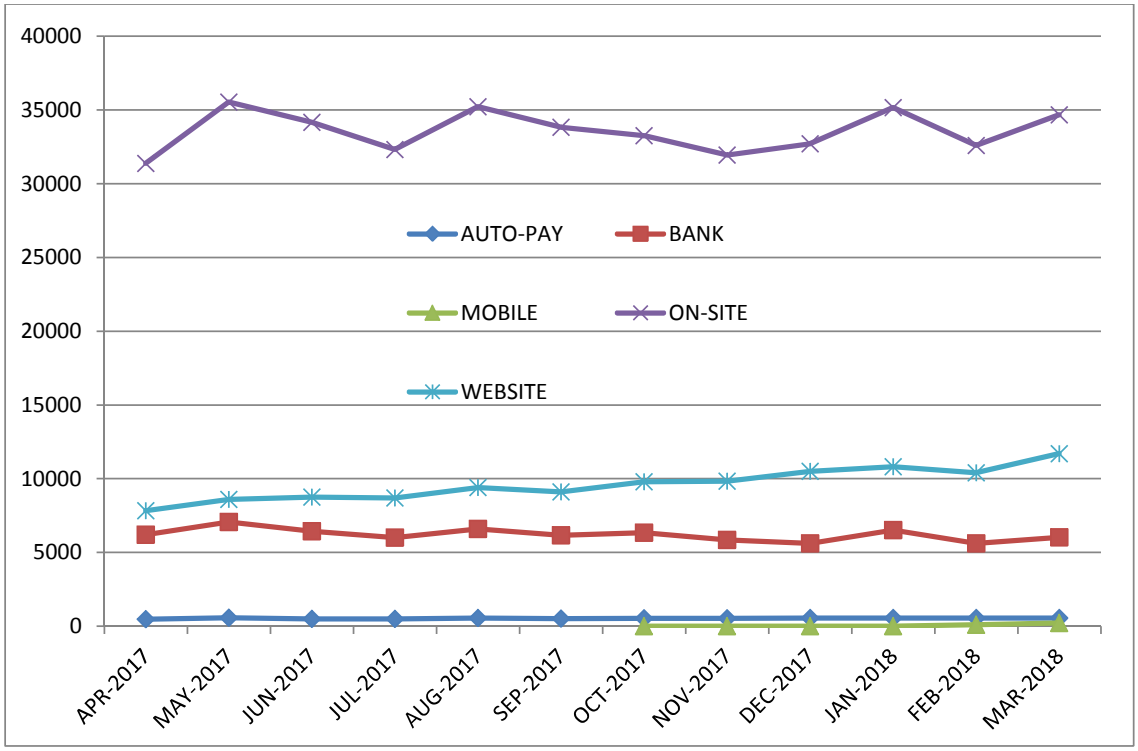


INCIDENT CALL SUMMARY:

The significance to record and utilize the Helpdesk Incident Handling Tool (ChangeGear) is to manage, track and measure workloads and assignments of customer reported IT incidents. The tracking of incidents is paramount. Measurements will be used for IT Customer Feedback survey in the future.

MARCH 2018 TICKETS

22 MONTH COMPARATIVE



For March 2018, Computer Services responded to 654 help desk calls from GPA internal and external customers. Breakdown as follows:

MAJOR APPLICATION ISSUES FOR March 2018

1. ORACLE CUSTOMER CARE & BILLING
   No system issue reported.

2. LANDIS & GYR AMI METERS (SMART METERS)
   No system issue reported.

3. ORACLE JDE
   No system issue reported.

4. METER DATA MANAGEMENT SYSTEM (MDMS)
   No system issue reported.

5. SHORETEL VOIP PHONE SYSTEM
   No system issue reported.

6. EMAIL EXCHANGE SERVER
   No system issue reported.

7. ONLINE PAYMENT SYSTEM (PAYGPA.COM)
   No system issue reported.

8. GEOGRAPHIC INFORMATION SYSTEM (GIS)
   No system issue reported.

9. MILSOFT OUTAGE MANAGEMENT SYSTEM (OMS)
   No system issue reported.

10. ADVANCED GRID ANALYTICS (AGA)
    No system issue reported.

11. ORACLE BUSINESS INTELLIGENCE REPORTING
    No system issue reported.

12. Mobile APP Payment Program
    No system issue reported.

ONGOING PROJECT UPDATES:

Network Penetration Testing and Vulnerability Assessment: Project to provide network testing and vulnerability assessment to benchmark GPA and GWA's network and host systems. This will also include IT Controls Systems testing and Business Impact Analysis for GPA and GWA critical IT systems. Work in currently ongoing and expected completion by April 2018.

SMS Emergency Outage Notification: Project to provide SMS text alerts for Emergency Outages notification for customers and emergency response agencies. Awaiting next steps from operations. In testing process at the moment with PSCC.

Pay by Phone Project: Working with vendor for Pay by Phone system to allow customers to call after hours and make automated payments to their GPA account. Changes to the call script and ongoing testing.

Customer Care & Billing (CC&B) Upgrade: Upgrade of the current Oracle CC&B program from version 2.4 to version 2.6. The current version of CC&B 2.4 will be end of life by Sept. 30, 2017 and support thereafter will be limited. Expected completion by September 2018.

Disaster Recovery- Cloud Solution: Project to turn up a backup site on the Oracle Cloud for GPWA's CC&B Application. The Oracle Cloud service has been provisioned and backup replication is online. Final testing of the Oracle Cloud backup is ongoing.

Disaster Recovery Site: Project to procure a Disaster Recovery (DR) site to provide redundancy for critical GPA applications and databases in case of disruption of the primary Fadian Data Center. Incorporating GWA requirements into proposal.

Physical Security: Project to provide additional surveillance monitoring for Fadian, T&D, Dededo CT and Transportation Warehouse. RFP has closed and bid evaluations in progress.

GPWA Website Upgrades: Project to revamp GPA and GWA websites for the following, GUAMPOWERAUTHORITY.COM, PAYGPA.COM, GUAMWETERWORKS.ORG and PAYGWA.COM. RFP has been released and will close on April 26, 2018. Expected to be completed in 160 days.

Oracle CHAT-BOT: Project to provide Oracle Chat Bot services to GPA's PAYGPA.COM, Mobile APP and Facebook Program. This will allow customers to utilize a CHAT program to make inquiries to frequently asked questions and inquiries on their account.

Landis & Gyr Command Center upgrade from ver. 6.5 to 7.2: Project to upgrade GPA AMI Smart Meter Program to the latest version of 7.2. This will allow new functionality for the Command Center and Smart Meter Integration.

Monthly Project Report

March 2018

Grow together and WIN

Unrestricted

Project Progression Summary

Factory Acceptance Test

This month was focused on addressing logistics for the upcoming Factory Acceptance Test in Taiwan scheduled for May 3rd through May 7th . The requirement to transport the FAT Attendees on different flights due to liability concerns were accomplished to include ground transport, hotel venue and daily meals.

GPA Datapoints

After a teleconference with the Siemens team and the GPA, revisions to GPA's data points were agreed to and GPA has been transmitting updated data points as they become available.

GWA SCADA Graphical Display Requirements

Benson Guam purchased a Schneider SCADA Pak 334e, same as currently deployed at several GWA stations. In working with Central Pacific Controls (Local Schneider representatives), as well as directly with Schneider Electric representatives, GWA's SCADA Pak particulars were cloned to Benson's unit. Coupled with the P&ID's submitted by GWA, Siemens Taiwan will utilize this to assist in building GWA's Graphical Displays.

Change Order #2 – Ugum Water Treatment Plant Assessment

Ugum WTP assessment has been submitted to GWA. Pending final decisions, Ugum WTP SCADA system upgrades are on the horizon.

Training Schedule

An inquiry was received in regard to the training schedule. Slide 10 of this presentation is provided.

FINANCIAL STATEMENT OVERVIEW
February 2018

Attached are the financial statements and supporting schedules for the month and fiscal year ended February 28, 2018.

Summary
The increase in net assets for the month ended was $0.5 million as compared to the anticipated net decrease of $1.3 million projected at the beginning of the year. The total kWh sales for the month were 1.99% less than projected and non-fuel revenues were $0.1 million more than the estimated amount. O & M expenses for the month were $5.2 million which was $1.3 million under our projections for the month. Other expenses for the month such as interest expense, IPP costs, (net of interest income and other income) totaled to $4.0 million, which was right in line with the projected amounts. There were no other significant departures from the budget during the period.

Analysis

Description	Previous Month	Current Month	Target
Quick Ratio	2.05	2.08	2
Days in Receivables	39	38	52
Days in Payables	25	19	30
LEAC (Over)/Under Recovery Balance -YTD	$16,775,982	$14,390,645	$16,146,466
T&D Losses	5.00%	4.92%	<7.00%
Debt Service Coverage	2.05	1.92	1.75
Long-term equity ratio	13%	13%	30 – 40%
Days in Cash	152	131	60

The Quick Ratio has been a challenge for GPA historically. However, over the last two fiscal years, the influx of cash has continued to improve this ratio. GPA has current obligations of approximately $66 million and approximately $136 million in cash and current receivables. Debt Service Coverage ratio is calculated using the methodology in use before the Fiscal Year 2002 change in accounting practice.

Financial Statement
February 2018
Significant Assumptions

The significant assumptions in the financial statements are as follows:

- Accrual cutoff procedures were performed at month end
- An inventory valuation is performed at year-end only
- Accounts Receivable includes accruals based on prior months' usage.

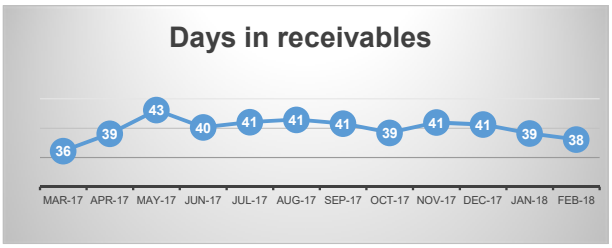
Net cash provided by investing activities	(443,559)	1,460,300
Cash flows from non-capital financing activities		
Interest paid on short term debt	(5,808)	(31,309)
Provision for self insurance funds	(516)	(2,868)
Net cash provided by noncapital financing activities	(6,324)	(34,177)
Cash flows from capital and related financing activities		
Acquisition of utility plant	(1,582,758)	(8,498,273)
Principal paid on bonds and other long-term debt	-	(3,550,000)
Interest paid on bonds(net of capitalized interest)	196,517	(15,158,442)
Interest paid on capital lease obligations	(284,850)	(1,584,115)
Interest & principal funds held by trustee	(2,552,837)	5,523,375
Reserve funds held by trustee	(22,127)	48,587
Bond funds held by trustee	636,006	3,581,112
Principal payment on capital lease obligations	(1,859,247)	(9,634,572)
Grant from DOI/FEMA	70,107	74,902
Debt issuance costs/loss on defeasance	(333,577)	19,876,558
Net cash provided by (used in) capital and related financing activities	(5,732,766)	(9,320,868)
Net (decrease) increase in cash and cash equivalents	(12,232,991.28)	(33,296,005)
Cash and cash equivalents, beginning	111,516,876	132,579,889
Cash and cash equivalents-Funds held by GPA, February 28, 2018	**$ 99,283,884**	**$ 99,283,884**



GUAM POWER AUTHORITY
(A COMPONENT UNIT OF THE GOVERNMENT OF GUAM)
Statements of Cash Flows, continued
Period Ended February 28, 2018

	Month Ended 2/28/2018	YTD Ended 2/28/2018
Reconciliation of operating earnings to net cash provided by operating activities:		
Operating earnings net of depreciation expense and excluding interest income	$3,251,778	$18,203,577
Adjustments to reconcile operating earnings to net cash provided by operating activities:		
Depreciation and amortization	2,893,871	16,132,990
Other expense	63,241	(2,389,068)
(Increase) decrease in assets:		
Accounts receivable	1,242,391	942,566
Materials and inventory	(130,220)	(813,498)
Fuel inventory	(6,861,269)	1,630,045
Prepaid expenses	367,808	(5,650,772)
Unamortized debt issuance cost	23,667	1,598,188
Deferred fuel revenue	2,385,337	2,360,403
Unamortized loss on debt refunding	229,166	(17,621,734)
Unamortized forward delivery contract costs	13,280	66,400
Increase (decrease) in liabilities:		
Accounts payable-operations	(7,000,838)	(35,633,619)
Accounts payable-others	(1,860,848)	(1,688,206)
Accrued payroll and employees' benefits	(334,427)	(293,551)
Net pension liability	(225,249)	(1,978,168)
Employees' annual leave	23,869	107,775
Customers deposits	(88,521)	(142,792)
Customer advances for construction	5,290	11,546
Unearned forward delivery contract revenue	(48,668)	(243,341)
Net cash provided by operating activities	**$ (6,050,342)**	**$ (25,401,259)**

GUAM POWER AUTHORITY WORK SESSION

CCU Conference Room
4:30 p.m., May 17, 2018

AGENDA (AMENDED)

1. **ISSUES FOR DECISION**
   - 1.1 Relative to Unarmed Security Guard Services / Resolution 2018- 1 0
2. **GM REPORT**
   - 2.1 Updates
3. **ISSUES FOR DISCUSSION**
   - 3.1 Organizational Realignment
   - 3.2 Levelized Energy Adjustment Clause (LEAC)
4. **DIVISION REPORTS**
   - 4.1 Administration: Customer Service, HR, Procurement, Safety
   - 4.2 Engineering & Technical: Engineering, IT, Planning & Regulatory, SPORD
   - 4.3 Finance Reports
   - 4.4 Operations: Facilities, Generation, PSCC, T&D, Transportation
   - 4.5 Public Information Office
5. **ANNOUNCEMENTS**
   - 5.1 Next Meeting: CCU Meeting – May 22, 2018
6. **ADJOURNMENT**

GUAM POWER AUTHORITY

Issues for Decision

Resolution No. 2018-10:

Relative to Unarmed Uniformed Security Guard Services

What is the project's objective and is it necessary and urgent?
The renewal of current contract is necessary and urgent in order to provide GPA with security guard services at various locations for the protection of GPA physical assets and employees.

Where is it at?
1) Supply Warehouse, Storage Yard and T&D Service Center
2) Gloria B. Nelson Public Service Facility
3) Cabras Power Plant and Dispatch Control Center Compound
4) Tanguisson Power Plant

How much will it cost?

Site		Monthly Cost
1)	Supply Warehouse, Storage Yard and T&D Service Center	$11,490.20
2)	Gloria B. Nelson Public Service Facility	$8,237.27
3)	Cabras Power Plant and Dispatch Control Center Compound	$11,490.20
4)	Tanguisson Power Plant	$11,490.20
	Monthly Total:	*$42,707.87*
	Total Additional Cost (4 months)	**$170,831.48**

Base Year	$512,494.44	CCU Resolution 2016-35
1st Year Option	$512,494.44	CCU Resolution 2016-35
Temporary Addition of Aggreko/Yigo CTs	$22,948.92	GM Authority
Final Option Year (4 mos)	$170,831.48	
Subtotal	*$1,218,769.28*	
2016-35 Approval	($1,024,988.88)	
Total Additional Funding	**$193,780.40**	

When will it be completed?

Base contract term:	06/01/16 – 09/30/16
	10/01/16 – 05/31/17
1st year option to renew term:	06/01/17 – 09/30/17
	10/01/17 – 05/31/18
2nd year option to renew term:	06/01/18 – 09/30/18

What is its funding source?
O&M Funds

The RFP/BID responses:
GPA-036-16: Pacific Island Security Agency (2nd year option to renew)

CONSOLIDATED COMMISSION ON UTILITIES
Guam Power Authority | Guam Waterworks Authority
P.O. Box 2977 Hagatna, Guam 96932 | (671)649-3002 | guamccu.org

Resolution No. 2018-10

RELATIVE TO AUTHORIZING THE GUAM POWER AUTHORITY TO CONTRACT FOR UNARMED UNIFORMED SECURITY GUARD SERVICES

WHEREAS, the Guam Power Authority utilizes unarmed security guard services to protect its assets, employees and customers during and after duty hours; and

WHEREAS, the Consolidated Commission on Utilities approved a $1,024,988.88 two-year contract through Resolution 2016-35 with Pacific Island Security Agency for unarmed uniformed security guard services at four (4) primary locations: Supply Warehouse, Storage Yard, and T&D Service Center; Gloria B. Nelson Public Service Facility; Cabras Power Plant and Dispatch Control Center Compound; and Tanguisson Power Plant from June 2016 to May 2018; and

WHEREAS, GPA assumed the security services of the Aggreko/Yigo Combustion Turbine Power Plant Compound in October 2017, and temporarily added this fifth (5^{th}) site to the existing contract from October 2017 to November 2017 through the General Manager's authority; and

WHEREAS, in October 2017, GPA initiated a separate planned procurement of the security services for the Aggreko/Yigo Combustion Turbine Power Plant Compound; and the Dededo Combustion Turbine Power Plant Compound and Piti Unit #7 in preparation to assume responsibility of security services commencing December 2017; and

WHEREAS, the Authority seeks to issue new comprehensive procurement for security services of the original four (4) sites and the additional three (3) sites on or about September 2018; and

WHEREAS, GPA exercised and completed the contract base and first year option and wishes to continue its second-year option to renew; and

WHEREAS, GPA seeks authorization to exercise a second and final renewal option at the cost of $170,831.48 for the term of June 2018 to September 2018 to continue services critical to the continuous safeguarding of its power generation assets**.**

NOW, THEREFORE, BE IT RESOLVED, by the CONSOLIDATED COMMISSION ON UTILITIES, the GOVERNING BODY of the GUAM POWER AUTHORITY as FOLLOWS:

1. After careful consideration, the Consolidated Commission on Utilities finds that the contracting for security for GPA properties is reasonable, prudent, and necessary.

2. The General Manager of the Guam Power Authority is hereby authorized to exercise a second and final renewal contract option for unarmed security services for a term beginning June 1, 2018 through September 30, 2018 at the additional cost of $170,831.48, with a total contract value of $1,218,769.28.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

DULY AND REGULARLY ADOPTED AND APPROVED THIS 22th DAY OF MAY 2018.

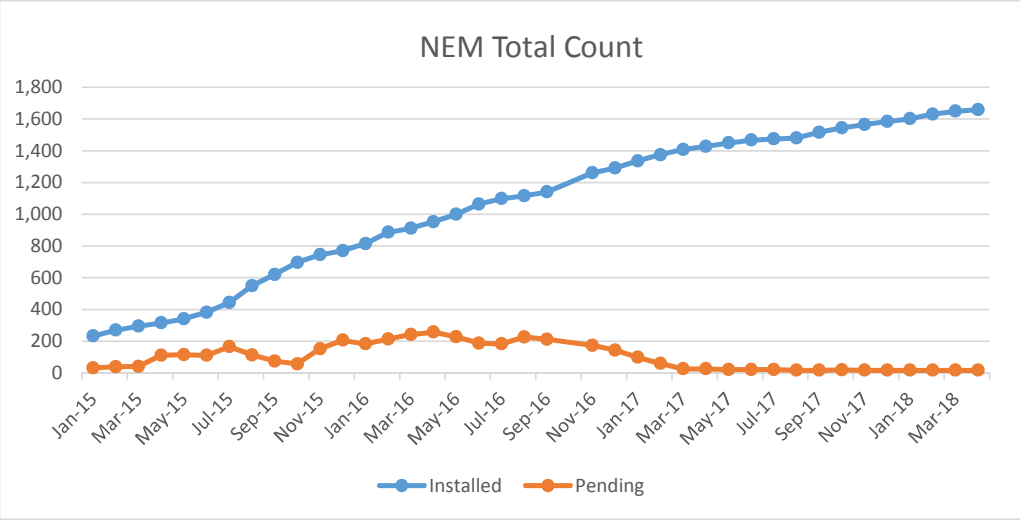
TO: **Consolidated Commission on Utilities**

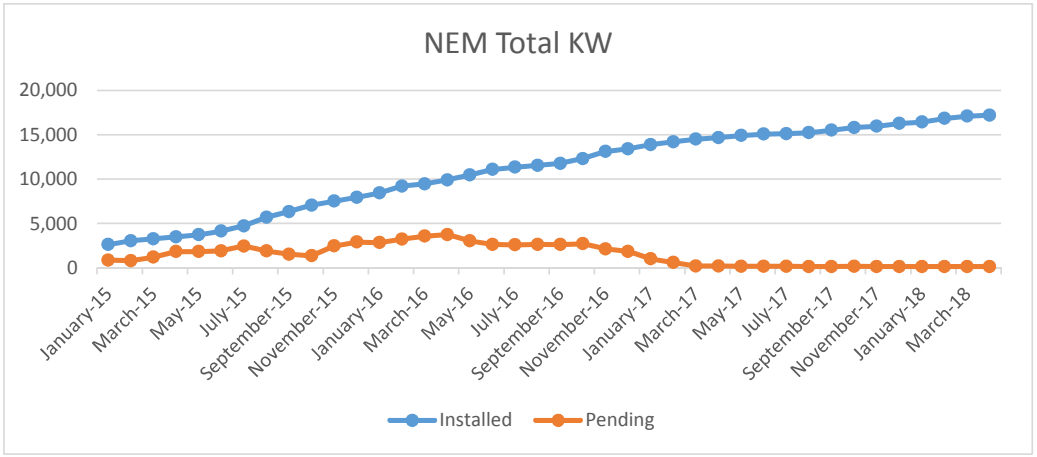
FROM: **General Manager**

DATE: **May 17, 2018**

SUBJECT: **General Manager's Report**



1. **Generation System Update:** The following summarizes the expected generation capacity situation for June 2018. The peak demand for June is projected to be 255 MW. GPA is scheduling the chemical cleaning of the Cabras 1 steam boiler for the end of May. The system is now heading into the higher peak months of the summer. Last year, the peak demand was 261 MW on August 1st, 2017. It is anticipated peak demand for CY 2018 may be 265MW. It appears the Demand Side Management program is having some impact in slowing the system growth in peak demand.



June 2018 Projected Capacity:	**385 MW**
June 2018 Projected Demand	**255 MW**
Projected Reserve Margin	**130 MW**

3. Renewable Energy Production Summary Thru April 2018:

Energy Production Source:	Kwh	Oil Barrels Avoided	Fuel Cost Avoided
NRG Total Production beginning Oct 2015	124,386,711	207,977	$11,438,719
Net Metering Estimated Production beginning Jan 2015	61,981,993	103,635	$5,699,922
Wind Power Production beginning Jan 2016	927,422	1,551	$85,287
Renewables Total:	**187,296,126**	**313,162**	**$17,223,928**

4. Demand Side Management (DSM) Program Expenses Thru April 2018.

All Expenses – Fiscal Year

Description	FY16	FY17	FY18 as of April 30	Total to Date
Labor	$11,348.80	$22,256.00	$11,005.25	$44,610.05
Contracts	$28,278.50	$73,010.05	$2,885.00	$104,173.55
Bank Fees	$155.00	$1,032.06	$230.00	$1,417.06
Paid Rebates-Split AC	$154,700.00	$557,275.00	$649,875.00	$1,361,850.00
Paid Rebates-Central AC	$3,400.00	$8,200.00	$1,300.00	$12,900.00
Paid Rebates-Washer/Dryer	$2,800.00	$7,425.00	$8,600.00	$18,825.00
Total Expenses	$200,682.30	$669,198.11	$673,895.25	$1,543,775.66

SUMMARY

DESCRIPTION	AMOUNT
Initial DSM Budget FY'16	$1,806,014.00
Interest Income as of Apr 18	$3,900.94
Total Expense	$1,543,775.66
Ending Balance as of Apr 18	$266,139.28
Addtl. Budget: Approved (FY'18)	$1,139,189.00
Total Ending Balance as of Apr 18:	**$1,405,328.28**

5. **Net Metering Customer Credit Recommendation:** GPA will complete its analysis and recommendation as to what credit and cost should be applied to net metering energy customers. GPA will provide its recommendation at the June 6, 2018 CCU regular meeting. Once the CCU approves a policy, GPA could petition the PUC for their approval.

6. **Phase II Renewables:** The Signing of the power purchase agreement with KEPCO/LGCNS is tentatively scheduled for May 31st at 9am here at Fadian. We will send out invitations to the CCU.

7. **Phase III Renewables Bid**: The bid has been issued. The bid request is for about 40MW of solar PV renewables to be constructed on Navy leased land. The technical proposals are due on June 19, 2018. The opening date of prices of acceptable technical proposals has been set for August 1, 2018.

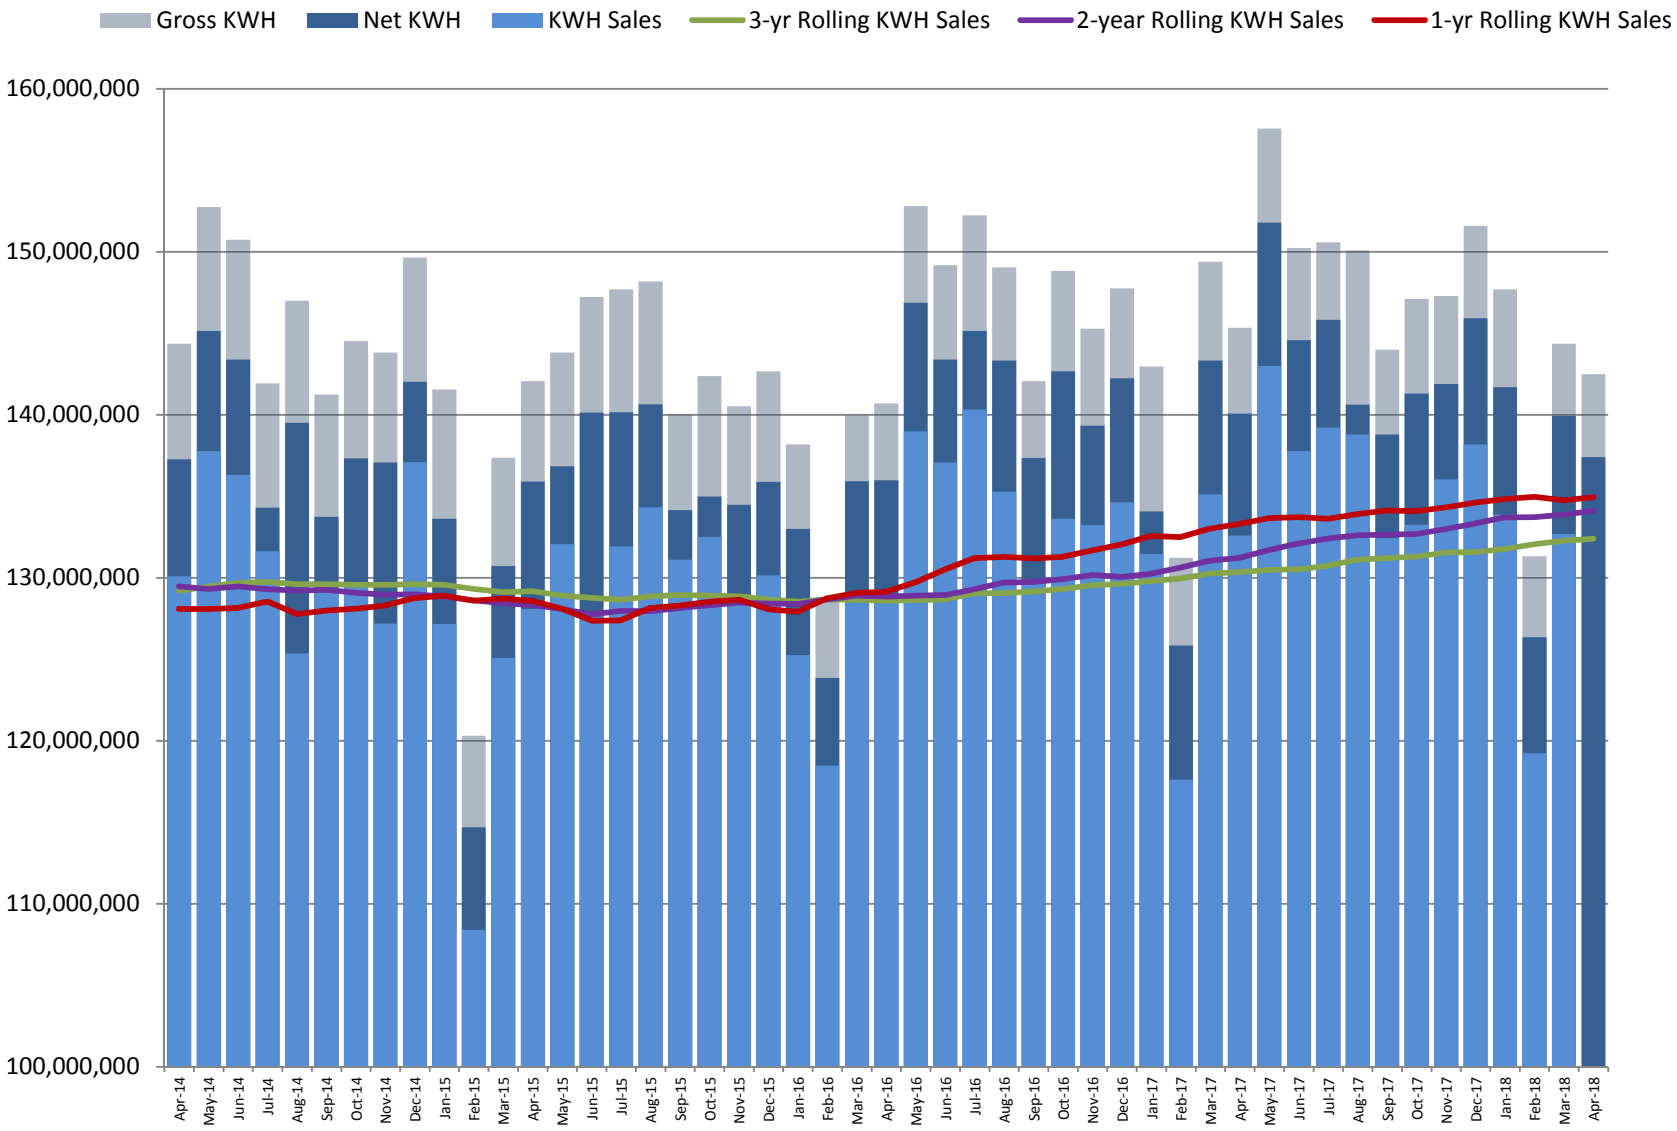
8. **PUC April 26, 2018 regular meeting resulted in the following:**
    - **Approval of GPA Docket 18-12, Invitation for Bid (IFB) for Property Insurance**

    Dockets to be considered in the May PUC meeting:
    - **GPA Docket 18-13, Petition to Approve the Piti 8 & 9 Contract Extension with Marianas Energy Corporation**

9. **New Power Plant Procurement:**

    - Public Law 102-34, consolidation of the Ukudo lots and rezoning to M1 took effect on May 16, 2018. The bill was passed by the 34th Legislature by a vote of 11-2. The Governor has allowed the Bill to lapse and become law. GPA will now file the petition for purchase of the 60 acres to the PUC in hopes they act on it in their May or June meeting.
    - Multi-Step Bid Invitation No. 034-18 was opened on April 5, 2018. Eighteen (18) proponents submitted their technical and financial information. The short list of proponents which met the required financial and technical experience requirement is scheduled to be announced by the end of May 2018.

10. **Supervisory Control and Data Acquisition (SCADA) Commissioning:** The new SCADA system being housed in Fadian is on track for commissioning in October 2018. The new system includes the latest technology for the GPA power and GWA water and wastewater system. The factory testing of the system's major components has been rescheduled to early June in Taiwan.



11. **Key Performance Indicators:** The following are updated indicators thru March 2018. Sales continued to be strong. Fuel oil prices have risen again and has passed $70 per bbl.

John M. Benavente, P.E.

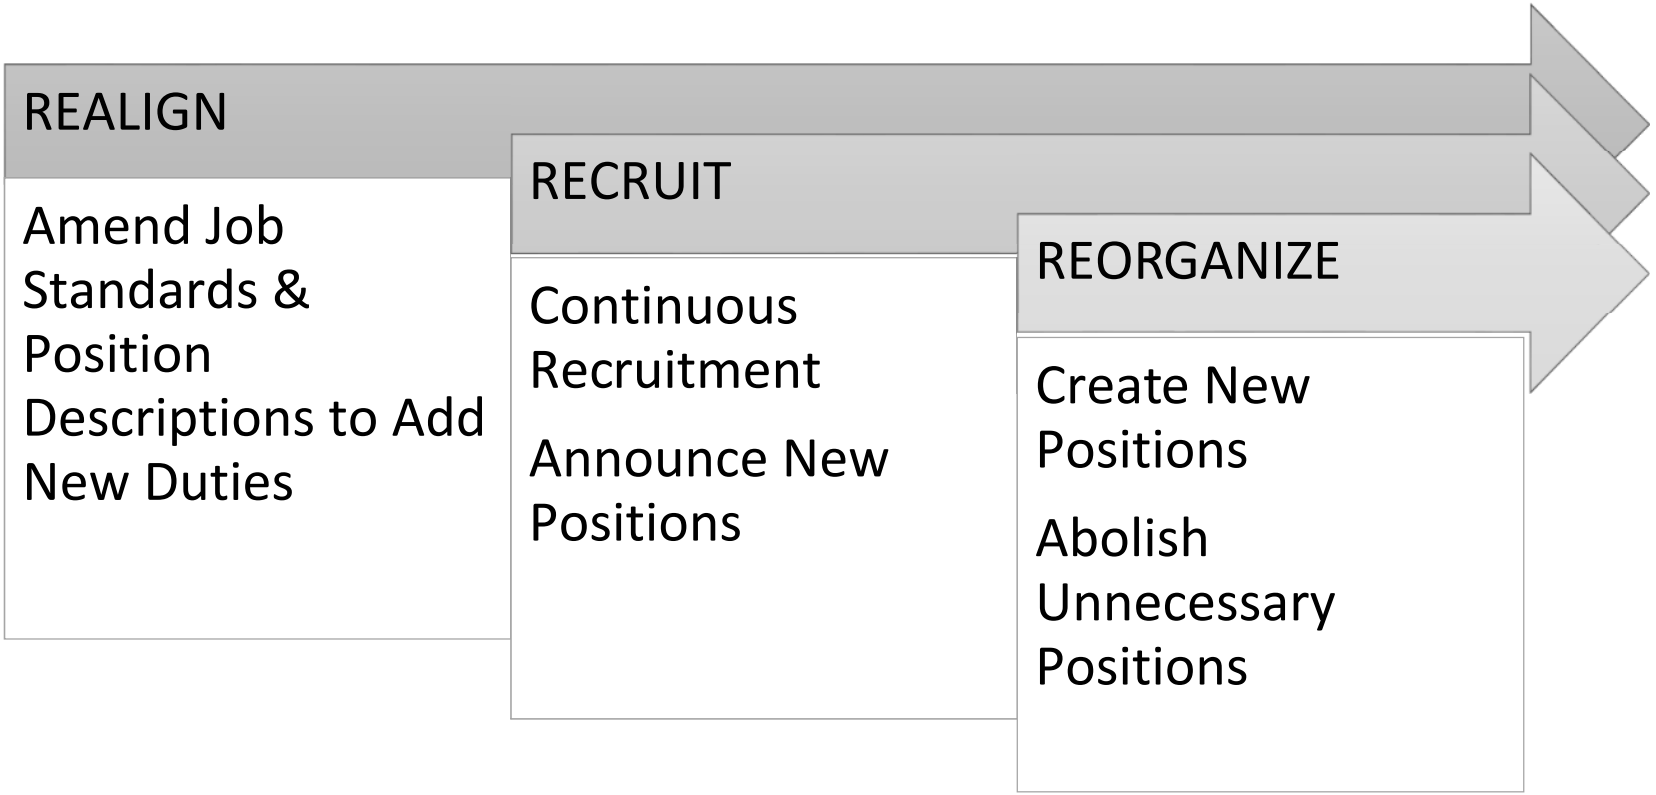
ISSUES FOR DISCUSSION

ORGANIZATIONAL REALIGNMENT

Summary

- 2011 - 2014: Installation of smart meters and accessories significantly changed GPA's processes & structure
- GPA commissioned an analysis of then-current processes and the anticipated changes
- Several recommendations were instituted, including changes to some business processes and organizational structure
- Other changes were instituted, yet not formalized

Outstanding Actions:



- *Reflect the current processes & structure*
- *Create new positions*
- *Eliminate overlap of similar functions*
- *Abolish unnecessary positions*

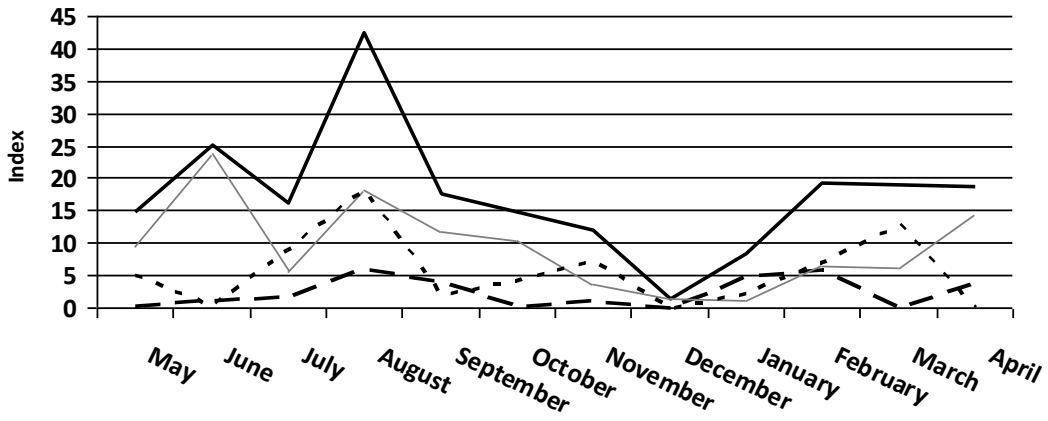
Project Activities

No.	Project Description	April 2018 Activities	Status / Est. Completion	RFP/Bid No
1	Energy Storage System (Phase I)	GPA reviewing revised 100% design. Clearing and grading permit work commenced in November 2017. Foundation permit work commenced in January 2018. Construction is 32% completed.	September 2018	MS Bid GPA-082-15
2	Renewable Energy Resource Phase II	PUC ratifies KEPCO contract (Docket 18-06) and approves HANWHA contract (Docket 18-08) on March 29, 2018. Contract signing for KEPCO scheduled for end of May (Kepco). Hanwha scehdule pending.	KEPCO PV plant COD is APR 2021. Hanwha's COD is anticipated for 1st qtr of 2020.	MS Bid GPA-070-16
3	New Power Plant Bid (EPCM)	Request for Qualification announced on January 16, 2018. Proposals deadline extended to April 5, 2018 due to questions and clarificaitons. Technical specifications are being reviewed and updated based on public hearings and technology neutral requirements. Evaluation extended to May 11, 2018.	Jan 2018 (Issue RFP Step 1 Solicitation) Apr 2018 (Proposals Due)	MS GPA-034-18
4	DSM Marketing	Negotiated additional scope for current year to support new vendors and programs and continue DSM marketing.	Continuous	
5	DSM Rebate Program	Processed rebates totaling ~ $103 K for Month of April	Continuous	
6	Wireless Network Expansion	Commenced Southern Expansion in collaboration with GWA: 30% Assessment of GWA Well Locations: Completed Assessment of Existing Tropos Units: 100% Router Equiqment and Accessories purchase	Dec-18 Completed Completed Arrival - May 2nd	 GPA-019-18
7	Performance Metrics Automation Project	Presentation to GM on iDashboard pending.	TBD	
8	Electric Grid Analysis Software	Additional training for users Training on Planning and Analysis Cases	Completed Jun-18	GPA-064-16
9	Supervisory Control and Data Acquisition (SCADA) System	Change Order Approved for October 2018 Completion and hardware costs Equipment on Order Factory Acceptance Test	Oct 2018 (SCADA COD) June 2018 (Factory Acceptance Test)	GPA-066-16
10	Mobile Workforce Management System	Bid Evaluation Completed, Clevest recommendation memo submitted for approval March 21, 2018	May 2018 (Bid Award)	GPA-023-17

Project Activities

No.	Project Description	April 2018 Activities	Status / Est. Completion	RFP/Bid No
11	Consulting Services for Smart Grid Analytics Enabled Distribution System Planning, Technical, and Economic Feasibility Studies	RFP evaluation completed for sole bidder. Bidder did not qualifiy. Committee recommendation to rebid. Sole-bidder Acknowledgement. Scope is being reassessed for resolicitation.	April 30, 2018 (Rebid)	RFP-17-005
12	TEMES Piti # 7 ECA Expiration & Transition to GPA	Transition completed. Environmental Assessment Report & Condition Assessment Report completed. Reports will be provided to Executive Management and Key Managers.	[Completed] [Completed] [On-going]	RFP-17-002
13	MEC Piti &8 and #9 - ECA Expiration	Environmental Assessment Report completed. Condition Assessment past due from Consultant.	[Completed] OVERDUE	RFP-17-002
14	Planning Software Administration/Maintenance	Call-off Consulting for DB Clean-up, CE + PO Plan Integration Configuration for ESS Call-off Consulting for additional work (New Power Plant Bid, etc.)	Start Date: Oct 2017 Completion Date: Sept 2019 *will continue thru next FY	
15	Generation Software (GADS open software)	Pending data entry from Generation & SPORD.	[On-going work]	
16	IFB for ULSD Supply for Baseloads and Peaking Units	Solicitation in progress. Bid package revised to include delivery requirements.	Start Date: Nov 2017 Est. completion: FY2018	IFB GPA-008-18
17	Contract for Lease of Bulk ULSD Storage	196KB tank repairs completed	27-Feb-18	TTGI-SA-2018-001
18	EV Infrastructure	Developing fast charge station scope for Mangilao offices.	Dec 2018	
19	Consulting Support, new procurements for Piti 7,8,9	Piti 7 - Management Contract (under Generation) awarded. No IPP bid. Piti 8&9 - Bid documents in progress, awaiting decision on Extension of ECA. If extended - will revise bid scope accordingly; if extension disapproved, will proceed with filing for approval of Bid.	[Commenced] Bid documents completion: June 2018 Bid Process Start Date: 3rd quarter of 2018 if Extension Not Approved	
20	Fuel Conversion Plan	Discussions on-going; additional budget needed. New Scope: Additional Support as Owner's Engineer	[On-going work, 6/2018 deadline] [thru FY 19 and 20, if approved]	
21	Fuel Bulk Storage Facility Assessment	ESA past due, pending approval from GPA CA past due, pending from Leidos	Start: Sept 2017 End: June 2018	



Project Activities

No.	Project Description	April 2018 Activities	Status / Est. Completion	RFP/Bid No
22	Renewable Energy Resource Phase III	Completed pre-bid conference and site visits January 23-24 2018.	(June 2018) Tech Proposal Due	
23	Utility Energy Services Contract (UESC)	Completed DSM Model House (DSM / Energy Efficient Equipment). Working on procedures to download and monitor office use. Obtained PUC approval for BEST GDOE program for energy efficiency. Coordinating meetings for week of May 21st to meet new Navy energy managers, kick off BEST GDOE assessment scope, followup with UOG on programs, meet with other commercial customers (GCC, Docomo, Ken Corp), and finalize financing structure.	Ongoing / Continuous	
24	IFB for RFO Supply to Baseload Plants	Solicitation in progress	Start: November 2017 Est. Completion: FY2018 Contract Start: Sep 1, 2018	IFB GPA-009-18
25	IFB for Petroleum Inspection Services	Re-Solicitation in progress	Start: November 2017 Est. Completion: FY2018 Contract Start: Jun 01, 2018	IFB GPA-014-18
26	RFO Storage Lease Agreement w/ Tristar	4-Year Lease extension Approved by CCU. Disapproved by PUC - requested for clarification on Index referenced. (Docket 18-10)	Start: November 2017 Est. Completion: May 2018 Contract Start: Aug 1, 2018	TTGI-SA-2013-001
27	GPA Fuel Farm RFO Pipeline Repair & Upgrade	c/o Engineering Project Mgt	Solicitation in progress (for award) Est. Completion: FY2019 (1st Qtr)	IFB GPA-047-18
28	GPA Fuel Farm ULSD Pipeline Upgrade	c/o Engineering Project Mgt	Estimated Start: Oct 2019 Est. Completion: Sep 2019	For IFB Solicitation
29	Tk 1934 & Tk1935 API 653 Internal Inspection	c/o Engineering Project Mgt	Estimated Start: Jun 2018 Est. Completion: FY2019	For IFB Solicitation
30	Milsoft Systems Software Services	Award Recommendation memo (Milsoft - Vendor) for approval submitted 3/28/2018 Price Proposal Review 4/19/2018	Continuous	GPA-RFP-18-003

Project Activities

No.	Project Description	April 2018 Activities	Status / Est. Completion	RFP/Bid No
31	MV90 Integration Services	Award Recommendation memo (Itron - Vendor) for approval submitted 3/30/2018	Dec-18	GPA-RFP-18-001
32	SCADA Workstations and Monitors	Award Recommendation memo for approval submitted 3/27/2018	June 2018 (Delivery)	GPA-049-18
33	Grant Proposal Development and Proposal Application Management Services	Solicitation process complete. Contract signed Feb. 20, 2018. Project activities commences following month	Feb 2018 (Contract signed)	Re-Solicitation GPA-RFP-16-011
34	Pipeline Lease Agreement w/ Tristar	4-Year Lease extension Approved by CCU. Disapproved by PUC - requested for clarification on Index referenced. (Docket 18-10)	Start: November 2017 Est. Completion: May 2018 Contract Start: Aug 1, 2018	TTGI-PA-2013-001
35	Dock Use Agreement w/ Tristar	4-Year Lease extension Approved by CCU. Approved by PUC on March 29, 2018. (Docket 18-10)	Start: November 2017 Est. Completion: Mar 2018 Contract Start: Aug 1, 2018	TTGI-DA-2013-001
36	Redesignation of Cabras-Piti / Guam	Re-designation received 12/2018. TRC standing by to assist GPA w/ State Implementation Plan, pending P&R review of Task Order. AAQM Installation/Implementation on hold, will depend on USEPA approval of SIP after submission on/before July 2019	Start: October 2011 Est. Completion: July 2019 *Submitted to EPA by completion date	RFP-11-001
37	Environmental Strategic Planning	Commenced discussions for update of 2012/2013 ESP.	Start: April 2018 Est. Completion: December 2018	RFP-11-001
38	GPA Fuel Farm- OWS Upgrading	c/o Engineering Project Mgt	Estimated Start: Jun 2018 Est. Completion: FY2019	For IFB Solicitation
39	GPA Fuel Farm- LD System Upgrading	c/o Engineering Project Mgt	Estimated Start: Jun 2018 Est. Completion: FY2019	For IFB Solicitation

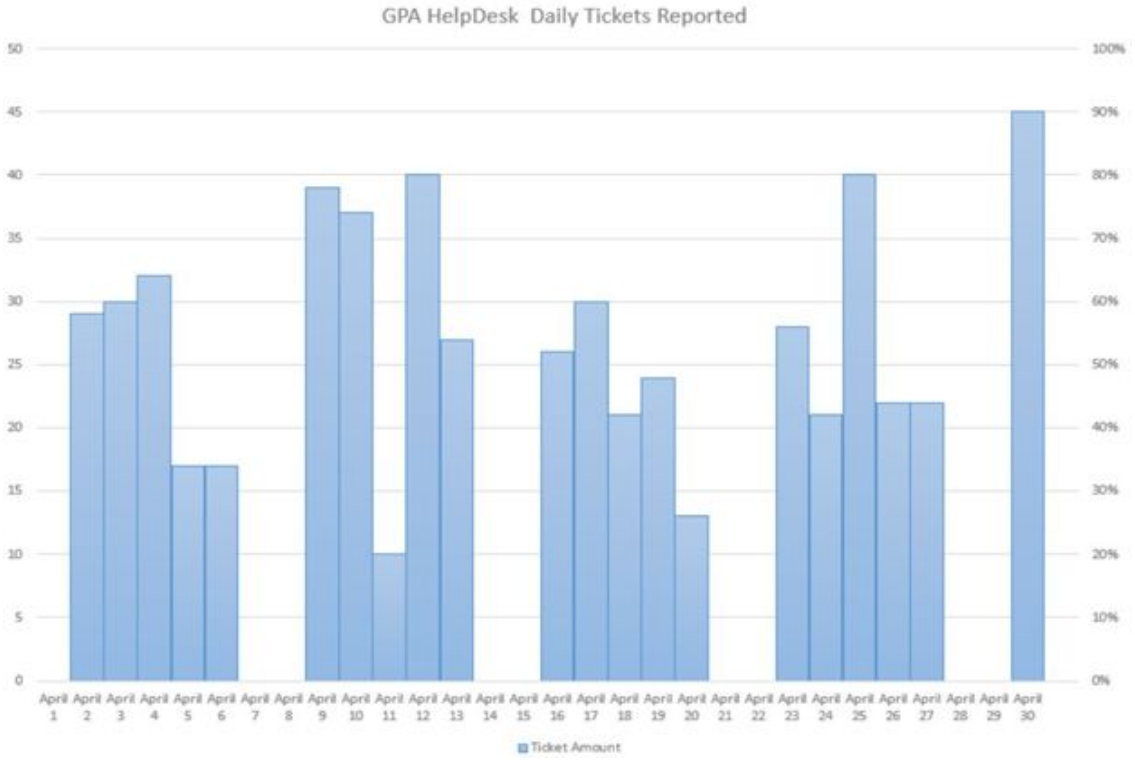
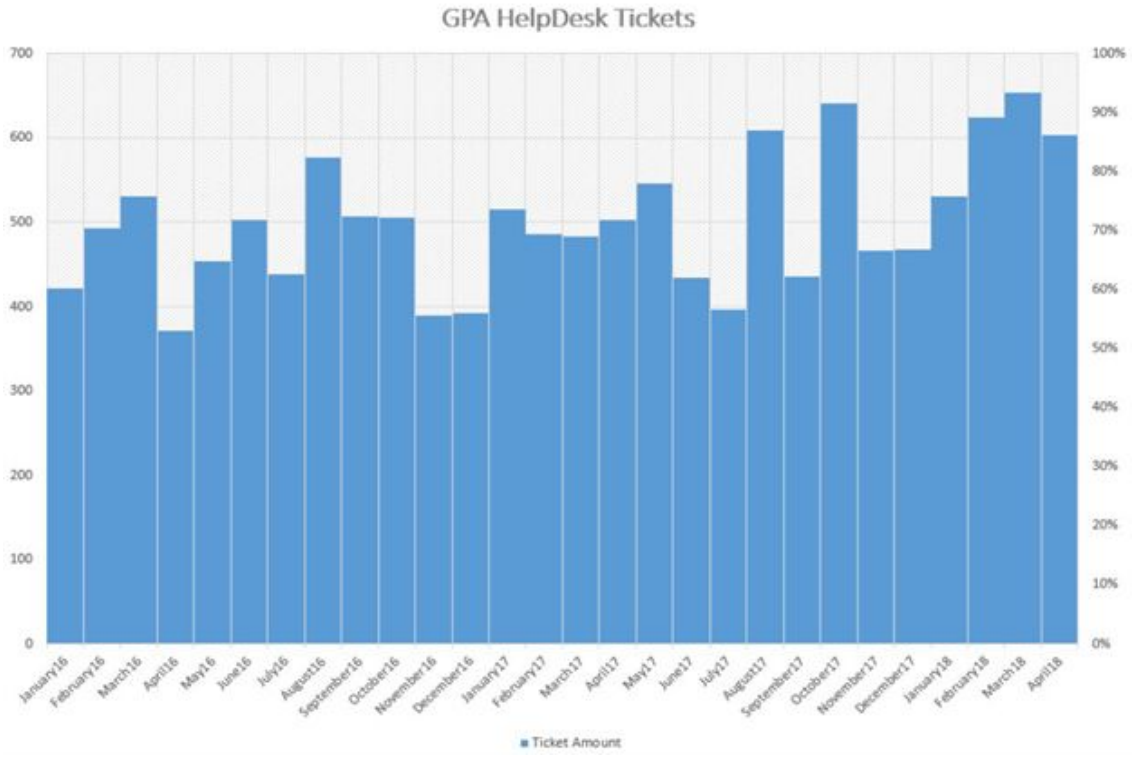
GPA INFORMATION TECHNOLOGY

APRIL 2018



SUMMARY:

The Information Technology Department continues to improve services, monitoring processes and system infrastructure utilization as guided by Cyber-Security initiatives and regulatory compliance. We strive and continue to improve all areas. Computer Services continues to seek new technology with networking, system access and utilization. We also strive to meet target levels of uptime, to include the IBM i-Series AS400, Virtual Machine environment, (VMware V-Sphere), (Blade Servers and Disk Array Storage), and Physical Servers, (non-Virtual Machines).



INCIDENT CALL SUMMARY:

The significance to record and utilize the Helpdesk Incident Handling Tool (ChangeGear) is to manage, track and measure workloads and assignments of customer reported IT incidents. The tracking of incidents is paramount. Measurements will be used for IT Customer Feedback survey in the future.

ONGOING PROJECT UPDATES:

Network Penetration Testing and Vulnerability Assessment: Project to provide network testing and vulnerability assessment to benchmark GPA and GWA's network and host systems. This will also include IT Controls Systems testing and Business Impact Analysis for GPA and GWA critical IT systems. Work in currently ongoing and expected completion by April 2018.

SMS Emergency Outage Notification: Project to provide SMS text alerts for Emergency Outages notification for customers and emergency response agencies. Awaiting next steps from operations. In testing process at the moment with PSCC.

Pay by Phone Project: Working with vendor for Pay by Phone system to allow customers to call after hours and make automated payments to their GPA account. Changes to the call script and ongoing testing.

Customer Care & Billing (CC&B) Upgrade: Upgrade of the current Oracle CC&B program from version 2.4 to version 2.6. The current version of CC&B 2.4 will be end of life by Sept. 30, 2017 and support thereafter will be limited. Expected completion by September 2018.

Disaster Recovery- Cloud Solution: Project to turn up a backup site on the Oracle Cloud for GPWA's CC&B Application. The Oracle Cloud service has been provisioned and backup replication is online. Final testing of the Oracle Cloud backup is ongoing.

Disaster Recovery Site: Project to procure a Disaster Recovery (DR) site to provide redundancy for critical GPA applications and databases in case of disruption of the primary Fadian Data Center. Incorporating GWA requirements into proposal.

Physical Security: Project to provide additional surveillance monitoring for Fadian, T&D, Dededo CT and Transportation Warehouse. RFP has closed and bid evaluations in progress.

GPWA Website Upgrades: Project to revamp GPA and GWA websites for the following, GUAMPOWERAUTHORITY.COM, PAYGPA.COM, GUAMWETERWORKS.ORG and PAYGWA.COM. RFP has been released and will close on April 26, 2018. Expected to be completed in 160 days.

Oracle CHAT-BOT: Project to provide Oracle Chat Bot services to GPA's PAYGPA.COM, Mobile APP and Facebook Program. This will allow customers to utilize a CHAT program to make inquiries to frequently asked questions and inquiries on their account.

Landis & Gyr Command Center upgrade from ver. 6.5 to 7.2: Project to upgrade GPA AMI Smart Meter Program to the latest version of 7.2. This will allow new functionality for the Command Center and Smart Meter Integration.

Monthly Project Report

April 2018

Grow together and WIN

Unrestricted

Project Progression Summary

Factory Acceptance Test

This month was focused on addressing logistics for the upcoming Factory Acceptance Test in Taiwan scheduled for June 6th rd through June 10th . The requirement to transport the FAT Attendees on different flights due to liability concerns were accomplished to include ground transport, hotel venue and daily meals.

Project Schedule

Project schedule is being revised and will be submitted in next update.

P&R Weekly & Monthly Inspection Reports

- Best Management Practices (BMP) Report Summary [Weekly]
- Generation Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]
- T&D Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]

- GPA is responsible to employees, the island environment, and the community to take all reasonable steps necessary to prevent spills from its facilities in order to protect human health and the environment

P&R Inspection Report Purpose

- The purpose of these inspections is to catch discrepancies and violations internally and correct them before inspections by Guam EPA and US EPA
- Regulatory Agencies can conduct scheduled or un-scheduled (surprise) inspections any time
- Any major discrepancies or violations cited can lead to issuance of a Notice of Violation (NOV), possible fines, and/or other enforcement action
- P&R conducts routine SPCC inspections in compliance with the requirements of 40CFR 112.7(a)(3)(ii), Discharge Prevention Measures

POWER PLANT

Location	Findings		Recommendation/Remarks	Status	Responsible	Completion Date	Due Date	Initial Findings Date
CABRAS UNITS 1 & 2	*Suply line 8" from tank farm*	No secondary containment	Provide secondary containment. Regular monitoring recommended				ASAP	November 2015
	Secondary Containment	Exposed/worn out insulation and corroded flanges on tank no.2	Repair	Repair ongoing			ASAP	July 2017
CABRAS UNITS 3 & 4	*FODST Nos. 3&4 Secondary Containment*	Metal and pipe debris in the area	Remove and clear area.	Cleared with John Kim and Joven. Debris is OK for removal. No longer needed for Insurance claim.				June 2016
	MOV	Broken wheel and corroded pipe	Repair/replace wheel and pipe				ASAP	March 2018
	Day Tank 3&4	Overgrown vegetation around tank seams on day tank 3&4	Remove vegetation				ASAP	February 2018
DEDEDO CT	*Tank Farm*	Rainwater on secondary containment	Drain water					April 2018
MACHECHE CT	Fuel Storage Tanks Area	Corrosion at tanks T-130/140 (paint applied over rust only)	Remove rust and repaint				ASAP	October 2015
		Corroded tank support T-130/140 (paint applied over rust only)	Remove rust and repaint				ASAP	October 2015
		Corroded gate valve on tank 110 & 120	Repair completed on T-110; undergoing repair on T-120				ASAP	April 2016
		Rust buildup on seam and tank belly	Remove rust and paint,				ASAP	November 2015
	Secondary Containment	Rainwater accumulation	Drain water				ASAP	April 2018
	Fuel Purifier	Fuel purifier leaking	Repair leak				ASAP	May 2017
		Fuel purifier is not free from oil spill	Conduct cleanup				ASAP	May 2017
YIGO CT	*Facility Area*	Fuel storage tank 140	Rust buildup on shell	Remove rust, re-paint				April 2018
		Secondary containment	Standing water	Drain water				April 2018

Generation SPCC Inspection Report (cont.)

Location	Findings		Recommendation/Remarks	Status	Responsible	Completion Date	Due Date	Initial Findings Date
MANENGGON DIESEL	*Tank No. 3*	Corroded tank shell	Chip and recoat				ASAP	April 2018
	Secondary Containment	Worn out sealant on the cracks on secondary containment	Replace sealant	Re-sealing is ongoing			ASAP	May 2017
		Algae accumulation in sec. containment	Conduct clean up				ASAP	November 2017
		Corroded fuel supply line	Chip corrosion and recoat				February 2018	December 2017
		Accumulated trash and debris in the parking area	Conduct cleanup				ASAP	March 2018
TALOFOFO DIESEL	*Facility Area*	Damaged window screen	Repair or replace				ASAP	December 2017
	Secondary Containment	Algae accumulation in sec. containment	Conduct clean up				ASAP	May 2018
TENJO DIESEL	*Facility Area*	Worn out gap seal on the secondary containment floor	Seal floor gaps				ASAP	August 2017
		Corroded tank shell on tank #2	Chip and recoat				ASAP	March 2018
		Corroded supply pipe	Chip and recoat				ASAP	March 2018
		Oil spill and debris in waste oil tank sec. containment	Conduct cleanup				ASAP	March 2018
		Debris stored in the plant grounds	Dispose debris				ASAP	January 2018
		Oil spill in work area and used cans with oil	Conduct clean up; rinse oil from old cans before disposing				ASAP	April 2018
PITI #7	*Main Fuel Tank, Day Tank # 1 & 2*	No integrity test	Conduct integrity test				ASAP	January 2018

FINANCIAL STATEMENT OVERVIEW
March 2018

Attached are the financial statements and supporting schedules for the month and fiscal year ended March 31, 2018.

Summary
The increase in net assets for the month ended was $1.1 million as compared to the anticipated net increase of $0.2 million projected at the beginning of the year. The total kWh sales for the month were 0.08% more than projected and non-fuel revenues were $0.2 million more than the estimated amount. O & M expenses for the month were $5.6 million which was $0.5 million under our projections for the month. Other expenses for the month such as interest expense, IPP costs, (net of interest income and other income) totaled to $3.9 million, which was right in line with the projected amounts. There were no other significant departures from the budget during the period.

Analysis

Description	Previous Month	Current Month	Target
Quick Ratio	2.08	2.22	2
Days in Receivables	38	37	52
Days in Payables	19	31	30
LEAC (Over)/Under Recovery Balance -YTD	$14,390,645	$14,428,269	$15,084,930
T&D Losses	4.92%	4.93%	<7.00%
Debt Service Coverage	1.92	1.89	1.75
Long-term equity ratio	18%	18%	30 – 40%
Days in Cash	131	196	60

The Quick Ratio has been a challenge for GPA historically. However, over the last two fiscal years, the influx of cash from insurance proceeds continued to improve this ratio. GPA has current obligations of approximately $85 million and approximately $189 million in cash and current receivables. Debt Service Coverage ratio is calculated using the methodology in use before the Fiscal Year 2002 change in accounting practice.

Financial Statement
March 2018
Significant Assumptions

The significant assumptions in the financial statements are as follows:

- Accrual cutoff procedures were performed at month end
- An inventory valuation is performed at year-end only
- Accounts Receivable includes accruals based on prior months' usage.

Issues for Decision

Resolution No. GPA 2018-14 & GWA 38-FY2018:

Relative to CCU CYBERSECURITY POLICIES AND PROCEDURES

What is the project's objective and is it necessary and urgent?

The CCU instituted the Cybersecurity Committee in 2017 to serve as the advisory and oversight group regarding information technology, infrastructure, and cybersecurity. The committee's responsibilities include the Guam Power Authority and Guam Waterworks Authority (GPWA) information technology systems, which includes policies, controls, risk mitigation, and infrastructure asset protection. A network security assessment recommended that GPWA develop common objectives and controls by establishing common policies, procedures, and business processes to manage risks.

The Cybersecurity initiative resulted in the formation of guidelines to ensure consistency and adequate protection and safeguards to GPWA systems, and resulted in the Password Creation and Protection Policy, the Computer, Software, License, E-mail, Internet, and Standard of Conduct policy, and the Network and Data System Access Policy.

Where is it located or covers?

This will cover all GPWA infrastructure, assets and information technology systems.

GPA RESOLUTION NO. 2018-14
GWA RESOLUTION NO. 38-FY2018

CCU CYBERSECUITY POLICIES AND PROCEDURES

WHEREAS, the CCU instituted the Cybersecurity Committee in 2017 to serve as the advisory and oversight group regarding information technology, infrastructure, and cybersecurity. The committee's responsibilities include the Guam Power Authority and Guam Waterworks Authority (GPWA) information technology systems, which includes policies, controls, risk mitigation, and infrastructure asset protection; and

WHEREAS, a network security assessment recommended that GPWA develop common objectives and controls by establishing common policies, procedures, and business processes to manage risks; and

WHEREAS, the Cybersecurity initiative resulted in the formation of guidelines to ensure consistency and adequate protection and safeguards to GPWA systems, and resulted in the Password Creation and Protection Policy, the Computer, Software, License, E-mail, Internet, and Standard of Conduct policy, and the Network and Data System Access Policy.

NOW THEREFORE, BE IT RESOLVED, by the Consolidated Commission on Utilities, as follows:

1. The Guam Power Authority and Guam Waterworks Authority General Managers are hereby authorized to implement and update the Cybersecurity policies for GPWA as required.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

DULY and REGULARLY ADOPTED this 24th day of July, 2018.

New Power Plant
Technical Bid Documents

John M. Benavente, P.E.
General Manager
July 17, 2018

VIEW FROM GUAM REGIONAL MEDICAL CENTER

IFB documents key points

- Technology Neutral
  - Allows Combined Cycle, Reciprocating Engines, renewable and any type of flexible generation
- Size range 120-180 MW
- Property Site Purchased by GPA; Site to be a Portion of 60 Acres
- IPP BOT model 25 years – with additional 5 year option (30 years total)
- Four months bid development time allowed for the selected seven (7) prequalified proponents

Risks

- Schedule delays – compliance date
  - CCU & PUC approval of IFB documents
- Insufficient number of IPP bids
  - Withdrawal
  - Non responsive or non compliant
- RFQ protests
- Complex proposals with varied options
- EPA Consent decree details unknown

Risks - continued

- Complications due to GPA equity position desired
- Permitting delays
- Property unknown issues
  - Sinkholes – poor geotechnical
  - Endangered species found
  - Cultural artifacts found
- PUC funding approval
- Easements for pipeline and transmission line rights of way
- System studies and upgrades may be required

Technical Proposal Requirements

- 120-180 MW
- Dual fuel capable with ULSD initially; Natural Gas Burning Capability
- Fully dispatchable base and Intermediate load
- Project Company will complete a Grid Study to show Technology Proposed meet Reliability Requirement:
  - Steady state and dynamics modeling using Positive Sequence Load Flow (PSLF) software
- Meet GPA Reliability Standards; Works well with Renewables
- Transient response
  - 5% within 1 second. 10% within 2 seconds
  - 25 MW per minute regulation

Technical Proposal Requirements - continued

- Capable of providing the full Dependable Capacity at any given time regardless of the weather conditions.
- Capable of withstanding and continuing to operate during all weather conditions.
- The loss of a single generating unit should not cause loss of capacity of more than __MW (Being Determined)
- GPA will provide rights of way for the ULSD pipeline and the 115 KV transmission interconnection from the GPA procured property to the Harmon substation
- Project Company will provide environmental permitting

Technical Proposal Requirements - continued

- Synchronous condenser requirement
- High Voltage transmission line and pipelines transferred to GPA after Commissioning Operating Date (COD)
- Provisions for optional partial commissioning
- Natural gas pipeline installed into same right of way as ULSD pipeline
  - Pipeline protection while not in use
  - Natural gas pipeline complies with FERC requirements
- Noise level at the site boundary shall not exceed 45 dB(A)
- Utilize GWA grey water for makeup – if cooling tower is required

Technical Proposal Requirements - continued

- Discharge to GWA or Zero Liquid Discharge system
- Potable water supplied from GWA
- Sea water makeup not allowed
- Architectural requirements
  - Building designs approved by GPA
  - Style, colors and finishes compatible with Guam's island heritage
  - Exterior colors and finishes blend in with surrounding
  - Low-rise buildings unless taller required for equipment enclosure
- Buffer zone around plant
- Utilize only part of provided property (~25 acres for plant)
- On site fuel storage 30 days
- Transfer facility for loading and unloading fuel delivery trucks (for resiliency)
- Water storage on site 7 days

Technical Proposal Requirements - continued

- Proponent proposal requirement
  - One original and five copies
  - Complete Section D Forms
  - Provide separate technical and commercial proposals in two separate envelopes
  - Proposal security required
    - GPA required **$3M** bid bond
  - Maximum debt to equity ratio of 80% to 20%
  - Equity required by lead developer at least 35% of the total equity
  - Responsive test Section B Appendix A
  - Optional GPA Financing Submittal Requirement

Technical Proposal Requirements - continued

- Successful proponent requirements
  - GPA employee hiring opportunity to address positions that will be impacted by the retirement of Cabras 1&2
  - Construction security of $75M at financial closing; released 3 months after COD – Section B 7.3 and ECA Section 9.6
  - **Transfer Security of approximately $ 6.3M** – to replace Operational Security and released 1 year after transfer
  - **Liquidated damages**
    - Delay in achieving COD
    - Failure to meet Contracted Capacity
    - Excessive outages
    - Failure to meet guaranteed renewable generation – in case of a hybrid plant

Technical Proposal Requirements - continued

- Successful proponent requirements
  - OSHA safety conformance
  - Monthly reports
  - Schedule updates
  - Progress meetings
  - Reliability test 7 days with 72 hours at maximum dependable capacity
  - Annual dependable capacity test
  - Maintenance and testing prior to transfer at the end of the Term.

Technical Proposal Requirements - continued

- Financing Option
  - Evaluate Option with Lowest Bidder Only
  - IPP provides 20% minimum equity
  - GPA Financing up to 75% of Project Amount (less Cabras Insurance Fund)
  - Require future capitalization to be in Fixed O&M Charges.
  - Lowest Bidder to provide details of Financing for evaluation if GPA financing would reduce Annual Capacity Fee Charge.
  - Determine if Financing Risk acceptable in return for Lower Capacity Fee

Evaluation

- Technical compliance
  - Size and Reserve evaluation (Being Determined)
- Price proposal
  - Opened only for bidders who passed technical requirements
  - Cost evaluation using Net Present Value (Being Determined)
    - Capacity Fee
    - Fixed O&M
    - Variable O&M
    - Fuel Efficiency
  - Lowest Net Present Value is Lowest Bidder

Next steps

- Complete revision of IFB documents to be completed by Monday 7/23/18.
- CCU review and approval IFB documents Tuesday 7/24/18
- Petition PUC for approval IFB documents 7/31/18
- GPA considering issuing CCU approved documents to IPP subject to amended changes ordered by PUC

Revised Schedule:

No.	Activity	Duration	Cumulative Duration	Expected Completion	Best Case Completion
1	**CCU worksession**			7/17/2018	
2	**CCU Meeting**			7/24/2018	
3	**PUC Meeting**			8/30/2018

Issues for Decision

Resolution No. 2018-15:

RELATIVE TO AUTHORIZING THE MANAGEMENT OF THE GUAM POWER AUTHORITY (GPA) TO PETITION THE PUBLIC UTILITES COMMISSION FOR THE APPROVAL OF THE MULTI-STEP BID BOT SPECIFICATION FOR NEW 120-180MW GENERATION CAPACITY

What is the project's objective? Is it necessary and urgent?

Multi-Step Bid GPA-034-18 is for a Build, Own/Operate and Transfer (BOT) contract for 120-180MW New Generation Capacity. GPA was provided conditional approval by the PUC in November 2017 to initiate the solicitation to establish a qualified bidders list through Docket 18-02. The technical specifications are required and requires PUC approval when completed. GPA has completed these technical specifications and seeks approval to continue with the bid for new capacity.

Where is the location?
Harmon

How much will it cost?
New Power Plant construction is estimated up to $400M. The BOT would recover costs over a 25-30 year term

When will it be completed?
Complete plant by September 2022.

What is its funding source?
Insurance Proceeds (Cabras 3&4) and Revenue Generated Funds

The RFP/BID responses:

GPA has completed Step 1 of this three-step multi-step bid. A qualified bidders list has been selected and will be provided the technical bid specifications upon PUC approval.

CONSOLIDATED COMMISSION ON UTILITIES
Guam Power Authority | Guam Waterworks Authority
P.O. Box 2977 Hagatna, Guam 96932 | (671)649-3002 | guamccu.org

RESOLUTION NO. 2018-015

AUTHORIZING THE MANAGEMENT OF THE GUAM POWER AUTHORITY (GPA) TO PETITION THE PUBLIC UTILITES COMMISSION FOR THE APPROVAL OF THE MULTI-STEP BID BOT SPECIFICATION FOR NEW 120-180MW GENERATION CAPACITY

WHEREAS, on November 30, 2017, the PUC approved (Docket 18-02) a multi-step procurement process and authorized GPA to issue the Request for Qualifications for the 120-180MW new power plant; and

WHEREAS, on January 16, 2018 GPA issued Multi-Step Bid GPA-034-18 for Build, Own/Operate & Transfer Contract for 120-180MW of New Generation Capacity; and

WHEREAS, in June 2018, GPA selected seven (7) firms to establish a Qualified Bidders list that will participate in the next phases of the multi-step bid which includes the development and submittal of a technical proposal and a price proposal; and

WHEREAS, GPA has completed the technical specification documents for the Step 2 of the 120-180MW New Generation Capacity bid which address the following:

- Build, Own/Operate and Transfer (BOT) contract
- Specifications for 120MW – 180MW flexible generation to meet renewable integration requirements
- Architectural requirements and GPA involvement during design process
- Federal Environmental and Safety requirements
- GPA Employee Hiring Opportunity
- Bond & Security Requirements during bid and construction periods
- Draft contract; and

WHEREAS, PUC Docket 18-02 requires GPA to submit and obtain approval of the technical bid documents from PUC; and

NOW THEREFORE, BE IT RESOLVED, by the Consolidated Commission on Utilities, subject to the review and approval of the Public Utilities Commission, as follows:

1. GPA is hereby authorized to petition the PUC for approval of the Technical Bid documents for Multi-Step Bid GPA-034-18 for the Build, Own/Operate & Transfer (BOT) Contract for 120-180MW of New Generation Capacity.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

DULY and REGULARLY ADOPTED this 24th day of July, 2018.

SUMMARY

DESCRIPTION	AMOUNT
Initial DSM Budget FY'16	$1,806,014.00
Interest Income as of June 18	$4,231.57
Total Expense	**$1,815,326.55**
Ending Balance as of June 18	$(5,080.98)
Addtl. Budget: Approved (FY'18)	$1,139,189.00
Total Ending Balance as of June 18:	**$1,134,108.02**

4. **Net Metering Customer Credit Recommendation:** GPA has schedule a public hearing for Wednesday July 18th at 5:30pm here at Fadian. The public hearing is for GPA to present its recommendation which it made to the CCU on the phased reduction of net metering credits. GPA will report to the CCU on July 24th the results of the public hearing and any changes it desires to make based on the public's input. Once the CCU approves GPA's recommendation, GPA could petition the PUC for their approval.

5. **PUC Dockets: The PUC approved the recommendation to hold LEAC at its current rate thru January 31, 2019.**

6. **New Power Plant Procurement:**

    - GPA completed the transaction for the Ukudu land on Friday July 13, 2018. GPA now owns the 60 acres.
    - Multi-Step Bid Invitation No. 034-18 qualified bidder list has been established and consist of seven (7) proponents. These proponents will be provided the bid specifications once CCU approves the package subject to PUC approval.

7. **Supervisory Control and Data Acquisition (SCADA) Commissioning:** The installation of the new SCADA system is now underway. The targeted commissioning date is October 2018. The SCAWA system is designed for Power, Water and Wastewater operations.

8. **Liberation Day Parade:** The parade is this weekend, Saturday July 21, 2018. GPWA is participating in the parade and will also have a food tent in Hagatna across the entrance to the Hagatna Waste Water treatment Plant. Please join us for this celebration.

9. **Apprentice Graduation:** The graduation ceremony for fifteen (15) apprentices occurred on Friday July 13, 2018 and received excellent media coverage. The next cycle of twenty (20) apprentices mostly in the T&D area is targeted to begin in October 2018. There are 314 qualified applicants vying for the program.

10. **Tropical Storm Maria:** The storm passed over Guam on July 5th, 2018. Storm blacked out the island for about half an hour. All customers were restored within two days. The estimated damage is about $234K.

11. **Senator Nelson Informational Hearing:** GPA provided an informational hearing to Senator Nelson on July 12, 2018. The informational briefing focused on LEAC, New Power Plant, and System Status. The presentation is attached for your perusal.

12. **GMH Main Electrical Panel Maintenance:** GPA has completed its task of conducting preventive maintenance on the GMH electrical panels. The maintenance was done between 6am to 2pm this past Sunday, July 15, 2018. GMH operated on standby generator power during the outage and there was no interruption of power to GMH. GPA has now completed its work with GMH. GPA is preparing a standard operating procedure for GMH for use in the event of an emergency. Please see the attached presentation of the work done.

13. **Key Performance Indicators:** The following are updated indicators thru June 2018.

John M. Benavente, P.E.

Informational Briefing to Senator Telena Nelson

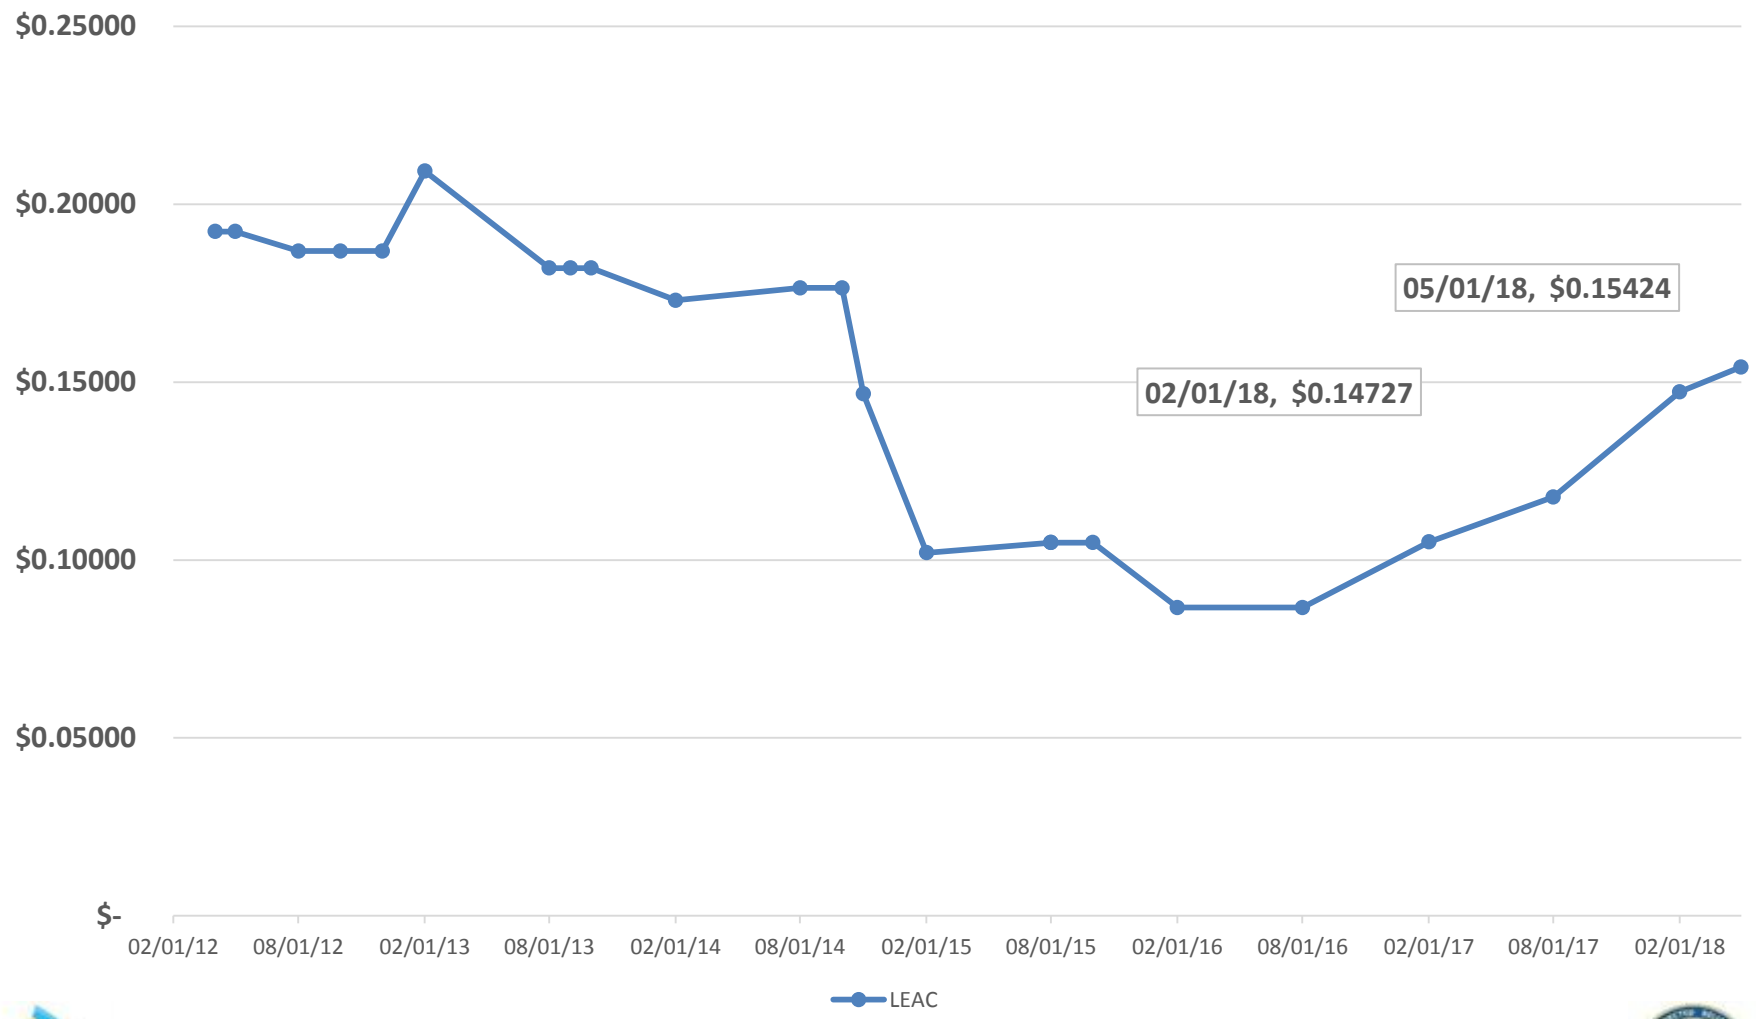
July 12, 2018

I Liheslaturan Guahan Public Hearing Room

Briefing Topics:

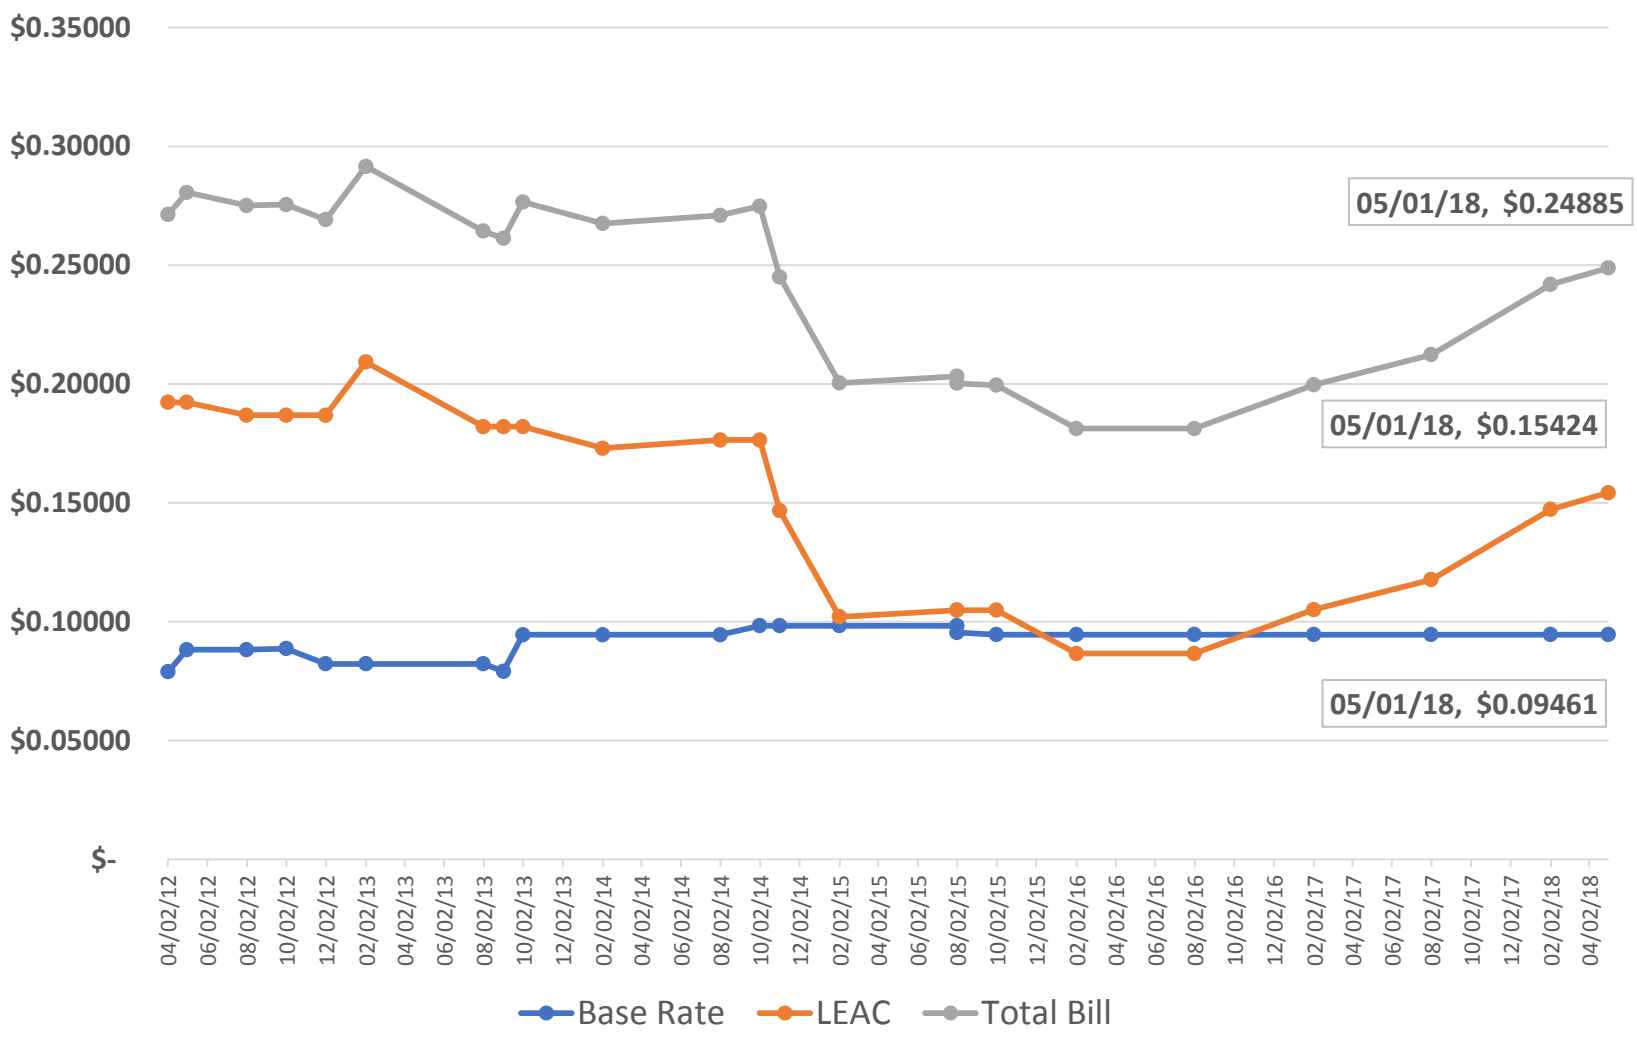
- Levelized Energy Adjustment Clause (LEAC)
- Status of Current Power Systems
- Update on the 180 MW Power Plant

LEAC



Power Rate Increases

- GPA base rate has been about the same since October 1, 2013.
- The decreases and increases in power rates have been due to adjustments to the Levelized Energy Adjustment Clause (LEAC) which are directly related to fuel oil expenses. The LEAC Clause is adjusted to be revenue neutral.



LEAC Update – GPA Fuel Purchases (Per Barrel)

Historical Residential LEAC Rate

Summary

- GPA petitioned the PUC on Jun 15, 2018 to maintain the Fuel Recovery Factor at $.154242/kWh effective for the period from August 1, 2018 thru January 31. 2019. The PUC has approved the petition.
- The change reflects no increase in the LEAC factor and no increase for a residential customer utilizing an average of 1,000 kilowatt hours per month up to January 31, 2019.
- GPA could file an interim petition should fuel prices rise substantially above $77/Barrel.
- The highest monthly residential bill for the average 1,000 KWH consumer was about $291 in Feb 2013.
- Implementation of GPA near term (within 4 years) plans could drop the average bill as low as $182 per month with the completion of about 160 MW of utility scale renewable projects and the new power plant burning ULSD and natural gas.

Status of Current Power Systems

Generation System Update

Generation System Update for June 2018

The expected generation capacity situation for June 2018 is as follows:

- The peak demand for June is projected to be 255 MW.
- The system is now heading into the higher peak months of the summer. Last year, the peak demand was 261 MW on August 1st 2017. It is anticipated peak demand for CY 2018 may be 265 MW.

June 2018 Projected Capacity:	**385 MW**
June 2018 Projected Demand:	**255 MW**
Projected Reserve Margin:	**130 MW**

GPA Will Not Be Able To Meet Demand Without New Power Plant By 2021

This table is provided to show that without a new power plant, GPA will not be able to meet load growth by 2022. Furthermore, as shown, because we lack adequate base load capacity, GPA's fuel related cost to provide additional energy to new customers will continue to drive its total energy cost higher because energy production would come from costlier less efficient standby units. The lack of new units which could work with intermittent renewables will result in limited solar PV additions into the grid thereby limiting cost saving opportunities.

Summary of System Generating Capacity With No New Baseload					**With New 180MW**
Description (MW)	**FY 2015**	**FY2017**	**FY2018**	**FY2021**	**FY2022**
Baseload Capacity	299	208	208	208	268
Emergency/Standby Capacity	120	200	200	200	200
Total Capacity	**419**	**408**	**408**	**408**	**468**
Peak Demand (Customer Requirement)	249	261	266	283	283
Reserve Margin (Balance between Capacity and Requirement)	170	147	142	125	185
Loss of Two Largest Units (Overhaul + Forced Outage)	(132)	(120)	(120)	(120)	(88)
Reserve After Loss of Two Largest Units	**38**	**27**	**22**	**5**	***97**
Utility Scale Renewables Capacity (MW)	**0**	**25**	**25**	**185**	**185**
% Energy from Baseload	98.0%	80.0%	62.2%	62.2%	**72.6%**
% Energy from Renewables	**0.0%**	**3.5%**	**3.5%**	**26.4%**	**26.4%**
% Energy from Emergency/Peaker	2.0%	16.5%	16.5%	11.4%	1.0%

Status of New Power Plant Procurement

New Power Plant Procurement:

- **Acceptable Bidder List of Qualified Proponents has been Established.**
- **Final specifications will be submitted to CCU and PUC approval this month.**

Bid Submittals (Step 1) were opened on April 5, 2018.
Eighteen (18) submittals were received.

1. APTIM
2. Green Globe Solutions
3. Guam Power Partners
4. Hanwha Energy
5. Karpower International
6. KEPCO/EWP
7. Korea Midland Power
8. Korea Southern Power
9. Osaka Gas Co.
10. POSCO Energy
11. Proman Global Dev.
12. Samsung C&T Corp.
13. Shanghai Electric Power
14. Sojitz
15. Summit Power Group
16. TEMES
17. Toyota Tsusho Corp.
18. Wartsila

Qualified Proponents will proceed to **Step 2 (Technical and Price Bid)**

1. Hanwha Energy
2. KEPCO/EWP
3. Osaka Gas Company
4. POSCO Energy
5. Samsung C&T Corporation
6. Toyota Tsusho Corporation
7. Wartsila

Summary

- GPA plants have aged significantly and the Cabras units are constantly having boiler tube leaks. We will need to spent millions to keep units running.
- GPA needs new base load units to provide reliable and low cost energy. A new power plant up to 180 MW of capacity has been approved and under bid.
- GPA manages an island-wide power delivery system; significant and continuous effort underway to strengthen the system.

T&D System Update

Tropical Storm Maria

July 5, 2018

Pre-Storm and Post-Storm Recovery

Pre-Storm Inspection & Clearing

UMATAC

BARRIGADA

DEDEDO

Response During Storm

TALOFOFO

MANGILAO

MTM

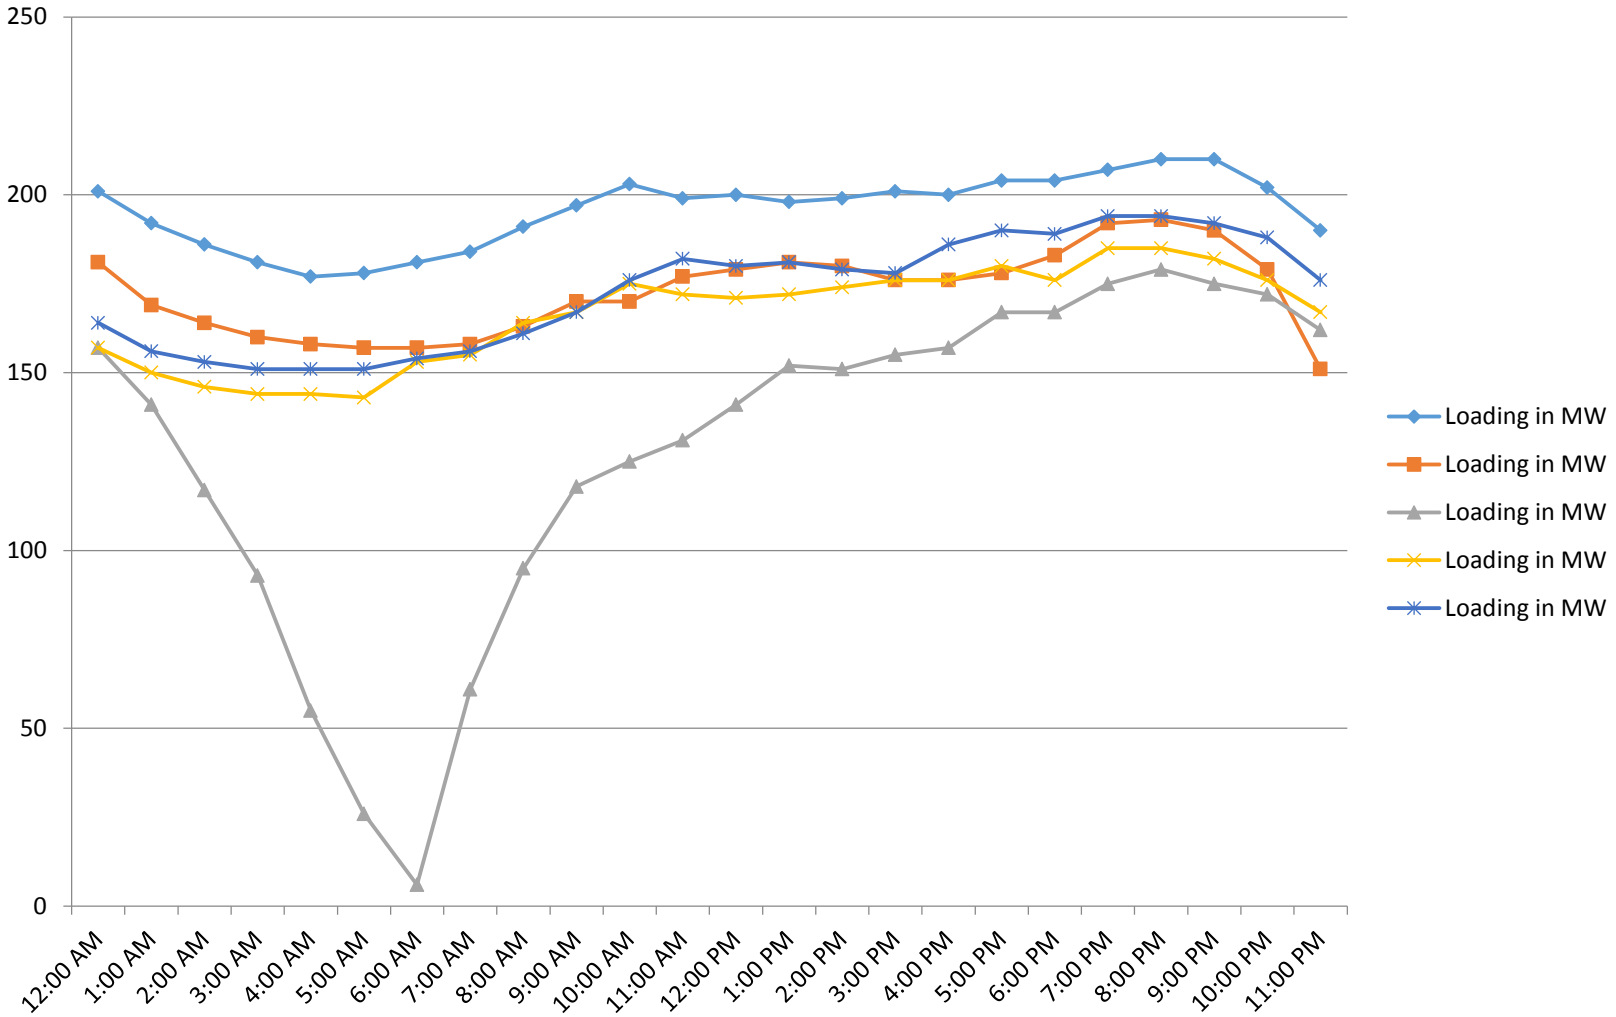
Post-Storm Clearing & Restoration

Tarzan Falls

Ypao Beach Road

Vegetation and high winds blew down several spans of power lines

Post-Storm Clearing & Restoration



GPA received numerous trouble calls concerning trees falling into power lines. Many of these areas were within residential neighborhoods. Crews took great care to ensure the safety of residents before restoring the power lines.

Community Support

MW Loading of Storm versus Normal Day

Tropical Storm Maria Damage

- Preliminary Damage Assessment:
- T&D Damages: $203,104
- Generation Damages: $31,690
- TOTAL ESTIMATED Damages: $234,794

Transmission & Distribution System

- 29 Substations connected through 189 miles of 115 kV and 34.5 kV lines
- Substations supply 67 distribution feeders with 1,638 miles of primary and secondary distribution lines
- GPA delivery system is managed through the Power System Control Center located adjacent to the Cabras Power Plant
- New Supervisory Control and Data Acquisition (SCADA) Center being installed at Fadian facility and expected to be operational by October 2018
- GPA has placed vital power transmission lines underground that connect system to key components of Guam's economy
- 60% of system load is served through new underground infrastructure
- GPA continues to harden its overhead system by replacing wood poles with concrete (about 90% hardened to date)
- GPA continues its village underground hybrid system which places secondary lines underground (24.4% of customers completed)

T&D SYSTEM

Description	Overhead Miles	Underground Miles	TOTAL Miles
Transmission Lines	154	35	189
Distribution Lines	1,331	307	1,638

Transmission & Distribution
ACTIVITIES

- Customer Work Orders
- 24/7 Troubleshooting
- Streetlight Repairs/Installation
- Line Hardware Maintenance
- Wood Pole Replacements/Pole Painting
- Vegetation Management

CUSTOMER WORK ORDERS

- Line Extensions
- New Installation – OH, UG, Hybrid
- GPA Plant Improvements
- Work Clearances
- Temporary Power
- Reconnections/Removals/Relocations
- Approximately 400 work orders received monthly

TROUBLESHOOTING

- Daily trouble calls
- 5 2-man crews of journeymen linemen handle trouble shooting activities -24/7
- Approximately 200 trouble calls monthly
- Most efforts today are reactive to customer complaints
- Plan is to eventually use smart grid data to identify and make needed repairs proactively

STREETLIGHTS

- Over 10,000 lights remaining to upgrade from HPS to LED
- Re-bid for more LED in process
- New rate for LED lights established and approved by CCU and PUC

LINE HARDWARE MAINTENANCE

- Line Inspection
- Infrared/Thermal Vision – discovers hot spots
- Predictive Line maintenance - detect signature anomalies on Electrical Equipment before any failures occur
- Hardware change outs of crossarms, insulators, fuse cutouts, static wire ongoing
- Much of the grid is several decades old and hardware such as cross arms, fuse cutouts, insulators need replacement in some areas

WOODEN POLE REPLACEMENT PROGRAM

POLE TYPE	COUNT
Wood	4,443
Concrete	29,751
Steel	2,086
TOTAL POLES	36,280
% Concrete/Steel	87.8%

– Replacement program on-going and crews prioritize hollow/rotten poles for replacement

POLE PAINTING PROGRAM WITH MAYORS

- Mayors paint poles 8 feet from ground level with Reflective Paint
- Mayors receive credit for poles painted every 2-3 years as necessary – based on normal wear
- Credit estimated at $10 per pole
- Budgeted for paint supplies in FY 2018

VEGETATION MANAGEMENT PROGRAM

Vegetation Management Activities

- Vegetation Management Contractor to focus on Main Routes/Main Lines
- Policy/Agreement with Village Mayors
- In-House Trimming
- Program Goals
  - 2 to 3-year program to achieve consistent maintenance and get ahead of vegetation growth

Vegetation Management Activities

Policy with Village Mayors

- Crews trim vegetation away from energized lines
- Mayors maintain vegetation below the “Critical Area”
- Obtain assistance from Mayors to cut down trees which grow high enough to reach lines. Helps avoid damages during storms and expedites power recovery
- GPA credits mayors based on linear footage cleared on a monthly/annual basis
- Credits can apply towards GPA T&D Services (lighting for ball field, electrical assistance, etc.)
- Credit amount will be based on similar costs paid to existing contractors ~ $2/per linear foot

Policy with Village Mayors

- Crews trim vegetation away from energized lines – the Critical Area
- Mayors maintain vegetation below the Critical Area

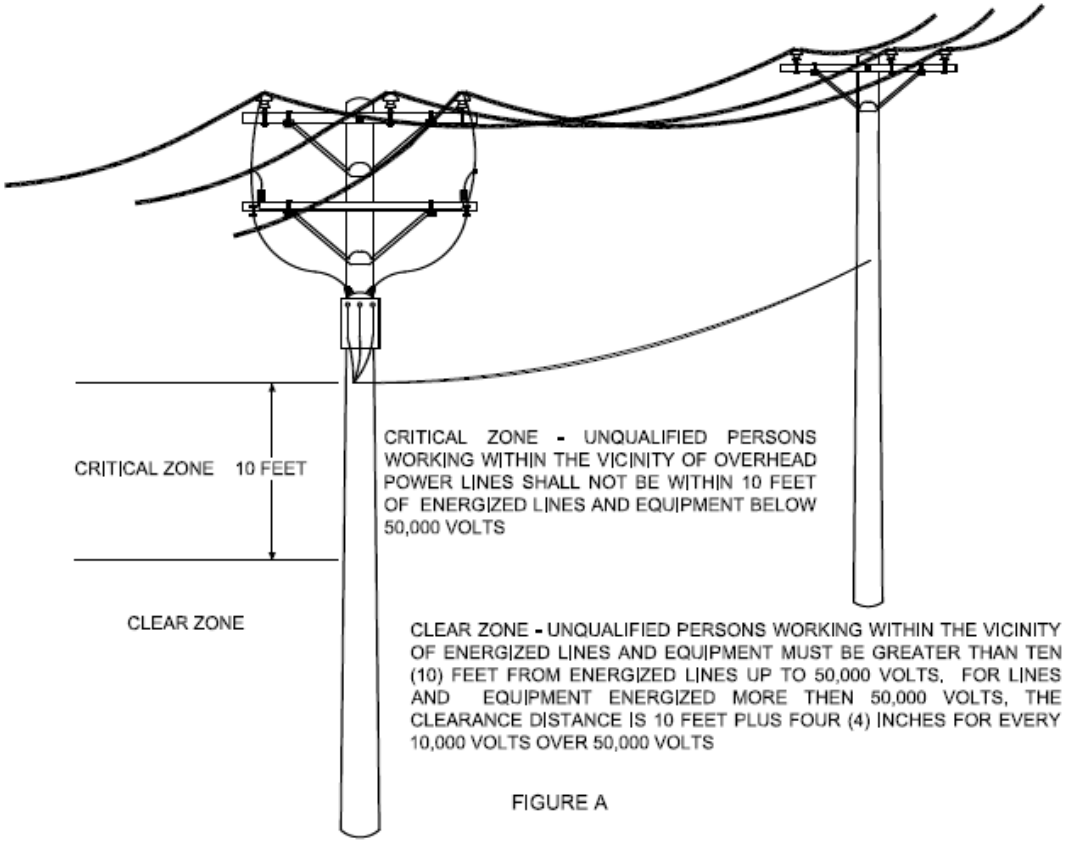

FIGURE A

- Worked with Village Mayors to finalize program – 11 Mayors interested in participating
- Formal launching targeted for Oct 1, 2018

Vegetation Management Activities

T&D to establish Tree Trimming Team

- Team consists of Operators and Tree Trimmers
- One crew for each Sector – North, Central, South
- Operators & Tree Trimmers to be hired FY 2018

Equipment Purchases

- 3 Mulchers – Delivered
- 3 Boom Mowers-Telescoping Trimmer
- 3 Dump Trucks

} Arrived February 2018

VEGETATION MANAGEMENT

MULCHERS - Delivered

Telescoping Trimmer

- Delivered

Summary

- The grid is substantially improved and reliable. Work continues towards a fully underground system.
- Programs are being implemented to continue to improve reliability.
- Vegetation management is a significant challenge, but programs are being implemented to establish a sustainable program. The public's help will be needed in order to substantially eliminate vegetation outages.
- Manpower is being added in order to keep up with the system's and customer needs. Apprenticeship program is being continued in order to have an adequate experienced workforce for many years.
- Questions? Thank you!

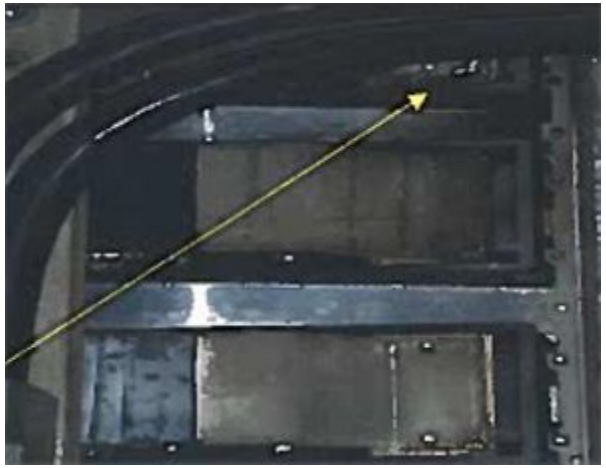
Assessment & Maintenance of Guam Memorial Hospital (GMH) Main Distribution Panel

July 15, 2018

Sequence of Events

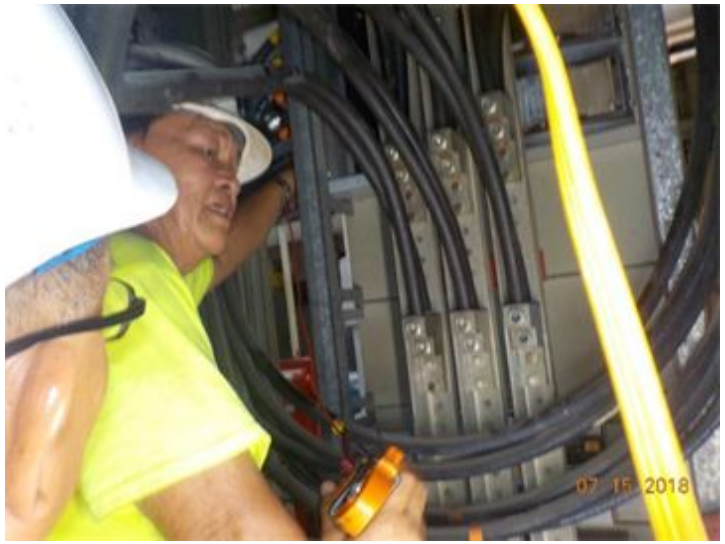
- Initial assessment conducted by GPA on June 27th
- Thermal Vision conducted by GPA on June 29th
- GMH approved Scope of Work July 9th
- Outage Taken on July 15th to conduct preventive maintenance and to correct discrepancies shown in following page found through a thermal vision inspection.
  - These are the highest points of possible failure
- Outage also allowed for upgrading of the GPA pad mount switch which was planned earlier

SCOPE OF GPA WORK

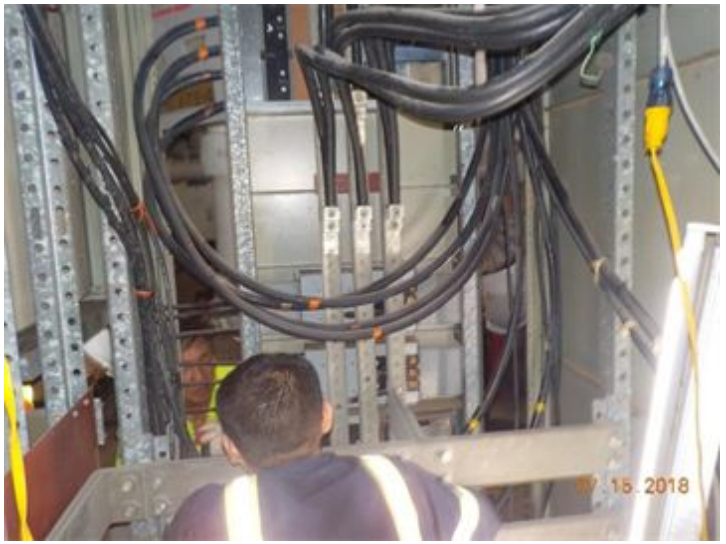


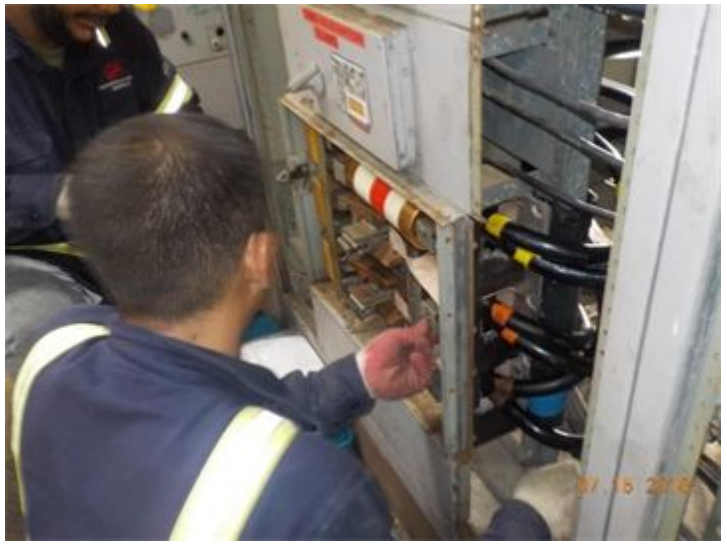
- Wipe down all equipment and remove all dust
- Cover and seal exposed, unused conduits
- Create labels for all equipment
- Clean all mating surfaces and apply a light coat of corrosion grease
- Wire brush secondary conductor ends or cut and re-terminate if necessary
- Upgrade GPA Pad mounted Switch

HOT SPOTS IDENTIFIED



Bus and Disconnect Removed





Route conductors to Spare Disconnect

Cleaned mating surface & provided a light coat of corrosion grease. Install new 500A fuses

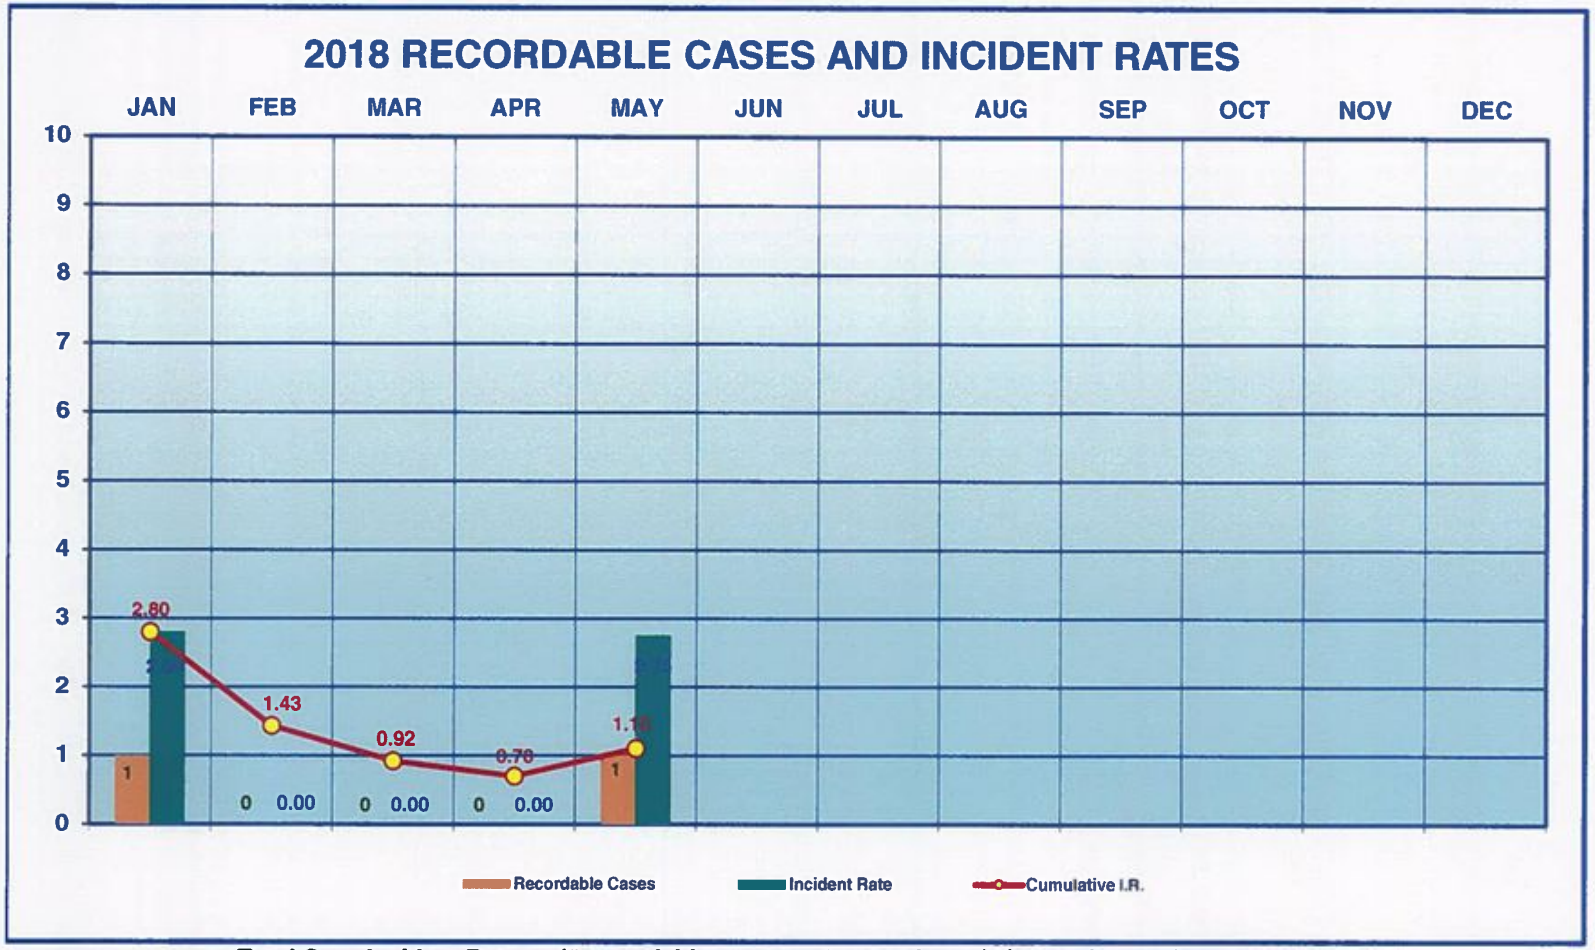
MEMORANDUM

TO: Safety Administrator June 6, 2018

FROM: Utility Administrative Aide

SUBJECT: **Vehicle Accident/Injury Cases for the Month of May 2018**

INJURY: One (1)
An employee from Generation was operating an electric 4-1/2 inch Bosch Angle Grinder. Employee stated he was cutting a spanner nut for the CWP 1A pump when the cutting disc shattered. As he was pulling his hand towards him the cutting disc made contact with his right index finger sustaining a ½ inch abrasion through his cotton glove. Due to the discrepancies found with the grinder, it was taken out of service. Employee declined and signed the medical treatment form and standard first aid was administrated for his injury. No lost work days was incurred as a result of this injury.



VEHICULAR ACCIDENT/DAMAGE: One (1)
An employee from T&D was assigned to change out a meter at the Flora Pago Gardens Complex. After completing his assigned task he proceeded to reverse out of the parking stall and had made contact with a black Ford F-150. The F-150, License # ME 2070 sustain minor scratches, GPA Official #5045 is a White 2001 Ford Ranger Pick Up with no damage, assigned to T&D Meter Shop.

If you should have any question(s), please contact me at the Safety Office.

SPORD CCU Report

June 2018

SPORD FY 2018 Budget Status

- SPORD O&M:

SPORD FY 2018 Budget Status

- Major Contracts (Non-O&M) thru June 2018

	Annual Contract Amount	Actuals	Balance
Aggreko Contract	$ 10,983,096	$ 7,783,691	$ 3,199,405
Fuel Contracts	$ 218,241,844	$ 149,297,637	$ 68,944,207
MEC IPP (Piti 8&9)	$ 31,909,347	$ 23,883,468	$ 8,025,879
NRG Contract (Renewable)	$ 10,170,682	$ 7,239,644	$ 2,931,038

SPORD FY 2018 Budget Status

- DSM Expenses

Description	FY16	FY17	FY18 as of June 30	Total to Date
Regular/OT Pay	$11,348.80	$22,256.00	$17,423.89	$51,028.69
Other Contractual	$28,278.50	$73,010.05	$38,992.25	$152,820.80
Bank Fees	$155.00	$1,032.06	$315.00	1,502.06
Paid Rebates-Split AC	$154,700.00	$557,275.00	$854,875.00	$1,566,850.00
Paid Rebates-Central AC	$3,400.00	$8,200.00	$1,300.00	$12,900.00
Paid Rebates-Washer/Dryer	$2,800.00	$7,425.00	$20,000.00	$30,225.00
Total Expenses	$200,682.30	$669,198.11	$932,906.14	$1,815,326.55

Ongoing Activities

- Contract Performance Management (IPP, PMC, Agrekko)
- Generation Fuel Supply & Fuel Farm Management
- DSM Rebate Processing
- Renewables (Wind Turbine Maint & DOAg MOA, NRG Invoicing)
- Smart Grid/Network Support
- Project Management
  - Procurement
  - *June Project Activities*

PROCUREMENT ACTIVITIES

PENDING AWARD / NTP

Responsible	PROJECT	Description	CCU Date Approved (Resolution No.)	PUC Date Approved (Docket No.)	Projected Start*	Projected Completion	Status
SPORD (FJI)	RENEWABLES	Phase II - KEPCO/LG CNS	1/23/18 (2018-01)	(18-06)	4/30/2021	4/24/2046	Pending contract signature & ntp scheduled for July-Aug 2018
SPORD (FJI)	RENEWABLES	Phase II - Hanwha	2/27/18 (2018-04)	PENDING	8/15/2021	8/9/2046	Pending contract signature & ntp scheduled for July-Aug 2018

ONGOING PROCUREMENT

Responsible	PROJECT	Description	Bid or RFP	Bid/RFP No	Announced	Bid Opening / Due	Notes
SPORD (RAC)	SCADA	SCADA Workstations	Bid	GPA-049-18	2/13/2018	3/14/2018	Monitors Delivered - June 2018 Computer Systems Delivery Extenson to July 2018 requested by Vendor
SPORD (FJI)	NEW POWER PLANT	Geotechnical Services	RFP	Resolicitation GPA-RFP-18-002	(2/6/2018) 3/20/18	4/20/2018	Bid resolicited due to no proposals received in original solicitation.
SPORD (RAC)	SMART GRID	MV90 Integration Services	RFP	GPA-RFP-18-001	1/30/2018	3/6/2018	Negotiations Ongoing - June 2018
SPORD (RAC)	PLANNING	Milsoft Systems Software Services	RFP	GPA-RFP-18-003	2/1/2018	3/7/2018	Negotiations Ongoing - June 2018
SPORD (ANF)	FUEL	Petroleum Inspection Services	MS Bid	GPA-014-18	1/30/2018	5/2/2018	Evaluation/contract negotation ongoing - June 2018
SPORD (FJI)	NEW POWER PLANT	Build, Operate & Transfer Contract for 120-180MW of New Generation Capacity. **(PHASE I - REQUEST FOR QUALIFICATIONS)**	MS Bid	GPA-034-18	1/16/2018	4/5/2018	Step I - Closing of Qualifications. Notice of selection issued to all bidders. Total of 7 Qualified bidders selected.

ONGOING PROCUREMENT (continued)

Responsible	PROJECT	Description	Bid or RFP	Bid/RFP No	Announced	Bid Opening / Due	Notes
SPORD (ANF)	FUEL	Supply of Residual Fuel Oil No. 6	MS Bid	GPA-009-18	11/16/2017	5/25/2018 (Phase I) 7/26/18 (Phase II)	Phase I evaluation complete. Phase II Price Opening scheduled for 7/26/18.
SPORD (ANF)	FUEL	Supply of Diesel Fuel Oil No. 2	MS Bid	GPA-008-18	11/16/2017	7/27/2018 (Phase I) 8/27/18 (Phase II)	Bid specs changed to include delivery- awaiting final review by Fuel Committee and Legal. Phase I- Closing of Technical Proposal extended to July 27, 2018.
SPORD (JTL)	RENEWABLES	Renewable Energy Resource Phase III	MS Bid	GPA-007-18	11/16/2017	10/4/2018	Step I - Closing of Technical Proposal
SPORD (RAC)	SMART GRID	Mobile Workforce Management System (MWMS) **RE-BID**	MS Bid	GPA-023-17	10/5/2017	3/20/2018	Procurement processing Purchase Order - June 2018
ENGINEERING	FUEL	GPA Tank Farm RFO Pipeline Upgrade - Design / Build	Bid	GPA-047-18	2/8/2018	9/30/2018	To repair existing RFO lines at the Bulk Fuel Farm

DEVELOPING PROCUREMENT

Responsible	PROJECT	Description	Bid or RFP	CCU Meeting	Projected Start	Projected Completion	Status
SPORD (MAT)	IPP Contract	Piti #8&9 IPP Contract	MS Bid				PENDING. Extension of current ECA approved by CCU and under PUC review. Bid document preparation for a new contract in-progress.
SPORD (FJI)	NEW POWER PLANT	Build, Operate & Transfer Contract for 120-180MW of New Generation Capacity. **(PHASE II - TECHNICAL SPECIFICATIONS)**	MS Bid				Pending final bid documents.
ENGINEERING	FUEL	GPA Tank Farm DFO Pipeline Upgrade - Design / Build	Bid		2/8/2018	11/30/2018	Preparation of bid specs in progress. To install new diesel line from Navy Tie-in to the Bulk Fuel Tanks and replace diesel line to TEMES CT
ENGINEERING	FUEL	Tank 1935 API 653 Internal Inspection	Bid		5/1/2018	5/31/2019	Preparation of bid specs in progress. Budgeted for FY 2018.
ENGINEERING	FUEL	OWS Upgrading	Bid		5/1/2018	5/31/2019	Preparing IFB bid specs.
ENGINEERING	FUEL	LD System Upgrading	Bid		5/1/2018	5/31/2019	Preparing IFB bid specs.
SPORD (RAC)	ELECTRIC VEHICLE	Electric Vehicle Charging Stations	Bid		Jul-18	Sep-18	Developing Specifications
SPORD (RAC)	SCADA	DNP3 SA training	RFP		Jul-18	Dec-18	Developing RFP
SPORD (RAC)	ELECTRIC VEHICLE	Electric Vehicle Infrastructure	RFP		Aug-18	Dec-18	Developing RFP
SPORD (RAC)	STUDIES	Consulting Services for Distribution Study using Smart Grid Analytics	RFP		Jul-18	May-19	Procurement Processing Documents
SPORD (RAC)	SMARTWORK SYSTEMS	Smartworks Systems Software Services	RFP		Aug-18	Continous	Developing RFP

Project Activities

No.	Project Description	June 2018 Activities	Status / Est. Completion	RFP/Bid No
1	Energy Storage System (Phase I)	GPA reviewing revised 100% design. Clearing and grading permit work commenced in November 2017. Foundation permit work commenced in January 2018. Construction is 32% completed.	September 2018 (Schedule is being updated)	MS Bid GPA-082-15
2	Renewable Energy Resource Phase II	PUC ratifies KEPCO contract (Docket 18-06) and approves HANWHA contract (Docket 18-08) on March 29, 2018. Projected signing dates are end of July or early August 2018.	KEPCO PV plant COD is APR 2021. Hanwha's COD is anticipated for 1st qtr of 2020.	MS Bid GPA-070-16
3	New Power Plant Bid (EPCM)	RFQ	Apr 2018 (	MS GPA-034-18
4	DSM Marketing	Supported the 2018UOG Sustainability Conference at the Hyatt.	Continuous	
5	DSM Rebate Program	Processed over 540 equipment in applications for rebates totaling ~ $117K	Continuous	
6	Wireless Network Expansion	Commenced Southern Expansion in collaboration with GWA: 30% Assessment of GWA Well Locations: Completed Assessment of Existing Tropos Units: 100% Router Equiqment and Accessories purchase Routers programming	Dec-18 Completed Completed Received routers - May 2018 Completed - June 2018 Accessories - May 2018	GPA-019-18
7	Performance Metrics Automation Project	Presentation on iDashboard provided to GM. GPA contiues to work with consultant on automating reports and formating.	Mar-18	
8	Electric Grid Analysis Software	Additional training for users Training on Planning and Analysis Cases	Completed Jul-18	GPA-064-16
9	Services to Develop Business Performance Indices using iDashboards	Dashboard builds 95%	Ongoing	GPA-RFP-16-008

Project Activities

No.	Project Description	June 2018 Activities	Status / Est. Completion	RFP/Bid No
10	Supervisory Control and Data Acquisition (SCADA) System	Change Order Approved for October 2018 Completion and hardware costs Factory Acceptance Test	Oct 2018 (SCADA COD) June 2018 (Factory Acceptance Test Completed)	GPA-066-16
11	Mobile Workforce Management System	Bid Evaluation Completed, Clevest recommendation memo submitted for approval March 21, 2018 Purchase Order being Processed	May 2018 (Bid Award) June 2018	GPA-023-17
12	Consulting Services for Smart Grid Analytics Enabled Distribution System Planning, Technical, and Economic Feasibility Studies	RFP evaluation completed for sole bidder. Bidder did not qualifiy. Committee recommendation to rebid. Sole-bidder Acknowledgement. Rebid Documents process by PMM	July 30, 2018 (Rebid) June 2018	RFP-17-005
13	TEMES Piti # 7 ECA Expiration & Transition to GPA	Transition completed. Environmental Assessment Report & Condition Assessment Report completed. Reports provided to Executive Management and Key Managers.	[Completed] [Completed] [Completed]	RFP-17-002
14	MEC Piti &8 and #9 - ECA Expiration	Environmental Assessment Report completed. Condition Assessment past due from Consultant.	[Completed] OVERDUE	RFP-17-002
15	MEC Piti &8 and #9 - ECA Extension	CCU approval received. PUC approval received, pending review of contract amendment. Amendment discussions w/ MEC on-going.	[Completed] In progress	
16	Generation Software (GADS open software)	Pending data entry from Generation & SPORD.	[On-going work]	
17	IFB for ULSD Supply for Baseloads and Peaking Units	Solicitation in progress. Bid package revised to include delivery requirements.	Start Date: Nov 2017 Est. completion: FY2018	IFB GPA-008-18
18	Contract for Lease of Bulk ULSD Storage	196KB tank repairs completed	27-Feb-18	TTGI-SA-2018-001

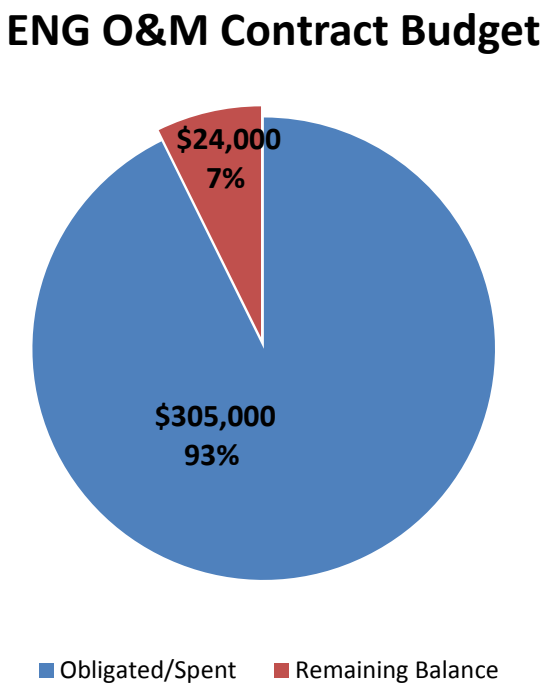
Project Activities

No.	Project Description	June 2018 Activities	Status / Est. Completion	RFP/Bid No
19	EV Infrastructure	Fast charge station scope for Mangilao offices. Developing fast charge station scope for Mangilao offices.	Dec 2018 June 2018	
20	Consulting Support, new procurements for Piti 7,8,9	Piti 7 - Management Contract (under Generation) awarded. No IPP bid. Piti 8&9 - Bid documents in progress, awaiting decision on Extension of ECA. If extended - will revise bid scope accordingly; if extension disapproved, will proceed with filing for approval of Bid.	[Commenced] Bid documents completion: June 2018 Bid Process Start Date: 3rd quarter of 2018 if Extension Not Approved	
21	Fuel Conversion Plan	Discussions on-going; additional budget needed. New Scope: Additional Support as Owner's Engineer	[On-going work, 6/2018 deadline] [thru FY 19 and 20, if approved]	
22	Fuel Bulk Storage Facility Assessment	ESA past due, pending approval from GPA CA past due, pending from Leidos	Start: Sept 2017 End: June 2018	
23	Renewable Energy Resource Phase III	Completed pre-bid conference and site visits January 23-24 2018.	(Mar 2018) Tech Proposal Due	
24	Utility Energy Services Contract (UESC)	Kicked off discussions with UOG, Guam Energy Office, Dept. of Navy, and GPA team on project development and opportunities. Discusssed DSM Model House. UOG Campus Assessment, Discussion on Solar Rooftop on DOE campuses.		
25	IFB for Delivery Services for GPA Plants	Bid canceled. Requirements to be included in the ULSD Supply solicitation	IFB Canceled Feb 2018	IFB GPA-006-18
26	IFB for RFO Supply to Baseload Plants	Solicitation in progress. Note: PUC approves 3-month extension of existing contract on June 26, 2018.	Start: November 2017 Est. Completion: FY2018 Contract Start: Sep 1, 2018	IFB GPA-009-18
27	IFB for Petroleum Inspection Services	Re-Solicitation in progress	Start: November 2017 Est. Completion: FY2018 Contract Start: Jun 01, 2018	IFB GPA-014-18

Project Activities

No.	Project Description	June 2018 Activities	Status / Est. Completion	RFP/Bid No
28	RFO Storage Lease Agreement w/ Tristar	4-Year Lease extension Approved by CCU. Disapproved by PUC - requested for clarification on Index referenced. (Docket 18-10)	Start: November 2017 Est. Completion: May 2018 Contract Start: Aug 1, 2018	TTGI-SA-2013-001
29	GPA Fuel Farm RFO Pipeline Repair & Upgrade	c/o Engineering Project Mgt	Solicitation in progress (for award) Est. Completion: FY2019 (1st Qtr)	IFB GPA-047-18
30	GPA Fuel Farm ULSD Pipeline Upgrade	c/o Engineering Project Mgt	Estimated Start: Oct 2019 Est. Completion: Sep 2019	For IFB Solicitation
31	Tk 1934 & Tk1935 API 653 Internal Inspection	c/o Engineering Project Mgt	Estimated Start: Jun 2018 Est. Completion: FY2019	For IFB Solicitation
32	Milsoft Systems Software Services	Negotiations - June 2018	Continuous	GPA-RFP-18-003
33	MV90 Integration Services	Negotiations ongoing - June 2018	Dec-18	GPA-RFP-18-001
34	SCADA Workstations and Monitors	Award Recommendation memo for approval submitted 3/27/2018	June 2018 (Monitors Delivered) July 2018 (Computer Systems Delivery)	GPA-049-18
35	Grant Proposal Development and Proposal Application Management Services	GPA submitted a grant request for the Department of Interior funding opportunity which includes partnered projects with GDOE(Best Schools Program), Public-Access Parking Lot Solar Canopy, Demand-Side Management Expansion, Electric Vehicle (EV) Infrastructure, Employees-Access Parking Lot Solar Canopy, Wind Turbine Battery Storage, and Geothermal Studies and Exploration.	Feb 2018 (Contract signed)	Re-Solicitation GPA-RFP-16-011
36	Pipeline Lease Agreement w/ Tristar	4-Year Lease extension Approved by CCU. Disapproved by PUC - requested for clarification on Index referenced. (Docket 18-10)	Start: November 2017 Est. Completion: May 2018 Contract Start: Aug 1, 2018	TTGI-PA-2013-001

Project Activities



No.	Project Description	June 2018 Activities	Status / Est. Completion	RFP/Bid No
37	Dock Use Agreement w/ Tristar	4-Year Lease extension Approved by CCU. Approved by PUC on March 29, 2018. (Docket 18-10)	Start: November 2017 Est. Completion: Mar 2018 Contract Start: Aug 1, 2018	TTGI-DA-2013-001
38	Redesignation of Cabras-Piti / Guam	Re-designation received 12/2018. TRC standing by to assist GPA w/ State Implementation Plan, pending P&R review of Task Order. AAQM Installation/Implementation on hold, will depend on USEPA approval of SIP after submission on/before July 2019	Start: October 2011 Est. Completion: July 2019 *Submitted to EPA by completion date	RFP-11-001
39	Environmental Strategic Planning	Commenced discussions for update of 2012/2013 ESP.	Start: April 2018 Est. Completion: December 2018	RFP-11-001
40	GPA Fuel Farm- OWS Upgrading	c/o Engineering Project Mgt	Estimated Start: Jun 2018 Est. Completion: FY2019	For IFB Solicitation
41	GPA Fuel Farm- LD System Upgrading	c/o Engineering Project Mgt	Estimated Start: Jun 2018 Est. Completion: FY2019	For IFB Solicitation

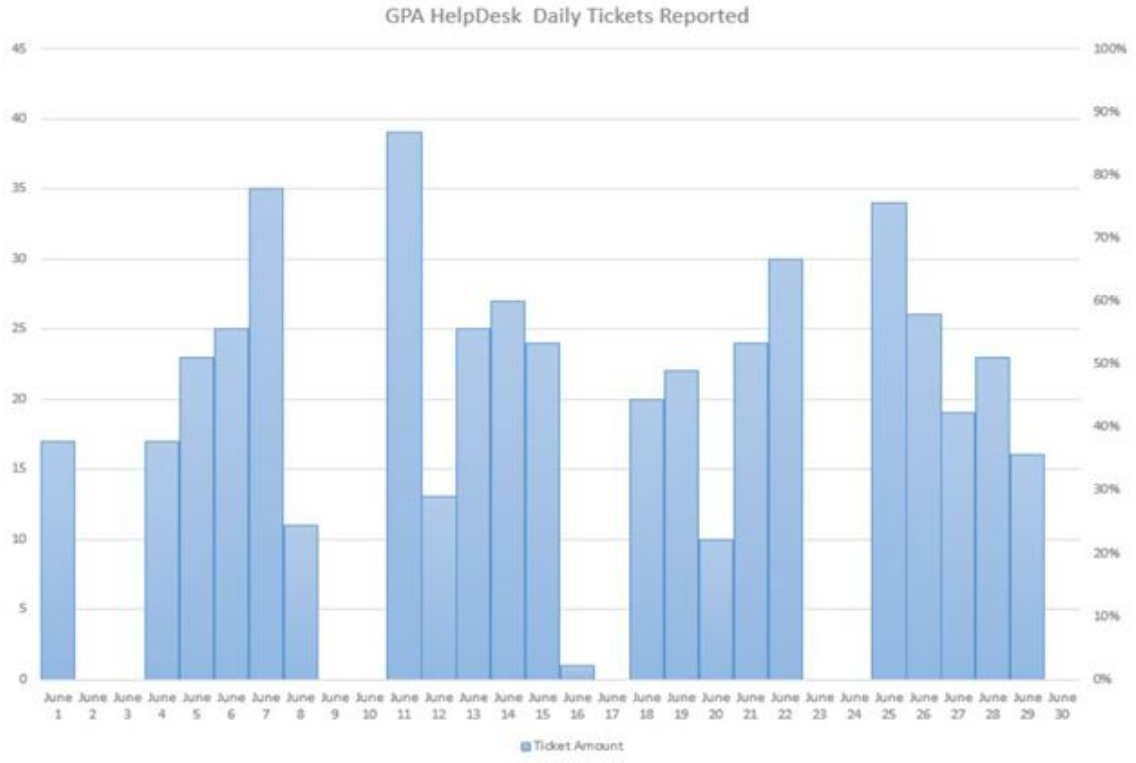
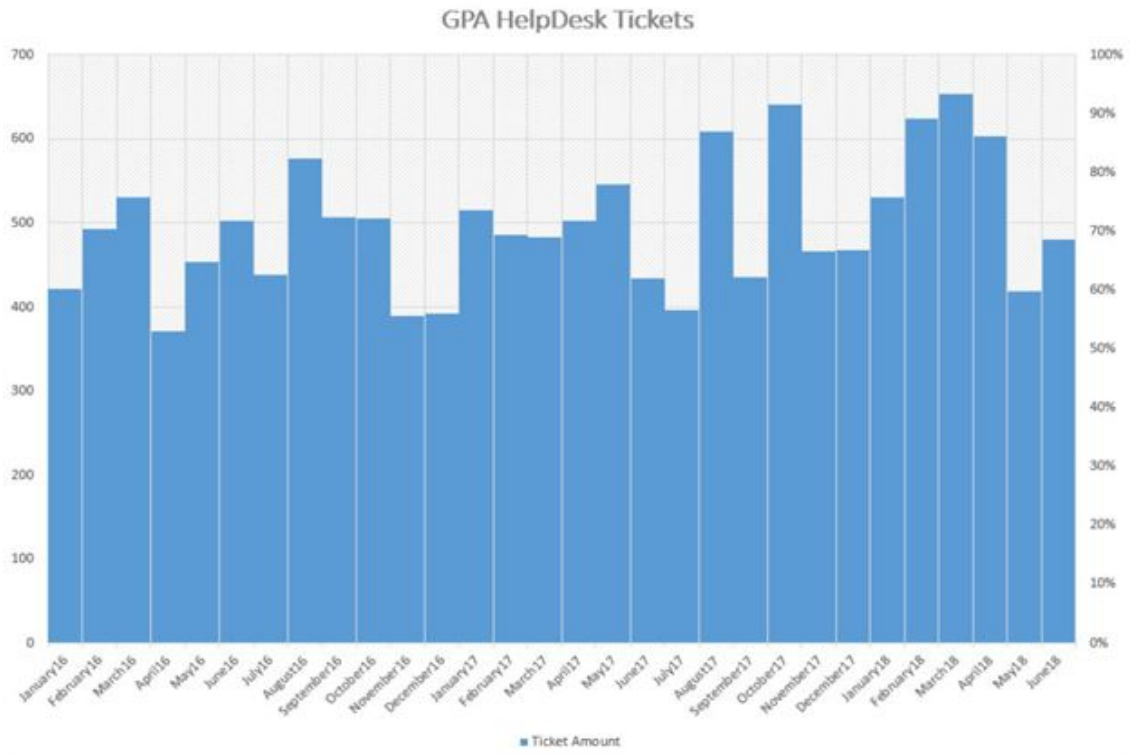
GPA INFORMATION TECHNOLOGY

June 2018



SUMMARY:

The Information Technology Department continues to improve services, monitoring processes and system infrastructure utilization as guided by Cyber-Security initiatives and regulatory compliance. We strive and continue to improve all areas. Computer Services continues to seek new technology with networking, system access and utilization. We also strive to meet target levels of uptime, to include the IBM i-Series AS400, Virtual Machine environment, (VMware V-Sphere), (Blade Servers and Disk Array Storage), and Physical Servers, (non-Virtual Machines).

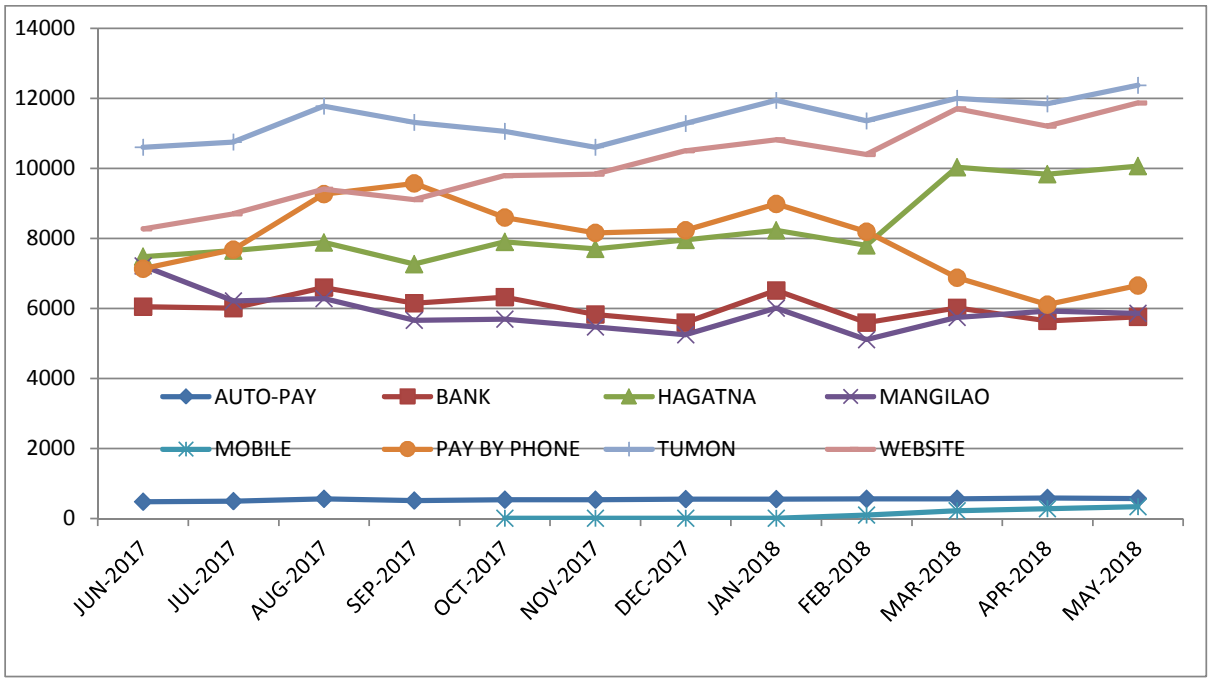


INCIDENT CALL SUMMARY:

The significance to record and utilize the Helpdesk Incident Handling Tool (ChangeGear) is to manage, track and measure workloads and assignments of customer reported IT incidents. The tracking of incidents is paramount. Measurements will be used for IT Customer Feedback survey in the future.

June 2018 TICKETS

22 MONTH COMPARATIVE



For June 2018, Computer Services responded to 481 help desk calls from GPA internal and external customers. Breakdown as follows:

CLOSED TICKETS

MAJOR APPLICATION ISSUES FOR JUNE 2018

1. ORACLE CUSTOMER CARE & BILLING
   No system issue reported.

2. LANDIS & GYR AMI METERS (SMART METERS)
   No system issue reported.

3. ORACLE JDE
   No system issue reported.

4. METER DATA MANAGEMENT SYSTEM (MDMS)
   No system issue reported.

5. SHORETEL VOIP PHONE SYSTEM
   No system issue reported.

6. EMAIL EXCHANGE SERVER
   No system issue reported.

7. ONLINE PAYMENT SYSTEM (PAYGPA.COM)
   No system issue reported.

8. GEOGRAPHIC INFORMATION SYSTEM (GIS)
   No system issue reported.

9. MILSOFT OUTAGE MANAGEMENT SYSTEM (OMS)
   No system issue reported.

10. ADVANCED GRID ANALYTICS (AGA)
    No system issue reported.

11. ORACLE BUSINESS INTELLIGENCE REPORTING
    No system issue reported.

12. Mobile APP Payment Program
    No system issue reported.

ONGOING PROJECT UPDATES:

SMS Emergency Outage Notification: Project to provide SMS text alerts for Emergency Outages notification for customers and emergency response agencies. Awaiting next steps from operations. In testing process at the moment with PSCC.

Pay by Phone Project: Working with vendor for Pay by Phone system to allow customers to call after hours and make automated payments to their GPA account. Changes to the call script and ongoing testing.

Customer Care & Billing (CC&B) Upgrade: Upgrade of the current Oracle CC&B program from version 2.4 to version 2.6. The current version of CC&B 2.4 will be end of life by Sept. 30, 2017 and support thereafter will be limited. Expected completion by September 2018.

Disaster Recovery- Cloud Solution: Project to turn up a backup site on the Oracle Cloud for GPWA's CC&B Application. The Oracle Cloud service has been provisioned and backup replication is online. Completed as of June 15 with full backup of CC&B being replicated to the Oracle Cloud.

Disaster Recovery Site: Project to procure a Disaster Recovery (DR) site to provide redundancy for critical GPA applications and databases in case of disruption of the primary Fadian Data Center. Incorporating GWA requirements into proposal.

Physical Security: Project to provide additional surveillance monitoring for Fadian, T&D, Dededo CT and Transportation Warehouse. IFB has been reviewed and awarding of project is pending.

GPWA Website Upgrades: Project to revamp GPA and GWA websites for the following, GUAMPOWERAUTHORITY.COM, PAYGPA.COM, GUAMWETERWORKS.ORG and PAYGWA.COM. RFP Responses has been reviewed and awaiting clarification of proposals.

Oracle CHAT-BOT: Project to provide Oracle Chat Bot services to GPA's PAYGPA.COM, Mobile APP and Facebook Program. This will allow customers to utilize a CHAT program to make inquiries to frequently asked questions and inquiries on their account. Project has been awarded and expect project to start by July 2018.

Landis & Gyr Command Center upgrade from ver. 6.5 to 7.2: Project to upgrade GPA AMI Smart Meter Program to the latest version of 7.2. This will allow new functionality for the Command Center and Smart Meter Integration. Expected completion by August 2018.

Engineering Large Customer and Net Metering Tracking

Date Received	Customer Name	Work Worder Numbers	Location	KVA	Meter Qty	Status
5/7/2014	Port Authority of Guam	412337	Piti			Upgrades of existing facilities, includes line relocations and service conversions from overhead to undergrounc 75% completed. Currently on hold pending Port Authorty direction for final removal.
12/20/2013	CoreTech International	Multiple	Dededo	300	64	Lada Estates, 450 kVA, Phase I and II are 100% Completed - 242 units energized. Phase III, 66 Units, 2 completed, 64 Pending, 30% Completed, 300 kVA. Phase III delayed due to Labor issues.
1/27/2015	TG Engineers	422182-85, 90-93, 96-98	Agana Heights	100	11	10 Unit Apartment, 100 kVA, 80% Completed. Work currently on hold.
5/13/2015	CoreTech International Towers	426021	Tamuning	3300	1	New condominiums, 2-1500kVA and 1 300 kVA, Tower 101 100% Completed, Tower 102, 103, and 104 are 45% completed, currently on hold. Temporary power pending for Community Center, 100% Completed. First 52 Service Orders for Tower 101 is 100% completed.
5/11/2016	Korando Corp (DPW Bile Pigua Bridge)	437716	Merizo			Bile and Pigua Bridge Reconstruction - 100% Completed, Route 25/26 Road Widening. Pending submission of final acceptance documents.
12/9/2016	Maeda Pacific	443952	Harmon			Route 1 and Route 3 road improvements - 100% completed, involves new underground 34.5kV and 13.8kV lines and the removal of overhead ples and lines. Pulling of wires intiated 10/9/17. Final Termination and testing Completed. Energizing of new underground 13.8kV and 34.5 kV lines completed. Pending return of materials and completion of minor punchlist items..
Pending	New Nikko Expansion	Pending	Tumon	1500		New Nikko Expansion, pending submittal of work order application. Redesign of primary feed ongoing. New primary underground work was started in May 2018.
3/10/2017	Best Housing Corp Ltd	446924-30	Mangilao	60	6	New 6-Unit Townhome, 80% completed
6/1/2017	GWA Pump Stations 2 and 3	450278-9	Santa Rita	150	2	New GWA Pump Stations. 100% Completed released to T&D.
8/7/2017	Matsumoto, Akiyoshi	452146-49, 51, 4, 6	Tumon	60	7	New 6 Unit Apartment with Common Meter. 60% Completed.
10/2/2017	Sumitomo Mitsui (Baza Gardens Waste water)	453369	Yona	300	1	Baza Gardens Wastewater Treatment Plant Improvements, 75% Completed, 300 kVA
1/9/2018	Baluyut, Isaganio B	456406, 7	Yigo	225	1	New McDonalds Restaurant Yigo, 90% Completed 225 kVA
02/13/18	TNN Guam (Staff Housing)	457427-9, 32	Tumon	500	1	50 Unit Staff Housing, 20% Completed, 500 kVA
02/27/18	Propacific Builders (GCC)	457959, 60	Mangilao	150	0	New GCC Building 100, 85% Completed, Existing meter and source, New Switch Gear Only
3/1/2018	Docomo Pacific Inc., New Data Center	Pending Application	Talafofo	3000	1	New Data Center. Planned to come off P-260 and P-262. 0% Completed. Still in Design Phase.
3/1/2018	KUAM	Pending	Chalan Pago			GPI to reroute poles to existing easement. Requires the ground clearing of an existing easement.
3/7/2018	Navy PV Sites					Pending final coordination with Surveyor and Navy approval
3/8/2018	Harmon Power Plant					Pending final Clearing permit from DPW. Clearing required along perimeter (10' x 6655 feet) to recover retrace boundary points.
03/12/18	Pernix Guam, LLC (GWA)	458313	Yigo	150	1	New GWA Water Reservoir, 90% Completed, 150 kVA
04/01/18	HG Northeast Inc	459085	Mangilao	100	14	New 14 Unit Subdivision, 5% Completed, 100 kVA, Pending Applications
4/30/2018	Rex International	459698	Sinajana	225	1	New Central Police Precinct, 30% Completed, 225 kVA
2/28/2018	Black Construction (Route 3 Road Improvements)	458020	Dededo			Route 3 Road Improvements. Involves the relocation of upto 54 ea. 45' concrete poles. 25% Completed.
05/12/18	Bestry Corporation	450085		500	8	Hamilton Hotel Renovation and Rehabilitation, 8 Meters, 85% Completed, 500 kVA
06/06/18	Goodwind Development Corporation	461159		225	1	New JolliBee Restaurant, 25% Completed, 225 kVA
06/14/18	Guam Waterworks Authority	461363		300	1	New Umatac-Merizo Wastewater Treatment, 10% Completed, 300 kVA

Planning & Regulatory CCU Report

June 30, 2018

Planning & Regulatory O&M Contract Budget

- Revenue Funded
- Target
  - 7.41% O&M Obligated by November 16, 2017
  - 19.28 O&M Obligated as of Nov. 30, 2017 (actual)
  - 19.36 O&M Obligated as of Dec. 31, 2017 (actual)
  - 25.60 O&M Obligated as of Apr. 30, 2018 (actual)
  - 36.72% O&M Obligation by June 30, 2018 (actual)
  - 54.31% O&M Obligation by July 31, 2018
  - 65% O&M Obligation by Aug. 30, 2018

P&R Weekly & Monthly Inspection Reports

- Best Management Practices (BMP) Report Summary [Weekly]
- Generation Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]
- T&D Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]

- GPA is responsible to employees, the island environment, and the community to take all reasonable steps necessary to prevent spills from its facilities in order to protect human health and the environment

P&R Inspection Report Purpose

- The purpose of these inspections is to catch discrepancies and violations internally and correct them before inspections by Guam EPA and US EPA
- Regulatory Agencies can conduct scheduled or un-scheduled (surprise) inspections any time
- Any major discrepancies or violations cited can lead to issuance of a Notice of Violation (NOV), possible fines, and/or other enforcement action
- P&R conducts routine SPCC inspections in compliance with the requirements of 40CFR 112.7(a)(3)(ii), Discharge Prevention Measures

FINANCIAL STATEMENT OVERVIEW
May 2018

Attached are the financial statements and supporting schedules for the month and fiscal year ended May 31, 2018.

Summary
The increase in net assets for the month ended was $1.5 million as compared to the anticipated net increase of $0.9 million projected at the beginning of the year. The total kWh sales for the month were 3.41% less than projected and non-fuel revenues were $0.6 million less than the estimated amount. O & M expenses for the month were $5.9 million which was $0.5 million less than our projections for the month. Other expenses for the month such as interest expense, IPP costs, (net of interest income and other income) totaled to $3.6 million, which was $0.4 million less than the projected amounts. There were no other significant departures from the budget during the period.

Analysis

Description	Previous Month	Current Month	Target
Quick Ratio	2.75	2.95	2
Days in Receivables	38	41	52
Days in Payables	22	21	30
LEAC (Over)/Under Recovery Balance -YTD	$13,005,690	$10,642,841	$12,413,898
T&D Losses	4.91%	4.90%	<7.00%
Debt Service Coverage	1.80	1.80	1.75
Long-term equity ratio	16%	17%	30 – 40%
Days in Cash	185	175	60

The Quick Ratio has been a challenge for GPA historically. However, over the last two fiscal years, the influx of cash from insurance proceeds continued to improve this ratio. GPA has current obligations of approximately $62 million and approximately $182 million in cash and current receivables. Debt Service Coverage ratio is calculated using the methodology in use before the Fiscal Year 2002 change in accounting practice.

Financial Statement
May 2018
Significant Assumptions

The significant assumptions in the financial statements are as follows:

- Accrual cutoff procedures were performed at month end
- An inventory valuation is performed at year-end only
- Accounts Receivable includes accruals based on prior months' usage.

Issues for Decision

Resolution No. 2018-16:

Relative to: Authorizing the Management of Guam Power Authority to Award the Contract for the Supply of Residual Fuel Oil No.6 to **Mobil Oil Guam**.

What is the project's objective? Is it necessary and urgent?

The Guam Power Authority's current contract for Supply of Residual Fuel Oil No.6 for the Baseload Plants is expiring in November 30, 2018. The new fuel supply contract is necessary to provide uninterrupted supply of fuel for the Baseload plants.

Where is the location?

Residual Fuel Oil No.6 will be supplied to the baseload plants

1. Cabras 1&2
2. MEC 8&9

How much will it cost?

The 2-year contract is estimated to cost approximately $230M requiring prior approval from the PUC.

When will it be completed?

The contract is planned for an initial period of two (2) years to commence on or about December 01, 2018 and to expire on November 30, 2020, with the option to extend for three (3) additional one-year terms.

What is its funding source?

Fuel revenue funds

The RFP/BID responses:

Five bidders responded to the solicitation under IFB GPA-009-18. **Mobil Oil Guam** was determined to the the lowest responsive and responsible bidder.

RESOLUTION NO. 2018-16

AUTHORIZING THE MANAGEMENT OF THE GUAM POWER AUTHORITY TO ENTER INTO A TWO YEAR CONTRACT FOR THE SUPPLY OF RESIDUAL FUEL OIL NO.6

WHEREAS, GPA's current contract extension with Hyundai Corporation for the supply of Residual Fuel Oil No.6 (RFO No. 6) is expiring in November 30, 2018; and

WHEREAS, in anticipation of this expiration date, GPA was authorized by the CCU under CCU Resolution No. 2017-40 and approved by the PUC under Docket 18-01 to issue bids for the procurement of a new residual fuel oil supply contract; and

WHEREAS, the Procurement Officer has provided adequate public announcement for the need for such fuel supply services through Invitation for Re-Bid No. GPA-009-18 describing the type of services required and specifying the type of information and data required of each offeror; and

WHEREAS, Hyundai Corporation, Mobil Oil Guam, Hanwa Corporation, Freepoint Commodities (LLC), and Vitol Inc., submitted bids for GPA consideration; and

WHEREAS, the results and evaluation of the bids are provided in Exhibits A, B, and C; and

WHEREAS, Mobil Oil Guam was determined to be the lowest, most responsive bidder meeting the requirements of the bid solicitation; and

WHEREAS, the average Fixed Premium Fee for Mobil Oil Guam of $54.700/MT (8.614/bbl) is approximately 3% higher than the current contract average Fixed Premium Fee of $53.090/MT ($8.361/bbl) as shown in **Exhibit B.** The estimated Fixed Premium Fee cost based on estimated supply quantities has a value of approximately $15,728,580.00 for the first year and $18,480,300.00 for the second year for a total of $34,208,880.00 for the two-year contract base period. The estimated cost increase in Fixed Premium for the 2-year period is approximately $1,006,879.00; and

WHEREAS, the Residual Fuel Oil No.6 Supply Contract with Mobil Oil Guam shall be for a period of two years and is anticipated to commence in December 1, 2018 and expire in November 30, 2020 with three one-year extension options renewable annually upon mutual agreement of both parties; and

WHEREAS, the award of the contract to Mobil Oil Guam based on estimated supply quantities has a value of approximately $113,345,841.00 for the first year and $116,097,561.00 for the second year for a total of $229,443,402.00 for the two-year contract period (**Exhibit C**).

NOW THEREFORE, BE IT RESOLVED, by the Consolidated Commission on Utilities, subject to the review and approval of the Guam Public Utilities Commission, as follows:

1. The General Manager of the Guam Power Authority is hereby authorized to enter into a two (2) year contract with Mobil Oil Guam for the supply of Residual Fuel Oil No.6.

2. The General Manager of the Guam Power Authority is hereby authorized an increase in obligating authority to the annual value of the contract and execute such agreements and documents necessary for a contract with **Mobil Oil Guam**.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

DULY and REGULARLY ADOPTED this 28th day of August 2018.

Certified by: **Attested by:**

JOSEPH T. DUENAS
CHAIRMAN

J. GEORGE BAMBA
SECRETARY

SECRETARY'S CERTIFICATE

I, **J. George Bamba**, Board Secretary of the Consolidated Commission on Utilities as evidenced by my signature above do hereby certify as follows:

The foregoing is a full, true and accurate copy of the resolution duly adopted at a regular meeting by the members of the Guam Consolidated Commission on Utilities, duly and legally held at a place properly noticed and advertised at which meeting a quorum was present and the members who were present voted as follows:

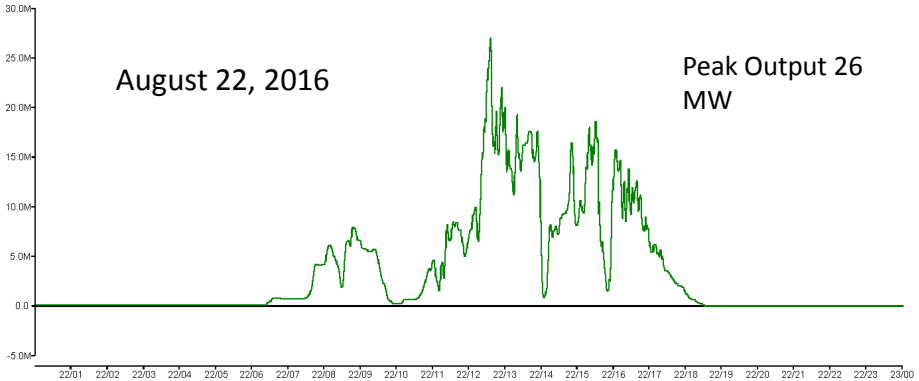
** LSFO supplied by the USN/PWC under Customer Service Agreement.

ISSUE FOR DECISION

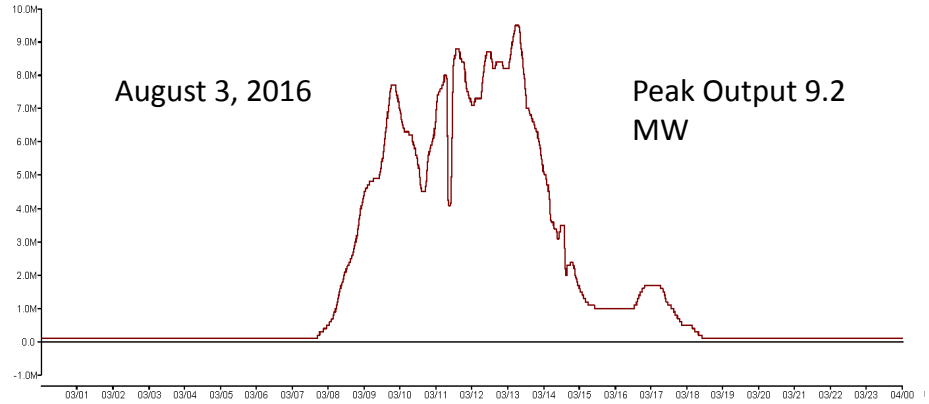
Net Metering (NEM) Credit Recommendation

OVERVIEW – NET METERING POLICIES

- Thirty Eight (38) States, Washington D.C., and Four (4) Territories Offer Net Metering and utilities in two additional states (Idaho and Texas adopted Net Metering (Full Retail Credit).
- Arizona, Georgia, Hawaii, Indiana, Maine and Mississippi have compensation other than net metering.
- The Value of Solar (VOS) is an alternative to net metering. Customers buy from the grid at retail rate and sell to the grid at an established VOS rate. Only Minnesota and Austin Energy (Texas) has adopted a VOS rate.

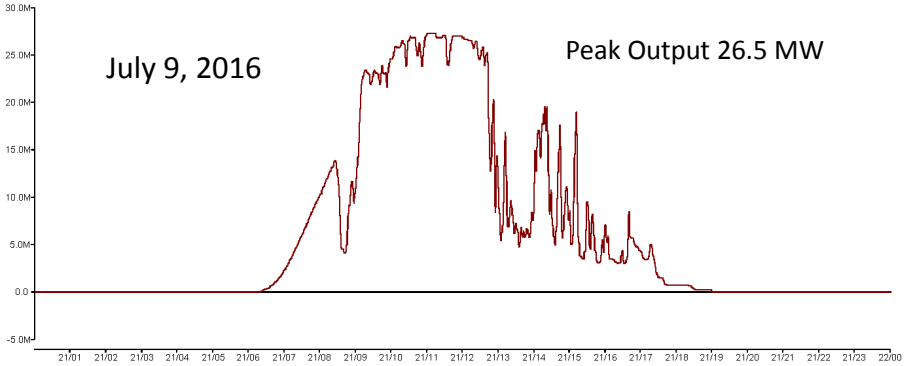


Source: National Council of State Legislatures: 11/20/17



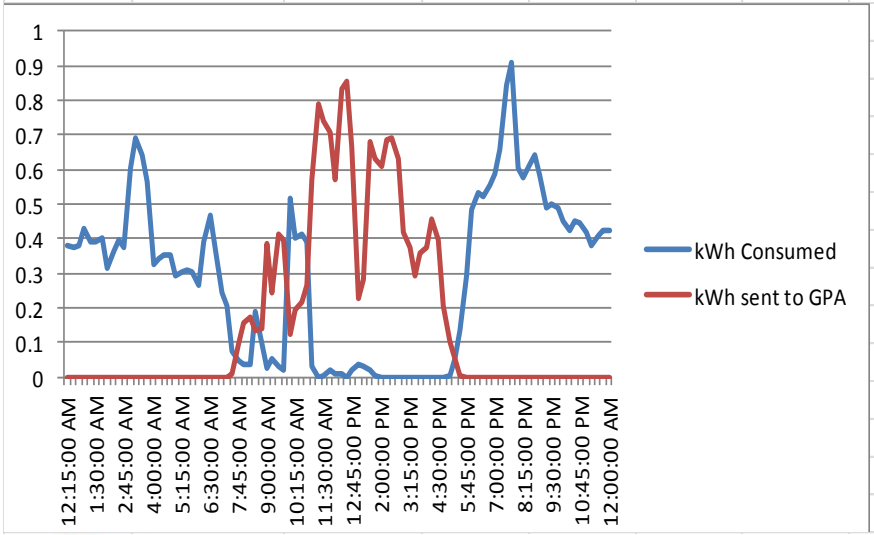
Guam NEM Program

- Program Mandated in 2004. Guam has been crediting NEM customers full retail rate over the past 13 years. Excess credit carried over or paid out annually at full retail rate.
- PUC to evaluate program and credits provided when GPA has 1,000 NEM Customers which occurred in June 2016.
- As of July 2018, GPA has 1,733 NEM Customers (94.7% Residential), with 18,315 KW of capacity. The revenue impact on non-NEM ratepayers is estimated at $3.4M annually.
- CCU/GPA conducted its first public hearing on NEM in August 2016 to gather input from stakeholders in order to prepare its filing to the PUC for changes in rate credits in order to achieve parity amongst all ratepayers.

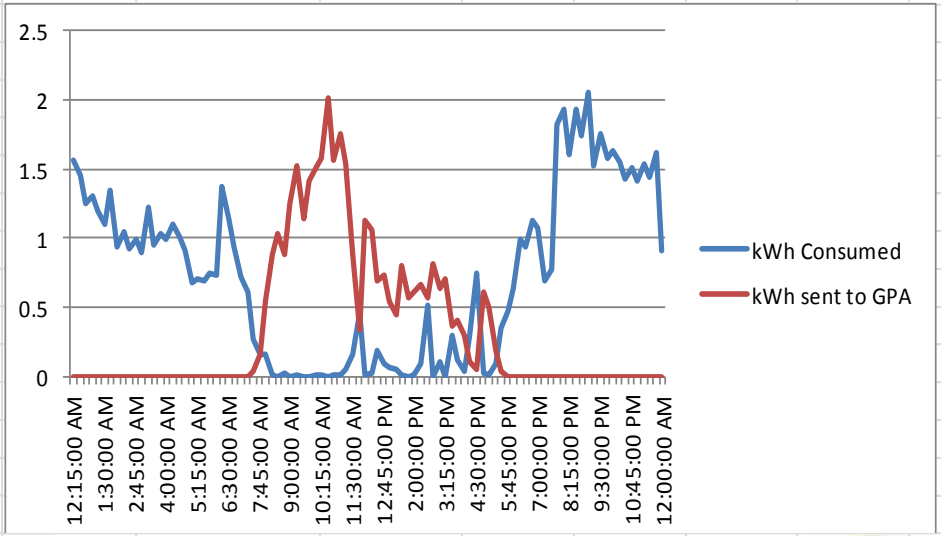


Solar PV Energy Production Characteristics

Utility Scale PV Output Look Like This …



NEM does not eliminate need for capacity

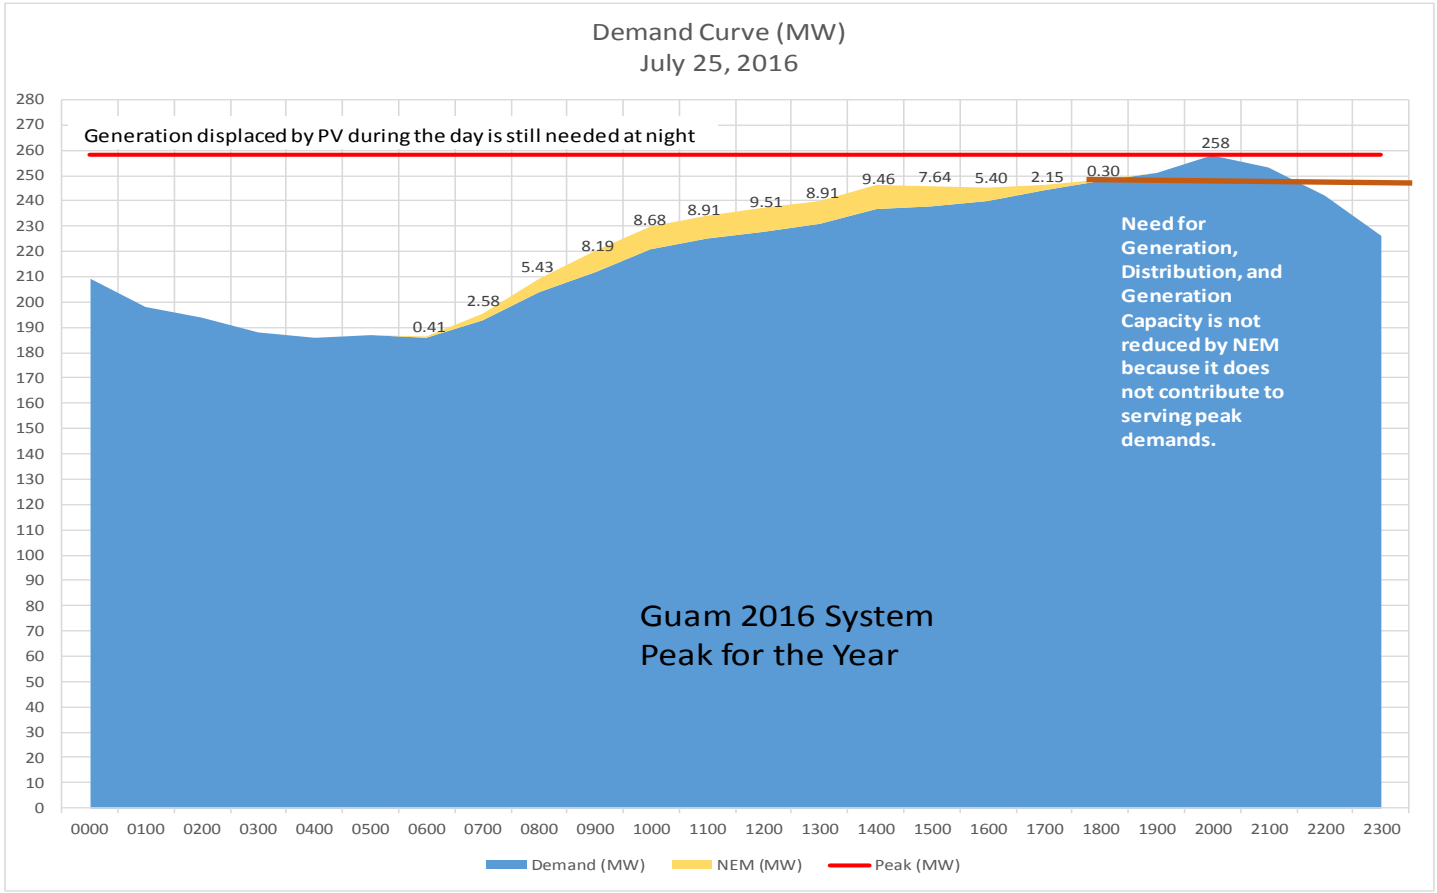


PV without adequate storage is not a capacity benefit. It is an energy benefit.

NEM Customer Profiles

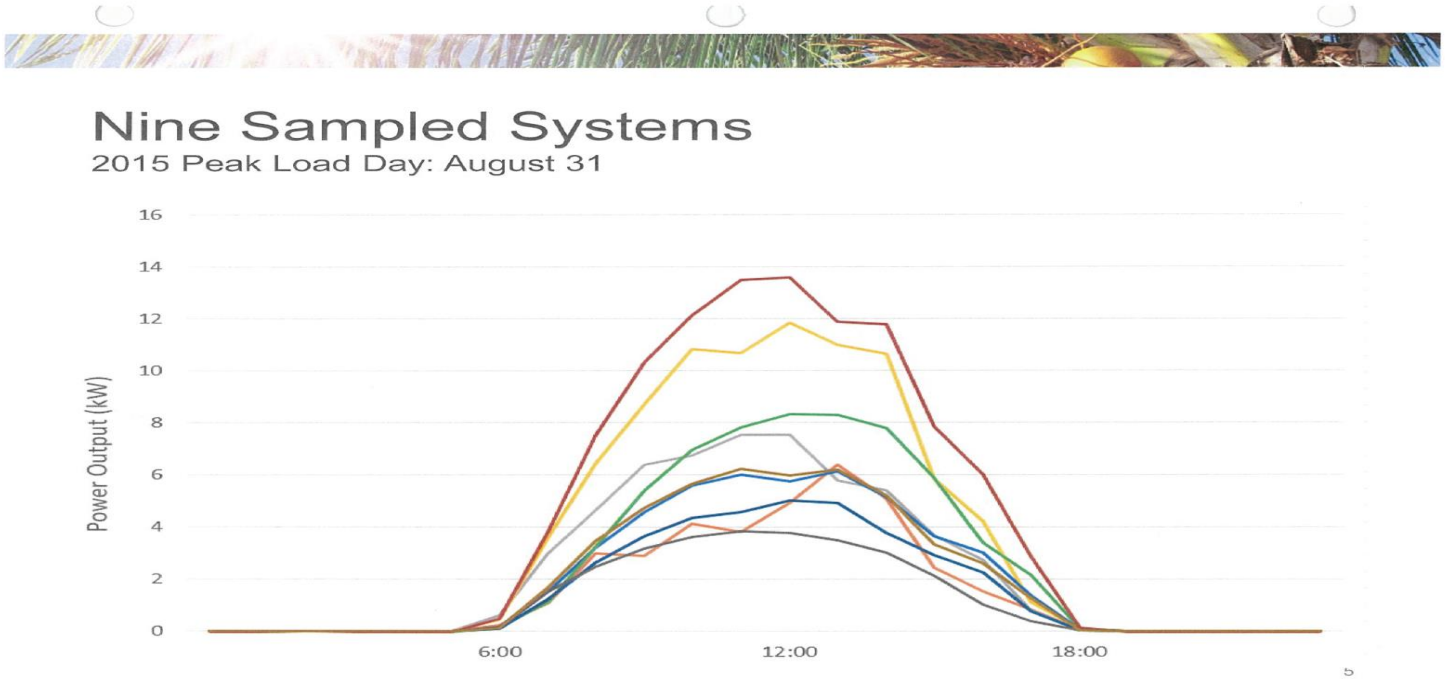
Date:	14-Jun-16		
PV System KW Size	5.0		
GPA KWH 12am to 7am	11.05		
GPA KWH 7am to 6pm	3.66		
GPA KWH 6pm to 12am	**12.92**	**Evening Peak**	
NEM KWH 7am to 6pm	16.14		
Net GPA KWH	11.49		

Date:	14-Jun-16		
PV System KW Size	12.4		
GPA KWH 12am to 7am	28.9		
GPA KWH 7am to 6pm	6.1		
GPA KWH 6pm to 12am	**34.6**	**Evening Peak**	
NEM KWH 7am to 6pm	32.5		
Net GPA KWH	37.1		



Does NEM Lower Guam Generation Capacity Requirements?

No. NEM Solar PV systems in Guam does not reduce peak demand and therefore does not eliminate conventional capacity needs



Transmission, Distribution, or Generation Capacity for Guam Not Reduced by PV

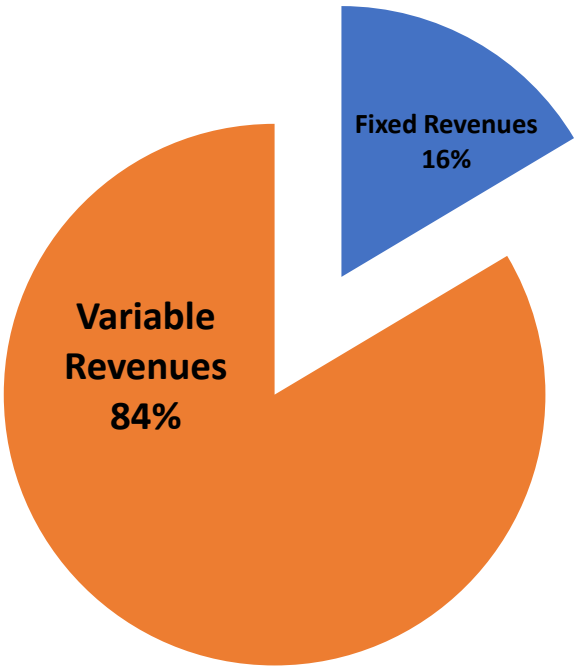
8

NEM Peak Production not at GPA Peak Demand Period

Source: Clean Power Resource Report

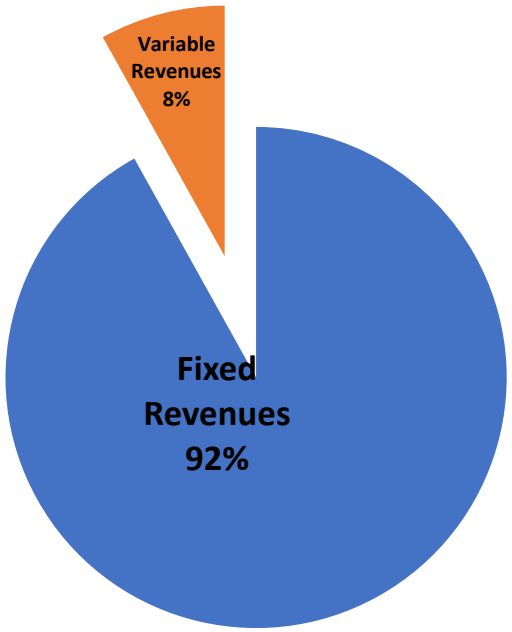
Net Metering Policy Issues

- Replacement for Net Metering Program
- Grandfathering existing registered NEM customers
  - Allow customers who own system to recover investment
  - Phase in to avoided cost rates over a 5 to 8 year period
- GPA files for PUC approval:
  - Reassessed NEM rates each LEAC for Avoided Fuel Value
  - Reassessed NEM rates for other components
    - Annually
    - Periodically over a set number of years
    - When GPA's generation mix changes



Value of the Grid to NEM Customers

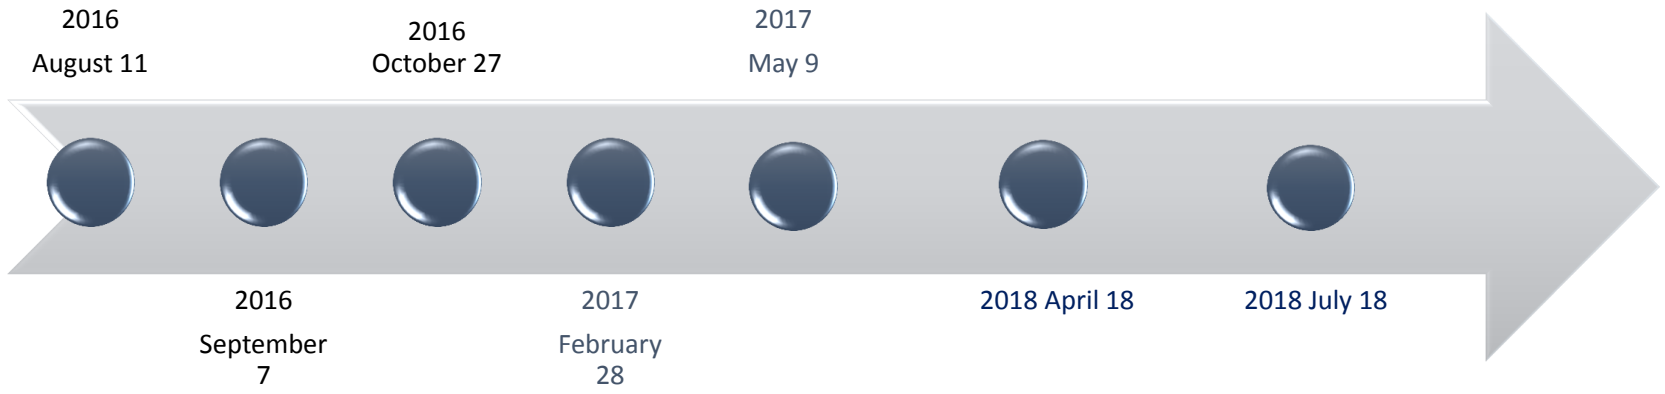
- NEM customers receive services from the grid including:
  - Use the grid to sell power (get credit at full retail rate for excess production)
  - Use the grid to energize their homes at night, but credited back from their production (Uses GPA Grid as storage)
  - Using Grid at night results in increased fuel cost to non-NEM Customers because costlier less efficient generation is used to generate their energy needs
  - Frequency regulation absorbed by grid for intermittencies
  - Reactive power supply
  - Voltage regulation
  - Stand-by power on overcast days when the sun does not shine



- Monthly fixed charge of $15 does not recover cost to serve from grid
  - Most of GPA fixed cost is recovered in the energy use (kWh) rate component which is typically zero for NEM customers

Rate Structure & Fixed Cost Recovery

Civilian Fixed vs Variable Revenues

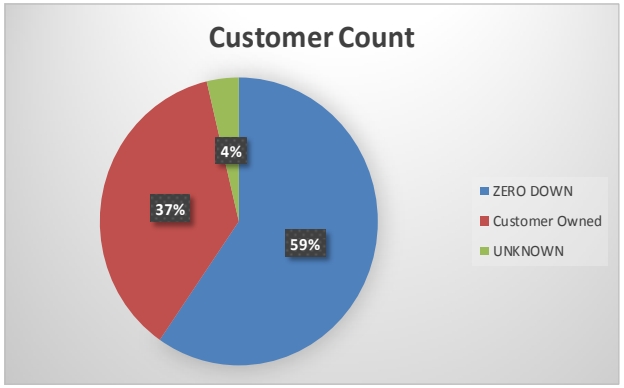


Navy Fixed vs Variable Revenues

GPA Rate Structure Should Move Towards Recovering More Fixed Costs Through Fixed Charges.

- Civilian rate structure
  - Most of GPA fixed costs recovered in the variable rate
- Navy rate structure
  - Most of GPA fixed costs recovered in the fixed rate
- Hawaii has moved to fixed cost recovery predominantly through its fixed rate

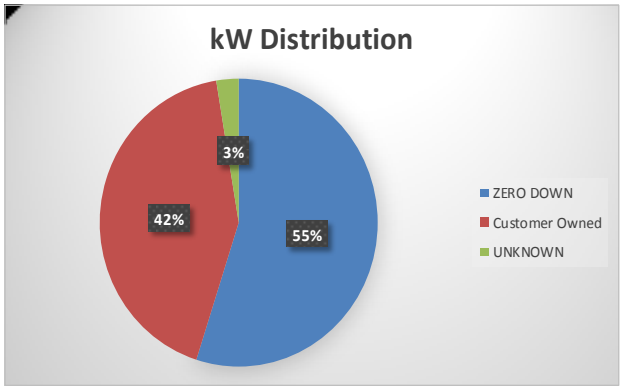
Net Metering Public Meetings Held to Gather Input from Stakeholders



Key Points from Public Meetings

- Solar PV providers opined the B&V report provides all the gain to GPA and did not represent true value of solar
- NEM Owner wants to recover his investment. Asked for grandfathering until he does so. He said it will take 7 years to recover his $60K investment
- NEM not meant to be money making business but a fair exchange of trade energy…some customers making money from units sized beyond their needs
- The applicability of NEM program to 3rd party providers need to be clarified
- Solar PV provider wants NEM program to continue up to 20% penetration similar to Hawaii
- Solar PV provider wanted more time to provide a report on Value of Solar and bring to GPA for information. Report was completed and presented by Clean Power Research on April 18, 2018

Key Points from Public Meetings (continued)



- Solar PV provider commented the NEM energy saves the utility cost on:
  - Maintenance cost for generations, poles, labor, lines, substations, transformers, etc.
  - Reduction of line losses because energy is near customers
  - Costs associated with fuel and fuel shipments
  - Helps GPA achieve energy portfolio reducing need for more renewable projects
  - Savings to environment; lessens carbon foot print
- Solar PV Provider-GPA should consider subsidies for home energy storage systems
- Solar PV Provider-GPA should consider grandfathering NEM customers through a phased approach
- No new points placed forward at the July 18, 2018 public meeting where the GM presented his recommendations which were previously presented to CCU

Summary

- Net Metering was established 13 years ago in 2004. Substantial Changes has occurred on GPA delivery cost and more changes expected by 2022.
- Customer Owned NEM System recovers its investment within 5 to 8 years from installation at GPA full Retail Rate Credit.
- Customer Owned NEM System recovers its investment within 8 to 12 years from installation at GPA LEAC Avoided Cost Rate Credit.
- It appears Zero Down Customers with 2.9% escalators will incur higher cost over the life of their 25 year contract. A $0.18/KWH rate in 2018 becomes $0.357/KWH in 2042.

Additional Information on Net Metering

Estimated Cost Impact to Non-Net Metering Ratepayers:

Total GPA Customers	51,515		
% NEM Customers	3.36%		
Non-NEM Customers	49,782		
% Non-NEM Customers	96.64%		

Jurisdiction	Years	Notes
Arkansas	20	
Neveda	20	
Utah	18	Until 2035
California	5	Residential, require application
	10	Other, require application
Arizona	20	Require application by June 12, 2018
Florida	20	March 31, 2018 final inspection, JEA
New Hampshire	22	Until 2040
Indiana	29	NEM customers prior to July 1, 2017 have until July 1, 2047
	14	NEM customers signing up prior to July 1, 2022 or their utility reaching a 1.5% peak summer load cap can continue net metering until July 1, 2032
Maine	15	Existing 2017 customers
Michigan	10	Limited to NEM that is already in the system
Hawaii (HECO, MECO, HELCO, Molakai, Lanai)	∞	NEM application was submitted to the utility postmarked 10/12/15 or earlier
Vermont	10	Net metering systems with a complete Certificate of Public Good application filed with the PSB prior to January 1, 2017 (as long as the application was filed at a time when the electric company was accepting net metering systems, based on the state's former aggregate capacity limit) are grandfathered

- Utilities and States Differ on Grandfathering NEM Customers
- Many Jurisdictions are Ending Net Metering

5

Maine

- In early 2017, Maine became the fourth state to more appropriately compensate net metering. The Public Utilities Commission adopted a ramp-down policy, which gradually harmonizes the transmission and distribution charges for net metering customers, aligned with true avoided costs.
- The rules grandfather existing customers for 15 years.

Source: Tanton, Thomas. (April 2018) Net Metering in the States: Moving Toward Equitable and Sustainable Policies for Electric Customers. URL at http://sglf.org/wp-content/uploads/sites/2/2018/04/SGLF-Net-Metering-In-the-States-by-Thomas-Tanton-April-2018.pdf (August 17, 2018).

7

Hawaii

- Marco Mangelsdor, president of installer ProVision Solar.
  - "... Hawaii's net energy metering (NEM) policy has "88% of the utility's ratepayers subsidizing the 12% who have net energy metered systems."
  - He believes utility's concern about that shift of costs for system maintenance is reasonable.
  - "The cost of NEM was $38 million in 2013 and it is estimated at $53 million in 2014. These are not trivial dollars."

11

California

- One of the first studies to quantify the magnitude of the NEM subsidy was conducted by Energy+Environmental Economics (E3) for the California Public Utilities Commission (CPUC) in 2013.
- The E3 study estimated that NEM would result in a cost shift of $1.1 billion annually by 2020 from NEM to non-NEM customers if current NEM policies were not reformed in California.
- A cost shift of this magnitude–paid for by non-NEM customers–was unacceptable to California regulators.
- As a result, California regulators set to work to reform rates in their state; many other states followed suit and conducted similar investigations of the magnitude of the NEM subsidy.

12

Nevada

- Recently, Arizona Public Service (APS), the state's largest utility, found that solar customers avoid on average around $1,000 annually in costs for operating the electric grid, costing the average power user, who must make up the cost, a $16.80 premium per year.

13

38

Louisiana

- Overall, the state found that its net metering structure resulted in an $89 million negative net benefits to electricity rate payers, meaning the net metering program costs are greater than program benefits, and that over $2 million of utility costs per year were being subsidized by non-solar consumers.

14

See attached Article of May 18, 2018 by Institute for Energy Research (IER)

Subsidies uncheck will continue to impact Non-Net Metering substantially:

Guam is at 3.36%; Hawaii is at 12 % NEM;

Description:	**Jul-18**	**Future**	**Future**	**Future**
% of All Customers	3.36%	5.00%	10.00%	15.00%
NEM Customers	1,733	2,576	5,152	7,727
Energy Produced	33,921,230	50,416,970	100,833,939	151,250,909
Annual Subsidy	$3,411,623	$5,071,652	$10,143,304	$15,214,955
Non-Nem Customers	49,782	48,939	46,364	43,788
Cost to each Non-NEM	**$68.53**	**$103.63**	**$218.78**	**$347.47**

Recommendation

1. CCU approve GPA filing a petition to the PUC as shown herein to consider changes to the existing net metering credit
2. Recommend an implementation plan for billing NEM customers on net billing: Buy All/Sell All or similar billing models
3. GPA files with GPUC for adjustment of net metering credits from retail to avoided cost
4. It is recommended that for existing NEM Customers, implement a Grandfather phase-in approach over 5 to 8 years to the GPA avoided cost credit. Adjustments for LEAC, line loss and variable cost changes done annually.
5. For future NEM customers, credit set at the GPA avoided cost

Issues for Decision

Resolution No. 2018-17:

Relative to Approving GPA's Net Metering Recommendation

What is the project's objective? Is it necessary and urgent?

The necessary and urgent objective of this resolution seeks approval to file and respond to the Guam Public Utilities Commission (PUC) order under Docket No. 08-10 (December 29, 2008), Exhibit A:

> **"The NM Rider is available to all customers without limitation as to the aggregate capacity of Customer-Generator installations on the GPA System. However, at the time the number of Customer-Generators exceeds one-thousand (1000) customers this issue will be reviewed by the PUC and a determination made as to the continued offering of the NM Rider for new 'net metering' customers."**

GPA achieved the milestone of 1000 net metering customers in June 2016. As of July 31, 2018, GPA has 1,733 net metering customers resulting in an approximate $3,411,623.29 annual subsidy by non-net metering customers. Additionally, GPA has conducted and completed as ordered by the Consolidated Commission on Utilities (CCU) several public meetings to:

- **Address net metering stakeholders' concerns and obtain feedback;**
- **Evaluate stakeholder feedback;**
- **Perform analysis regarding net metering impacts on the GPA especially on non-net metering customers;**
- **Propose recommendations on whether or not changing the current net metering program is in the best interests of customers while insofar as practical alleviating net metering customer concerns.**

Where is the location?

the Territory of Guam

How much will it cost?

This recommendation will save non-net metering customers approximately $3,411,623.29 annually.

When will it be completed?

Upon approval of the Guam Public Utilities Commission

What is its funding source?

The Levelized Energy Adjustment Clause

CONSOLIDATED
COMMISSION ON UTILITIES
Guam Power Authority • Guam Waterworks Authority
P.O.BOX 2977 • Agana,Guam 96932

RESOLUTION NO. 2018–17

AUTHORIZING MANAGEMENT OF THE GUAM POWER AUTHORITY (GPA) TO FILE NET METERING PROGRAM RECOMMENDATIONS ADDRESSING THE GUAM PUBLIC UTILITIES COMMISSION (PUC) ORDER (DOCKET NO. 08-10 (DECEMBER 29, 2008), EXHIBIT A, PARAGRAPH 3

WHEREAS, Guam Public Law 27-132 (2004) created Net Metering for Guam and assigned the Guam Public Utilities Commission (PUC) the responsibility for setting the Net Metering Rate for excess renewable energy fed into GPA's Distribution System; and

WHEREAS, the Guam Public Utilities Commission (PUC) ordered GPA to execute the Interim Net Metering (NM) Rider under Docket No. 08-10 (December 29, 2008); and

WHEREAS, under Docket 08-10, Exhibit A (paragraph 1), the PUC states: "The NM Rider may be amended or modified in the future by GPA, with the approval of the Guam Public Utilities Commission (PUC)"; and

WHEREAS, under Docket 08-10, Exhibit A (paragraph 3), the PUC orders: "The NM Rider is available to all customers without limitation as to the aggregate capacity of Customer-Generator installations on the GPA System. However, at the time the number of Customer-Generators exceeds one-thousand (1000) customers this issue will be reviewed by the PUC and a determination made as to the continued offering of the NM Rider for new 'net metering' customers."; and

WHEREAS, GPA achieved the milestone of 1000 net metering (NEM) customers in June 2016; and

WHEREAS, NEM customers receive services from the grid subsidized by non-NEM customers including but not limited to: 1) Use of the grid to sell power (get credit at full retail rate for excess production); 2) Use of the grid to energize their homes at night; 3) Frequency regulation absorbed by grid for intermittencies; 4) Reactive power supply; 5) Voltage regulation; and 6) Stand-by power on overcast days when the sun does not shine.

WHEREAS, GPA has 1,733 net metering customers (July 31, 2018) resulting in an approximate $3,411,623 annual subsidy going forward and from 2009 to 2017 a total subsidy of approximately $6,562,968.64 paid for by non-net metering customers; and

WHEREAS, as ordered by the Consolidated Commission on Utilities (CCU), GPA has conducted and completed several public meetings to: 1) Address net metering stakeholders' concerns and obtain feedback; 2) Evaluate stakeholder feedback; 3) Perform analysis regarding net metering impacts on the GPA especially on non-net metering customers; and, 4) Propose recommendations on whether or not changing the current net metering program is in the best interests of customers while insofar as possible alleviating net metering customer concerns; and

WHEREAS, the GPA General Manager presented the Authority's Net Metering (NEM) Credit Recommendation (Exhibit A) at the July 18, 2018 CCU Working Session held publicly; and

WHEREAS, GPA recommends the following Value of Solar (VOS) Policies as a replacement for the existing Net Metering Program including: 1) Grandfathering existing registered NEM customers for a period of 5 to 8 years allowing customers who own NEM systems to recover their investment while phasing in VOS rates over this extended 5 to 8 year time period; and filing for PUC approval a process to establish Value of Solar (VOS) rates;

WHEREAS, the process to establish Value of Solar (VOS) rates would: 1) Reassess VOS rates each LEAC for Avoided Energy Value; 2) Reassess VOS rates for other VOS components as applies on a) an annual basis; b) periodic basis over a set number of years; and 3) whenever there are material changes to GPA's generation mix; and

NOW, THEREFORE, BE IT RESOLVED, by the CONSOLIDATED COMMISSION ON UTILITIES subject to the review and approval of the Public Utilities Commission as follows:

1. The General Manager is authorized to file a petition of its Value of Solar Policy Recommendations to the Guam Public Utilities Commission.
2. The General Manager is authorized to conduct an information campaign supporting these recommendations.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

DULY and REGULARY ADOPTED this XXth day of March 2018.

Certified by:	**Attested by:**
JOSEPH T. DUENAS	**J. GEORGE BAMBA**
CHAIRMAN	**SECRETARY**

SECRETARY'S CERTIFICATE

I, J. George Bamba, Secretary for the Consolidated Commission on Utilities do hereby certify that the foregoing is a full, true, and correct copy of the resolution duly adopted at a regular meeting of the members of Guam's Consolidated Commission on Utilities, duly and legally held at the meeting place thereof on August XX, 2018, at which meeting of all said members had due notice and at which at least a majority thereof were present, and

At said meeting said resolution was adopted by the following vote:

Ayes: _____

Nays: _____

Absent: _____

Abstain: _____

As of the date of this certification, said original resolution has not been amended, modified, or rescinded since the date of its adoption, and the same is now in full force and effect.

SO CERTIFIED this XXth day August 2018.

J. GEORGE BAMBA
Secretary
Consolidated Commission on Utilities

We Told You So: Another Net Metering Solar Subsidy Bites the Dust

....

....

Net metering solar subsidies in Michigan are being ended because they're unaffordable and unfair, something that should have been apparent to all long ago.

Michigan has joined other states in realizing that net metering rules as originally designed are biased against consumers without rooftop solar, raising their electricity rates. Michigan will now charge rooftop solar customers at the retail price of electricity for electricity that they consume and pay them a lower price for the electricity that the utility purchases from them thereby charging them for the use of the electrical wires (i.e., transmission and distribution) that non-solar consumers hitherto have had to subsidize. Customers already in the net metering program will be grandfathered for 10 years. By changing the rules on net metering, Michigan will join several other states that have recognized the bias.

Michigan rooftop solar system that has had a hidden subsidy with net metering

Beginning June 1, Michigan customers who provide solar power to utility companies will be paid an avoided-cost tariff based on how much their utility pays to produce electricity, ensuring solar rooftop customers are "assessed for their fair and equitable use of the

1/3

electrical grid."

Under the current rules, solar panel customers are often able to avoid much of the cost of maintaining the electric grid, which they continue to use, resulting in the non-net metering customers paying more than their share to maintain the grid. This is because utilities were required to buy electricity from solar rooftops at retail prices, even though it was a wholesale product, and other ratepayers would end up subsidizing their neighbors' solar systems by paying the utility more than the product was worth.

States That Have Changed Net Metering Rules

At least five states have implemented alternative compensation methods for solar rooftop customers, including Arizona, Hawaii, Indiana, Maine, and Nevada. While these states have implemented widely-varying alternative compensation methods, all five states have grandfathered existing customers, allowing them to continue under the previous net metering rules for a set number of years.

In December 2016, the Arizona Corporation Commission lowered the credit residential solar customers receive for excess energy sent back to the grid and limited how long customers can keep their rates. The new rate is based on the cost of energy from large solar farms, which is much lower than the retail rate.

In October 2015, Hawaii closed its net metering program to new solar owners, and provided two options: self-supply and grid-supply. Under the self-supply option, solar customers with energy storage in areas of high solar penetration are limited in the amount of electricity they can send back to the grid and do not receive any compensation for it. Under the grid-supply option, solar customers are compensated at the wholesale rate for electricity supplied to the grid. In Hawaii, wholesale prices range from roughly 15 cents per kilowatt-hour to 28 cents per kilowatt-hour, which is about half of the state's average retail electricity rates. To help cover fixed costs, residential solar customers connected to the grid will pay a minimum monthly bill of $25.

In May 2017, Indiana Governor Eric Holcomb signed into law a measure that lowers the rate of compensation for customers who install solar or wind power, phasing out retail net metering. Systems installed by the end of 2017 were to get the retail rate for 30 years, but the rate will be lowered over a series of years for other customers after 2022. After 2022, solar and wind customers will be compensated at their utility's marginal cost, plus 25 percent.

Last year, Maine approved new solar rules that would gradually decrease the compensation to customers with solar panels on their homes, grandfathering an existing customer's rate for 15 years. Regulators agreed to delay implementation until April 30, as technical aspects of the new rules were sorted out.

On December 23, 2015, the Public Utility Commission of Nevada established an alternate compensation method for rooftop solar customers that creates new classes of net metering customers and a structured process for transitioning to the new rules and rates. Over five years, the basic service charge will increase in gradual increments accompanied by a related decrease in the energy charge that net metering customers pay for each unit of

energy delivered by the utility and a decrease in the credit that the utility provides for energy delivered by rooftop solar customers to the grid. The rates and credits are to be reset periodically by the Public Utility Commission.

Other states have discovered that their net metering programs have overcompensated solar panel owners at the expense of their other energy consumers. Montana's largest utility company found that it was overpaying net metering customers by about three times the market value. The value of the rooftop solar energy that was being delivered back to the grid was about four cents per kilowatt hour, but the net metering customers were getting paid about 12 cents per kilowatt hour for that power. In New Hampshire, Governor Chris Sununu shunned renewable energy subsidies that have artificially supported failing solar energy companies.

Conclusion

Net metering is a boondoggle for residential homeowners who can afford to put solar panel systems on their homes. It also hurts non-solar customers by forcing them to subsidize solar panel homeowners through the purchase of a wholesale product at a retail price and the allowing grid freeriding. States are realizing the bias and are implementing alternate compensation methods. But current net metering beneficiaries tend to be grandfathered for at least a period of time and are still absorbing their new wealth.

Editor's Note: *This article gets at two points we've been making here for a very long time; (1) renewables depend upon unaffordable subsidies that are often hidden, and (2) net metering is incredibly unfair to other ratepayers. State after state is backing away from net metering because it effectively pays producers of solar energy two subsidies that raise the costs for everyone else.*

First, the energy the produced under net metering goes into the system without picking up any of the costs of the grid to deliver it to others, meaning the others have to carry the whole load.

Secondly, the value of energy is based on the need or demand for it. A solar system that produces energy when it's not needed at the same price as when it is needed only raises the price of electricity. Think of it as buying water to sprinkle your lawn. Would you want to pay the water company to sprinkle your lawn when it's already raining? Of course not, and that's what net metering does; it forces others to buy your product when they don't want or need it.

Moreover, by forcing others to buy your product you also make dispatchable energy providers such as natural gas power plants, who are crucial for providing electricity when you can't, that much less economical. You steal the cream of the business and leave others to produce and sell what you can't, which necessarily makes them more expensive. This is why the German Energiewende is such a flop and why New York electricity prices can be expected to increase as far can the eye can see. Michigan knows better.

3/3

PUBLIC HEARING OF NET METERING 7/18/18 MINUTES OF MEETING
GBNPSB, Mangilao

At onset of NEM's work session GM said that the course of this matter will be

1. GM – OVERVIEW OF STATUS OF PUBLIC HEARINGS TO DATE
2. MANAGEMENT'S RECOMMENDATION TO CCU
3. CCU POLICY ON NET METERING CREDITS

MANAGEMENT'S RECOMMENDATION TO CCU
GM Benavente proceeded with his presentation.

COMMENTS
After the presentation, comments were recorded for the record. Synopsis below:

JOE ROSARIO / MRE
Testified in opposition of proposed changes to NEM program
8/11/16 – 1st meeting w/ Black & Veach recommendation; thought it was very aggressive approach that would have negatively impacted an industry that was just starting to gain momentum. At that time 1200 NEM customers made up less than 2.5% of overall GPA customers. Now 2018 customer count 1647 with GPA ratepayer base of 60,010 represents 3.3% of total GPA customer base – less than 1% increase of NEM customers on the grid. Why is such an aggressive change being proposed. Can't be because of loss of revenue – NEM is not "wrecking GPA finances". If there is to be a change why not a negotiated rate that all benefits from – not only the utility but the industry and the consumer. Proposed changes will have serious negative (approved as written) impact to the solar industry and growth of distributed generation – solar DG is good for Guam. It provides good & long term sustainable paying jobs. Changes will discourage homeowners to go solar. Initial intent of Net Metering Law – it enhances power gen system, encourages private investment in renewable resources and stimulation of economic growth. Changes are 100% against the true spirit of the law. All private solar companies encourages use distributed generated solar every day. With 1647 NEM customers $ amount is upwards of $50M of direct investment and trickles down and benefits the economy not to mention savings. PPA saves customers money 7 cents per kWh hour – translates to annually $1000 x 979 PPA customers is $1M savings per year. Recommends that CCU do not approve the recommended changes – its way too soon and too much at stake. Asks PUC to vote it down if CCU moves forward. Second – work with solar industry to benefit utility and the industry – coming together can only result in good.

Chairman – what triggered CCU to look at NEMS is mandate of PUC to review program after reaching 1,000 customers. Just want people to understand that GPA did not take this on – PUC was the one who mandated GPA to look into this program after hitting the 1,000 threshold. Decision is not rushed have been having meetings since 2016 and been very accommodating to give everyone a chance to give input. Input is very important.

Rosario – talked again about grid penetration; only less that 1% and why change now

Chairman – that is where the PUC comes in – they are the ones who are asking for this study. All we are doing is to give PUC GPA's input and it's up to them what to do. We are taking every opportunity to look at the other side and not kill the program. Wants to make sure that there is a balance. Wants to give those who invested in their system to recover their cost. CCU may make changes to what the GM recommends too . We want our records accurate, we haven't put anybody off

GM – why is the benchmark 1% such an important base. If you look at the total MW in system solar represents 20% during the daytime. Response – 10% is the average. In the US the penetration to the system is varied but they have thousands of generation that are absorbing the intermittency allowing for more penetration. It was said that Guam could have 15% penetration and the system would still be stable. NRG was put on and system fell apart. Those that said 15% have since backed off. Benchmarks from other places cannot be used on Guam. 120MW of renewable will be coming online with batteries to stabilize the system ; Phase III navy renewables is going to take all the energy of the daytime and store it and shave the peak because GPA cannot take anymore in the daytime. GPA is moving forward a step at a time to understand the system. GPA is not saying there's no opportunity for Net Metering. Just want to make it known that understanding the GPA system is a better way because it is a real world scenario.

Jeff Voacolo / MRE

Submitted written testimony from solar energy customers; Chairman would like to have submittal electronically; give to GPA and they will do the CCU distribution. Premature for GPA to make any change to net metering program. DG is changing quickly and independent study conducted by 3rd party says that Value of Solar (VOS) study contemplated multiple scenarios and utilization of solar to Guam's grid that most important consideration so to couple solar production with battery storage. NEM customers do not benefit the need for capacity. This year, MRE will be offering solar energy systems with battery storage. In 2019 existing customers will be retrofitted with storage systems. Now NEM customers will help GPA's grid more resilient and will assist GPA with peak loads at night when any excess energy can be deployed. With penetration so low there is no need to change the program now. To say that fixed cost should be recovered via fixed charges – he disagrees. To stay competitive, rates cannot be changes to stay competitive. According to CCU/GPA operations are in fine shape financially – they did not have to reduce work hours or to cut costs that other govguam agency have to do because of their efficient management of resources. With very low NEM penetration right now, there is no need to make any changes at this time. Slide 21 is very concerning to industry and have asked for calculations and data supporting the report. Cannot understand why GPA had segregated difference classes of finance structure while calculating NEM customers. NEM is a policy issue not a finance structure issue. GPA states that with 16636 kWh it will receive 30M kwh hours – 1,858 kwh hours per kwh installed this is impossible on Guam. They ran this report through PBWatts and PBSysReports and it comes closer to 23M 700 kWh hours roughly and actually matches MRE's systems. An average MRE system produces 1425kwh hours per kwh installed. Per report solar energy DG is declining. If so why is there a need to change NEM at this time especially with GPA's forecasted decline of LEAC rates by 2021. Slide 23/34 there's an intent to discredit PPA program or zero down structure by GPA. Does not see relevance – NEM is policy issue and not finance issue. On PPA's MRE can provide rate adjustment – they offer an energy production guarantee over a 20-25 year term. On Slide 35, bullet point #4 - "zero down customers with 2.9 escalators will occur higher costs over the life of their 25 year contract" – MRE believes this is an incorrect statement by the utility and should be taken out of the report. There's been a fallacy among all utilities of a cost shift from solar energy customers to non solar energy customers. Voacolo provided from Lawrence Berkeley National Laboratory disputing this fact – when solar energy is below 10% in any market there is no load shift. MRE suggests to CCU should extend any changes to the NEM program for 3 years and collect data to present their findings at that time. Slide 36 re sunsetting customers at a phased in approach. There was never mention of any sunsetting approach. This would hurt the industry at large. MRE wholehearted disagrees to change NEM at this time.

Chairman
Next CCU meeting is 7/24 and not sure if CCU will take this matter up. Anyone can send further comments to GPA via the Communication Office. This will be posted on the website.

Q&A
A couple of other questions were asked but the speakers were not at the conference table and their questions were inaudible.

GPA NET Metering - 18 July 2018/CCU 3rd Floor Board Conference Room/5:30p.m.
GPA GM
GPA Management Team
Public
Media
CCU Chairman – joins the meeting

John M. Benavente, P.E., GPA General Manager opened meeting at 5:30p.m.
GM provides information via a PowerPoint Presentation

21¢ - the avoided cost was 11.02¢
Approximately .10¢ kWh

ESS projects coming online will take care of intermittency issues currently impacting the system.
-$0.0018 cost
-signing of contracts 2nd week of August 2018
-approximately 8.25¢/kwh
-this is of a 'utility scale' [meets RPS public law]

120 megawatt New plant
40 megawatt on Navy property
… the addition of renewable and the new power plant will help mitigate LEAC rates:
- There will be a drop in the LEAC
- New plant will burn efficient fuel: ULSD and LNG
- This will hedge against future rising fuel prices

Solar production with battery storage

Public:

"Penetration" – use real world scenario according to GPA's existing system.
Slide 21 – NEM is a policy issue, not a financial structure issue

MRE + 14.25¢ kWh

Slides 23 and 24 – are to 'discredit' the solar industry today

JB: explains
25¢
.9¢ - Base rate
15.4¢ - LEAC

9.4¢ kWh - Base rate pays debt, IPP
All GPA customers pay a portion of this
In short, other customers have to pay more

1500
-1000
500 = GPA credits them the full 500 x .25¢

GPA, non-solar PV customers pay for/subsidize the full credit
All solar PV generated x .9¢ is approximately $3.1M per year

3.1M x X years = goes to NM customers over the years and it will add up

GPA's role is to provide the CCU with all information on the issue
Policy call? – it could be
"avoided cost" is for GPA to present on behalf of all GPA customers

DSM helps everyone

"Balance" – GPA is looking to find a balance
Part of finding the "balance" is being open to the numbers and analyses

GPA to 'phase in' over 5-8 years to recoup the avoided cost
⬇
⬇
Discussion:
An example: in the late 1980s everyone was promoting for GPA to change all wooden poles to concrete poles. Concrete poles were costing 3x as much and to put all underground it would cost 10x as much
-People still said, "Just put it all underground!"

However, then GPA would have to raise its Base rate.
GPA continued with changing out wooden poles to concrete and adding secondary lines w/hybrid system
Approximately 90% of the system is hardened
25% of homes are on/in the hybrid system – key areas with load demand/higher density

Depends on cash flow, but also for GPA to not increase its debt
GPA's business planning is to not impact the rates, if possible.

*Hard copy binder reports provided to GPA.
GPA Communications will receive emails or other public comments or testimony.

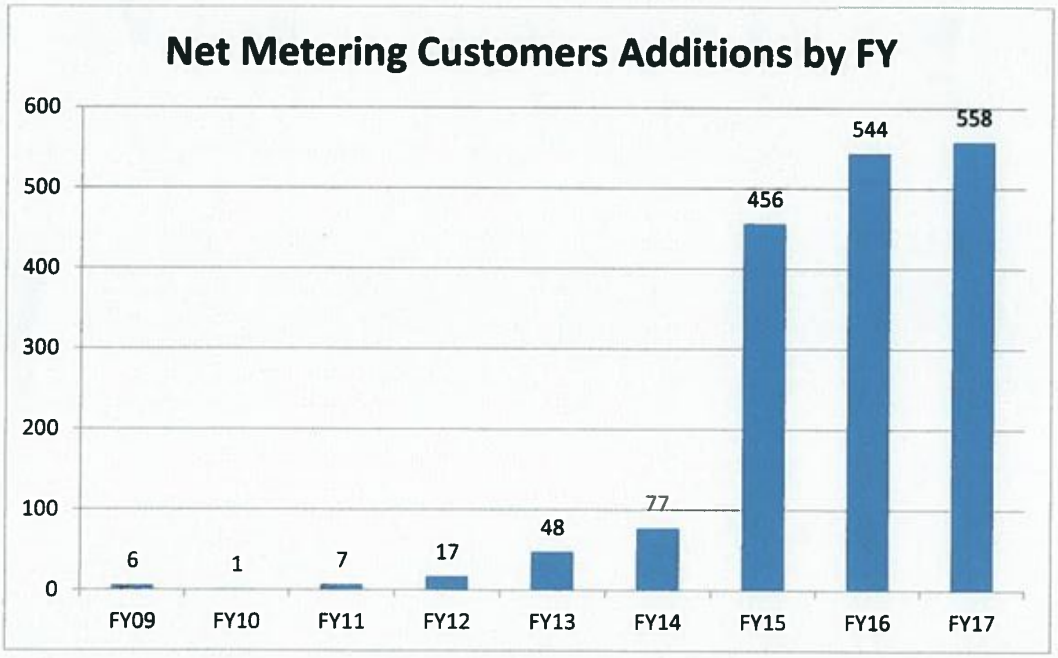
GUAM POWER AUTHORITY
ATURIDÅT ILEKTRESEDÅT GUAHAN
P.O.BOX 2977 • AGANA, GUAM U.S.A. 96932-2977

30 March 2018



Mr. Frederick J. Horecky
Administrative Law Judge
Public Utilities Commission
643 Chalan San Antonio, Suite 102B
Tamuning, Guam 96913

Subject: Docket 08-10 – Filing of Net Metering Data

Dear Judge Horecky:

Attached herewith is a copy of the Guam Power Authority Net Metering report for the period ending September 30, 2017 as stipulated in the Interim Net Metering Rider.

The total amount of estimated negative impact on revenue from Net Metering for FY17 was $3.29 million annualized representing about 2% of GPA's base rate revenues for the year. The graph below depicts the growth in the number of Net Metering customers in the last nine (9) fiscal years.

There were 558 additional customers added in Fiscal Year 2017 for a total of 1,714 customers to-date. The cumulative negative total base rate revenue impact is already at $6.5 million from the inception of Net Metering.

Although, the Authority intended to file a new structure for NM last year, GPA took time to conduct a series of public hearings in order to receive concerns and issues from Net Metering customers and Solar PV providers. We plan to pursue this matter in the coming months and to file a petition relative to the rate design, customer equity and revenue impact.

Please do not hesitate to contact our office should you require further information regarding this filing. Thank you.

JMB JOHN M. BENAVENTE, P.E.
GENERAL MANAGER

GPA Resolution No. 2018-18

RELATIVE TO THE APPROVAL OF THE CREATION OF THE ADVANCED METER INFRASTRUCTURE (AMI) TECHNICIAN SERIES OF POSITIONS

What is the project's objective and is it necessary and urgent?

The installation and utilization of GPA's advanced meter infrastructure (AMI) beginning in 2011, including smart meters, significantly changed the Authority's processes and structure. Current employees holding Meter Reader and Customer Service Electrician series positions are performing AMI or other work generally unrelated to their position titles. The Authority seeks to create new positions, abolish unnecessary positions, and eliminate overlap of similar functions in order to gain efficiencies and reflect its current processes and structure.

Where is it at?

The AMI Technician series will be initially utilized by Customer Service, PSCC, and Meter Shop but may be used by other divisions. The Meter Reader and Customer Service Electrician series recommended for abolishment are under the Customer Service division organizational structure.

How much will it cost?

The reorganization is not expected to exceed the current budget.

When will it be completed?

No later than October 28, 2018

What is its funding source?

Revenue funds.

The RFP/BID responses:

Not applicable.

CONSOLIDATED COMMISSION ON UTILITIES
Guam Power Authority | Guam Waterworks Authority
P.O. Box 2977 Hagatna, Guam 96932 | (671)649-3002 | guamccu.org

Resolution No. 2018-18

RELATIVE TO THE APPROVAL OF THE CREATION OF THE ADVANCED METER INFRASTRUCTURE (AMI) TECHNICIAN SERIES OF POSITIONS

WHEREAS, under 12 G.C.A. § 8104, the Consolidated Commission on Utilities ("CCU") has plenary authority over financial, contractual and policy matters relative to the Guam Power Authority; and

WHEREAS, the Guam Power Authority ("GPA") is a Public Corporation established and existing under the laws of Guam; and

WHEREAS, the GPA General Manager requests the CCU to approve the creation of the Advanced Meter Infrastructure ("AMI") Technician series positions (Exhibit A); and

WHEREAS, the GPA General Manager requests the CCU to approve the classification standards of the AMI Technician series positions in the classified status; and

WHEREAS, the GPA General Manager requests the CCU to abolish the Meter Reader and Customer Service Electrician series of positions; and

WHEREAS, Public Law 28-112 and 4 G.C.A. § 6303(d) authorizes the creation of positions in Autonomous Agencies and Public Corporations; and

WHEREAS, GPA Personnel Rules & Regulations as amended by Public Law 28-159 authorizes the CCU to amend, modify or add a position to the list of certified, technical and professional positions; and

WHEREAS, regulatory notification requirements have been satisfied and GPA continues to conduct outreach with potentially affected employees.

NOW, THEREFORE, BE IT RESOLVED, the Consolidated Commission on Utilities, as the Governing Body of the Guam Power Authority, does hereby approve and authorize the following**:**

1. The recitals set forth above hereby constitute the findings of the CCU.
2. The creation and the job classification standards for the AMI Technician series of positions in the classified status are hereby approved and attached herein as Exhibit A.
3. The AMI Technician series of positions are hereby added to the Certified, Technical and Professional list of positions at GPA.
4. The Meter Reader and Customer Service Electrician series are hereby abolished and removed from the Certified, Technical and Professional list of positions at GPA effective October 28, 2018.
5. The authorization of the AMI Technician series of positions shall become effective September 29, 2018.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

DULY AND REGULARLY ADOPTED AND APPROVED THIS 28th DAY OF AUGUST 2018.

STAFF REPORT

REQUEST:

The General Manager of the Guam Power Authority petitions the Consolidated Commission on Utilities (CCU) to create the following positions in the classified service pursuant to Public Law 28-112:

- AMI Technician (Proposed Creation)
- AMI Technician Leader (Proposed Creation)

AUTHORITY:

Public Law 28-159, Section 3(c) Amendment of Certified, Technical, and Professional Positions. Section 9, 4 GCA §6303 (d) states:

"Creation of positions in the Autonomous Agencies and Public Corporations.

(1) The petition of the head of an agency, department or public corporation listed in the first paragraph of 4 GCA §4105(a) of this Title to create a position shall include:

A. the justification for the new and amended positions;

Creation of the AMI Technician positions and amendment to the existing Meter Electrician series of positions are critical towards the Authority's vision of efficiency and system reliability in the transformation of Smart Grid initiatives that has modernize our Island Wide Power System. Although, Smart Grid is a cornerstone of GPA's transformation, GPA replaced many of its old analog meters with digital smart meters for both residential and commercial customers. GPA is now able fulfill remote service connection and disconnection orders in a matter of hours instead of days.

B. the essential details concerning the creation of the position; (see classification review below)

C. an analysis of the similarities and differences between the position to be created and positions listed pursuant to Title 4 GCA §4101.1.(d);

The Smart Grid is a digitally-enhanced network that uses computer-based remote control and automation to increase the efficiency of the Authority's Island-Wide Power System (IWPS). Smart meters employ two-way radio communication technology and computer processing. This allows GPA to read meters remotely, start and stop meters remotely, receive outage alert notifications and monitor power quality. The duties and responsibilities associated with the AMI Technician positions is to ensure accurate day-to-day monitoring, analysis and control of the Command Center, which is the head end of the AMI network. The major function of the AMI Command Center Supervisor is to oversee the monitoring the AMI Command Center and determine appropriate courses of action; coordinates with the Internal Audit's Revenue Protection Section, Power System Control Center (PSCC), and other divisions regarding network issues, meter investigation, metering failure and tampering issues. These positions are much needed towards the strategic goals of the Authority and fulfillment of its mission towards modernizing our Island Wide Power System.

D. the position description; (see attached)

E. the proposed pay ranges and demonstration of compliance with §6301 of this Title;

The GPA's compensation plan was authorized by P.L. 28-159 and approved by the CCU in October 2007. The proposed compensation is in accordance with the Strategic Pay Plan Methodology.

F. a fiscal note as that term in described in 2 GCA §9101 et seq.; and any other pertinent information.

The Guam Power Authority is responsible for the funding availability for these positions and is in compliance with all applicable laws, rules and regulations regarding the creation, filling and retention of positions in certified, technical and professional positions. The funding of these positions has no financial impact to the General Fund.

(2) The petition shall be posted on the agency, department or public corporation's website for ten (10) days (Saturdays, Sundays and government of Guam holidays excepted). After the posting, the head shall forward the petition along with evidence of his compliance with 5 GCA §6303.1(a), to the governing board or commission who, if they approve the same, shall approve the petition by resolution and file the petition and resolution for records with the Director of Administration and the Legislative Secretary.

(3) No new position may be filled until after compliance with the provision of this section and thirty (30) days has elapsed from the date of filing with the Legislative Secretary."

METHODOLOGY:

Information was gathered from various public utilities associated with the American Public Power Association (APPA) and other utilities with comparable positions within the U.S. mainland. The information collected were used to analyze and develop the proposed job standards as they apply to the work performed at GPA. The staff reviewed the duties associated with the proposed creations as indicated in the position description forms. In evaluating these positions, the Strategic Pay Job Evaluation Methodology was utilized to determine the job evaluation points based on a total of twelve (12) measurement factors; Education, Experience, Complexity, Scope of Work, Problem Solving, Freedom to Act/Supervision Received, Work Environment, Physical Demands, Impact of Discretionary Decisions, Human Relations Skills/Contact, Authority Exercised, and Supervisory/Managerial Responsibility.

CLASSIFICATION REVIEW:

In 2011, GPA embarked in a Smart Grid project towards modernizing our IWPS. GPA replaced most of its old analog meters with digital smart meters for both residential and commercial customers. Thus, resulting in the installation and utilization of advanced meter infrastructure (AMI), which includes smart meters. As a result, this significantly changed the Authority's processes and structure. GPA personnel can now communicate with meters remotely, start and stop power remotely, receive outage alert notifications and to monitor power quality. The AMI network reads and processes real time power consumption in homes and businesses on Guam and transmit data back to GPA. It's a tremendous technological change in GPA to constantly monitor electricity flow and adjust its distribution for maximum efficiency.

The AMI Command Center integrated system is currently located within the Customer Services Division and is currently supervised by a Customer Service Supervisor. The proposed AMI Technician positions will be assigned within the Customer Services Division and will be responsible for:

- Monitoring radio frequency network for all collectors, routers and meters for status with regards to network health and productivity on Command Center system.
- Monitoring Advanced Metering Infrastructure (AMI) Command Center head end system and dashboard.
- Monitoring meter and endpoint alerts on AMI dashboard (i.e. lost, not logging, tamper reverse, stuck switch, power outages).
- Performing all remote reconnects and disconnects on AMI meters for new and existing customers as well as non-payment/delinquent accounts on field activity reports and validation.
- Monitoring Meter Data Management System (MDMS).
- Performing AMI send and receive command prompts as needed.
- Processing work order requests & input data into the Customer Information System (CIS) of the Customer Care & Billing (CC&B) System.
- Monitoring outage tracking reporting and coordinates with PSCC and/or other divisions.

The impact to the implementation of Smart Grid initiatives and the replacement of analog electric meters with AMI smart meters eliminated and replaced functions in various positions within the Customer Services Division, specifically, Electric Meter Readers series and Customer Service Electrician series. This type of automation of meter reading and real-time day metering inclusive of installation, disconnection and reconnection has caused the Authority to eliminate these positions. Out of the 51,000 customers, there are only less than 30 "opt out" customers requiring manual reading of the analog meters. However, this task is very minimal and does not justify a full-time Electric Meter Reader to perform this task. Manual meter reading, meter installation, removal and troubleshooting tasks have been absorbed into duties of Meter Electrician series with the Authority's Meter Shop section.

Based on the proposed job standards for the AMI Technician and Leader positions, the nature of work and minimum experience and training consist of:

AMI Technician:

This positions are responsible for assisting with and supporting the day-to-day monitoring, analysis and control of the Command Center for the Advanced Metering Infrastructure (AMI) operations and Radio Frequency (RF) networking for the Guam Power Authority. The proposed position requires:

1) One (1) year experience in Advanced Metering Infrastructure (AMI) dashboard alerts and endpoint status monitoring and graduation from high school or GED equivalency; or
2) Any equivalent combination of experience and training which provides the minimum knowledge, abilities and skills.

AMI Technician Leader:

This position leads and supports the day-to-day monitoring, analysis and control of the Command Center for the Advanced Metering Infrastructure (AMI) operations and Radio Frequency (RF) networking for the Guam Power Authority. The proposed position requires:

1) Four (4) years of experience in Advanced Metering Infrastructure (AMI) dashboard alerts and endpoint status monitoring and graduation from high school or GED equivalency; or
2) Any equivalent combination of experience and training which provides the minimum knowledge, abilities and skills.

RECOMMENDATION:

1) To approve the creation of the following positions in the classified service and add these positions to list of the certified, technical and professionals (CTP) category of positions:

   - AMI Technician
   - AMI Technician Leader

The proposed minimum and maximum range of compensation will be in accordance with the Strategic Pay Methodology, as follows:

2017 MARKET DATA (15th Market Percentile)	JE Points	Structural Adjustment - MIN				Structural Adjustment - MAX			
		Base Salary	Grade	Step	Sub Step	Base Salary	Grade	Step	Sub Step
AMI Technician	414	32,706	F	4	C	34,034	F	5	C
AMI Technician Leader	640	46,933	J	4	B	48,839	J	5	B

2) To abolish and remove the following positions from GPA's list of positions:

   - Electric Meter Reader I
   - Electric Meter Reader II
   - Electric Meter Reader Leader
   - Electric Meter Reader Supervisor
   - Customer Service Electrician I
   - Customer Service Electrician II
   - Customer Service Electrician Leader
   - Customer Service Electrician Supervisor

AMI Technician (Proposed)

NATURE OF WORK IN THIS CLASS:

This position is responsible for assisting with and supporting the day-to-day monitoring, analysis and control of the Command Center for the Advanced Metering Infrastructure (AMI) operations and Radio Frequency (RF) networking for the Guam Power Authority.

ILLUSTRATIVE EXAMPLES OF WORK: *(Any one position may not include all the duties listed, nor do the examples cover all the duties which may be performed.)*

Monitors the dashboard system for status of AMI meters, radio frequency (RF) connectivity and outage tracking.

Performs remote connections/disconnections for 2s and 12s smart meters for move-in/move-out customers as well as delinquent accounts.

Sends and receives various commands, e.g. On Demand Reads (ODR) as needed to AMI meters and RF network for operations and troubleshooting.

Enters latitude/longitude, service location ID, date and time of installation, customer information file (customer ID, billing cycle, book number) on spreadsheet and provide to IT for import to update records in Command Center.

Validates and reviews field activity work order for successful completion on Command Center and Customer Information System (CIS).

Coordinates customer inquiries for meter troubleshooting.

Assists in conducting AMI meter investigations for non-responding meters and makes proper repairs using meter software application programs.

Prepares documents for field investigations, energy surveys, and meter testing (i.e. interval data, consumption load break down, snap shots, and readings).

Monitor unscheduled power outages and report locations to the Power System Control Center (PSCC) and/or other departments.

Performs other related duties as required.

MINIMUM KNOWLEDGE, ABILITIES AND SKILLS:

Knowledge of Landis+Gyr Command Center applications.

Knowledge of 132Comm, End Point Test Manager (ETM) and radio shop software applications.

Knowledge of optical probes utilized to obtain data directly from smart meters.

Knowledge of the customer information system.

Knowledge of the different AMI meter types and forms including GPA legacy meter types and forms.

EXHIBIT A

Knowledge of AMI Network operations and Radio Frequency (RF) Networking.

Ability to make arithmetic computations.

Ability to work effectively with the public and employees.

Ability to follow oral and written instructions.

Ability to maintain records and prepare reports.

Ability to interpret and apply pertinent laws, rules, regulations and other program guidelines.

Ability to lean and apply computer system application utilized by the utility, to include but not limited to Landis+Gyr Command Center; MeterSense MDMS; Customer Care & Billing (CC&B); and JD Edwards.

Skill in the safe operation of a motor vehicle.

MINIMUM EXPERIENCE AND TRAINING:

1) One (1) year experience in Advanced Metering Infrastructure (AMI) dashboard alerts and endpoint status monitoring and graduation from high school or GED equivalency; or

2) Any equivalent combination of experience and training which provides the minimum knowledge, abilities and skills.

NECESSARY SPECIAL QUALIFICATION:

Possession of a valid driver's license may be required.

Established:

Knowledge of Landis+Gyr Command Center applications.

Knowledge of 132Comm, End Point Test Manager (ETM) and radio shop software applications.

Knowledge of optical probes utilized to obtain data directly from smart meters.

Knowledge of the customer information system.

Knowledge of different AMI meter types and forms including GPA legacy meter types and forms.

Knowledge of AMI Network operations and Radio Frequency (RF) Networking.

EXHIBIT A

Ability to lead the work of others.

Ability to make arithmetic computations.

Ability to work effectively with the public and employees.

Ability to follow oral and written instructions.

Ability to maintain records and prepare reports.

Ability to interpret and apply pertinent laws, rules, regulations and other program guidelines.

Ability to lean and apply computer system application utilized by the utility, to include but not limited to Landis+Gyr Command Center; MeterSense MDMS; Customer Care & Billing (CC&B); and JD Edwards.

Skill in the safe operation of a motor vehicle.

MINIMUM EXPERIENCE AND TRAINING:

1) Four (4) years of experience in Advanced Metering Infrastructure (AMI) dashboard alerts and endpoint status monitoring, and graduation from high school or GED equivalency; or

2) Any equivalent combination of experience and training which provides the minimum knowledge, abilities and skills.

NECESSARY SPECIAL QUALIFICATION:

Possession of a valid driver's license may be required.

Established:

_____
JOSEPH T. DUENAS, Chairman
Consolidated Commission on Utilities

EXHIBIT A

POSITION DESCRIPTION QUESTIONNAIRE INSTRUCTIONS

WHO SHOULD COMPLETE THE QUESTIONNAIRE?

(1) The employee occupying the position (jobholder) completes the first six (I-VI) sections of the questionnaire.

(2) The employee completes Section VII if he/she chooses to do so. If the employee decides not to complete Section VII, mark the box provided. The direct supervisor will then complete Section VII for the employee.

(3) The direct supervisor completes Section VIII. It is to add or clarify any of the information provided by the employee/jobholder or to provide different information.

(4) The direct supervisor completes the questionnaire for vacant positions.

(5) Section IX is completed by the Human Resources Office.

(6) The completed questionnaire is subject to post-audit by the Civil Service Commission.

I. JOB IDENTIFICATION:

Position Title: Show the official (payroll) title only.

Official Position No.: Show the official number provided in the staffing pattern for the job. Although the employee/jobholder may change from time to time, the position number does not change. It is a position management tool.

Job Location: Show the exact location of the position within the organization.

Direct Supervisor: Show the official position title and name of supervisor or manager to whom the jobholder must report.

II. JOB DESCRIPTION:

ESSENTIAL FUNCTIONS: These are the required job duties of the position that a qualified person must perform. Under the Americans with Disability Act, the duties are performed either with or without a "reasonable accommodation." Without one of the essential functions, the need for the job is changed.

The description of functions performed must be short, clear and correct. It should tell what is done and its purpose or why. It should not tell how it is done. The duties are specific. Do not use unclear, general statements. Do not use additional papers.

Organize and list the job functions in one of the formats selected below. Mark the format selected. The format selected is only for the purpose of organizing the description of the job. It will not determine the job's classification and pay.

(1) Daily work assignments – proper for job functions that are repetitive and have specific work operations and procedures. List the functions beginning with the first daily work assignment and ending with the last work assignment.

(2) Percentage of time – proper for jobs that have varied functions and responsibilities. List the functions by percentage of time spent, beginning with the highest percentage. The total % should equal 100%.

(3) Order of importance – proper for job functions that provide levels of importance. List the functions beginning with the most important function and ending with the least important. All functions are performed, however.

NONESSENTIAL FUNCTIONS: Nonessential functions are tasks that are minor, or not required to the completion of the essential functions. In addition, nonessential functions are those that could be performed by other workers. The phrase, "performs related duties as assigned" is normally listed here.

III. MINIMUM QUALIFICATION REQUIREMENTS:

These are the minimum requirements needed to qualify for the job. They are necessary for satisfactory performance of the job's essential functions. It is not to show the employee's (jobholder's) qualifications. They are used further in the job analysis necessary for the creation of position classification standards.

Experience – Show the type and length (months or years) of experience needed by a qualified applicant to perform the essential functions of the job.

Education – Show the formal schooling or training required for a qualified applicant to perform the essential functions of the job.

Revised: 05/97 Class Code

POSITION DESCRIPTION QUESTIONNAIRE

I. IDENTIFICATION

Official Position Title: **AMI TECHNICIAN LEADER** Official Position No.:

Job Location: Guam Power Authority (Department/Agency) Customer Services (Division) (Section/Unit)

Name: _____ (Last) (First) (Middle Initial)

Pay Grade: [X] Classified [ ] Unclassified [ ] Position Vacant

Supervisor: (Name of Direct Supervisor) Title of Supervisor

II. DESCRIPTION OF DUTIES

Duty NO. or % of Time	
	ESSENTIAL FUNCTIONS: Organize and list duties and responsibilities that **MUST** be performed. List duties in one of the formats below. (1) The daily work assignments, beginning with the first duty and ending with the last duty for the day. (2) Percentage of time and show % for each (total % equals 100%). (3) Order of importance, beginning with the most important. Mark (√ or X) one format only: [ ] (1), [ ] (2), [X] (3)
	AMI OPERATIONS/RF NETWORKING: Leads and assist personnel in day to day operations related to collector status. Perform Collector connectivity tests/ping. Prepare for remote disconnection and reconnection on command center. Send command via command center and record. Respond to client safety alerts for reconnection of customers properly. Validate field activity work order for successful completion on Command Center and CIS.; Monitor meter and endpoint alerts on AMI dashboard (i.e. lost, not logging, tamper reverse, stuck switch, power outages); Prepare documents for field investigations, energy audits, and meter testing (i.e. interval data, consumption load break down, snap shots, and readings); Monitor all reporting associated with network connectivity and meter data. Review and analyze daily midnight reads, interval data, meter history, event logs for irregularities and voltage quality; Assist with meter inquiries from all divisions; Monitor and update meter group types and user defined group; Edit and update smart meter information on command center (i.e. service address, latitude/longitude location, billing cycles, and book numbers); Monitor for unscheduled power outages and report locations to PSCC and/or other departments.
	CUSTOMER SERVICE DUTIES: Interacting and assisting customers on a daily basis regarding their power bill inquiries, while in the office or out on the field. Whether in person or by phone. Perform various task with CIS system. Assist business office personnel with manpower augmentation when needed. Complete and lock all daily customer work order requests for commercial, residential, and government accounts to include same day services. Process and lock AMI meter exchange, AMI meter investigations and Emergency work clearance work orders. Create work orders on CIS system when necessary and submit to proper departments. Provide excellent customer service when dealing with customers directly or by phone. Provide good customer relations by providing customers the knowledge to understand the operations, advantages, and benefits of the smart meter. program.
	ADMINISTRATIVE: Performs as auxiliary payroll time entry clerk for personnel. Performs vehicle time entry and monitors vehicle preventive maintenance schedules. Prepares weekly rotational work schedule for approval. Performs account billing adjustments related to error reads and work order completions.
	NON-ESSENTIAL OR ADDITIONAL FUNCTIONS: List duties and responsibilities not listed above that **may be** performed, as assigned.
	Assist other divisions on providing information on customer accounts, locations, readings etc.

	Assist various sections throughout in the monitoring of the AMI real time outage tracker during pre-and post-storm restorations.
	Conduct preventive maintenance on all assigned vehicles.
	Follow all departmental rules and policies.
	Perform good housekeeping.

III. CONTACTS: Departments, agencies and individuals you deal with during the course of your daily activities.

A. Within your department / agency. Mark (X or √) one box:

[ ] None [ ] Up to 15% of total working hours

[ ] 15 – 50% of total working hours [X] Over 50%

B. Outside your department / agency. Mark (X or √)

[ ] None [ ] Up to 15% of total working hours

[ ] 15 – 50% of total working hours [X] Over 50%

IV. SUPERVISION RECEIVED: How closely is the employee's/jobholder's work reviewed by the direct supervisor? Mark (X or √) one correct response.

[ ]	Detailed and specific instructions / procedures received or followed for each assignment.
[ ]	General Supervision – Routine duties are performed with minimal supervision. Standard practices or procedures allow employee to function alone at routine work. Supervisor makes occasional check of work while in progress. Work is reviewed upon completion.
[X]	Direction – Receives guidance about general objectives in most of the tasks and projects assigned; determines methods, work sequence, scheduling and how to achieve objectives of assignments; operates within policy guidelines. (Generally applicable to skilled professionals, supervisors and managers.)
[ ]	General Direction – Receives very general guidance about overall objectives; work is usually quite independent of others; operates within division or department policy guidelines, using independent judgment in achieving assigned objectives. (Generally applicable to managers / administrators in large and complex organizations and to department / agency heads and their first assistants.)

V. SUPERVISION EXERCISED: The employee/jobholder supervises other employees. List the number of employees supervised, their position titles, and a brief description of their responsibilities.

Number Supervised	Position Title	Description of Responsibilities

VI. EQUIPMENT: List the equipment (pickup truck, welder, crane, etc.), office machines (word processor, calculator, copying machine, etc.), or any other machines, tools or devices that are used on a regular and continuing basis. Show what percentage of the regular workday is spent using each.

TOOLS / EQUIPMENT	PERCENT (%) OF TIME FOR EACH
Desk Top Computer	35
Lap Top Computer	15
Printer/ Copier Machine	2
Calculator	2
Shoretel Telephone	1
Push To Talk Radio	1
Optical Probe	10
Thermal Tester	1
Integrated Wan Radio (IWR)	5
Volt Meter	5
Various Personal Protective Equipment (PPE)	5
Government Official Vehicle	15

VII. JOB REQUIREMENTS

[ ] Mark (√ or X) here if jobholder is unable to complete this section. The direct supervisor will then complete this section for the jobholder.

A. MINIMUM QUALIFICATION REQUIREMENTS: List the minimum experience and training a qualified applicant must have before employment.

1. WORK EXPERIENCE: List the general, specialized and/or supervisory / management work experience needed and how much (in months and/or years). If none, mark (√ or X) "No work experience required."	
[ ] No work experience is required.	
Computer Knowledge**:** Demonstrated ability with regard to computer skills, including excellent word processing capabilities, proficiency with e-mail and internet applications and data base applications and experience using programs such as (for example: MS Word, Access and Excel).	
Analytical Thinking Skills**:** Proven ability to work in complex frameworks, analyze and prioritize elevated levels of information and convert ideas and objectives into actions. Problem Solving Skills: Ability to appropriately prioritize problems, gather and analyze the right information to identify symptoms and causes and identify the right people to involve reaching better conclusions.	
Specialized: Advanced Metering Infrastructure and Radio Frequency network/meter/router/collector; Radio Shop, Command Center, and Endpoint Test Management (ETM) advance operations training by Landis & Gyr.	
Semi-skilled in the electrical trade or equivalent.	
Four (4) years of experience in Advanced Metering Infrastructure (AMI) dashboard alerts and endpoint status monitoring and graduation from high school or GED equivalency; or Any equivalent combination of experience and training which provides the minimum knowledge, abilities and skills.	
Supervisor / Management:	
If no work experience is required, list the knowledge, abilities and skills a qualified applicant needs before employment to perform the essential job functions.	

2. FORMAL EDUCATION OR TRAINING: Mark (√ or X) the **most** applicable education level required.
a. [ ] Below High School – Show Number of Years
b. [X] High School Graduation / GED

c. [ ] Vocational / Technical School

Show specific training that is required by this position.

Advanced Metering Infrastructure and Radio Frequency Networking.

Knowledge and training of Customer information systems related

d. [ ] Some College

Show number of [ ] Semester Hours _____ or [ ] Quarter Hours _____.

Show specific courses required by the essential functions of this job.

e. College Degree (Show major area of study required.)

[ ] Associate's : _____

[ ] Bachelor's: _____

[ ] Master's: _____

[ ] Beyond Masters: _____

3. CRITICAL SKILLS / EXPERTISE: List specialized skills or specialization needed to perform essential functions.

Advanced Metering Infrastructure Operations and Radio Frequency networking.

4. LICENSE, REGISTRATION OR CERTIFICATION:
List possession of required license, professional registration/certification needed to perform essential functions.

B. MENTAL / VISUAL, PHYSICAL, AND ENVIRONMENTAL JOB REQUIREMENTS:

1. Mark (√ or X) the most appropriate physical requirement(s) for the job.

[X]	Sitting	The job requires the employee to sit in a comfortable position most of the time. The employee can move about.
[X]	Sitting	Employee is required to sit for extended periods or time without being able to leave the work area.
[X]	Sitting/Standing/Walking	The employee is required to sit, stand, and walk most of the time.
[X]	Climbing	Employee is required to climb ladders or scaffolding or to climb and work in overhead areas.
[X]	Lifting	Employee is required to raise or lower objects from one level to another regularly.
[X]	Pulling and/or Pushing	The job requires exerting force up to _____ pounds on a regular basis to move

		the object to or away from the employee.
[X]	Carrying	The employee is required, on a regular basis, to carry objects in his or her arms or on the shoulder(s).
[X]	Reaching	The employee is regularly required to use the hands and arms to reach for objects.
[X]	Stooping and Crouching	The employee is regularly required to bend forward by bending at the waist or by bending legs and spine.
[X]	Crawling	Employee is required to work in a confined space and/or to crawl and move about on his or her hands and knees.
[X]	Speaking	The job requires expressing ideas by the spoken word.
[X]	Listening	The job requires the perception of speech or the nature of sounds in the air.
[ ]	Other	Describe the requirement.

_____

_____

_____

2. Mark (√ or X) the most appropriate mental / visual requirement for the job.

[X] General Intelligence (typical requirement for machine operators, office staff, etc.)

[ ] Motor Coordination Skills (typical for automotive mechanic, painter, etc.)

[X] Coordination of Eyes, Hands, and Feet (typical for tractor trailer driver, fire fighter, line electrician, etc.)

[X] Verbal Intelligence (typical for counselors, customer service representatives, etc.)

[ ] Numerical Intelligence (typical for an accounting clerk, cargo checker, etc.)

[ ] Other:

_____

_____

_____

3. The job's most appropriate work environment and the weather exposure.

Show what percent of a typical workday is spent.
(Select one response only)

__60_% Indoors in a comfortable temperature-controlled environment (for instance, in an office).

__5_% Indoors in a non-temperature-controlled environment (such as an open garage, storerooms and warehouses, etc.)

__10_% Outdoors exposed to changing weather conditions (for instance, rain, sun, wind, etc.)

__25_% Outdoors but in an enclosed vehicle protected from extreme weather conditions.

4. Other physical working conditions

[ ] Mark (X or √) if none of the following is applicable.

Show what percent of a typical workday this position is exposed to:

_5_% Air contamination (i.e., dust, fumes, smoke, toxic conditions, disagreeable odors).

_____% Vibration (i.e., operating jackhammer, impact wrench).

__5_% Noise (Exposure at a level enough to cause bearing loss or fatigue).

_____% An improperly illuminated or awkward and confining work space.

_ 5_% Working above ground level where the chance of falling exists (i.e., on ladders, rooftops, bucket trucks, scaffolding).

__10_% Lifting or carrying items or objects. Describe item/object and weight:

_____

_____

__25_% Heat. Describe source and degree of high temperature.

Outdoors Temperatures

_____

_____

__25_% Cold. Describe source and degree of cold temperature: Indoor Office Temperatures

_____

_____

_ 25_% Other hazards. Describe:

Electrical, Extreme Weather, and Vicious Animals

_____

_____

5. Describe the working conditions that are irregular or unusual for the job and show frequency of exposure.

[ ] Mark (X or √) if not applicable.

CONDITION	FREQUENCY OF EXPOSURE

C. Work Schedule/Hours – Mark (√ or X) the most appropriate work schedule/hours for the job.

[ ] Regular – Standard Eight (8) hours daily, Monday – Friday
[ ] Irregular – Shift work – A 24-hour work operation.
[X] Regular / Irregular – Overtime hours with overtime pay entitlement

State Purpose and Total Hours required per pay period:

40 hours a week and overtime if required in an event of non-communication issues or other issues pertaining to a smart meter and or command center and emergency situations.

The information given on this position is complete and correct.

_____ _____

Signature of Employee Date

VIII. SUPERVISOR'S REVIEW

IMPORTANT: This Block to Be Filled Out Only By The Direct Supervisor

a.	(1)	Has the employee correctly stated his or her official payroll position title? [ ] Yes] No
	(2)	If not, what is the correct title? _____
b.	(1)	Are the employee's statements about the duties of his/her position and the supplementary information complete and accurate? [ ] Yes [ ] No
	(2)	If not, what additions, deletions or corrections should be made? (Refer to block and page) _____ _____ _____
c.		What positions under your supervision perform the same essential functions Give name and title: Name Title _____ _____ _____
d.		Does this position require (mark one) [ ] Immediate supervision on a regular basis, [ ] Immediate supervision only for new/complex tasks, or [ ] Little immediate supervision.
e.		Does the employee participate in (mark those appropriate) the [ ] Formulation, [ ] Interpretation, and/or [ ] Application of Agency/Department policy. Give examples: _____ _____ _____
f.		The employee (mark one) [ ] Performs routine, well-defined tasks, [ ] Performs moderately complex tasks requiring moderate knowledge of Agency's/Department's work; or [ ] Performs complex tasks requiring extensive knowledge of Agency's/Department's work.

I certify to the accuracy of the description of duties, responsibilities and organizational relationships provided herein; further, that the position is necessary to carry out government functions for which I am responsible. This certification is made with the knowledge that this information is to be used for statutory purposes on the use of public funds. The false or misleading statement may constitute violations of such statutes or their implementing regulations.

VII. JOB REQUIREMENTS

[ ] Mark (√ or X) here if jobholder is unable to complete this section. The direct supervisor will then complete this section for the jobholder.

A. MINIMUM QUALIFICATION REQUIREMENTS: List the minimum experience and training a qualified applicant must have before employment.

1. WORK EXPERIENCE: List the general, specialized and/or supervisory / management work experience needed and how much (in months and/or years). If none, mark (√ or X) "No work experience required."

[ ] No work experience is required.

General: . One (1) year experience in Advanced Metering Infrastructure (AMI) dashboard alerts and endpoint status monitoring and graduation from high school or GED equivalency; or
Any equivalent combination of experience and training which provides the minimum knowledge, abilities and skills.

Supervisor / Management:

If no work experience is required, list the knowledge, abilities and skills a qualified applicant needs before employment to perform the essential job functions.

- Computer Knowledge**:** Demonstrated ability with regard to computer skills, including excellent word processing capabilities, proficiency with e-mail and internet applications and data base applications and experience using programs such as (for example: MS Word, Access and Excel).
- Analytical Thinking Skills**:** Proven ability to work in complex frameworks, analyze and prioritize elevated levels of information and convert ideas and objectives into actions.
- Problem Solving**:** Ability to appropriately prioritize problems, gather and analyze the right information to identify symptoms and causes and identify the right people to involve reaching better conclusions.
- Knowledge of Basic Electricity

2. FORMAL EDUCATION OR TRAINING:
Mark (√ or X) the **most** applicable education level required.

a. [ ] Below High School – Show Number of Years
b. [X] High School Graduation / GED

c. [ ] Vocational / Technical School

Show specific training that is required by this position.

Basic knowledge of AMI meters and Radio Frequency Networking or equivalent.

Semi-skilled in the electrical trade or equivalent.

2 years' experience in the installation and removal of electrical power meters or equivalent.

d. [ ] Some College

Show number of [ ] Semester Hours _____ or [ ] Quarter Hours _____.

Show specific courses required by the essential functions of this job.

e. College Degree (Show major area of study required.)

[ ] Associate's : _____

[ ] Bachelor's: _____

[ ] Master's: _____

[ ] Beyond Masters: _____

3. CRITICAL SKILLS / EXPERTISE: List specialized skills or specialization needed to perform essential functions.

4. LICENSE, REGISTRATION OR CERTIFICATION:
List possession of required license, professional registration/certification needed to perform essential functions.

B. MENTAL / VISUAL, PHYSICAL, AND ENVIRONMENTAL JOB REQUIREMENTS:

1. Mark (√ or X) the most appropriate physical requirement(s) for the job.

[X]	Sitting	The job requires the employee to sit in a comfortable position most of the time. The employee can move about.
[X]	Sitting	Employee is required to sit for extended periods or time without being able to leave the work area.
[X]	Sitting/Standing/Walking	The employee is required to sit, stand, and walk most of the time.
[X]	Climbing	Employee is required to climb ladders or scaffolding or to climb and work in overhead areas.
[X]	Lifting	Employee is required to raise or lower objects from one level to another regularly.
[X]	Pulling and/or Pushing	The job requires exerting force up to _____ pounds on a regular basis to move the object to or away from the employee.

[X]	Carrying	The employee is required, on a regular basis, to carry objects in his or her arms or on the shoulder(s).
[X]	Reaching	The employee is regularly required to use the hands and arms to reach for objects.
[X]	Stooping and Crouching	The employee is regularly required to bend forward by bending at the waist or by bending legs and spine.
[X]	Crawling	Employee is required to work in a confined space and/or to crawl and move about on his or her hands and knees.
[X]	Speaking	The job requires expressing ideas by the spoken word.
[X]	Listening	The job requires the perception of speech or the nature of sounds in the air.
[ ]	Other	Describe the requirement.

_____

_____

_____

2. Mark (√ or X) the most appropriate mental / visual requirement for the job.

[X] General Intelligence (typical requirement for machine operators, office staff, etc.)

[ ] Motor Coordination Skills (typical for automotive mechanic, painter, etc.)

[X] Coordination of Eyes, Hands, and Feet (typical for tractor trailer driver, fire fighter, line electrician, etc.)

[X] Verbal Intelligence (typical for counselors, customer service representatives, etc.)

[X] Numerical Intelligence (typical for an accounting clerk, cargo checker, etc.)

[ ] Other:

_____

_____

_____

3. The job's most appropriate work environment and the weather exposure.

Show what percent of a typical workday is spent.
(Select one response only)

__60_% Indoors in a comfortable temperature-controlled environment (for instance, in an office).

__5_% Indoors in a non-temperature-controlled environment (such as an open garage, storerooms and warehouses, etc.)

__10_% Outdoors exposed to changing weather conditions (for instance, rain, sun, wind, etc.)

__25_% Outdoors but in an enclosed vehicle protected from extreme weather conditions.

4. Other physical working conditions

[ ] Mark (X or √) if none of the following is applicable.

Show what percent of a typical workday this position is exposed to:

_5_% Air contamination (i.e., dust, fumes, smoke, toxic conditions, disagreeable odors).

_____% Vibration (i.e., operating jackhammer, impact wrench).

__5_% Noise (Exposure at a level enough to cause bearing loss or fatigue).

_____% An improperly illuminated or awkward and confining work space.

_ 5_% Working above ground level where the chance of falling exists (i.e., on ladders, rooftops, bucket trucks, scaffolding).

__10_% Lifting or carrying items or objects. Describe item/object and weight:

_____

_____

__25_% Heat. Describe source and degree of high temperature.

Outdoors Temperatures

_____

_____

__25_% Cold. Describe source and degree of cold temperature: Indoor Office Temperatures

_____

_____

_ 25_% Other hazards. Describe:

Electrical, Extreme Weather, and Vicious Animals

_____

_____

5. Describe the working conditions that are irregular or unusual for the job and show frequency of exposure.

[ ] Mark (X or √) if not applicable.

CONDITION **FREQUENCY OF EXPOSURE**

C. Work Schedule/Hours – Mark (√ or X) the most appropriate work schedule/hours for the job.

[ ] Regular – Standard Eight (8) hours daily, Monday – Friday
[ ] Irregular – Shift work – A 24-hour work operation.
[X] Regular / Irregular – Overtime hours with overtime pay entitlement

State Purpose and Total Hours required per pay period:

40 hours a week and overtime if required in an event of non-communication issues or other issues pertaining to a smart meter and or command center and emergency situations.

The information given on this position is complete and correct.

N/A

_____ _____

Signature of Employee Date

VIII. SUPERVISOR'S REVIEW

IMPORTANT: This Block to Be Filled Out Only By The Direct Supervisor

a.	(1)	Has the employee correctly stated his or her official payroll position title? [X] Yes] No
	(2)	If not, what is the correct title? _____
b.	(1)	Are the employee's statements about the duties of his/her position and the supplementary information complete and accurate? [X] Yes [ ] No
	(2)	If not, what additions, deletions or corrections should be made? (Refer to block and page) _____ _____ _____
c.		What positions under your supervision perform the same essential functions Give name and title: Name Title _____ _____ _____
d.		Does this position require (mark one) [ ] Immediate supervision on a regular basis, [ ] Immediate supervision only for new/complex tasks, or [X] Little immediate supervision.
e.		Does the employee participate in (mark those appropriate) the [ ] Formulation, [X] Interpretation, and/or [X] Application of Agency/Department policy. Give examples: _____ _____ _____
f.		The employee (mark one) [ ] Performs routine, well-defined tasks, [ ] Performs moderately complex tasks requiring moderate knowledge of Agency's/Department's work; or [ ] Performs complex tasks requiring extensive knowledge of Agency's/Department's work.

I certify to the accuracy of the description of duties, responsibilities and organizational relationships provided herein; further, that the position is necessary to carry out government functions for which I am responsible. This certification is made with the knowledge that this information is to be used for statutory purposes on the use of public funds. The false or misleading statement may constitute violations of such statutes or their implementing regulations.

GPA WORK SESSION

Presentation To:

Consolidated Commission on Utilities

August 23, 2018

ISSUES FOR DECISION

RESOLUTIONS

GPA Resolution No. 2018-016

Authorizing Management to award a Two Year Contract for the Supply of Residual Fuel Oil No. 6 to Mobil Oil Guam

What is the project's objective? Is it necessary and urgent?

The Guam Power Authority's current contract for Supply of Residual Fuel Oil No.6 for the Baseload Plants is expiring in November 30, 2018. The new fuel supply contract is necessary to provide uninterrupted supply of fuel for the Baseload plants.

Where is the location?

Residual Fuel Oil No.6 will be supplied to the baseload plants:
Cabras 1&2
MEC 8&9

How much will it cost?

The 2-year contract is estimated to cost approximately $230M requiring prior approval from the PUC.

When will it be completed?

The contract is planned for an initial period of two (2) years to commence on or about December 01, 2018 and to expire on November 30, 2020, with the option to extend for three (3) additional one-year terms.

What is its funding source?

Fuel revenue funds

The RFP/BID responses:

Five bidders responded to the solicitation under IFB GPA-009-18. **Mobil Oil Guam** was determined to the lowest responsive and responsible bidder.

GPA Resolution No. 2018-017
Relative to Approving GPA's NET Metering Credit Recommendation

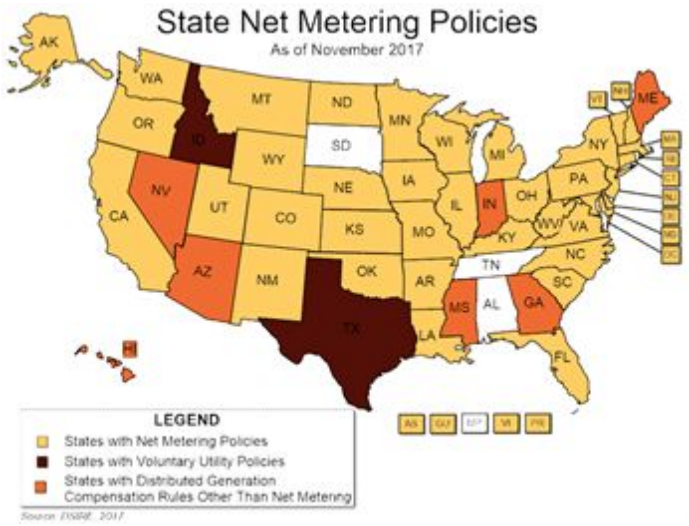
What is the project's objective? Is it necessary and urgent?
The necessary and urgent objective of this resolution seeks approval to file and respond to the Guam Public Utilities Commission (PUC) order under Docket No. 08-10 (December 29, 2008), Exhibit A:

> "The NM Rider is available to all customers without limitation as to the aggregate capacity of Customer-Generator installations on the GPA System. However, at the time the number of Customer-Generators exceeds one-thousand (1000) customers this issue will be reviewed by the PUC and a determination made as to the continued offering of the NM Rider for new 'net metering' customers."

GPA achieved the milestone of 1000 net metering customers in June 2016. As of July 31, 2018, GPA has 1,733 net metering customers resulting in an approximate $3,411,623.29 annual subsidy by non-net metering customers. Additionally, GPA has conducted and completed as ordered by the Consolidated Commission on Utilities (CCU) several public meetings to:

- Address net metering stakeholders' concerns and obtain feedback;
- Evaluate stakeholder feedback;
- Perform analysis regarding net metering impacts on the GPA especially on non-net metering customers;
- Propose recommendations on whether or not changing the current net metering program is in the best interests of customers while insofar as practical alleviating net metering customer concerns.

Where is the location? The Territory of Guam



How much will it cost? This recommendation will save non-net metering customers approximately $3,411,623.29 annually.

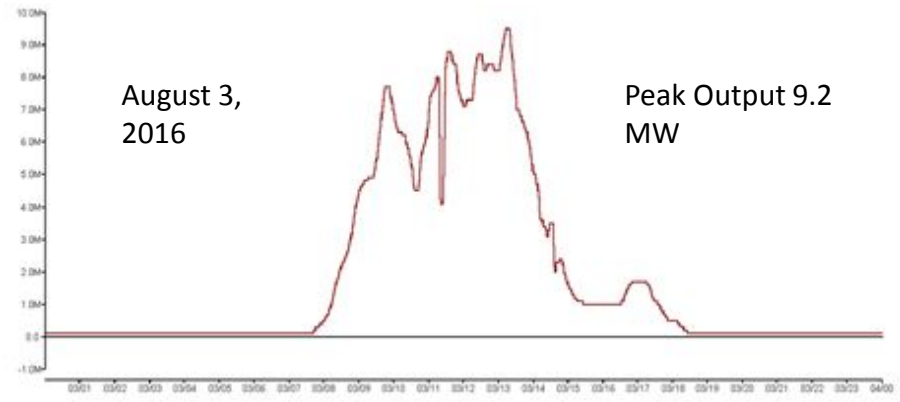
When will it be completed? Upon approval of the Guam Public Utilities Commission

What is its funding source? The Levelized Energy Adjustment Clause

OVERVIEW – NET METERING POLICIES

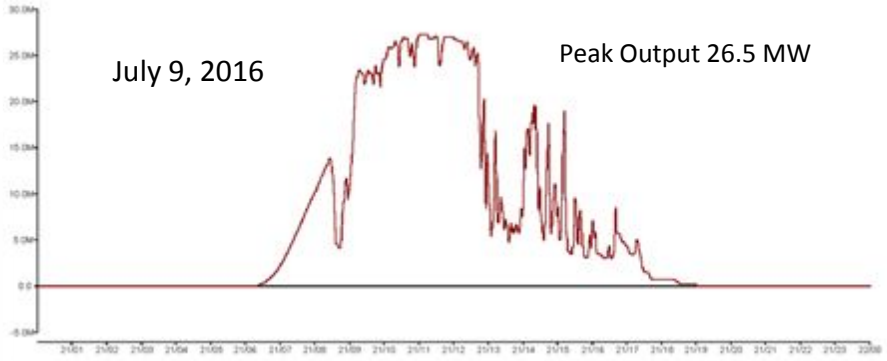
- Thirty Eight (38) States, Washington D.C., and Four (4) Territories Offer Net Metering and utilities in two additional states (Idaho and Texas adopted Net Metering (Full Retail Credit).
- Arizona, Georgia, Hawaii, Indiana, Maine and Mississippi have compensation other than net metering.
- The Value of Solar (VOS) is an alternative to net metering. Customers buy from the grid at retail rate and sell to the grid at an established VOS rate. Only Minnesota and Austin Energy (Texas) has adopted a VOS rate.

Source: National Council of State Legislatures: 11/20/17



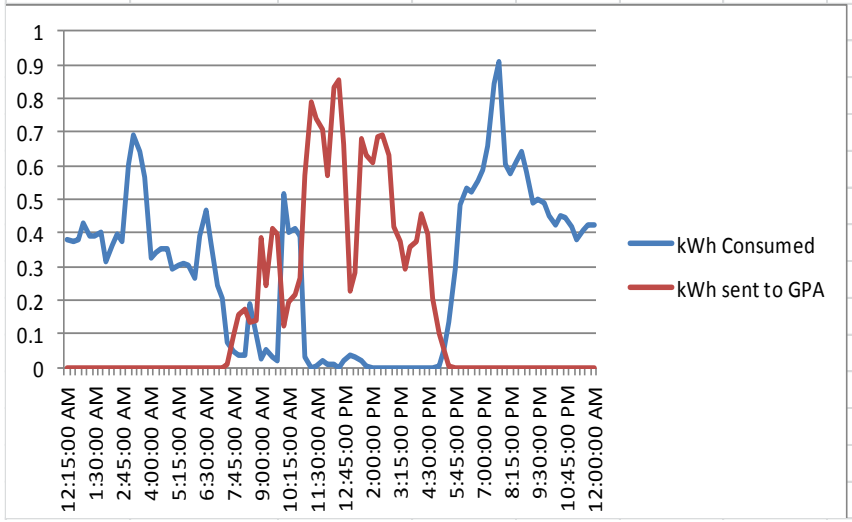
Guam NEM Program

- Program Mandated in 2004. Guam has been crediting NEM customers full retail rate over the past 13 years. Excess credit carried over or paid out annually at full retail rate.
- PUC to evaluate program and credits provided when GPA has 1,000 NEM Customers which occurred in June 2016.
- As of July 2018, GPA has 1,733 NEM Customers (94.7% Residential), with 18,315 KW of capacity. The revenue impact on non-NEM ratepayers is estimated at $3.4M annually.
- CCU/GPA conducted its first public hearing on NEM in August 2016 to gather input from stakeholders in order to prepare its filing to the PUC for changes in rate credits in order to achieve parity amongst all ratepayers.

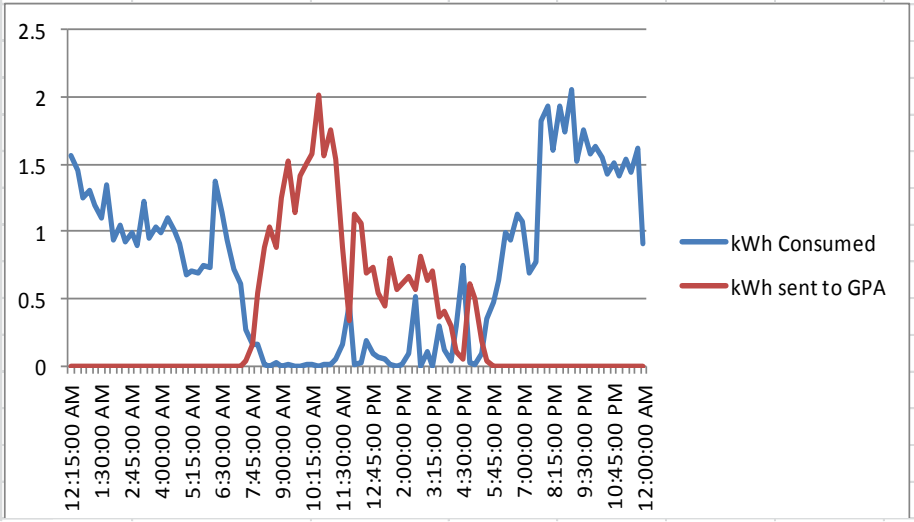


Solar PV Energy Production Characteristics

Utility Scale PV Output Look Like This …



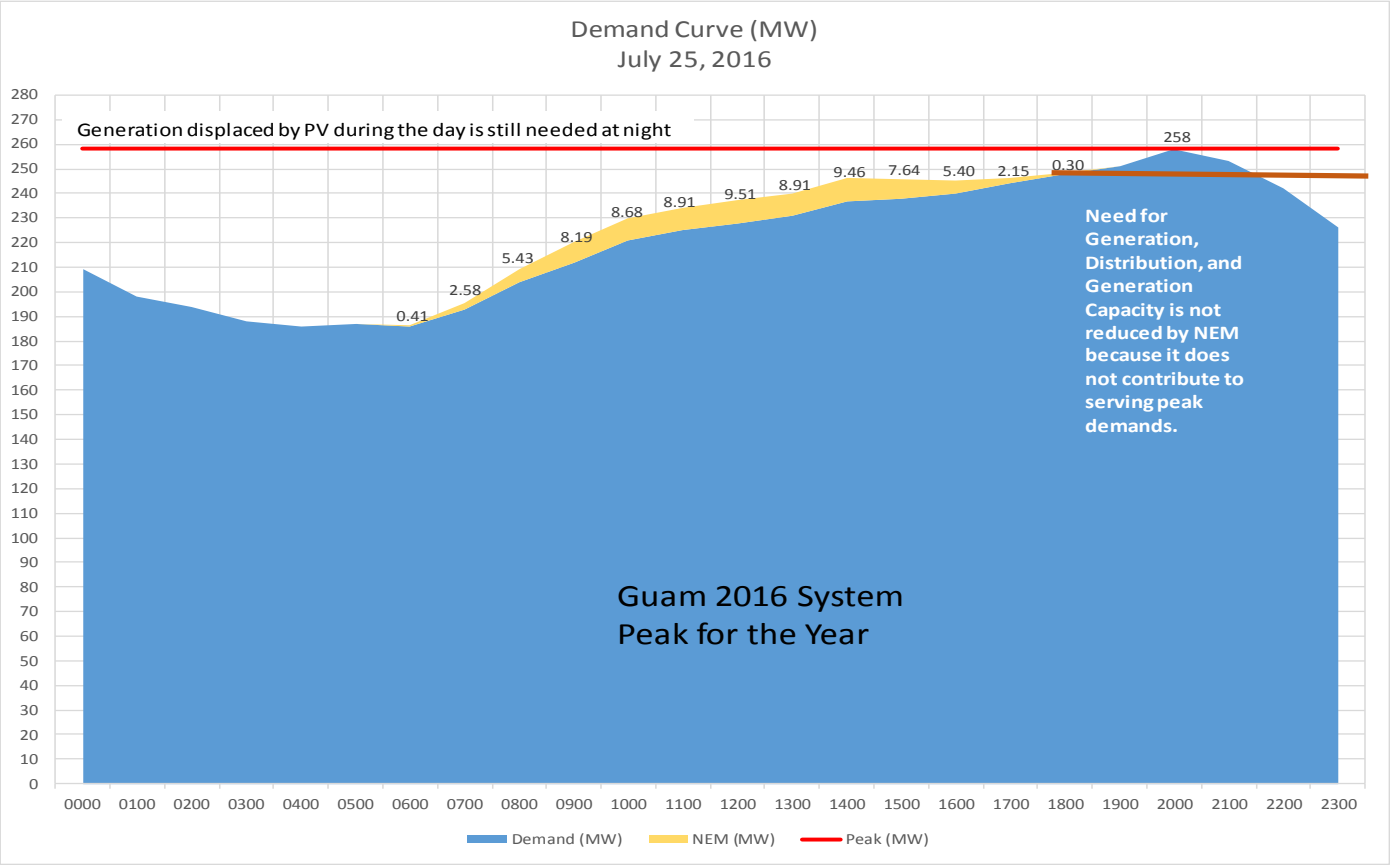
NEM does not eliminate need for capacity



PV without adequate storage is not a capacity benefit. It is an energy benefit.

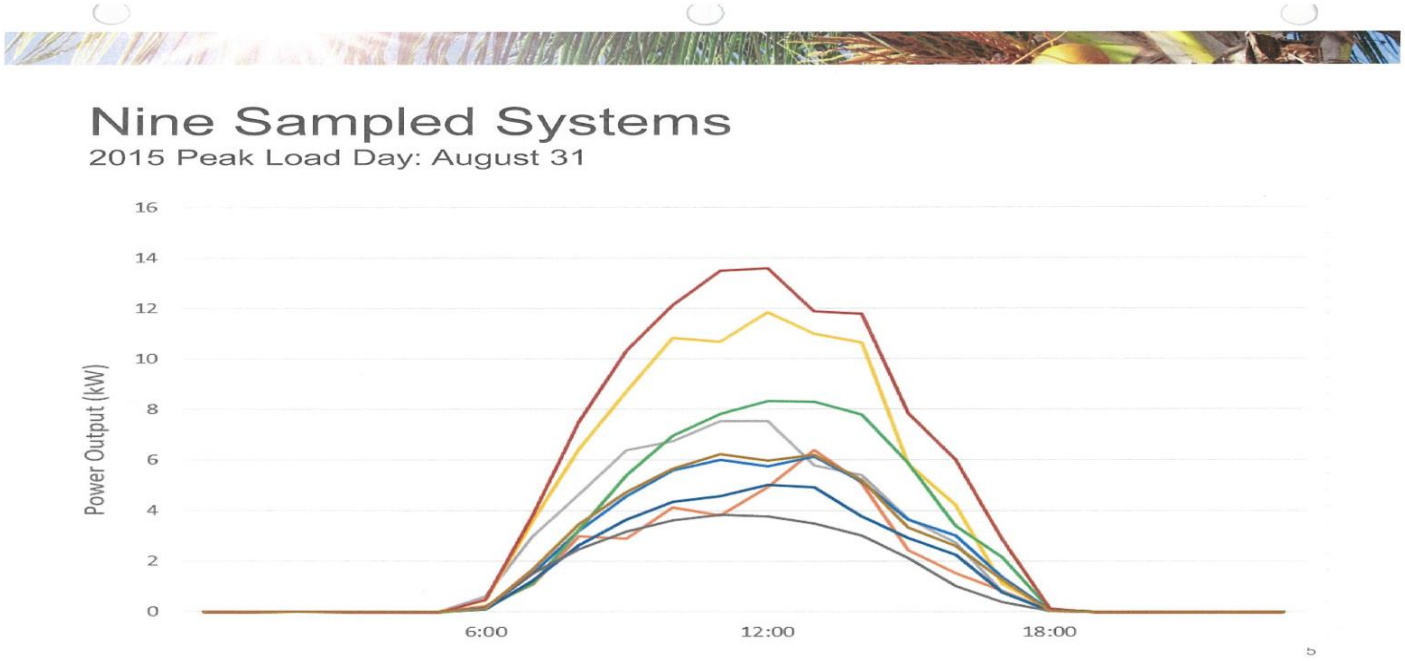
NEM Customer Profiles

Date:	14-Jun-16		
PV System KW Size	5.0		
GPA KWH 12am to 7am	11.05		
GPA KWH 7am to 6pm	3.66		
GPA KWH 6pm to 12am	**12.92**	**Evening Peak**	
NEM KWH 7am to 6pm	16.14		
Net GPA KWH	11.49		



Date:	14-Jun-16		
PV System KW Size	12.4		
GPA KWH 12am to 7am	28.9		
GPA KWH 7am to 6pm	6.1		
GPA KWH 6pm to 12am	**34.6**	**Evening Peak**	
NEM KWH 7am to 6pm	32.5		
Net GPA KWH	37.1		

Does NEM Lower Guam Generation Capacity Requirements?



No. NEM Solar PV systems in Guam does not reduce peak demand and therefore does not eliminate conventional capacity needs

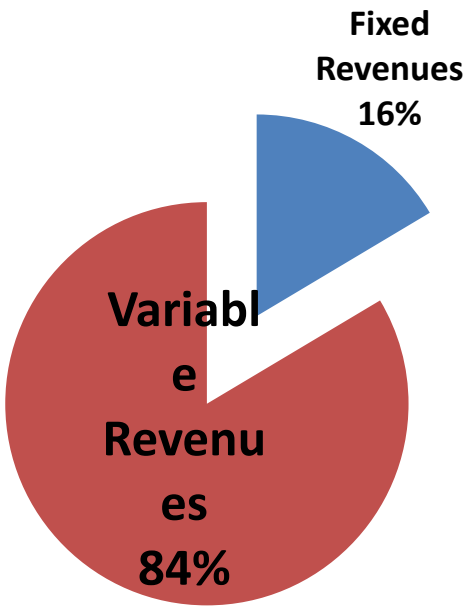
Transmission, Distribution, or Generation Capacity for Guam Not Reduced by PV

NEM Peak Production not at GPA Peak Demand Period

Source: Clean Power Resource Report

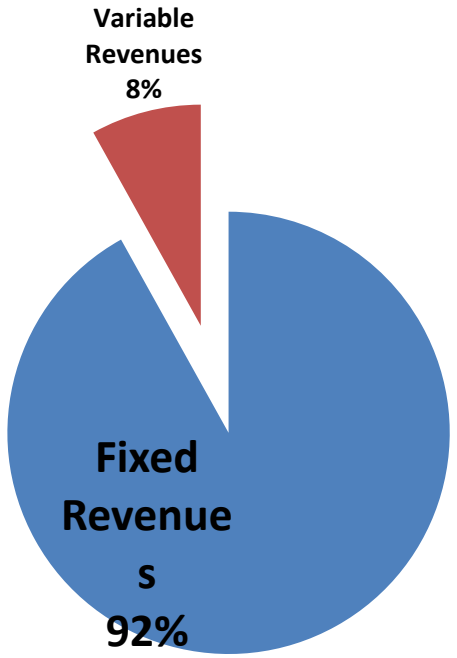
Net Metering Policy Issues

- Replacement for Net Metering Program
- Grandfathering existing registered NEM customers
  - Allow customers who own system to recover investment
  - Phase in to avoided cost rates over a 5 to 8 year period
- GPA files for PUC approval:
  - Reassessed NEM rates each LEAC for Avoided Fuel Value
  - Reassessed NEM rates for other components
    - Annually
    - Periodically over a set number of years
    - When GPA's generation mix changes



Value of the Grid to NEM Customers

- NEM customers receive services from the grid including:
  - Use the grid to sell power (get credit at full retail rate for excess production)
  - Use the grid to energize their homes at night, but credited back from their production (Uses GPA Grid as storage)
  - Using Grid at night results in increased fuel cost to non-NEM Customers because costlier less efficient generation is used to generate their energy needs
  - Frequency regulation absorbed by grid for intermittencies
  - Reactive power supply
  - Voltage regulation
  - Stand-by power on overcast days when the sun does not shine



- Monthly fixed charge of $15 does not recover cost to serve from grid
  - Most of GPA fixed cost is recovered in the energy use (kWh) rate component which is typically zero for NEM customers

Rate Structure & Fixed Cost Recovery

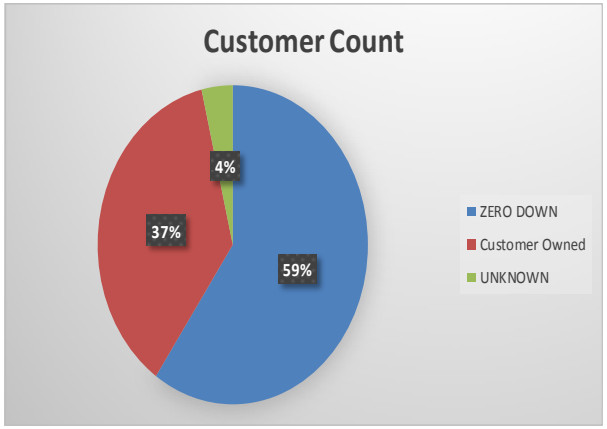
Civilian Fixed vs Variable Revenues

Navy Fixed vs Variable Revenues

GPA Rate Structure Should Move Towards Recovering More Fixed Costs Through Fixed Charges.

- Civilian rate structure
  - Most of GPA fixed costs recovered in the variable rate
- Navy rate structure
  - Most of GPA fixed costs recovered in the fixed rate
- Hawaii has moved to fixed cost recovery predominantly through its fixed rate

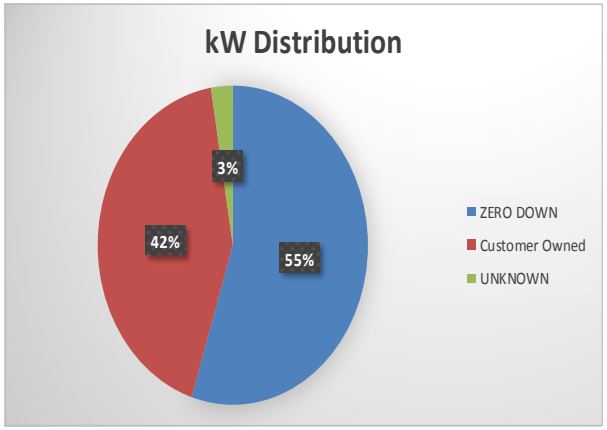
Net Metering Public Meetings Held to Gather Input from Stakeholders



Key Points from Public Meetings

- Solar PV providers opined the B&V report provides all the gain to GPA and did not represent true value of solar
- NEM Owner wants to recover his investment. Asked for grandfathering until he does so. He said it will take 7 years to recover his $60K investment
- NEM not meant to be money making business but a fair exchange of trade energy…some customers making money from units sized beyond their needs
- The applicability of NEM program to 3rd party providers need to be clarified
- Solar PV provider wants NEM program to continue up to 20% penetration similar to Hawaii
- Solar PV provider wanted more time to provide a report on Value of Solar and bring to GPA for information. Report was completed and presented by Clean Power Research on April 18, 2018

Key Points from Public Meetings (continued)



- Solar PV provider commented the NEM energy saves the utility cost on:
  - Maintenance cost for generations, poles, labor, lines, substations, transformers, etc.
  - Reduction of line losses because energy is near customers
  - Costs associated with fuel and fuel shipments
  - Helps GPA achieve energy portfolio reducing need for more renewable projects
  - Savings to environment; lessens carbon foot print
- Solar PV Provider-GPA should consider subsidies for home energy storage systems
- Solar PV Provider-GPA should consider grandfathering NEM customers through a phased approach
- No new points placed forward at the July 18, 2018 public meeting where the GM presented his recommendations which were previously presented to CCU

With Tax Credit	$17,495		**8.4**
15 Year Loan Annual Payment, 8%, 15 years	$2,043	$31.82	

Summary

- Net Metering was established 13 years ago in 2004. Substantial Changes has occurred on GPA delivery cost and more changes expected by 2022.

- Customer Owned NEM System recovers its investment within 5 to 8 years from installation at GPA full Retail Rate Credit.

- Customer Owned NEM System recovers its investment within 8 to 12 years from installation at GPA LEAC Avoided Cost Rate Credit.

- It appears Zero Down Customers with 2.9% escalators will incur higher cost over the life of their 25 year contract. A $0.18/KWH rate in 2018 becomes $0.357/KWH in 2042.

Additional Information on Net Metering

Hawaii (HECO, MECO, HELCO, Molakai, Lanai)	∞	NEM application was submitted to the utility postmarked 10/12/15 or earlier
Vermont	10	Net metering systems with a complete Certificate of Public Good application filed with the PSB prior to January 1, 2017 (as long as the application was filed at a time when the electric company was accepting net metering systems, based on the state's former aggregate capacity limit) are grandfathered

- Utilities and States Differ on Grandfathering NEM Customers
- Many Jurisdictions are Ending Net Metering

5

Maine

- In early 2017, Maine became the fourth state to more appropriately compensate net metering. The Public Utilities Commission adopted a ramp-down policy, which gradually harmonizes the transmission and distribution charges for net metering customers, aligned with true avoided costs.
- The rules grandfather existing customers for 15 years.

Source: Tanton, Thomas. (April 2018) Net Metering in the States: Moving Toward Equitable and Sustainable Policies for Electric Customers. URL at http://sglf.org/wp-content/uploads/sites/2/2018/04/SGLF-Net-Metering-In-the-States-by-Thomas-Tanton-April-2018.pdf (August 17, 2018).

7

Hawaii

- Marco Mangelsdor, president of installer ProVision Solar.
  - "… Hawaii's net energy metering (NEM) policy has "88% of the utility's ratepayers subsidizing the 12% who have net energy metered systems."
  - He believes utility's concern about that shift of costs for system maintenance is reasonable.
  - "The cost of NEM was $38 million in 2013 and it is estimated at $53 million in 2014. These are not trivial dollars."

11

California

- One of the first studies to quantify the magnitude of the NEM subsidy was conducted by Energy+Environmental Economics (E3) for the California Public Utilities Commission (CPUC) in 2013.
- The E3 study estimated that NEM would result in a cost shift of $1.1 billion annually by 2020 from NEM to non-NEM customers if current NEM policies were not reformed in California.
- A cost shift of this magnitude–paid for by non-NEM customers–was unacceptable to California regulators.
- As a result, California regulators set to work to reform rates in their state; many other states followed suit and conducted similar investigations of the magnitude of the NEM subsidy.

12

Nevada

- Recently, Arizona Public Service (APS), the state's largest utility, found that solar customers avoid on average around $1,000 annually in costs for operating the electric grid, costing the average power user, who must make up the cost, a $16.80 premium per year.

13

Louisiana

- Overall, the state found that its net metering structure resulted in an $89 million negative net benefits to electricity rate payers, meaning the net metering program costs are greater than program benefits, and that over $2 million of utility costs per year were being subsidized by non-solar consumers.

14

See attached Article of May 18, 2018 by Institute for Energy Research (IER)

Subsidies uncheck will continue to impact Non-Net Metering substantially: Guam is at 3.36%; Hawaii is at 12 % NEM;

Description:	Jul-18	Future	Future	Future
% of All Customers	3.36%	5.00%	10.00%	15.00%
NEM Customers	1,733	2,576	5,152	7,727
Energy Produced	33,921,230	50,416,970	100,833,939	151,250,909
Annual Subsidy	$3,411,623	$5,071,652	$10,143,304	$15,214,955
Non-Nem Customers	49,782	48,939	46,364	43,788
Cost to each Non-NEM	**$68.53**	**$103.63**	**$218.78**	**$347.47**

Recommendation

1. CCU approve GPA filing a petition to the PUC as shown herein to consider changes to the existing net metering credit

2. Recommend an implementation plan for billing NEM customers on net billing: Buy All/Sell All or similar billing models

3. GPA files with GPUC for adjustment of net metering credits from retail to avoided cost

4. It is recommended that for existing NEM Customers, implement a Grandfather phase-in approach over 5 to 8 years to the GPA avoided cost credit. Adjustments for LEAC, line loss and variable cost changes done annually.

5. For future NEM customers, credit set at the GPA avoided cost

GPA Resolution No. 2018-18

RELATIVE TO THE APPROVAL OF ORGANIZATIONAL REALIGNMENT - CREATION OF THE ADVANCED METER INFRASTRUCTURE (AMI) TECHNICIAN SERIES POSITIONS

What is the project's objective and is it necessary and urgent?
The installation and utilization of GPA's advanced meter infrastructure (AMI) beginning in 2011, including smart meters, significantly changed the Authority's processes and structure. Current employees holding Meter Reader and Customer Service Electrician series positions are performing AMI or other work generally unrelated to their position titles. The Authority seeks to create new positions, abolish unnecessary positions, and eliminate overlap of similar functions in order to gain efficiencies and reflect its current processes and structure.

Where is it at?
The AMI Technician series will be initially utilized by Customer Service, PSCC, and Meter Shop but may be used by other divisions. The Meter Reader and Customer Service Electrician series recommended for abolishment are under the Customer Service division organizational structure.

How much will it cost?
The reorganization is not expected to exceed the current budget.

When will it be completed?
No later than October 28, 2018

What is its funding source?
Revenue funds.

The RFP/BID responses: Not applicable

ORGANIZATIONAL REALIGNMENT

Creation of the AMI Technician Series Positions

August 23, 2018

Summary

- Installation of smart meters and accessories (beginning 2011) significantly changed GPA's processes & structure
- GPA commissioned an analysis of then-current processes and the anticipated changes
- Several recommendations were instituted, including changes to some business processes and organizational structure
- Other changes were instituted, yet not formalized

- Meter Readers & Customer Service Electrician perform the following duties:
  - Monitor smart meters, generate reports and work orders using AMI tools
  - Provide AMI technical assistance
  - Assist Customer Service Representatives
- Meter Shop absorbed the following duties:
  - Manual meter readings
    - 27 opt-out customers *as of July 2018*
  - Manual reconnections & disconnections
  - Meter & streetlight investigations

Outstanding Actions

- Reflect the current processes & structure
- Create new positions
- Eliminate overlap of similar functions
- Abolish unnecessary positions

LIST OF POSITIONS TO BE ABOLISHED	LIST OF POSITIONS TO BE CREATED
Electric Meter Reader I	AMI Technician
Electric Meter Reader II	AMI Technician Leader
Electric Meter Reader Leader	
Electric Meter Reader Supervisor	
Customer Service Electrician I	
Customer Service Electrician II	
Customer Service Electrician Leader	
Customer Service Electrician Supervisor	

Proposed Creation of Positions:

AMI Technician:
Responsible for assisting with and supporting the day-to-day monitoring, analysis and control of the Command Center for the Advanced Metering Infrastructure (AMI) operations and Radio Frequency (RF) networking.

AMI Technician Leader:
Leads and supports the day-to-day monitoring, analysis and control of the Command Center for the Advanced Metering Infrastructure (AMI) operations and Radio Frequency (RF) networking.

GM REPORT

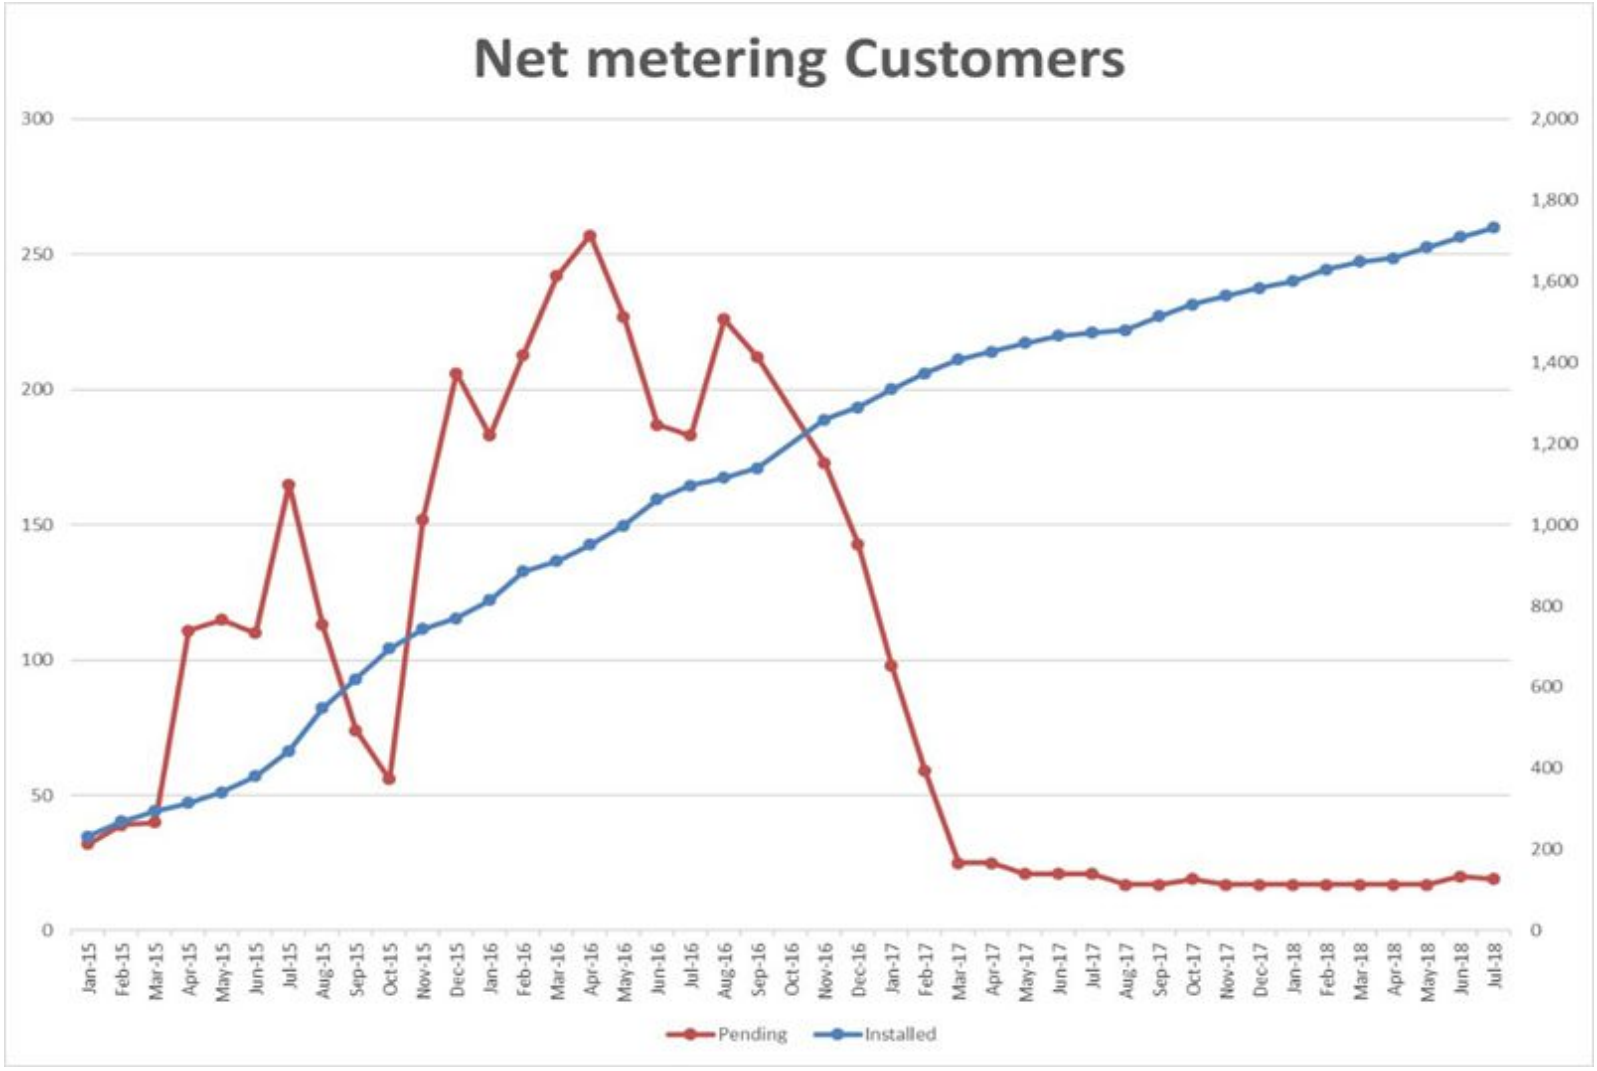
TO: **Consolidated Commission on Utilities**

FROM: **General Manager**

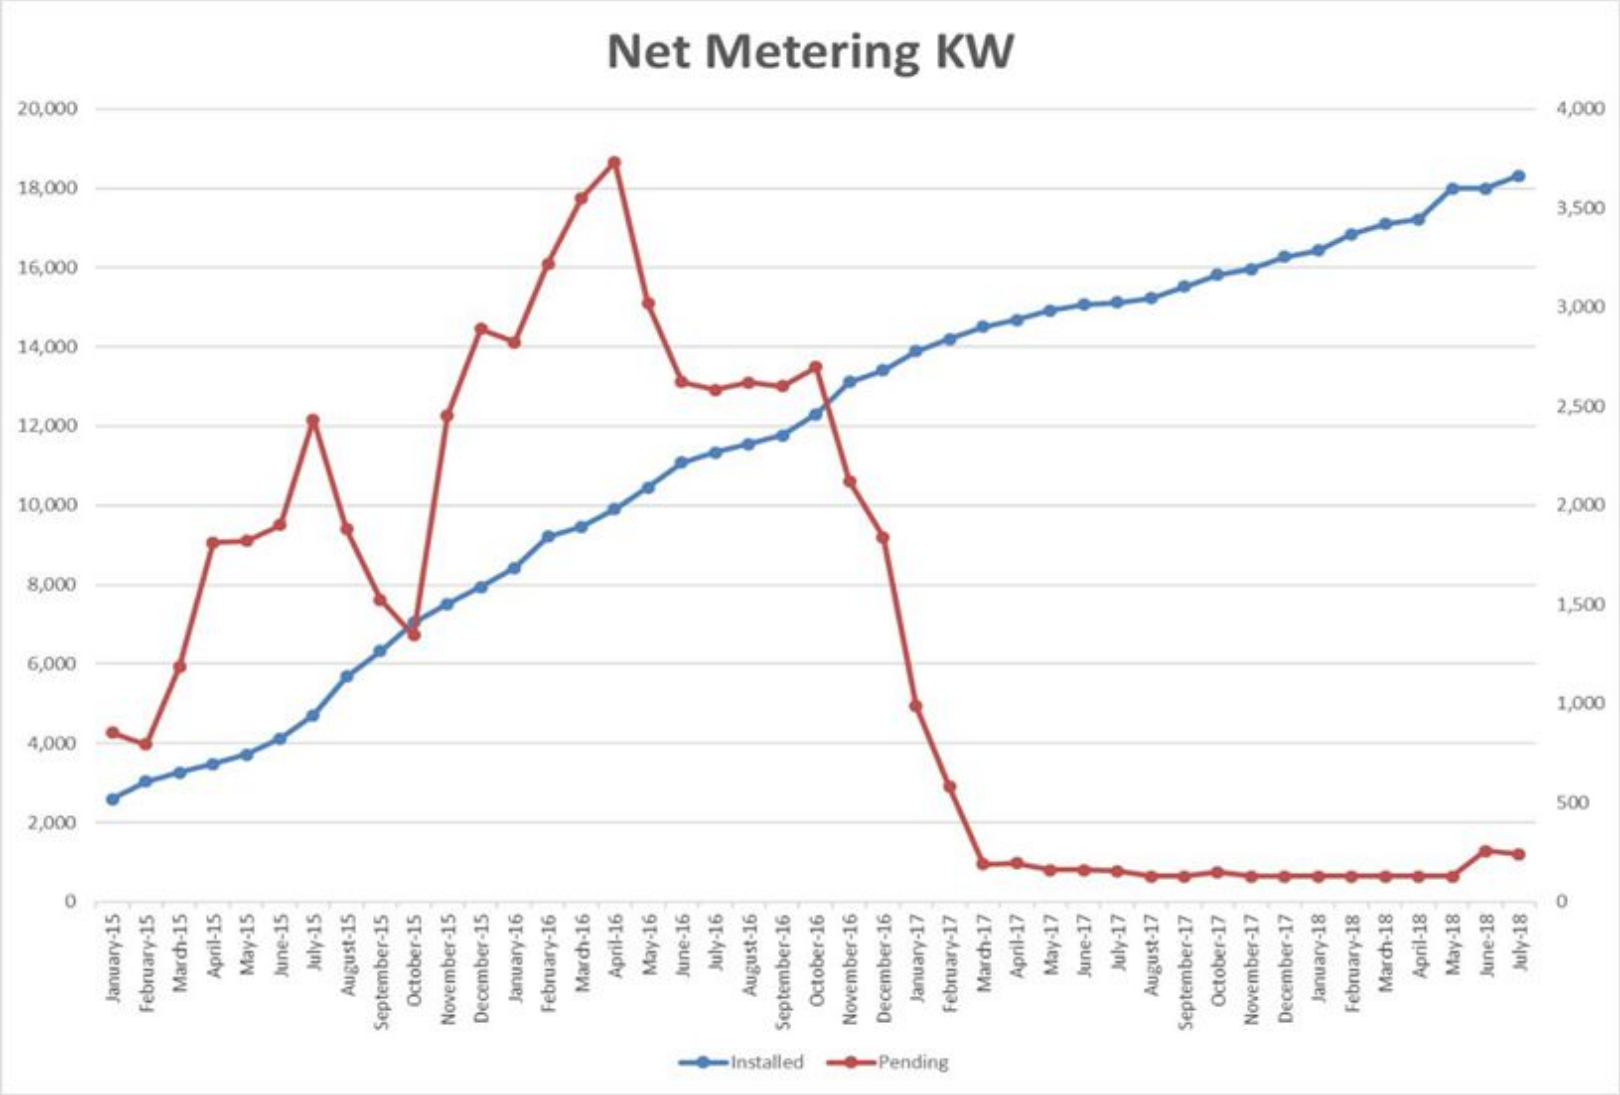
DATE: **August 23, 2018**

SUBJECT: **General Manager's Report**

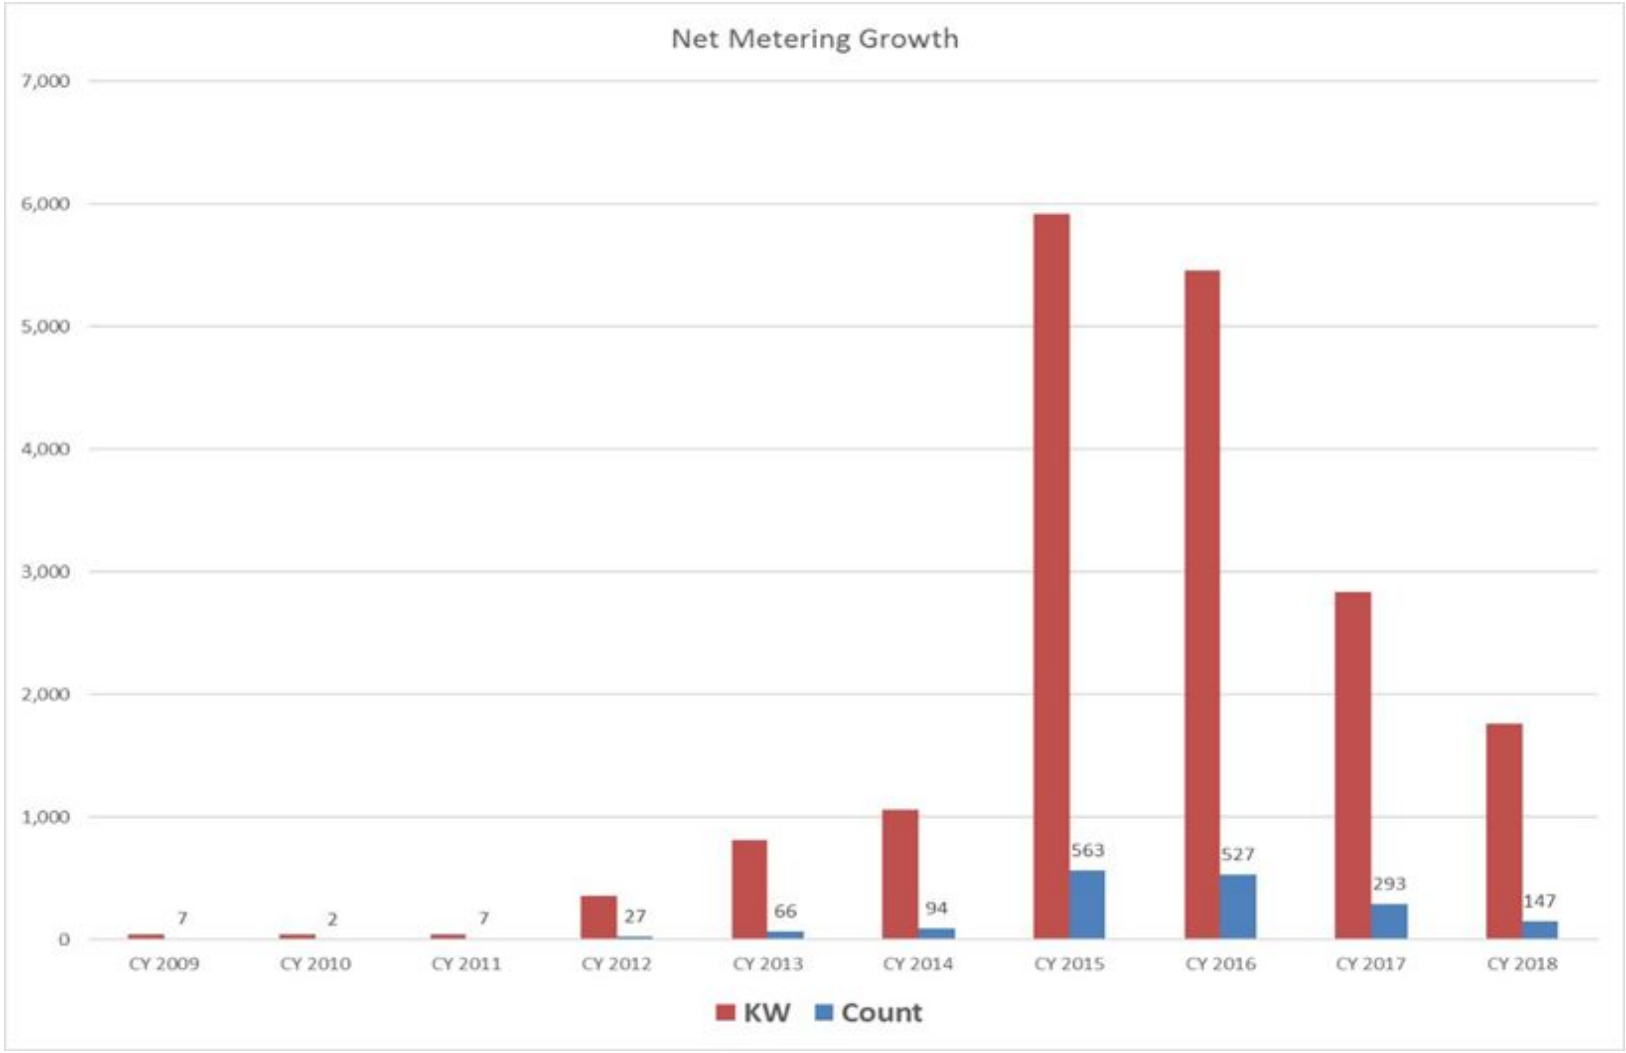
This report provides an update on key issues:



1. **Generation System:** The following summarizes the expected generation capacity projection for **August 2018**. All base load units are expected to be in operation for the month. The Cabras steam units are currently limited to 55 MW each to minimize the potential for boiler tube leaks which is a common occurrence for them.



August 2018 Projected Capacity:	**360 MW**
August 2018 Projected Demand:	**250 MW**
Anticipated Reserve Margin:	**110 MW**



2. Net metering Summary Ending July 2018:

Description:	Count	Kw
Active	**1,733**	**18,315**
Pending	19	241
Totals:	1,752	18,556

Service:	Count	KW	Kw/Customer

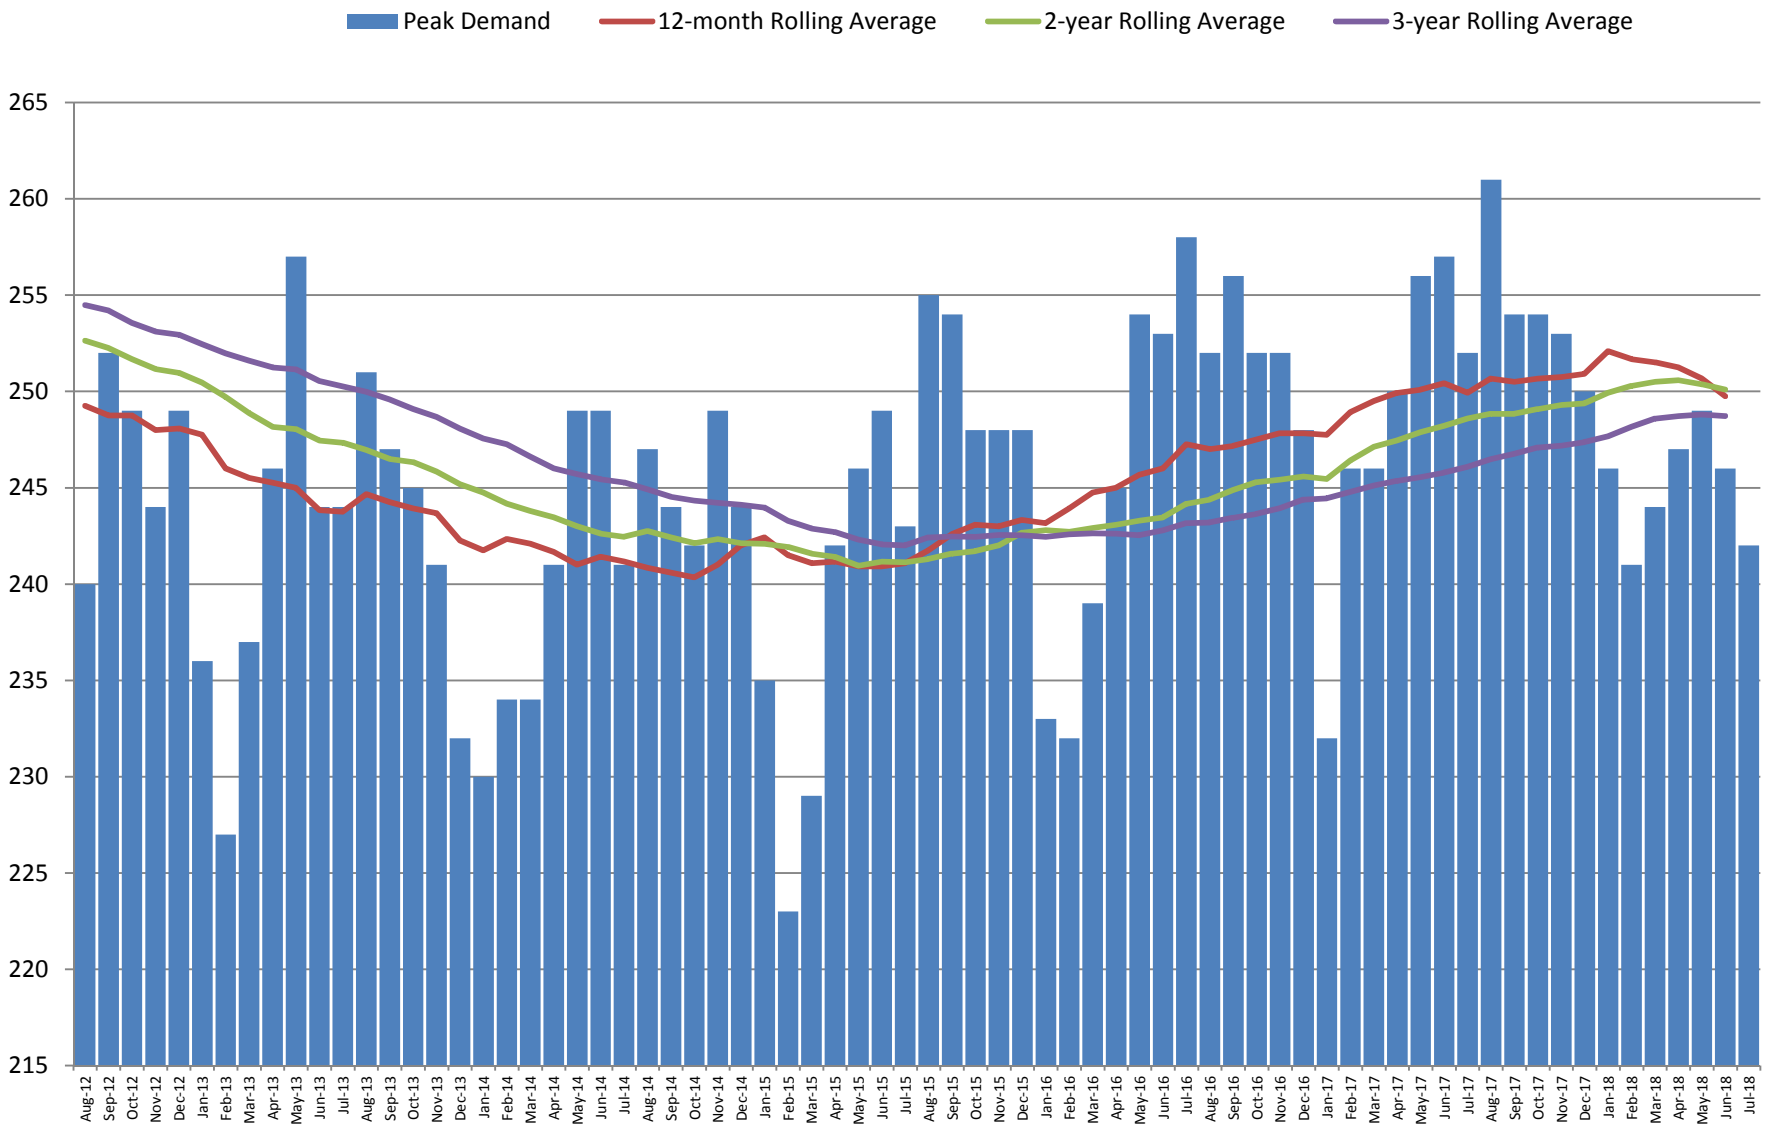
SUMMARY

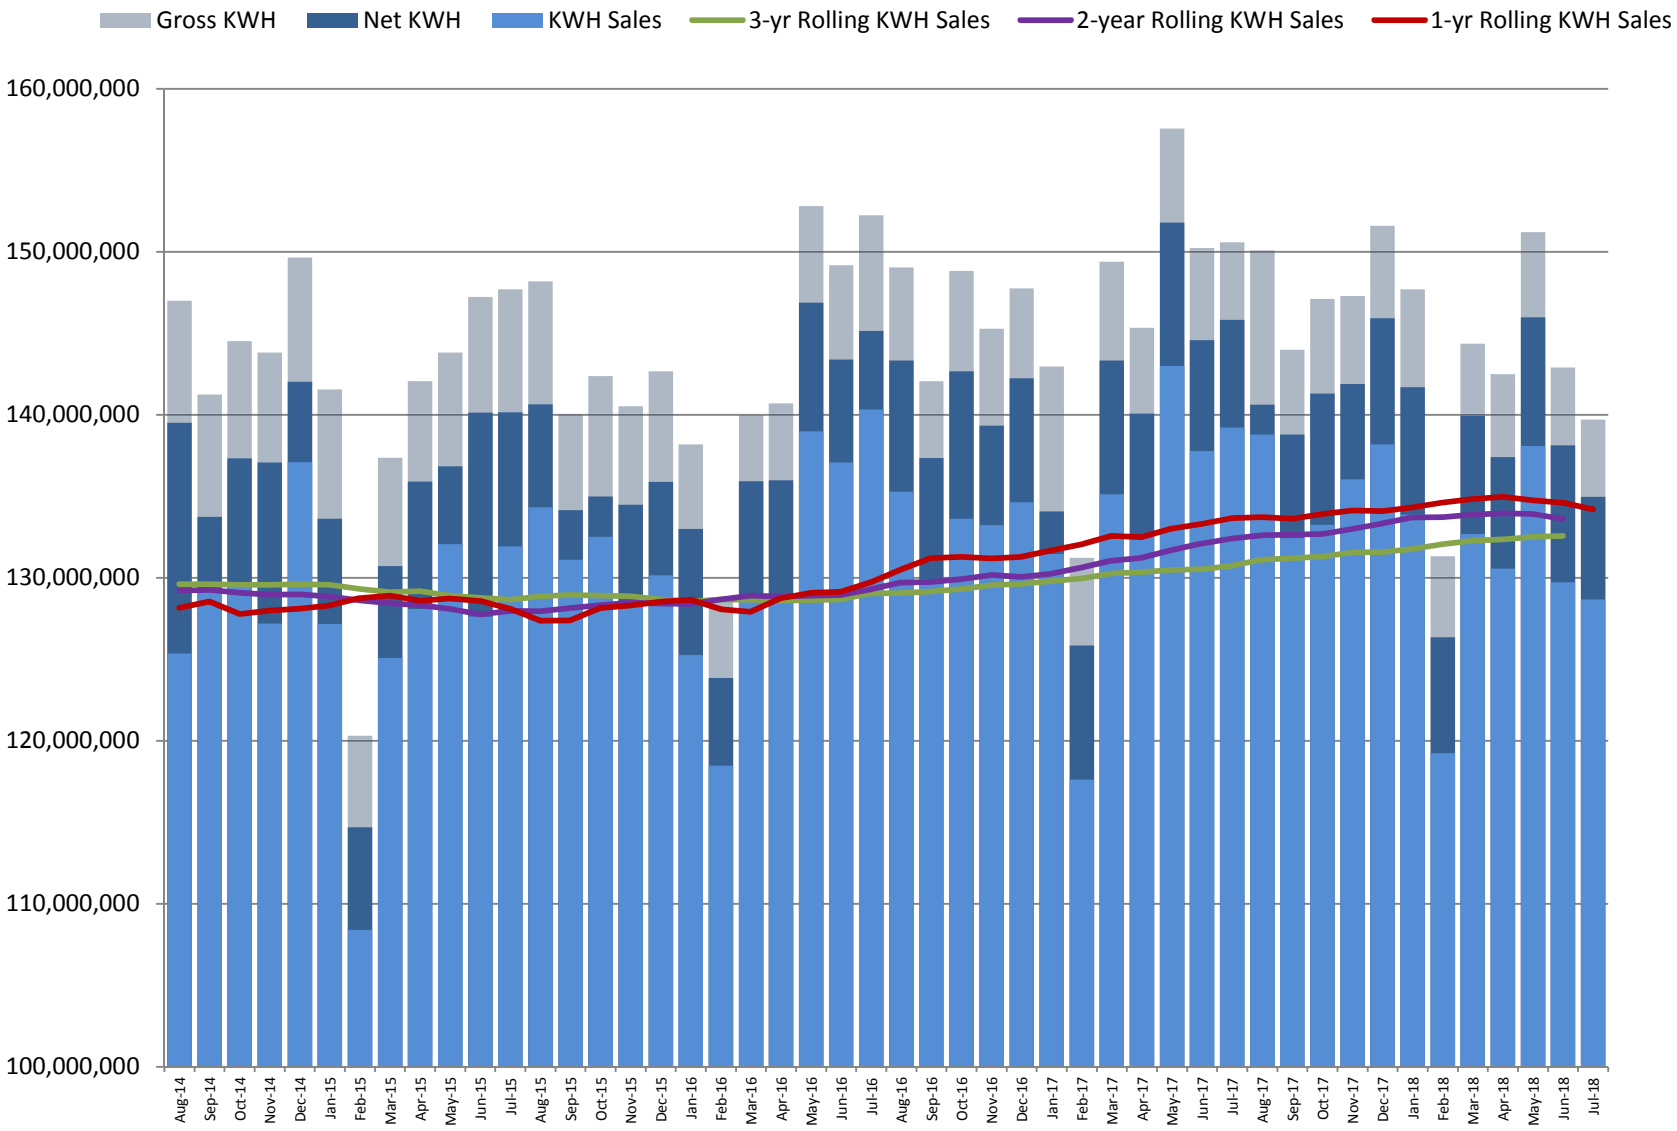
DESCRIPTION	AMOUNT
Initial DSM Budget FY'16	$1,806,014.00
Interest Income as of July 18	$4,367.24
Total Expense	$1,878,545.53
Ending Balance as of July 18	$(68,164.29)
Addtl. Budget: Approved (FY'18)	$1,139,189.00
Total Ending Balance as of July 18	**$1,071,024.71**

4. New Power Plant Specifications: GPA has submitted the bid specifications for the new power plant to PUC for approval. ALJ Horecky has placed the item on the agenda for the August 30, 2018 regular PUC meeting.



5. Phase II Renewable Contracts:

- **Contract signing for HANWAH 60 MW Renewable project is scheduled for Wednesday August 22nd at 10am here at Fadian.**
- **Contract Signing for KEPCO- LG CNS 60 MW Renewable project is scheduled for Friday August 24th here at Fadian**
- **These two contracts when completed in 2021 will save the ratepayers over $43M over the first 5 years or operations (estimated at a LEAC of $0.11/Kwh)**



6. Key Performance Indicators: The following are indicators thru July 2018.

Key Performance Indicators: The following are updated indicators thru July 2018.

Current vacancies adjusted to reflect FTE of 510

** JOBS = Job Opportunities and Basic Skills (individuals under the Public Health assistance program)

** GETP = Guam Employment & Training Program (individuals under the Public Health assistance program)

** SCSEP = Senior Community Service Employment Program

** APPRENTICESHIP TRAINING PROGRAM - Generation, PSCC and T&D combined total

** JOBS/SCSEP/GETP and Apprentice program participants are not included in the total annual budgeted FTE (Full-Time Employee) count.

** P.L. 34-32 -Temporary employee(s)

Staffing Report as of July 31, 2018 - PREPARED BY: J.Aguigui

PLANNING & REGULATORY DIVISION REPORT

The following summarizes P&R's activities for the month of July 2018

INSPECTIONS/MONITORING

- Best Management Practices (BMP) Weekly Inspection/Report – Cabras Power Plant
- Monthly Spill Prevention, Control and Countermeasures (SPCC) Inspection/Report – Cabras Power Plant, Macheche, Dededo, Yigo CT, Talofofo, MDI, Tenjo Diesel, Piti 7 Power Plants, IP&E fuel Farm.
- Reviews monthly Continuous Emissions Monitoring System (CEMS) report and monitors TRC's O&M for Tenjo Diesel
- Monitoring of used oil disposal to the WOF from UNITEK Environmental

REPORTING

- New Source Performance Standards (NSPS) Monthly and Quarterly Report– Submitted reports to GEPA/USEPA for Macheche CT, Yigo CT, Piti #7 CT, Talofofo, Manenggon and Tenjo Diesel Plants.
- Quarterly Discharge Monitoring Report (NetDMR) submitted to USEPA
- Quarterly Fuel Switching Report submitted to USEPA
- Submitted Annual Toxic Release Inventory Report (TRI) RY2017 via EPA online reporting tool
- Gathered spill reports and absorbent pad PO's as part of a request for public records pursuant to sunshine reform act of 1999 5 GCA S10101

SPILL/ENVIRONMENTAL RESPONSE

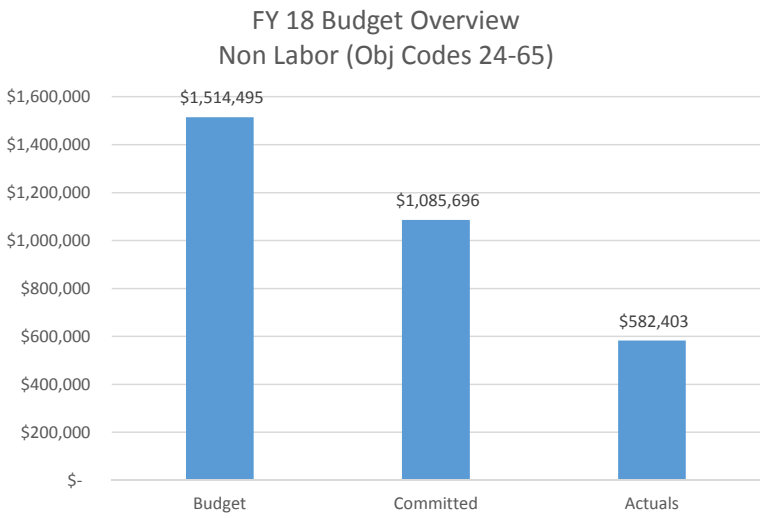
- Responded to a leaking transformer along Route 3 in Finegayan

PROCUREMENT

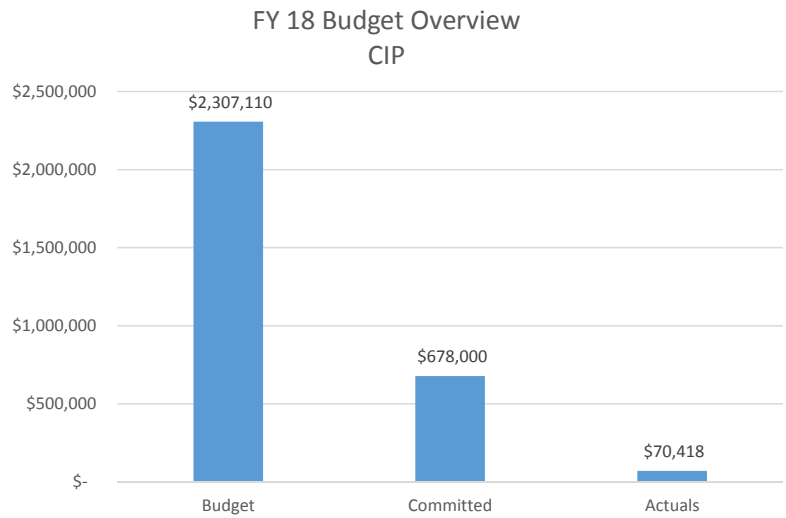
- GPA-RFP-18-007 Annual Emission Testing – Requested for Best and Final Offer
- GPA RFP-18-008 CEMS and RICE MACT O&M – Evaluating bid proposal from two Contractors
- IFMSB GPA-068-18 – Hazardous Material Removal and Disposal for Tanguisson and Dededo Diesel. Bid currently on hold.
- Processed RFQ bid for the tank bottom sampling of Tanks 1934 and 1935
- Assisted Meganum Inc, in conducting site inspection for the Tanks 1934 and 1935 tank bottom sampling

TRAINING

- Attended Procurement Training on Creating Requisitions
- Attended Accident & Injury Reporting and Safety Orientation Training; July 19, 2018.



OTHER PROJECTS:



- Prepare the WOF energy recovery SOP in Cabras for final review and signature
- Meeting with SPORDS regarding the following:
    - 1934 and 1935 Tank bottom sampling
    - API Tank out of service inspection and repair
    - Disposal soil and metal structure in the Tank Farm
- Environmental Strategic Plan – assisting SPORD in updating the ESP
- Talofofo Excedance to Permit Limit – coordinated with Operations to reduce use of Talofofo Diesel Plant
- Piti Sub Soil Remediation (Navy Project) – Part of information dissemination list and POC along with Engineering
- GPA Employee Family Fun Day
    - Event has been postponed until further notice
    - Assisted as Members of Committee and 3rd Floor Sub-Committee
    - Participant in Static Display Competition
- Engineering Internship Program – our group has 1 intern for this summer

Responsible	PROJECT	Description	Bid or RFP	Bid/RFP No	Announced	Bid Opening / Due	Notes
SPORD (ANF)	FUEL	Supply of Diesel Fuel Oil No. 2	MS Bid	GPA-008-18	11/16/2017	TBD (Phase I) TBD (Phase II)	Procurement Stay in place since 07/27/18. Bid specs revised- awaiting final review by Fuel Committee and Legal (TBD) Under Mgt Fuel Committee review (TBD)
SPORD (JTL)	RENEWABLES	Renewable Energy Resource Phase III	MS Bid	GPA-007-18	11/16/2017	10/4/2018	Lease modifications ongoing to address bidders' concerns/questions. Completed lease discussions in July.
SPORD (RAC)	SMART GRID	Mobile Workforce Management System (MWMS) **RE-BID**	MS Bid	GPA-023-17	10/5/2017	3/20/2018	Procurement processing Insurance -August 2018
SPORD (MAT)	PLANNING	Planning Software Consulting Services	RFP	GPA-RFP-18-010	7/26/2018	8/30/2018	Consulting Services for GPA's ABB Software utilized in planning and operations research activities.

DEVELOPING PROCUREMENT

Responsible	PROJECT	Description	Bid or RFP	Projected Start	Projected Completion	Status
SPORD (FJI)	NEW POWER PLANT	Build, Operate & Transfer Contract for 120-180MW of New Generation Capacity. **(PHASE II - TECHNICAL SPECIFICATIONS)**	MS Bid			Pending final bid documents.
ENGINEERING	FUEL	GPA Tank Farm DFO Pipeline Upgrade - Design / Build	Bid	2/8/2018	11/30/2018	Preparation of bid specs in progress. To install new diesel line from Navy Tie-in to the Bulk Fuel
ENGINEERING	FUEL	Tank 1935 API 653 Internal Inspection	Bid	5/1/2018	5/31/2019	Preparation of bid specs in progress. Budgeted for FY 2018.
ENGINEERING	FUEL	OWS Upgrading	Bid	5/1/2018	5/31/2019	Preparing IFB bid specs.
ENGINEERING	FUEL	LD System Upgrading	Bid	5/1/2018	5/31/2019	Preparing IFB bid specs.

DEVELOPING PROCUREMENT (continued)

Responsible	PROJECT	Description	Bid or RFP	Projected Start	Projected Completion	Status
SPORD (RAC)	ELECTRIC VEHICLE	Electric Vehicle Charging Stations	Bid	Jul-18	Sep-18	Developing Specifications
SPORD (RAC)	SCADA	DNP3 SA training	RFP	Jul-18	Dec-18	Submitted to Procurement (August 2018)
SPORD (RAC)	ELECTRIC VEHICLE	Electric Vehicle Infrastructure	RFP	Aug-18	Dec-18	Developing RFP
SPORD (RAC)	STUDIES	Consulting Services for Distribution Study using Smart Grid Analytics	RFP	Jul-18	May-19	Submitted to Procurement (July 2018)
SPORD (RAC)	SMARTWORK SYSTEMS	Smartworks Systems Software Services	RFP	Aug-18	Continous	Developing RFP
SPORD (ANF)	FUEL	Bulk ULSD Supply	Bid	Aug-18	Dec-18	Draft Bid review by Mgt Fuel Committee
SPORD (ANF)	FUEL	ULSD supply for WSD and other plant sites	Bid	Sep-18	Mar-19	Developing Specifications
SPORD (ANF)	FUEL	GPA Bulk Fuel Storage Facility PMC	Bid	Sep-18	Sep-19	Developing Specifications to convert to PMC
ENGINEERING	FUEL	Guatali Bridge for ULSD Tankertruck access from Tristar	Bid	FY2018	FY2019	Developing Specifications w/ DPW Consultant (WSP)
SPORD (MAT)	FUEL / OPERATIONS	IFB for the Supply of Reprocessed Waste Oil Meeting GPA's ULSD Specifications	Bid	FY2018	FY2019	Bid Documents, Scope of Work, Bid Price Structure under review by Management
SPORD (LOS)	STUDIES	Power System Analyses and Studies	RFP	FY2018	FY2019	Pending RFP No. and announcement date from
SPORD (LOS)	WIND TURBINE	Wind Turbine O&M Supervision and Materials	RFP	FY2019	FY2019	Developing RFP documents

Project Activities

No.	Project Description	July 2018 Activities	Status / Est. Completion	RFP/Bid No
1	Energy Storage System (Phase I)	GPA reviewing Pre-Final design. Clearing and grading permit work commenced in November 2017. Foundation permit work commenced in January 2018. Construction is 42% completed.	September 30, 2018 (Request to extend completion date is pending)	MS Bid GPA-082-15
2	Renewable Energy Resource Phase II	PUC ratifies KEPCO contract (Docket 18-06) and approves HANWHA contract (Docket 18-08) on March 29, 2018. Signing dates are scheduled for the end of August 2018.	KEPCO PV plant COD is APR 2021. Hanwha's COD is anticipated for 1st qtr of 2020.	MS Bid GPA-070-16
3	New Power Plant Bid (EPCM)	Completed technical bid documents and obtained CCU approval to petition PUC for approval	Award (2019 Q3) COD (2022 Q2)	MS GPA-034-18
4	DSM Marketing	Represented GPA (presenter) at the Energy Outreach Session at Pacific Star Resort hosted by GEO and supported the 2018 Home and Lifestyles Expo at the Agana Shopping Center.	Continuous	
5	DSM Rebate Program	Processed over 270 equipment in applications for rebates totaling ~ $60K	Continuous	
6	Wireless Network Expansion	Commenced Southern Expansion in collaboration with GWA: 30% Assessment of GWA Well Locations: Completed Assessment of Existing Tropos Units: 100% Router Equiqment and Accessories purchase Routers programming Preparing next router order and installation documents	Dec-18 Completed Completed Received routers - May 2018 Completed - June 2018 Accessories - May 2018 August 2018	GPA-019-18
7	Performance Metrics Automation Project	Presentation on iDashboard provided to GM. GPA contiues to work with consultant on automating reports and formating.	Mar-18	
8	Electric Grid Analysis Software	Additional training for users Realtime Voltage Module Training on Planning and Analysis Cases	Completed Completed (July 2018) November 2018	GPA-064-16
9	Services to Develop Business Performance Indices using iDashboards	Dashboard builds 95%	Ongoing	GPA-RFP-16-008

Project Activities

No.	Project Description	July 2018 Activities	Status / Est. Completion	RFP/Bid No
10	Supervisory Control and Data Acquisition (SCADA) System	Change Order Approved for October 2018 Completion and hardware costs Servers; Programs, & Workstations Installed Point to Point Test Ongoing	Oct 2018 (SCADA COD) Completed 'Sept 2018 (Estimated Completion)	GPA-066-16
11	Mobile Workforce Management System	Bid Evaluation Completed, Clevest recommendation memo submitted for approval March 21, 2018 Purchase Order being Processed Pending Vendor Insurance	May 2018 (Bid Award) August 2018 September 2018	GPA-023-17
12	Consulting Services for Smart Grid Analytics Enabled Distribution System Planning, Technical, and Economic Feasibility Studies	New Bid	August 2018 (Announcement)	RFP-18-XXX
13	MEC Piti &8 and #9 - ECA Expiration	Environmental Assessment Report completed. Condition Assessment past due from Consultant.	[Completed] OVERDUE	RFP-17-002
14	MEC Piti &8 and #9 - ECA Extension	CCU approval received. PUC approval received, pending review of contract amendment. Amendment discussions w/ MEC on-going.	[Completed] In progress	
15	Generation Software (GADS open software)	Pending data entry from Generation & SPORD.	[On-going work]	
16	IFB for ULSD Supply for Baseloads and Peaking Units	Solicitation in progress. Bid package revised to include delivery requirements.	Start Date: Nov 2017 Est. completion: FY2019	IFB GPA-008-18
17	Contract for Lease of Bulk ULSD Storage	196KB tank repairs completed. Lease commenced January 01, 2018 until December 31, 2018 with annual extension option up to 4 years as approved by PUC	Start: November 2017 Est. Completion: FY2018 Contract Start: Jan 1, 2018	TTGI-SA-2018-001
18	EV Infrastructure	Fast charge station scope for Mangilao offices. Developing fast charge station scope for Mangilao offices.	Dec 2018 September 2018	

Project Activities

No.	Project Description	July 2018 Activities	Status / Est. Completion	RFP/Bid No
19	Fuel Conversion Plan	Condition Assessment & Transition Plan completed, submitted to Executive Mgmt and Key Employees Additional Support as Owner's Engineer - not needed at this time, per Engr Proj Mgmt Supv & Team, and Spord Fuel Mgmt Engr III	[Completed] Cancelled	
20	Fuel Bulk Storage Facility Assessment	ESA completed, RECs being addressed by GPA/IP&E CA completed	Start: Sept 2017 End: June 2018	
	Renewable Energy Resource Phase III	Completed pre-bid conference and site visits January 23-24 2018.	(Mar 2018) Tech Proposal Due	
21	Utility Energy Services Contract (UESC)	Conducted Best Schools program site assessments. Continued discussions with Navy.		
22	IFB for Delivery Services for GPA Plants	Bid canceled. Requirements to be included in the ULSD Supply solicitation	IFB Canceled Feb 2018	IFB GPA-006-18
	IFB for RFO Supply to Baseload Plants	Solicitation for a 2-Year Contract in progress. Note: PUC approves a 3-month extension of existing contract until November 30, 2018.	Solicitation in progress (for award) Est. Completion: FY2019 (1st Qtr)	IFB GPA-009-18
23	IFB for Petroleum Inspection Services	Solicitation completed. 2-Year contract to commence August 1, 2018 and will expire on July 31, 20120 with three (3) annual extension options	(Contract signed)	IFB GPA-014-18
27	RFO Storage Lease Agreement w/ Tristar	4-Year Lease extension (Sep 2018-Aug 2022) Approved by CCU. Disapproved by PUC - requested for clarification on Index referenced. (Docket 18-10)	Included in the August 2018 PUC meeting Contract Start: Sep 1, 2018	TTGI-SA-2013-001
28	GPA Fuel Farm RFO Pipeline Repair & Upgrade	c/o Engineering Project Mgt	Completed. Project Implementation in progress (Design phase)	IFB GPA-047-18
29	GPA Fuel Farm ULSD Pipeline Upgrade	c/o Engineering Project Mgt	Estimated Start: Oct 2019 Est. Completion: Sep 2019	For CCU/PUC approval for IFB Solicitation

Project Activities

No.	Project Description	July 2018 Activities	Status / Est. Completion	RFP/Bid No
30	Tk 1934 & Tk1935 API 653 Internal Inspection	c/o Engineering Project Mgt	Estimated Start: Jun 2018 Est. Completion: FY2019	For CCU/PUC approval for IFB Solicitation
31	Milsoft Systems Software Services	Negotiations - June 2018	Continuous	GPA-RFP-18-003
32	MV90 Integration Services	Negotiations ongoing - June 2018	Dec-18	GPA-RFP-18-001
33	SCADA Workstations and Monitors	Delivered	July 2018 Completed	GPA-049-18
34	Grant Proposal Development and Proposal Application Management Services	GPA submitted a grant request for the Department of Interior funding opportunity which includes partnered projects with GDOE(Best Schools Program), Public-Access Parking Lot Solar Canopy, Demand-Side Management Expansion, Electric Vehicle (EV) Infrastructure, Employees-Access Parking Lot Solar Canopy, Wind Turbine Battery Storage, and Geothermal Studies and Exploration.	Feb 2018 (Contract signed)	Re-Solicitation GPA-RFP-16-011
35	Pipeline Lease Agreement w/ Tristar	4-Year Lease extension Approved by CCU. Disapproved by PUC - requested for clarification on Index referenced. (Docket 18-10)	Start: November 2017 Est. Completion: May 2018 Contract Start: Aug 1, 2018	TTGI-PA-2013-001
36	Dock Use Agreement w/ Tristar	4-Year Lease extension Approved by CCU. Approved by PUC on March 29, 2018. (Docket 18-10)	Start: November 2017 Est. Completion: Mar 2018 Contract Start: Aug 1, 2018	TTGI-DA-2013-001
37	Redesignation of Cabras-Piti / Guam	Re-designation received 12/2018. TRC standing assisting with SIP Modeling, SIP draft. AAQM Installation/Implementation on hold, will depend on USEPA approval of SIP after submission on/before July 2019	Start: October 2011 Est. Completion: July 2019 *Submitted to EPA by completion date	RFP-11-001
38	Environmental Strategic Planning	Draft review and finalization on-going.	Start: April 2018 Est. Completion: September 2018	RFP-11-001

Project Activities

No.	Project Description	July 2018 Activities	Status / Est. Completion	RFP/Bid No

Monthly Project Report

July 2018

Grow together and WIN

Unrestricted

Project Progression Summary

Equipment Delivery

- July 6, 2018 – Arrival of SCADA Servers
- July 11, 2018 – Arrival of SCADA Cisco Switches
- Pending – Delivery of UPS/Printers, estimated DOA: End of August

Installation and Interconnection

- July 12, 2018 – Installation and Interconnection Phase commences
    - SCADA Servers and Switches installed IAW cabinet layout as provide by GPWA

- Change in 3rd party communication infrastructure
    - Due to unsupported technology, the conversion of analog to IP based communication from GTA was necessary to facilitate end-to-end connectivity between field and control sites

Disaster Recovery

- Secondary site (DR) discussed further and a solution is currently under review

P&R Weekly & Monthly Inspection Reports

- Best Management Practices (BMP) Report Summary [Weekly]
- Generation Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]
- T&D Spill Prevention, Control, and Countermeasures (SPCC) Report Summary [Monthly]

- GPA is responsible to employees, the island environment, and the community to take all reasonable steps necessary to prevent spills from its facilities in order to protect human health and the environment

P&R Inspection Report Purpose

- The purpose of these inspections is to catch discrepancies and violations internally and correct them before inspections by Guam EPA and US EPA
- Regulatory Agencies can conduct scheduled or un-scheduled (surprise) inspections any time
- Any major discrepancies or violations cited can lead to issuance of a Notice of Violation (NOV), possible fines, and/or other enforcement action
- P&R conducts routine SPCC inspections in compliance with the requirements of 40CFR 112.7(a)(3)(ii), Discharge Prevention Measures

FINANCIAL STATEMENT OVERVIEW
July 2018

Attached are the financial statements and supporting schedules for the month and fiscal year ended July 31, 2018.

Summary
The increase in net assets for the month ended was $0.8 million as compared to the anticipated net increase of $1.0 million projected at the beginning of the year. The total kWh sales for the month were 10.89% less than projected and non-fuel revenues were $1.3 million less than the estimated amount. O & M expenses for the month were $5.7 million which was $0.7 million less than our projections for the month. Other expenses for the month such as interest expense, IPP costs, (net of interest income and other income) totaled to $3.4 million, which was $0.5 million less than the projected amounts. There were no other significant departures from the budget during the period.

Analysis

Description	Previous Month	Current Month	Target
Quick Ratio	2.34	2.48	2
Days in Receivables	45	39	52
Days in Payables	35	29	30
LEAC (Over)/Under Recovery Balance -YTD	$8,904,873	$8,422,674	$9,142,210
T&D Losses	4.99%	5.03%	<7.00%
Debt Service Coverage	1.80	1.80	1.75
Long-term equity ratio	17%	17%	30 – 40%
Days in Cash	185	172	60

The Quick Ratio has been a challenge for GPA historically. However, over the last two fiscal years, the influx of cash from insurance proceeds continued to improve this ratio. GPA has current obligations of approximately $73 million and approximately $181 million in cash and current receivables. Debt Service Coverage ratio is calculated using the methodology in use before the Fiscal Year 2002 change in accounting practice.

Financial Statements
July 2018

Significant Assumptions

The significant assumptions in the financial statements are as follows:

- Accrual cutoff procedures were performed at month end
- An inventory valuation is performed at year-end only
- Accounts Receivable includes accruals based on prior months' usage.

FINANCIAL STATEMENT OVERVIEW
July 2018

Attached are the financial statements and supporting schedules for the month and fiscal year ended July 31, 2018.

Summary
The increase in net assets for the month ended was $0.8 million as compared to the anticipated net increase of $1.0 million projected at the beginning of the year. The total kWh sales for the month were 10.89% less than projected and non-fuel revenues were $1.3 million less than the estimated amount. O & M expenses for the month were $5.7 million which was $0.7 million less than our projections for the month. Other expenses for the month such as interest expense, IPP costs, (net of interest income and other income) totaled to $3.4 million, which was $0.5 million less than the projected amounts. There were no other significant departures from the budget during the period.

Analysis

Description	**Previous Month**	**Current Month**	**Target**
Quick Ratio	2.34	2.48	2
Days in Receivables	45	39	52
Days in Payables	35	29	30
LEAC (Over)/Under Recovery Balance -YTD	$8,904,873	$8,422,674	$9,142,210
T&D Losses	4.99%	5.03%	<7.00%
Debt Service Coverage	1.80	1.80	1.75
Long-term equity ratio	17%	17%	30 – 40%
Days in Cash	185	172	60

The Quick Ratio has been a challenge for GPA historically. However, over the last two fiscal years, the influx of cash from insurance proceeds continued to improve this ratio. GPA has current obligations of approximately $73 million and approximately $181 million in cash and current receivables. Debt Service Coverage ratio is calculated using the methodology in use before the Fiscal Year 2002 change in accounting practice.

Financial Statements
July 2018

Significant Assumptions

The significant assumptions in the financial statements are as follows:

- Accrual cutoff procedures were performed at month end
- An inventory valuation is performed at year-end only
- Accounts Receivable includes accruals based on prior months' usage.

Issues for Decision

Resolution No. 2018-17:

Relative to Approving GPA's Net Metering Recommendation

What is the project's objective? Is it necessary and urgent?

The necessary and urgent objective of this resolution seeks approval to file and respond to the Guam Public Utilities Commission (PUC) order under Docket No. 08-10 (December 29, 2008), Exhibit A:

> **"The NM Rider is available to all customers without limitation as to the aggregate capacity of Customer-Generator installations on the GPA System. However, at the time the number of Customer-Generators exceeds one-thousand (1000) customers this issue will be reviewed by the PUC and a determination made as to the continued offering of the NM Rider for new 'net metering' customers."**

GPA achieved the milestone of 1000 net metering customers in June 2016. As of July 31, 2018, GPA has 1,733 net metering customers resulting in an approximate $3,411,623.29 annual subsidy by non-net metering customers. Additionally, GPA has conducted and completed as ordered by the Consolidated Commission on Utilities (CCU) several public meetings to:

- **Address net metering stakeholders' concerns and obtain feedback;**
- **Evaluate stakeholder feedback;**
- **Perform analysis regarding net metering impacts on the GPA especially on non-net metering customers;**
- **Propose recommendations on whether or not changing the current net metering program is in the best interests of customers while insofar as practical alleviating net metering customer concerns.**

The petition is to decrease net metering subsidy evenly over a 5-year period beginning CY'2019.

How much will it cost?

This recommendation will save non-net metering customers approximately $3,411,623.29 annually.

When will it be completed?

Upon approval of the Guam Public Utilities Commission

What is its funding source?

The Levelized Energy Adjustment Clause

CONSOLIDATED COMMISSION ON UTILITIES

RESOLUTION NO. 2018–17

AUTHORIZING MANAGEMENT OF THE GUAM POWER AUTHORITY (GPA) TO FILE NET METERING PROGRAM RECOMMENDATIONS ADDRESSING THE GUAM PUBLIC UTILITIES COMMISSION (PUC) ORDER DOCKET NO. 08-10 (DECEMBER 29, 2008), EXHIBIT A, PARAGRAPH 3

WHEREAS, Guam Public Law 27-132 (2004) created Net Metering for Guam and assigned the Guam Public Utilities Commission (PUC) the responsibility for setting the Net Metering Rate for excess renewable energy fed into GPA's Distribution System; and

WHEREAS, the Guam Public Utilities Commission (PUC) ordered GPA to execute the Interim Net Metering (NM) Rider under Docket No. 08-10 (December 29, 2008); and

WHEREAS, under Docket 08-10, Exhibit A (paragraph 1), the PUC states: "The NM Rider may be amended or modified in the future by GPA, with the approval of the Guam Public Utilities Commission (PUC)"; and

WHEREAS, under Docket 08-10, Exhibit A (paragraph 3), the PUC orders: "The NM Rider is available to all customers without limitation as to the aggregate capacity of Customer-Generator installations on the GPA System. However, at the time the number of Customer-Generators exceeds one-thousand (1000) customers this issue will be reviewed by the PUC and a determination made as to the continued offering of the NM Rider for new 'net metering' customers."; and

WHEREAS, GPA achieved the milestone of 1000 net metering (NEM) customers in June 2016; and

WHEREAS, NEM customers receive services from the grid subsidized by non-NEM customers including but not limited to: 1) Use of the grid to sell power (get credit at full retail rate for excess production); 2) Use of the grid to energize their homes at night; 3) Frequency regulation absorbed by grid for intermittencies; 4) Reactive power supply; 5) Voltage regulation; and 6) Stand-by power on overcast days when the sun does not shine.

WHEREAS, GPA has 1,733 net metering customers (July 31, 2018) resulting in an approximate $3,411,623 annual subsidy going forward and from 2009 to 2017 a total subsidy of approximately $6,562,968.64 paid for by non-net metering customers; and

WHEREAS, as ordered by the Consolidated Commission on Utilities (CCU), GPA has conducted and completed several public meetings to: 1) Address net metering stakeholders' concerns and obtain feedback; 2) Evaluate stakeholder feedback; 3) Perform analysis regarding net metering impacts on the GPA especially on non-net metering customers; and, 4) Propose recommendations on whether or not changing the current net metering program is in the best interests of customers while insofar as possible alleviating net metering customer concerns; and

WHEREAS, the GPA General Manager presented the Authority's Net Metering (NEM) Credit Recommendation **(Exhibit A)** at the August 28, 2018 CCU Meeting held publicly; and

WHEREAS, GPA recommends the following Value of Solar (VOS) Policies as a replacement for the existing Net Metering Program including: 1) Grandfathering existing registered NEM customers for a period of 5 years allowing customers who own NEM systems to recover their investment while phasing in VOS rates over this extended 5-year time period; and filing for PUC approval a process to establish Value of Solar (VOS) rates;

WHEREAS, the process to establish Value of Solar (VOS) rates would: 1) Reassess VOS rates each LEAC for Avoided Energy Value; 2) Reassess VOS rates for other VOS components as applies on a) an annual basis; b) periodic basis over a set number of years; and 3) whenever there are material changes to GPA's generation mix; and

NOW, THEREFORE, BE IT RESOLVED, by the CONSOLIDATED COMMISSION ON UTILITIES subject to the review and approval of the Public Utilities Commission as follows:

1. The General Manager is authorized to file a petition of its Value of Solar Policy Recommendations as shown in **Exhibit A** to the Guam Public Utilities Commission. The petition is to decrease net metering subsidy evenly over a 5-year period beginning Calendar Year 2019.
2. The General Manager is authorized to conduct an information campaign supporting these recommendations.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

DULY and REGULARY ADOPTED this 25th day of September 2018.

Certified by: **Attested by:**

JOSEPH T. DUENAS
CHAIRMAN

J. GEORGE BAMBA
SECRETARY

SECRETARY'S CERTIFICATE

I, J. GEORGE BAMBA, Secretary for the Consolidated Commission on Utilities do hereby certify that the foregoing is a full, true, and correct copy of the resolution duly adopted at a regular meeting of the members of Guam's Consolidated Commission on Utilities, duly and legally held at a place properly noticed and advertised at which meeting a quorum was present and the members who were present voted as follows:

Ayes: _____

Nays: _____

Absent: _____

Abstain: _____

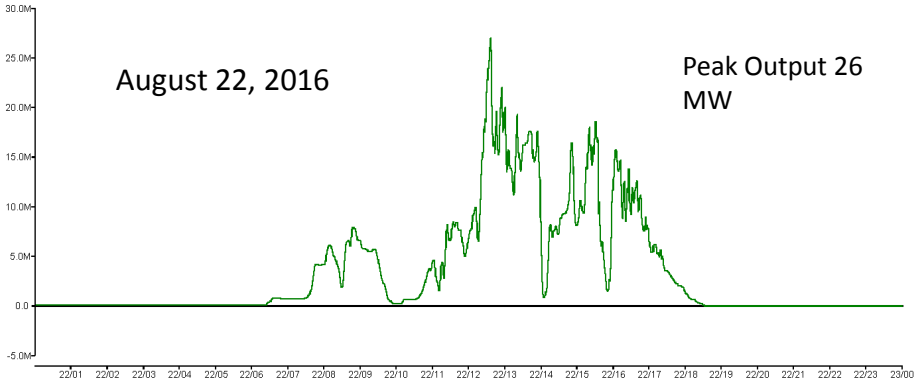
ISSUE FOR DECISION

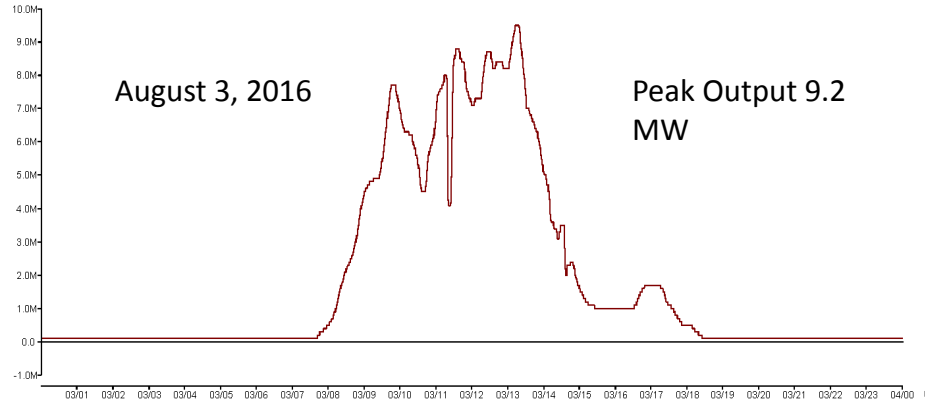
Net Metering (NEM) Credit Recommendation

OVERVIEW – NET METERING POLICIES

- Thirty Eight (38) States, Washington D.C., and Four (4) Territories Offer Net Metering and utilities in two additional states (Idaho and Texas adopted Net Metering (Full Retail Credit).
- Arizona, Georgia, Hawaii, Indiana, Maine and Mississippi have compensation other than net metering.
- The Value of Solar (VOS) is an alternative to net metering. Customers buy from the grid at retail rate and sell to the grid at an established VOS rate. Only Minnesota and Austin Energy (Texas) has adopted a VOS rate.

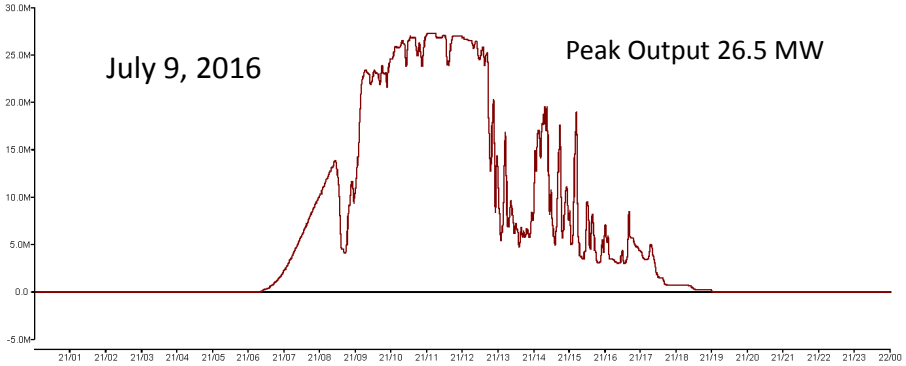


Source: National Council of State Legislatures: 11/20/17



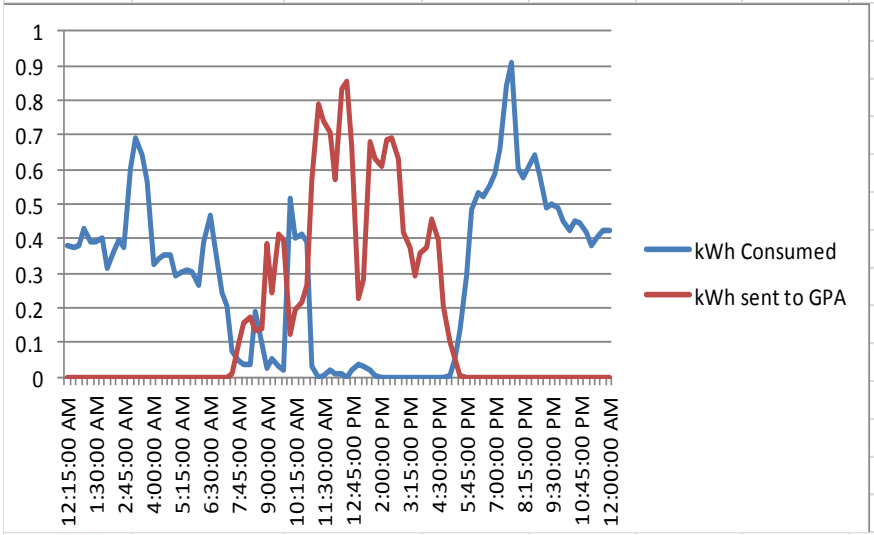
Guam NEM Program

- Program Mandated in 2004. Guam has been crediting NEM customers full retail rate over the past 13 years. Excess credit carried over or paid out annually at full retail rate.
- PUC to evaluate program and credits provided when GPA has 1,000 NEM Customers which occurred in June 2016.
- As of July 2018, GPA has 1,733 NEM Customers (94.7% Residential), with 18,315 KW of capacity. The revenue impact on non-NEM ratepayers is estimated at $3.4M annually.
- CCU/GPA conducted its first public hearing on NEM in August 2016 to gather input from stakeholders in order to prepare its filing to the PUC for changes in rate credits in order to achieve parity amongst all ratepayers.

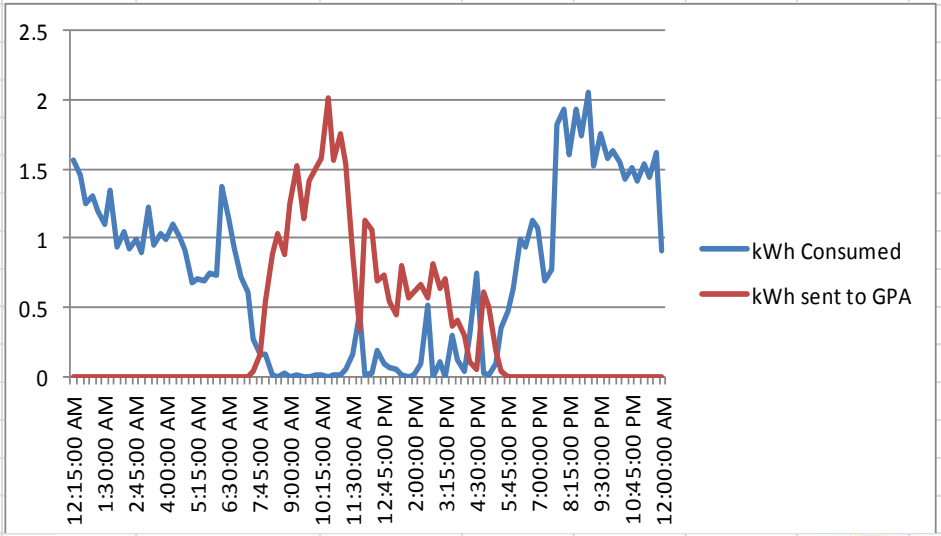


Solar PV Energy Production Characteristics

Utility Scale PV Output Look Like This …



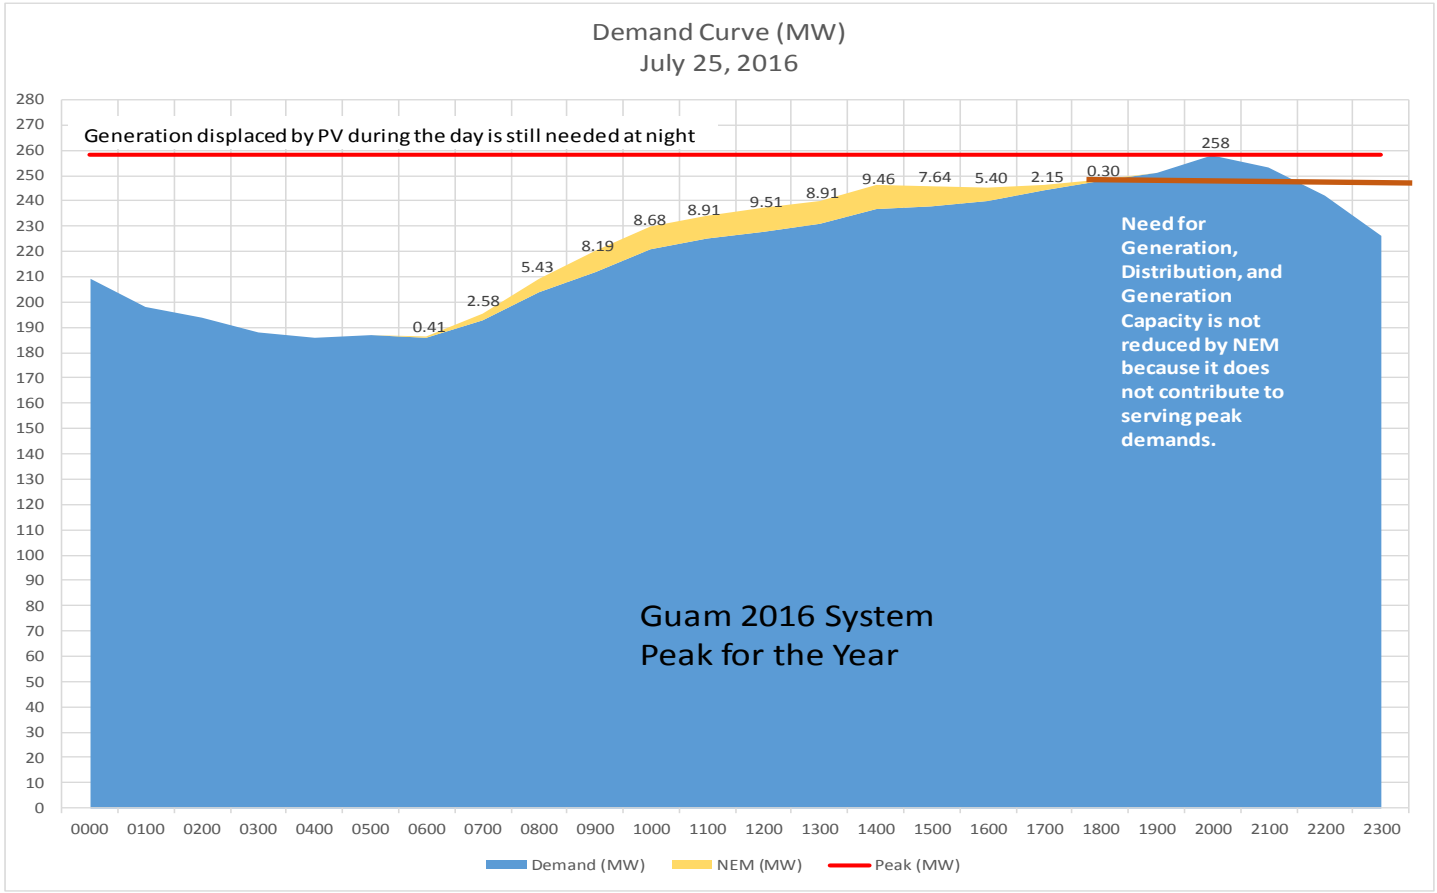
NEM does not eliminate need for capacity



PV without adequate storage is not a capacity benefit. It is an energy benefit.

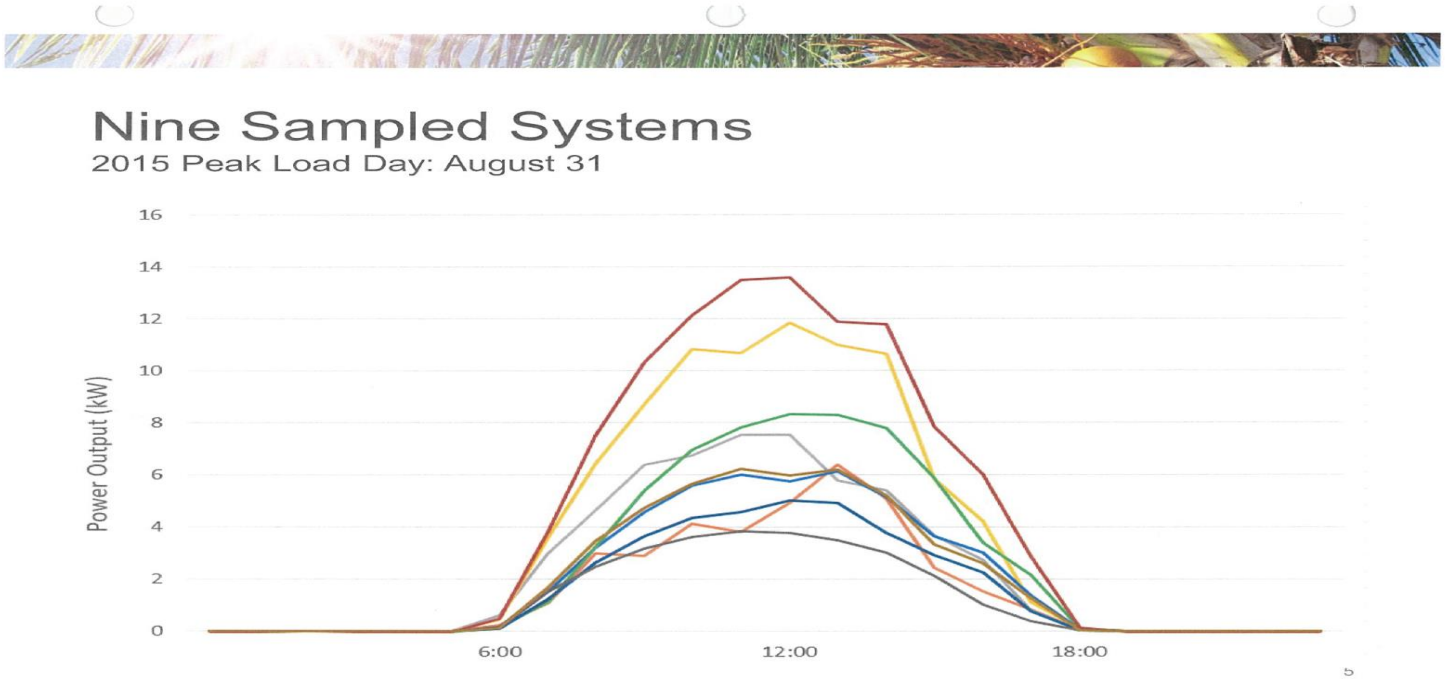
NEM Customer Profiles

Date:	14-Jun-16		
PV System KW Size	5.0		
GPA KWH 12am to 7am	11.05		
GPA KWH 7am to 6pm	3.66		
GPA KWH 6pm to 12am	**12.92**	**Evening Peak**	
NEM KWH 7am to 6pm	16.14		
Net GPA KWH	11.49		



Date:	14-Jun-16		
PV System KW Size	12.4		
GPA KWH 12am to 7am	28.9		
GPA KWH 7am to 6pm	6.1		
GPA KWH 6pm to 12am	**34.6**	**Evening Peak**	
NEM KWH 7am to 6pm	32.5		
Net GPA KWH	37.1		

Does NEM Lower Guam Generation Capacity Requirements?



No. NEM Solar PV systems in Guam does not reduce peak demand and therefore does not eliminate conventional capacity needs

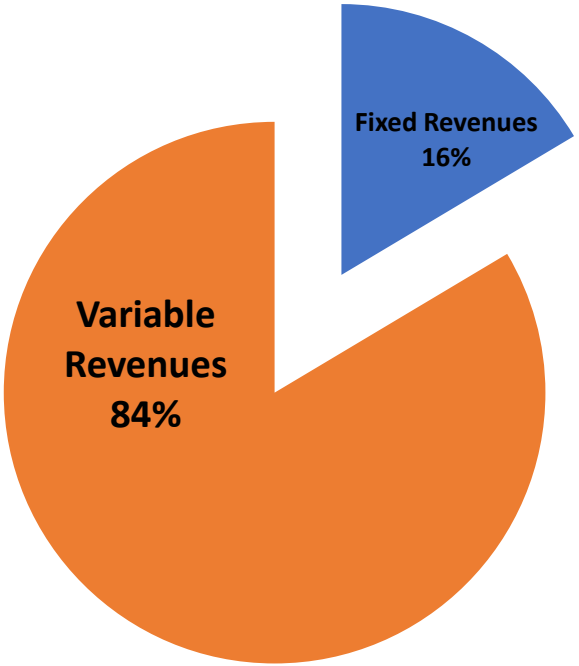
Transmission, Distribution, or Generation Capacity for Guam Not Reduced by PV

NEM Peak Production not at GPA Peak Demand Period

Source: Clean Power Resource Report

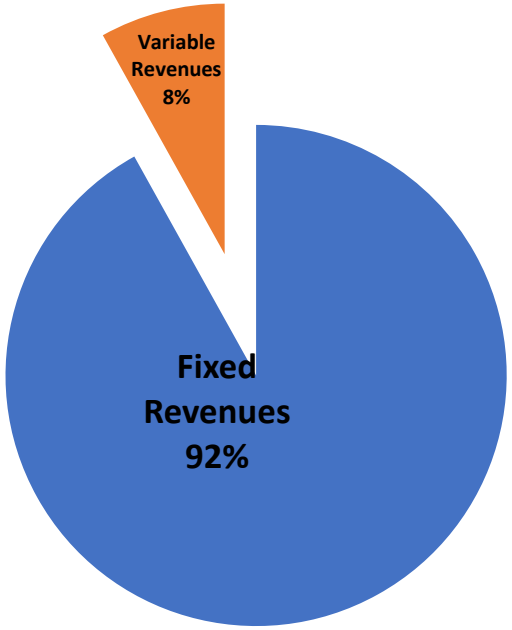
Net Metering Policy Issues

- Replacement for Net Metering Program
- Grandfathering existing registered NEM customers
  - Allow customers who own system to recover investment
  - Phase in to avoided cost rates over a 5 to 8 year period
- GPA files for PUC approval:
  - Reassessed NEM rates each LEAC for Avoided Fuel Value
  - Reassessed NEM rates for other components
    - Annually
    - Periodically over a set number of years
    - When GPA's generation mix changes



Value of the Grid to NEM Customers

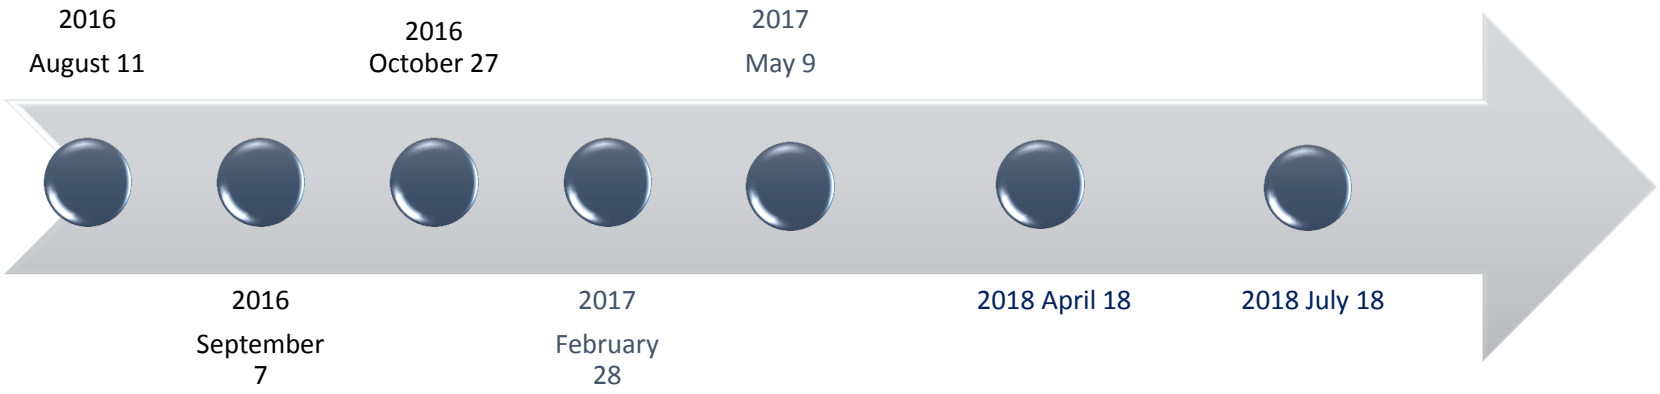
- NEM customers receive services from the grid including:
  - Use the grid to sell power (get credit at full retail rate for excess production)
  - Use the grid to energize their homes at night, but credited back from their production (Uses GPA Grid as storage)
  - Using Grid at night results in increased fuel cost to non-NEM Customers because costlier less efficient generation is used to generate their energy needs
  - Frequency regulation absorbed by grid for intermittencies
  - Reactive power supply
  - Voltage regulation
  - Stand-by power on overcast days when the sun does not shine



- Monthly fixed charge of $15 does not recover cost to serve from grid
  - Most of GPA fixed cost is recovered in the energy use (kWh) rate component which is typically zero for NEM customers

Rate Structure & Fixed Cost Recovery

Civilian Fixed vs Variable Revenues

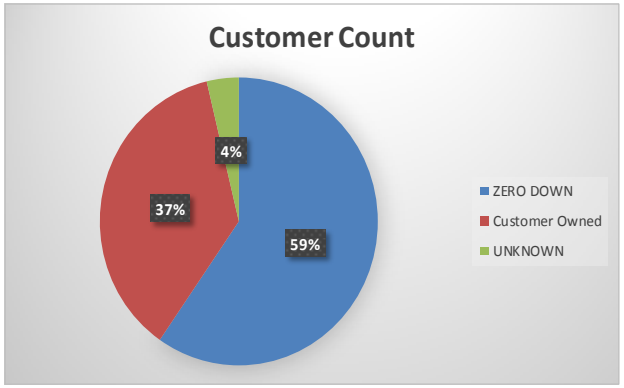


Navy Fixed vs Variable Revenues

GPA Rate Structure Should Move Towards Recovering More Fixed Costs Through Fixed Charges.

- Civilian rate structure
  - Most of GPA fixed costs recovered in the variable rate
- Navy rate structure
  - Most of GPA fixed costs recovered in the fixed rate
- Hawaii has moved to fixed cost recovery predominantly through its fixed rate

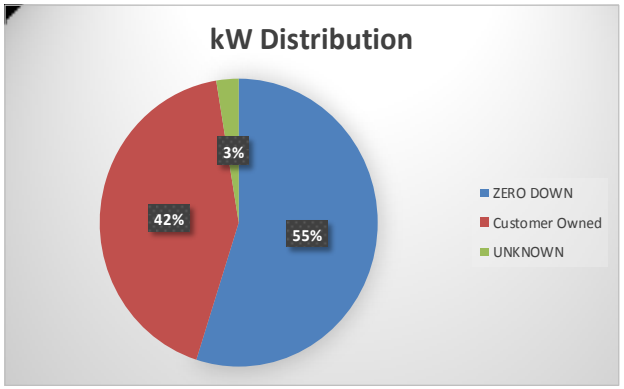
Net Metering Public Meetings Held to Gather Input from Stakeholders



Key Points from Public Meetings

- Solar PV providers opined the B&V report provides all the gain to GPA and did not represent true value of solar
- NEM Owner wants to recover his investment. Asked for grandfathering until he does so. He said it will take 7 years to recover his $60K investment
- NEM not meant to be money making business but a fair exchange of trade energy…some customers making money from units sized beyond their needs
- The applicability of NEM program to 3rd party providers need to be clarified
- Solar PV provider wants NEM program to continue up to 20% penetration similar to Hawaii
- Solar PV provider wanted more time to provide a report on Value of Solar and bring to GPA for information. Report was completed and presented by Clean Power Research on April 18, 2018

Key Points from Public Meetings (continued)



- Solar PV provider commented the NEM energy saves the utility cost on:
  - Maintenance cost for generations, poles, labor, lines, substations, transformers, etc.
  - Reduction of line losses because energy is near customers
  - Costs associated with fuel and fuel shipments
  - Helps GPA achieve energy portfolio reducing need for more renewable projects
  - Savings to environment; lessens carbon foot print
- Solar PV Provider-GPA should consider subsidies for home energy storage systems
- Solar PV Provider-GPA should consider grandfathering NEM customers through a phased approach
- No new points placed forward at the July 18, 2018 public meeting where the GM presented his recommendations which were previously presented to CCU

Installation Cost - No Tax Credit	$24,993		**12.0**
15 Year Loan Annual Payment, 8%, 15 years	$2,919	-$844.18	
With Tax Credit	$17,495		**8.4**
15 Year Loan Annual Payment, 8%, 15 years	$2,043	$31.82	

Summary

- Net Metering was established 13 years ago in 2004. Substantial Changes has occurred on GPA delivery cost and more changes expected by 2022.
- Customer Owned NEM System recovers its investment within 5 to 8 years from installation at GPA full Retail Rate Credit.
- Customer Owned NEM System recovers its investment within 8 to 12 years from installation at GPA LEAC Avoided Cost Rate Credit.
- It appears Zero Down Customers with 2.9% escalators will incur higher cost over the life of their 25 year contract. A $0.18/KWH rate in 2018 becomes $0.357/KWH in 2042.

Additional Information on Net Metering

Estimated Cost Impact to Non-Net Metering Ratepayers:			
NEM Credit above avoided cost	**Estimated Kwh**	**Estimated Subsidy**	**$/Kwh**
FY 2009	23,912	$1,657	$0.0693

Net Metering Customers July 2018	1,733		
Total GPA Customers	51,515		
% NEM Customers	3.36%		
Non-NEM Customers	49,782		
% Non-NEM Customers	96.64%		

Jurisdiction	Years	Notes
Arkansas	20	
Neveda	20	
Utah	18	Until 2035
California	5	Residential, require application
	10	Other, require application
Arizona	20	Require application by June 12, 2018
Florida	20	March 31, 2018 final inspection, JEA
New Hampshire	22	Until 2040
Indiana	29	NEM customers prior to July 1, 2017 have until July 1, 2047
	14	NEM customers signing up prior to July 1, 2022 or their utility reaching a 1.5% peak summer load cap can continue net metering until July 1, 2032
Maine	15	Existing 2017 customers
Michigan	10	Limited to NEM that is already in the system
Hawaii (HECO, MECO, HELCO, Molakai, Lanai)	∞	NEM application was submitted to the utility postmarked 10/12/15 or earlier
Vermont	10	Net metering systems with a complete Certificate of Public Good application filed with the PSB prior to January 1, 2017 (as long as the application was filed at a time when the electric company was accepting net metering systems, based on the state's former aggregate capacity limit) are grandfathered

- Utilities and States Differ on Grandfathering NEM Customers
- Many Jurisdictions are Ending Net Metering

5

Maine

- In early 2017, Maine became the fourth state to more appropriately compensate net metering. The Public Utilities Commission adopted a ramp-down policy, which gradually harmonizes the transmission and distribution charges for net metering customers, aligned with true avoided costs.
- The rules grandfather existing customers for 15 years.

Source: Tanton, Thomas. (April 2018) Net Metering in the States: Moving Toward Equitable and Sustainable Policies for Electric Customers. URL at http://sglf.org/wp-content/uploads/sites/2/2018/04/SGLF-Net-Metering-In-the-States-by-Thomas-Tanton-April-2018.pdf (August 17, 2018).

7

Hawaii

- Marco Mangelsdor, president of installer ProVision Solar.
  - "... Hawaii's net energy metering (NEM) policy has "88% of the utility's ratepayers subsidizing the 12% who have net energy metered systems."
  - He believes utility's concern about that shift of costs for system maintenance is reasonable.
  - "The cost of NEM was $38 million in 2013 and it is estimated at $53 million in 2014. These are not trivial dollars."

11

California

- One of the first studies to quantify the magnitude of the NEM subsidy was conducted by Energy+Environmental Economics (E3) for the California Public Utilities Commission (CPUC) in 2013.
- The E3 study estimated that NEM would result in a cost shift of $1.1 billion annually by 2020 from NEM to non-NEM customers if current NEM policies were not reformed in California.
- A cost shift of this magnitude–paid for by non-NEM customers–was unacceptable to California regulators.
- As a result, California regulators set to work to reform rates in their state; many other states followed suit and conducted similar investigations of the magnitude of the NEM subsidy.

12

Nevada

- Recently, Arizona Public Service (APS), the state's largest utility, found that solar customers avoid on average around $1,000 annually in costs for operating the electric grid, costing the average power user, who must make up the cost, a $16.80 premium per year.

13

38

Louisiana

- Overall, the state found that its net metering structure resulted in an $89 million negative net benefits to electricity rate payers, meaning the net metering program costs are greater than program benefits, and that over $2 million of utility costs per year were being subsidized by non-solar consumers.

14

See attached Article of May 18, 2018 by Institute for Energy Research (IER)

Subsidies uncheck will continue to impact Non-Net Metering substantially:

Guam is at 3.36%; Hawaii is at 12 % NEM;

Description:	**Jul-18**	**Future**	**Future**	**Future**
% of All Customers	3.36%	5.00%	10.00%	15.00%
NEM Customers	1,733	2,576	5,152	7,727
Energy Produced	33,921,230	50,416,970	100,833,939	151,250,909
Annual Subsidy	$3,411,623	$5,071,652	$10,143,304	$15,214,955
Non-Nem Customers	49,782	48,939	46,364	43,788
Cost to each Non-NEM	**$68.53**	**$103.63**	**$218.78**	**$347.47**

Recommendation

1. CCU approve GPA filing a petition to the PUC as shown herein to consider changes to the existing net metering credit
2. Recommend an implementation plan for billing NEM customers on net billing: Buy All/Sell All or similar billing models
3. GPA files with GPUC for adjustment of net metering credits from retail to avoided cost
4. It is recommended that for existing NEM Customers, implement a Grandfather phase-in approach over 5 years to the GPA avoided cost credit as shown on the following page. Adjustments for LEAC, line loss and variable cost changes done annually.
5. For future NEM customers, credit set at the GPA avoided cost

Migrate to Avoided Cost in Phases as Follows:			
Year	Estimated Kwh	*$/Kwh	Subsidy
CY 2018	33,921,230	$0.1006	$3,411,623
CY 2019	33,921,230	$0.0805	$2,729,298
CY 2020	33,921,230	$0.0603	$2,046,974
CY 2021	33,921,230	$0.0402	$1,364,649
CY 2022	33,921,230	$0.0201	$682,325
CY2023	33,921,230	$0.0000	$0
Total Subsidy:			$10,234,869
*Subsidy decreased evenly over 5 years			
Avoided Cost Credit set annually by PUC in a similar protocol as LEAC			
All excessed credits trued up at the end of each year

Issues for Decision

Resolution No. 2018 -20:

Relative to Authorizing the Management of Guam Power Authority to solicit bids (IFB) for the GPA Bulk Storage Fuel Tanks Out of Service/Internal Inspection and Refurbishment.

What is the project's objective? Is it necessary and urgent?
The project will involve the internal inspection and refurbishment of the bulk storage fuel tanks and appurtenances. The tanks need to undergo the required internal inspection to comply with regulatory requirements and refurbish as necessary to ensure the structural integrity and safe operations of the tanks. The project also includes upgrading of the facility's auxiliary system to assure uninterrupted supply of fuel for the power plants. The last inspection was conducted in 2007. Inspections are required to be performed every ten (10) years.

Where is the location?
GPA Bulk Storage Tanks Facility at Piti, Guam.

How much will it cost?
The estimated project cost is $ 8,000,000.00 requiring approval from CCU and PUC.

When will it be completed?
The project is anticipated to commence on FY 2019 and the target completion is on FY 2021.

What is its funding source?
The project will utilize Cabras 3&4 Insurance Proceeds.

The RFP/BID responses:
The IFB solicitation will commence immediately after CCU & PUC approval.

CONSOLIDATED COMMISSION ON UTILITIES
Guam Power Authority | Guam Waterworks Authority
P.O. Box 2977 Hagatna, Guam 96932 | (671)649-3002 | guamccu.org

RESOLUTION NO. 2018 -20

Relative to Authorizing the Bid for Bulk Storage Fuel Tanks and Internal Inspection and Refurbishment

WHEREAS, the Guam Power Authority (GPA) operates and maintains the bulk storage fuel tanks located at Piti, Guam, which are managed by the Performance Management Contractor, Isla Petroleum and Energy Holdings, LLC (IP&E) and are used to supply fuel to GPA's base load units; and

WHEREAS, the bulk storage fuel tanks last underwent internal inspection and refurbishment in 2007; and

WHEREAS, the tanks appurtenances including auxiliary equipment are required to be assessed, recalibrated and refurbished to comply with USEPA regulatory requirements; and

WHEREAS, upon completion of the out of service/internal inspection and refurbishment of the bulk storage fuel tanks, they will be utilized to store ULSD fuel to supply Piti Power Plant 7 and upon ULSD conversion for Piti Power Plants 8 and 9 and the proposed 180 MW power plant; and

WHEREAS, funding for this project will be programmed under the Cabras 3&4 Insurance Proceeds with an estimated total cost of $8,000,000.00 (attached Exhibit "A"); and

WHEREAS, GPA intends to issue an Invitation for Bid for the Bulk Storage Fuel Tanks Out of Service/Internal Inspection and Refurbishment, to commence on FY2019.

WHEREAS, the total cost exceeds the $1.5M threshold requiring GPA to seek procurement authorization from PUC; and

WHEREAS, GPA is requesting the approval of the CCU to petition the PUC for the issuance of an Invitation for Bid; and

NOW, THEREFORE, BE IT RESOLVED, by the Consolidated Commission on Utilities, subject to the review and approval of the Public Utilities Commission, as follows:

1. GPA's request to solicit competitive bids for the Bulk Storage Fuel Tanks Out of Service/ Internal Inspection and Refurbishment through an Invitation for Bid process is reasonable and prudent.

2. GPA is authorized to petition the Public Utilities Commission for approval to issue bids to procure a Contractor for the Bulk Storage Fuel Tanks Out of Service/Internal Inspection and Refurbishment.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

DULY and REGULARLY ADOPTED this 25th day of September 2018.

Issues for Decision

Resolution No. 2018 – 21: IFB New ULSD Pipeline System

Relative to: ***Authorizing the Management of Guam Power Authority to solicit bids (IFB) for the New ULSD Pipeline System.***

What is the project's objective? Is it necessary and urgent?
The project will construct 8-, 12-, and 24-inch diameter pipes with supports/pedestals, pipe manifolds, valves and pumping station appurtenances for ULSD fuel. The pipeline system will connect to Navy Tie-In, Tanks 1934 and 1935, and to Piti Power Plants 7, 8, and 9. USEPA has mandated GPA to utilize ULSD for the power plants by year 2021.

Where is the location?
GPA Bulk Storage Tanks Facility, Navy-Tie-In, and Piti 7, 8, and 9.

How much will it cost?
The estimated project cost is $ 5,900,000.00 requiring approval from CCU and PUC.

When will it be completed?
The project is anticipated to commence on FY 2019 and the target completion is on FY 2020.

What is its funding source?
The project will utilize Cabras 3&4 Insurance Proceeds.

The RFP/BID responses:
The IFB solicitation will commence immediately after CCU & PUC approval.

RESOLUTION NO. 2018 – 21

AUTHORIZING THE MANAGEMENT OF GUAM POWER AUTHORITY TO PROCEED WITH THE SOLICITATION FOR THE NEW ULSD PIPELINE SYSTEM

WHEREAS, the Guam Power Authority (GPA) is mandated by United States Environmental Protection Agency (USEPA) to use Ultra Low Sulfur Diesel (ULSD) oil to fuel power plants by 2021; and

WHEREAS, GPA will comply with the USEPA requirements, GPA will build and use a pipeline system to supply ULSD oil to the Piti Tank Farm, Piti Power Plants 7, 8 and 9; and

WHEREAS, the ULSD pipeline system consists of 8-, 12- and 24-inch diameter pipes with supports/pedestals, pipe manifolds, valves, and pumping station to include motor, pumps, concrete roof, berms and pads; and

WHEREAS, the 24-inch ULSD pipeline will be interconnected from the US Navy tie-in to tanks 1934 and 1935, the 12-inch pipeline will be interconnected from tanks 1934 and 1935 to the pumping station and the 6-inch pipeline will be interconnected from pumping station to the Piti Power Plants 7, 8, and 9; and

WHEREAS, the ULSD pipeline system will be operated and maintained under United States Environmental Protection Agency (USEPA) and American Petroleum Institute (API) guidelines and regulations; and

WHEREAS, funding for this project will be programmed under the FY 2019 and FY 2020 Cabras 3&4 Insurance Proceeds with an estimated cost of $5,900,000.00 (Attached Exhibit “A”); and

WHEREAS, GPA intends to issue an Invitation for Bid for the New ULSD Pipeline System, to commence in FY2019.

WHEREAS, the total cost exceeds the $1.5M threshold requiring GPA to seek procurement authorization from PUC; and

WHEREAS, GPA is requesting the approval of the CCU to petition the PUC for the issuance of an Invitation for Bid; and

NOW, THEREFORE, BE IT RESOLVED, by the Consolidated Commission on Utilities, subject to the review and approval of the Public Utilities Commission, as follows:

1. GPA's request to solicit competitive bids for the New ULSD Pipeline System through an Invitation for Bid process is reasonable and prudent.

2. GPA is authorized to petition the Public Utilities Commission for approval to issue bids to procure a Contractor for the construction of the New ULSD Pipeline System.

RESOLVED, that the Chairman of the Commission certifies and the Secretary of the Commission attests the adoption of this Resolution.

Issues for Decision

Resolution No. 2018-22

RELATIVE TO THE AUTHORIZATION OF THE GUAM POWER AUTHORITY TO AWARD PROPERTY INSURANCE FOR A THREE-YEAR POLICY

What is the project's objective? Is it necessary and urgent?

The Consolidated Commission on Utilities has determined that it is a prudent and reasonable business practice to maintain insurance coverage on GPA's assets to the extent practical. Guam Power Authority's Bond Indenture agreement requires GPA to "secure and maintain property insurance on all facilities constituting the system against risks of loss or damage to the extent that such insurance is obtainable at reasonable cost." The indenture further requires GPA to carry insurance "of a scope and nature as that usually carried in the industry." GPA's current Property Insurance policy is set to expire on November 1, 2018. The insurance risk manager and the insurance broking team has configured, with the goal in mind of improving, to the greatest extent possible, the terms and conditions of GPA's property insurance policy for the next three years.

How much will it cost?

The next three annual installment premiums will be billed at ***$4,355,000.00***. GPA's premium was reduced from $6,450,000.00 per year to $4,355,000.00 per year for a **savings of $2,095,000.00.**

What is its funding source?

RESOLUTION NO. 2018-22

RELATIVE TO THE AUTHORIZATION OF THE GUAM POWER AUTHORITY TO AWARD PROPERTY INSURANCE FOR A THREE-YEAR POLICY

WHEREAS, the Consolidated Commission on Utilities has determined that it is a prudent and reasonable business practice to maintain insurance coverage on GPA's assets to the extent practical; and

WHEREAS, the Guam Power Authority's Bond Indenture agreement requires GPA to "secure and maintain property insurance on all facilities constituting the system against risks of loss or damage to the extent that such insurance is obtainable at reasonable cost"; and

WHEREAS, the indenture further requires GPA to carry insurance "of a scope and nature as that usually carried in the industry"; and

WHEREAS, GPA's current Property Insurance policy is set to expire on November 1, 2018; and

WHEREAS, the insurance risk manager and the insurance broking team has configured, with the goal in mind of improving, to the greatest extent possible, the terms and conditions of GPA's property insurance policy for the next three years. GPA's premium was reduced from $6,450,000.00 per year to $4,355,000.00 per year for a savings of $2,095,000.00; and

WHEREAS, GPA is to award new insurance policy from November 1, 2018 to November 1, 2021 for the following premium:

- The next three annual installment premiums will be billed at $4,355,000.00. There's an option to increase the limit from $200M to $300M property policy for an additional $100,000.00 annual premium.

WHEREAS, GPA now brings these matters before the Consolidated Commission on Utilities; and

NOW THEREFORE, BE IT RESOLVED BY THE CONSOLIDATED COMMISSION ON UTILITIES, SUBJECT TO THE APPROVAL OF THE GUAM PUBLIC UTILITES COMMISSION, AS THE GOVERNING BODY OF THE GUAM POWER AUTHORITY, AS FOLLOWS:

1. The GPA General Manager is authorized to accept the terms of the annual premiums offered by the insurance underwriters at a cost of $4,355,000.00 for each of the next three policy periods covered between November 1, 2018 and November 1, 2021.
2. The GPA General Manager is authorized to pay each annual premium as it becomes due without any financing arrangements.

RESOLVED, that the Chairman certifies and the Board Secretary attests to the adoption of this Resolution.

DULY AND REGULARLY ADOPTED AND APPROVED THIS 25th **DAY OF SEPTEMBER, 2018.**

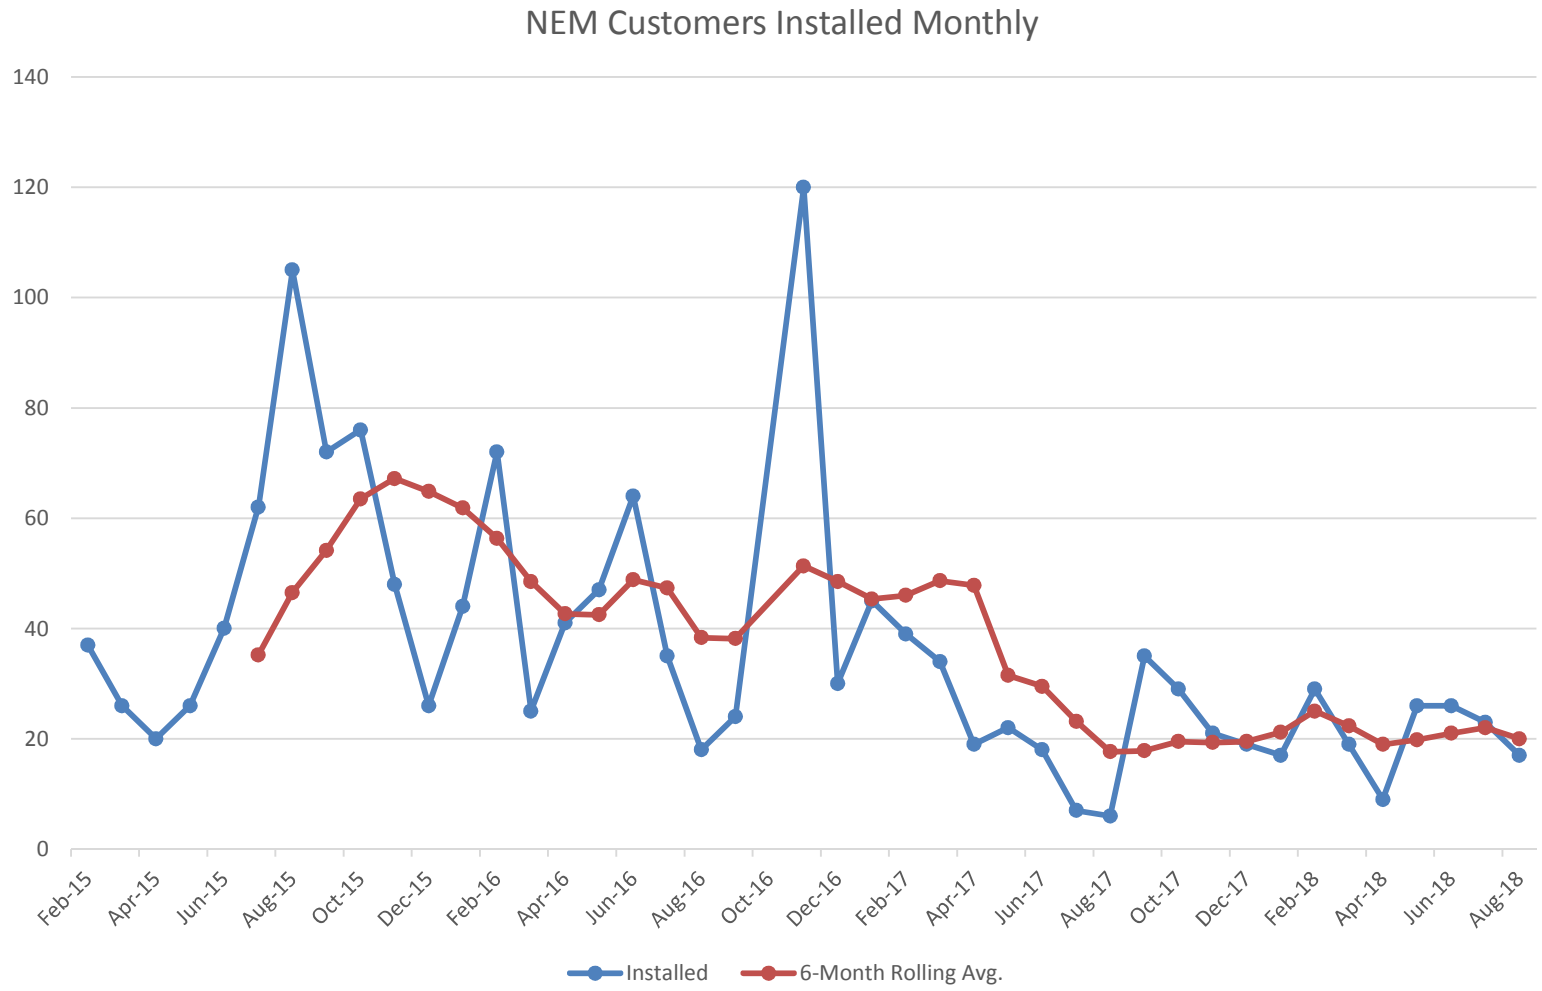
GM REPORT

TO: **Consolidated Commission on Utilities**

FROM: **General Manager**

DATE: **September 20, 2018**

SUBJECT: **General Manager's Report**



This report provides updates on key issues:

1. **Generation System:** The following summarizes the expected generation capacity projection for **October 2018**. All base load units are expected to be in operation for most of the month. The Cabras steam units are currently limited to 55 MW each to minimize the potential for boiler tube leaks which has been a common occurrence for units.

October 2018 Projected Capacity:	**361 MW**
October 2018 Projected Demand:	**250 MW**
Anticipated Reserve Margin:	**111 MW**

2. Net metering Summary Ending August 2018:

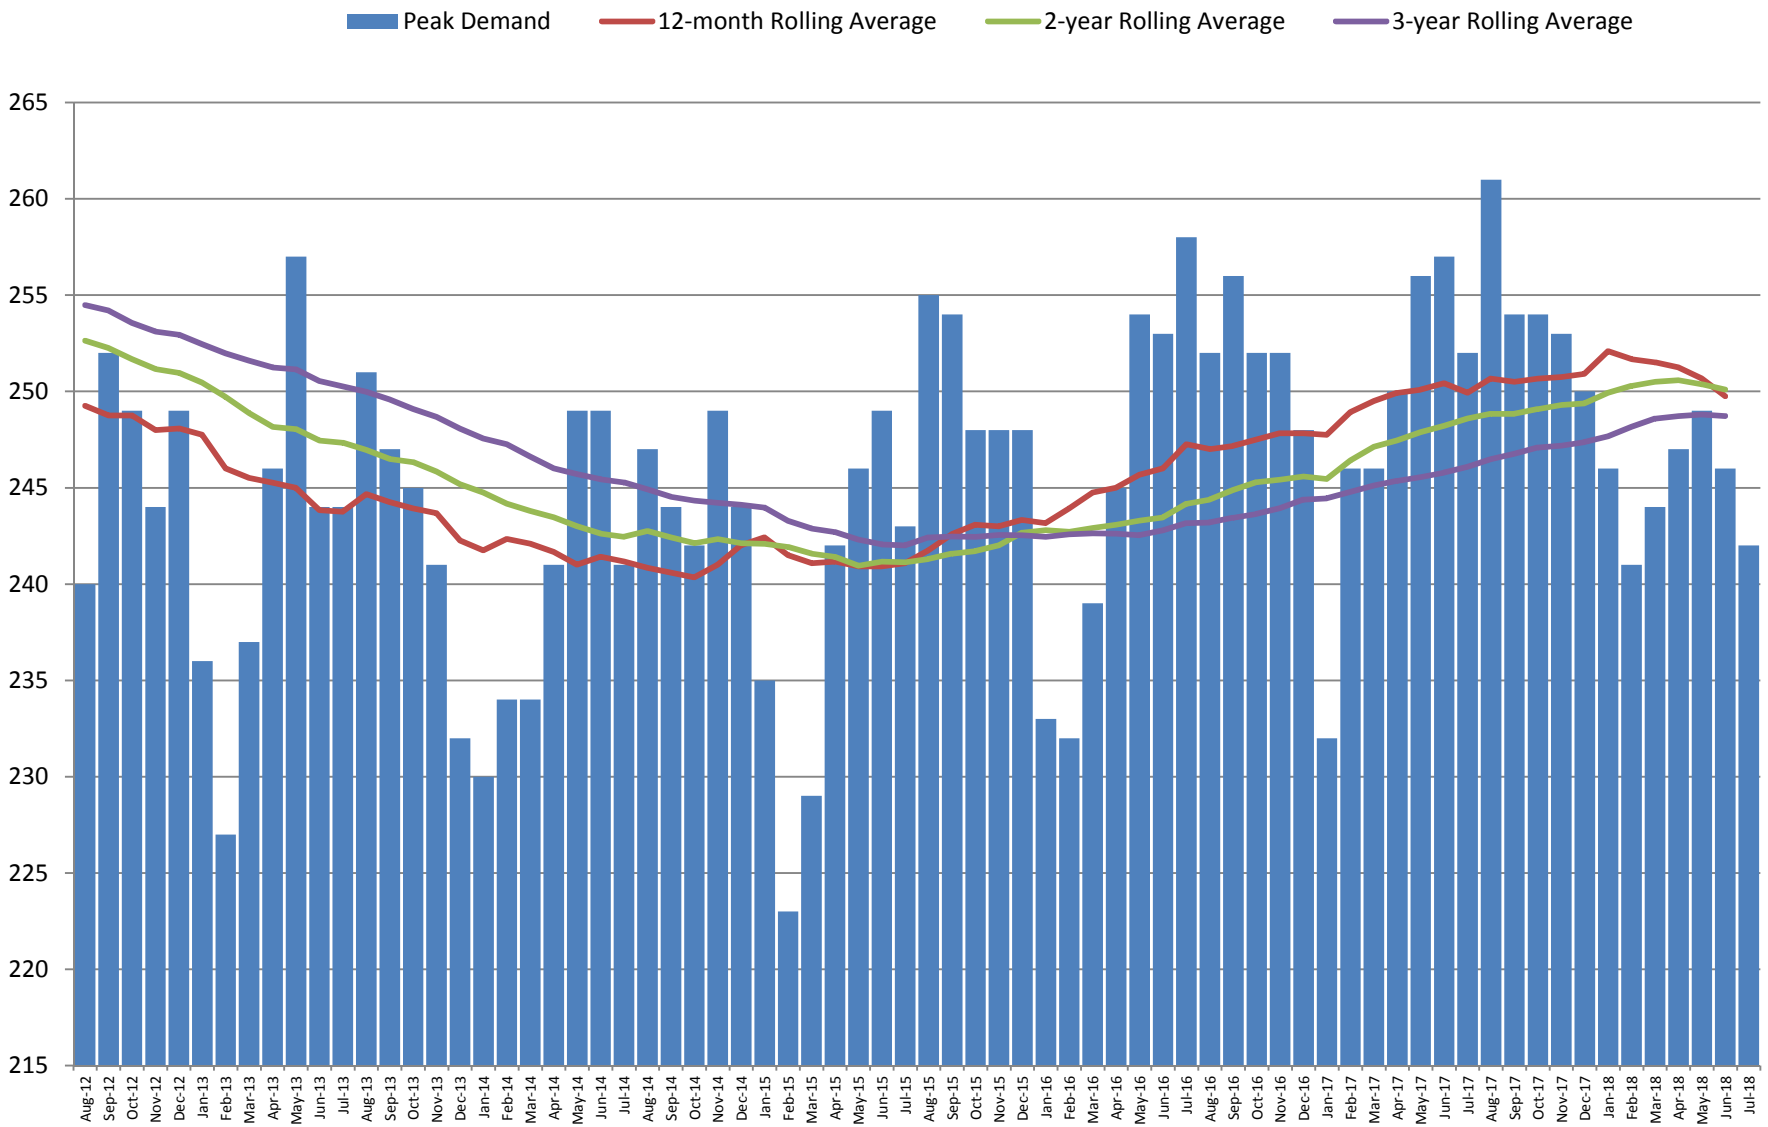
3. Demand Side Management Expenses Thru August 2018

Description	FY16	FY17	FY18 as of Aug 31	Total to Date
Regular/OT Pay	$11,348.80	$22,256.00	$20,469.95	$ 54,074.75
Other Contractual	$28,278.50	$85,550.05	$79,752.25	$193,580.80
Bank Fees	$155.00	$1,032.06	$1,070.08	$2,2457.14
Paid Rebates-Split AC	$154,700.00	$557,275.00	$1,039,700.00	$1,751,675.00
Paid Rebates-Central AC	$3,400.00	$8,200.00	$3,600.00	$15,200.00
Paid Rebates-Washer/Dryer	$2,800.00	$7,425.00	$31,800.00	$42,025.00
Total Expenses	$200,682.30	$681,738.11	$176,392.28	$2,058,812.69

DSM PROGRAM SUMMARY

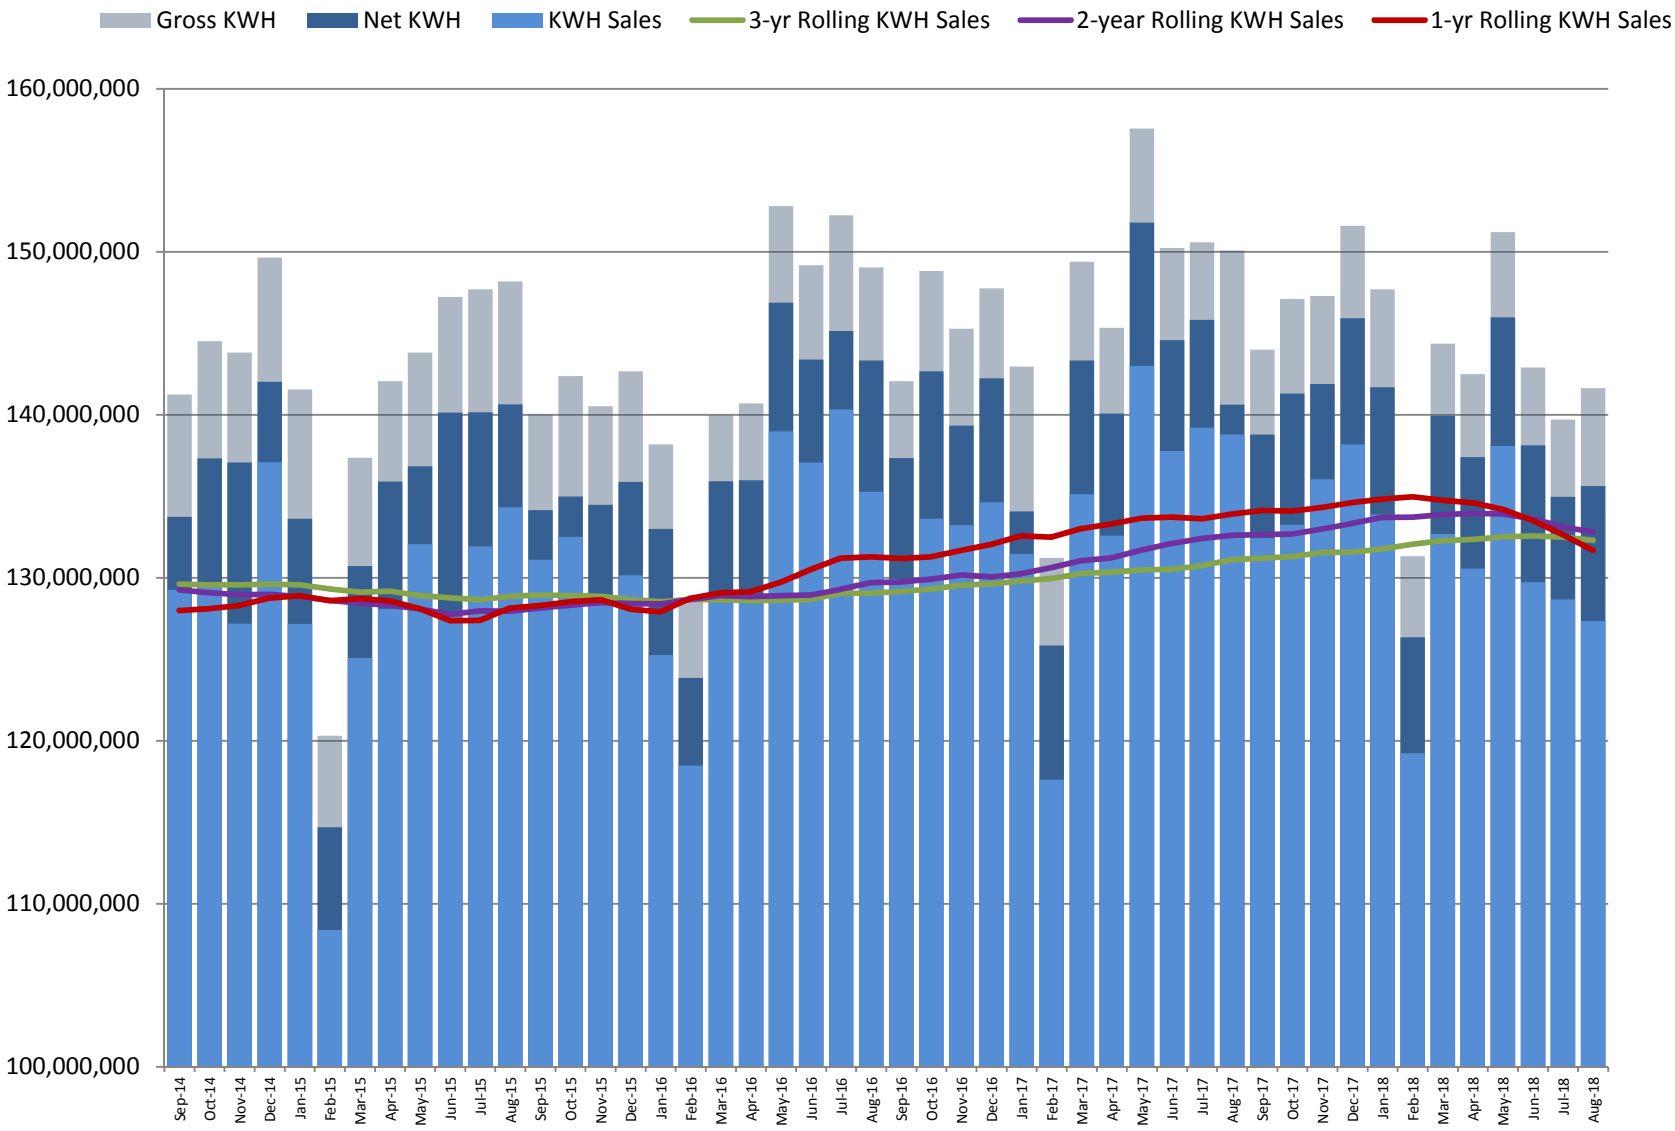
DSM Program reduces peak demand and reduces LEAC cost for all customers at a one time fixed rebate. Program has become very successful and GPA would like to petition the PUC to fund additional rebates under LEAC. DSM eliminates running less efficient peaking units at peak time thereby reducing fuel cost.

DESCRIPTION	AMOUNT
Initial DSM Budget FY'16	$1,806,014.00
Interest Income as of Aug 18	$4,500.36
Total Expense	$2,058,812.69
Ending Balance as of Aug 18	$(248,298.33)
Addtl. Budget: Approved (FY'18)	$1,139,189.00
Total Ending Balance as of Aug 18	**$890,890.67**



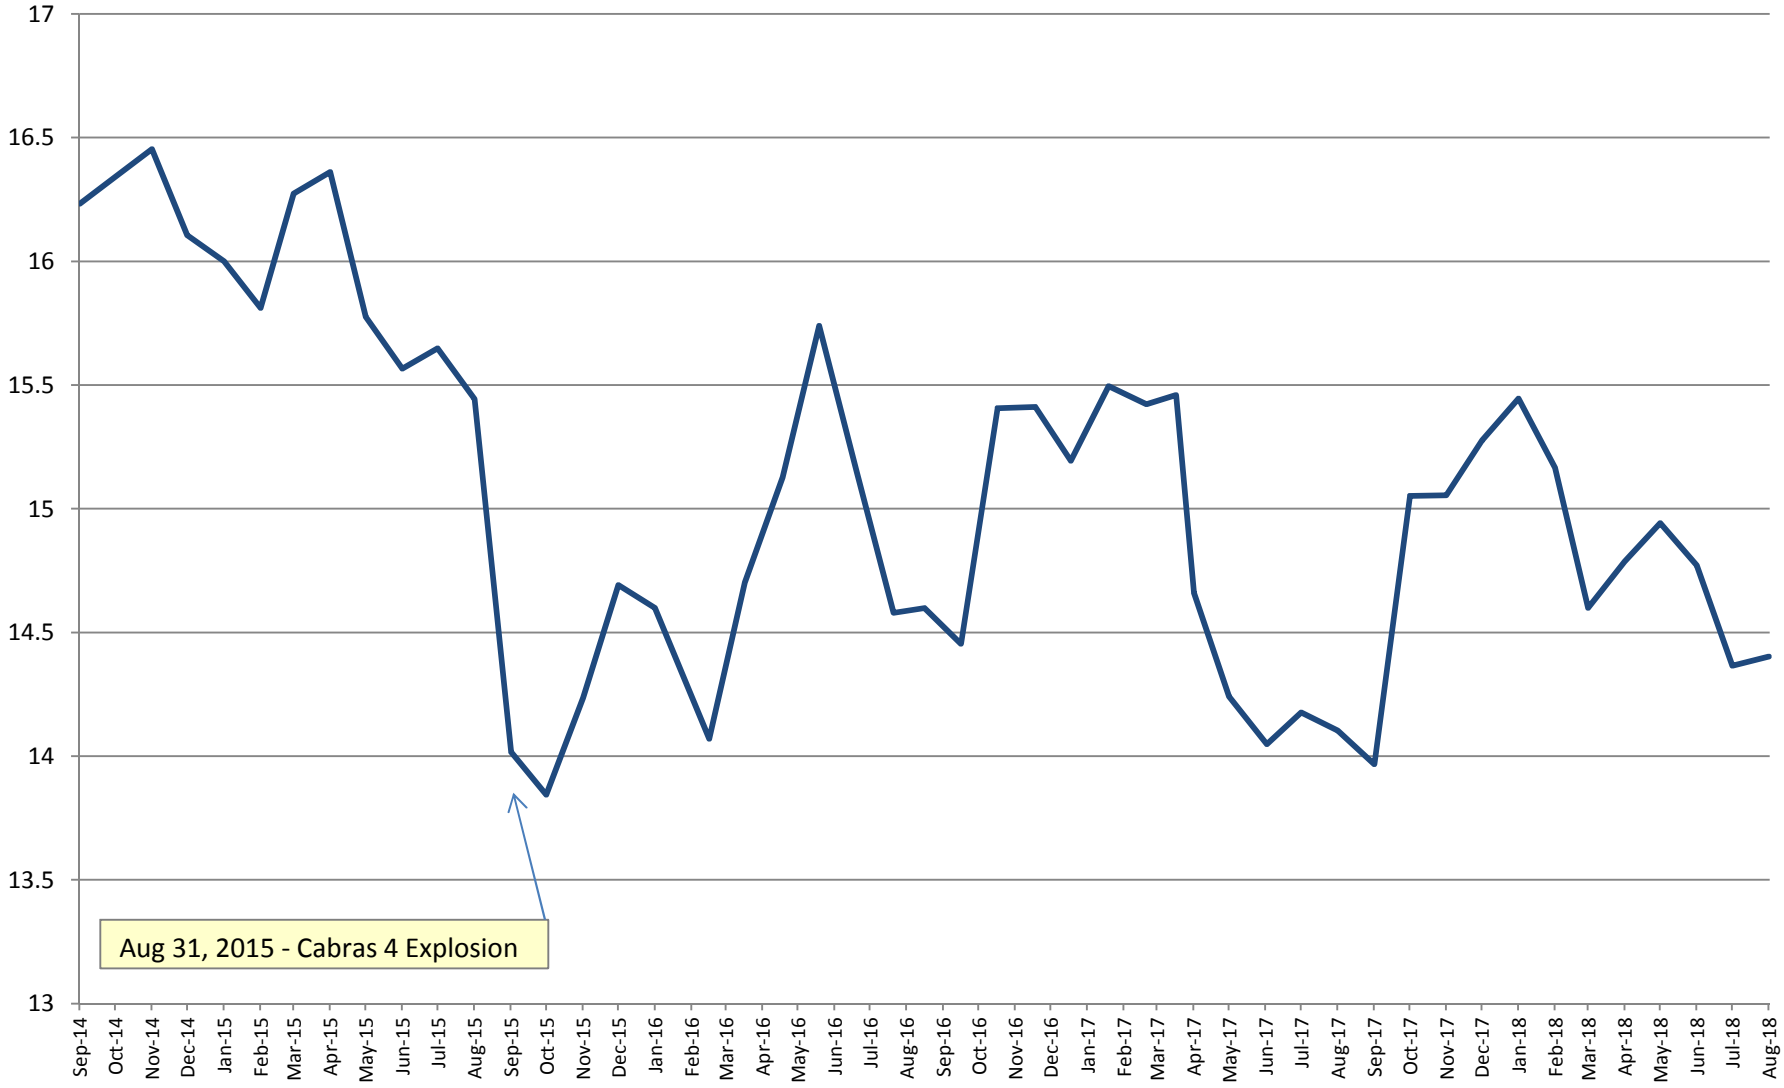
4. **PUC Dockets:**
   - The PUC has approved the technical specifications for the new plant. Thank you PUC for the quick turn around of the petition. The package is being issued to the bid's short listed proponents
   - FY 2019 CIP budget Approval is on their September meeting agenda.

5. **Phase II Renewable Contracts:**
   - Contract for HANWAH 60 MW Renewable project was signed Wednesday August 22nd.
   - Contract for KEPCO- LG CNS 60 MW Renewable project was signed Friday August 24th
   - These two contracts when completed in 2021 will save the ratepayers over $43M over the first 5 years or operations (estimated at a LEAC of $0.11/Kwh)

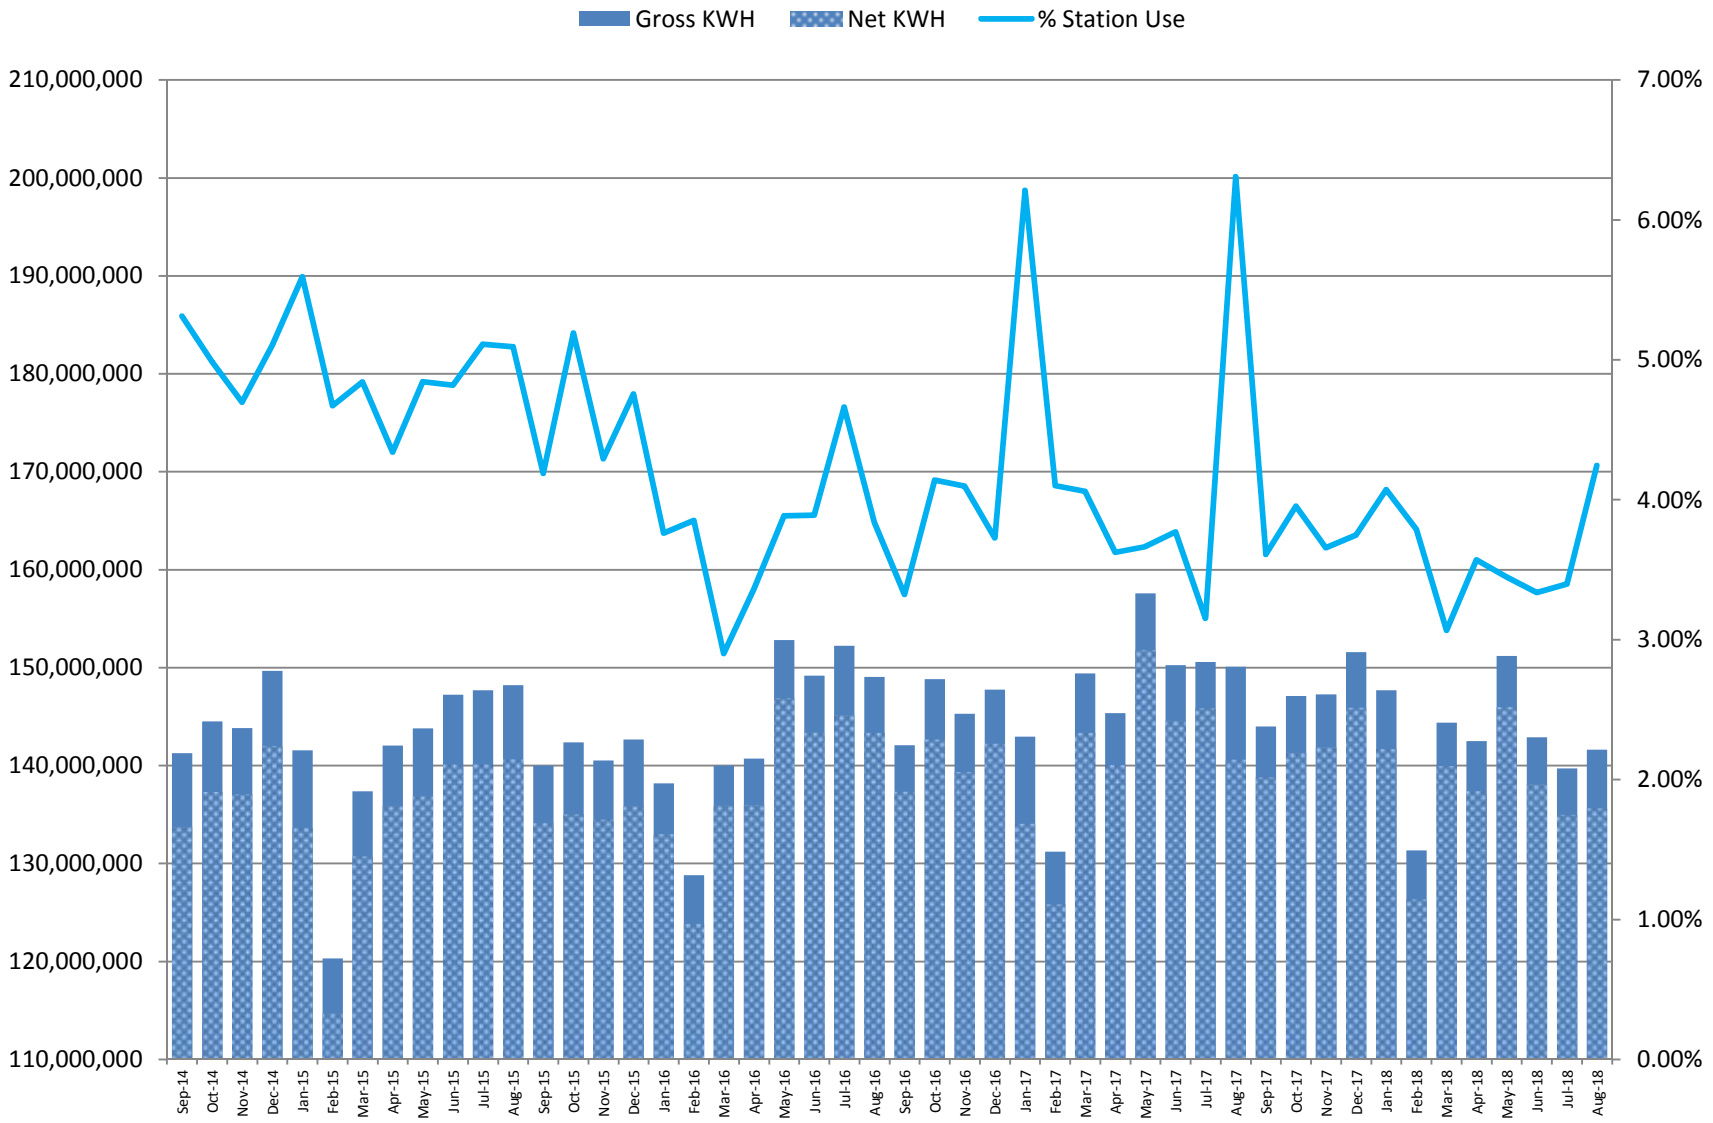


6. **Typhoon Mangkhut Restoration:** A presentation has been prepared to provide an update of the island-wide power restoration efforts from Typhoon Mangkhut.

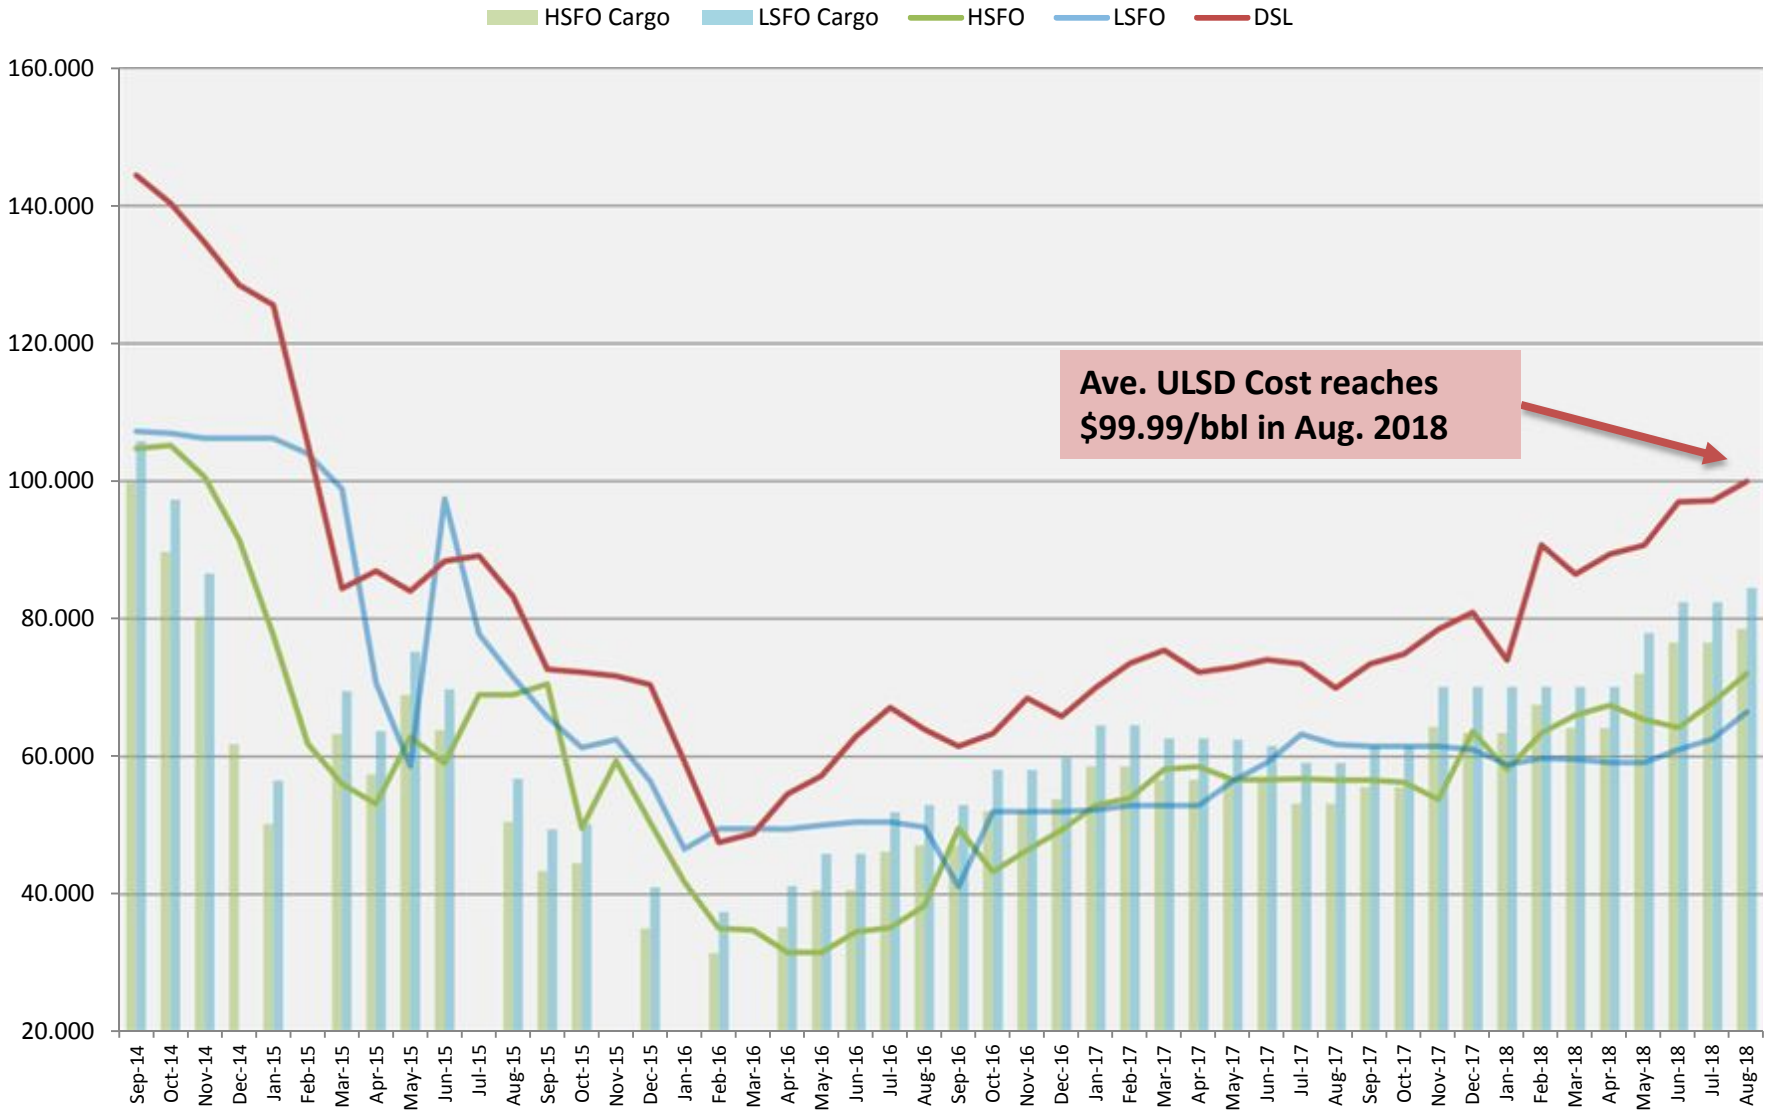
7. **Key Performance Indicators:** The following are indicators thru August 2018.



Historical Monthly Peak Demand
Aug 2012 - Aug 2018



Historical KWH Sales
Sept 2014 - Aug 2018



SYSTEM GROSS HEAT RATE
(KWH/Gal)
Sept 2014 - Aug 2018

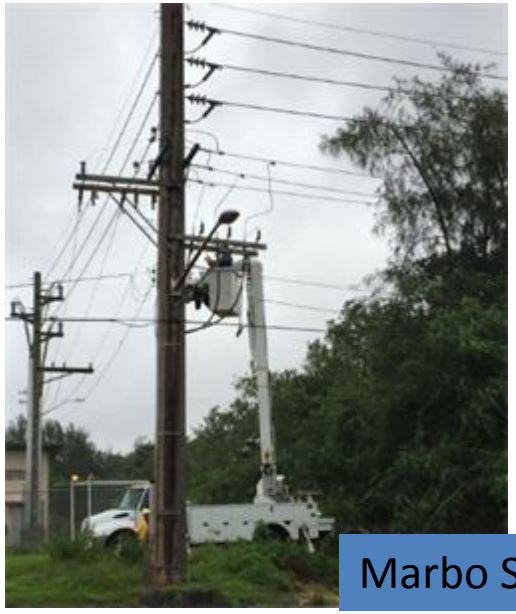
- Damaging winds of 39 mph
  - Monday 1:00 pm to Tuesday 4:00 am
- Destructive winds of 58 mph
  - Monday 4:00 pm – 11:00 pm
- Typhoon force winds of 74 mph
  - Monday 7:00 pm – 10:00 pm

EOC GPA RACs Deactivated – 10:00 am September 17th Monday

T&D Crews active until official stand down
5:14 pm Monday, September 10th

T&D Crews resumed activities
6:00 am Tuesday, September 11th



Storm Preparations

- Commenced Friday afternoon, September 7, 2018
- Trimming vegetation away from power lines throughout the island and removing line guards
- Securing power plant buildings, substation buildings, and the GBNPSB
- Topping off all fuel at the power plant tanks, water systems sites, and for the fleet

Damage Assessment

- Engineering assessment began on Tuesday, September 11, 2018.
- Transmission and Distribution Damages
  - Down and leaning wooden poles; 4 ea. 35', 12 ea. 45', and 1 ea. 55'
  - Down transmission, distribution primary and secondary power lines and static wire
  - Damaged hardware – insulators, cutouts, lightning arrestors, overhead pole top configurations
  - Damaged equipment – transformers
  - Vegetation coming in contact with power lines
  - Severed wires due to flying debris coming in contact with power lines
  - Sagging primary and secondary lines
- Generation Facilities and Substation Damages
  - Cabras Power Plant Unit 1&2 - Damaged wall panels, parapet, cracked awning windows, AC ducts
  - Central Maintenance – Damaged exhaust fan
  - Dededo CT – Damaged chain link fence and gate
  - Yigo CT – Damaged roll-up door and roof (including insulation)
- Various Substations – Damaged chain link fence, roof, doors, damaged perimeter lighting, burnt bus insulator, vegetation

Procurement/Warehouse

CONTRACTS

- 3 line crews to supplement GPA crews
- Food, Water, Gatorade and Fruits
- Safety Supplies: Tools, safety shoes, rain gear, spot lights, safety vests, traffic cones, etc.

LINE MATERIALS ISSUED	QUANTITY
POLES	12
TRANSFORMERS	2 Pad and 8 Pole Mounts
CROSS ARMS	70
FUSE CUTOUTS	200
FUSE LINKS	900
INSULATORS	440
WIRES	20,000 LF
LIGHTNING ARRESTERS	25
Bolts, Clamps, Clevises, Connectors

<u>7 Generator Issues After Storm:</u>
Overheated – AG2, CD17, F15, Machanao, Y15
Flooded & Submerged – ND4, SD4

GPWA to procure in FY 2019 additional portable generators for Booster Pump Stations which serve high elevation customers and for emergencies due to damaged stationary units

Customer Engagement

- Tracking of customer trouble reports received by Customer Service Representatives CSRs, Facebook direct messenger and GPA personnel.

- Trouble calls received by Customer Service Representatives
  - Tuesday, September 11th – 237
  - Wednesday, September 12th – 498
  - Thursday, September 13th – 345
  - Friday, September 14th – 311
  - Saturday, September 15th – 253

- Facebook Direct Messenger - **428** messages received from September 9th to 14th

- 12-hour shifts were implemented for (CSRs) assisting with trouble calls and AMI/Command Center Operations.

- Community updates via social media were successful in keeping our customers engaged and informed. Public sentiment improved with frequent updates and photos of the crew's pre-storm trimming and post-storm restoration.

Customer Engagement

Communications

1. Updated & Distributed Public Service Announcements (PSAs) to various storm related topics:
    - Voltage Fluctuations; Portable Generator Safety; Appliance Safety; Downed Power Lines; Securing Yard Items; Main Breakers;
2. Damaged Weather Head Process
    - Developed Graphic for process; Issued process to press & stakeholders
3. Typhoon Restoration Process
    - Developed Graphic for restoration process
4. Issued Restoration Updates
    - Media, Stakeholders e.g. GDOE, DPW, MCOG, GWA, Joint Information Center, Social Media
5. Coordinated Inter Agency Support via JIC & EOC
    - GDOE restoration coordination for 41 schools
    - Traffic intersection restoration coordination – GUARNG, DPW & GPD
    - Telecommunication
6. Employee Recall Memorandum from GM-COR 4
7. Updated Admin Staff on Restoration Progress;
    a) Trouble Call reporting;
    b) Periodic & Multiple 30 minute outages as necessary

Information Technology

Smart Meter AMI Network

- No damage to the six major collectors in Apra Heights, Barrigada, Dededo, Talofofo, Yigo and Umatac.
- Once power was restored, meter activity was seen.

GPA Network Communications

- All GPA links to substations, Julale, Cabras, T&D, Dededo CT operational
- No reported damage to fiber or related communication equipment.
- The Tier 2 network, GPA's island wide wireless network, was not damaged by the storm.

GPA Customer Billing and Payment Systems

- Operational, online payments available on Tuesday after the storm

GPA Datacenter

- Operational throughout the storm and no issues reported.

Personnel

- **SUPPORT PERSONNEL ACTIVATED TO SUPPORT RECOVERY**

  - ✓ *Safety*
  - ✓ *Procurement – Preparation and Issuance of contracts*
  - ✓ *Customer Services – CSRs staffed at the Dispatch Center, Facebook updates and reporting Facebook messages, tracking trouble reports, and following up with customer inquiries*
  - ✓ *Finance – Certification of purchases, funding, and payments*
  - ✓ *Public Information Office – Joint Information Center (JIC) staffing, liaison with MCOG, GDOE and others*
  - ✓ *Planning & Regulatory – Handled oil spill response, documented transformer damages, and pole installations*
  - ✓ *IT – Maintained network communications, monitored meter communications and health of routers and collectors, coordinated repair and reenergization of routers and collectors with T&D, reported on customers energized*
  - ✓ *SPORD – conducted Fuel inspections and ensured fuel deliveries*

Personnel

- **PERSONNEL ACTIVATED**

  - ✓ *Dispatch – System Dispatching, Generation Dispatching, Trouble Desk, SCADA personnel*
  - ✓ *Transportation – Mechanics in support of heavy equipment and light duty vehicles*
  - ✓ *Engineering – damage assessment (35) + Line Crew Support (26)*
  - ✓ *Generation – all units available except for Aggrekko which required complete securing to prevent damage, all GPA sites manned through the storm*
  - ✓ *Generation Water System Diesel – 9 personnel covered 207 standby Generator sites*
  - ✓ *Facilities – personnel handling GBNPSB, securing GPA facilities, assessing and repairing facility damages*

Personnel

TRANSMISSION & DISTRIBUTION

- *Line Crews*

  Day Shift

  North – 4 crews
  Central – 3 crews
  Southern – 3 crews

  Swing/Graveyard Troubleshooters – 3 Crews

- *Operators = 3 crews*
- *Meter shop = 8 electricians for meter change outs, crew support*
- *Relay shop = 6 electricians for 29 substations*
- *Substation = 10 electricians for 29 substations*
- *4 Safety, 2 HR, 1 IT = Material assembly, traffic control, supply runs*
- *Engineering = 26 personnel for documentation of crew activities, redesign as necessary, line assessment prior to restoration*

Safety

ZERO INJURIES!!!

Summary

- No Injuries!!! Biggest Accomplishment for Very Dangerous Working Conditions
- Recovery Efforts were Excellent! Thank you Employees of GPA and GWA!!!!
- Thank you to the Ratepayers and Public for their patience and understanding!!!
- Teams will meet to determine system and procedural improvements to improve future recovery efforts
- Great Team Work between GWA and GPA to keep water service flowing. Team to meet to recommend additional future improvements

THANK YOU

CUSTOMER SERVICE DIVISION - Aug 2018

SUMMARY REPORT

SITE	Less than 10 Mins.	%	10-15 Mins.	%	15-30 Mins.	%	30-45 Mins.	%	TOTAL	Location %

Government Accounts Receivable: CSD reports invoices for the month of July 2018, for 71 active government accounts with an overall total of $6,091,174.02. 65 accounts were current (92%), 6 accounts arrears (8%). 4 fax/emails issued to government accounts totaling $1,813,462.96. July 2018 invoices, 65 accounts paid in full.

CREDIT AND COLLECTION

Delinquent Ratio: As of Aug 2018 the authority reported a total 48,353 active customers. The "Delinquent Ratio" was recorded at 6.12% with 2,957 total delinquent accounts, total arrears of 2,460,682.31; 2,335,628.45; 2,934(6.07% / 28-45 days) category; 77,484.34; 213 (0.44% / 46-60 days); 4,285.17; 24(0.05% 61-90 days); and 43,284.35; 51 (0.11% / Over 90 days).

Bankruptcy: During Aug 2018 the Bankruptcy reports four (4) customer accounts filed, totaling $3,134.07 Chapter 7.

Damage Claim: The Damage claim committee received one (1) Damage claim at $120.00 for the month of August 2018.

ACTIVE DELINQUENT – NON PAYMENT

COMMAND CENTER /DISCONNECTIONS/RECONNECTIONS

Single Phase Meters: Credit and Collection issued orders to Command Center to perform remote disconnect/reconnect for a total of 1,197 customers; 884(74%) were disconnected; 305(25%) deferred; 8(1%) incompletes.

3 Phase Meters: Credit and Collection issued orders to Disconnect Reconnect crew to perform truck roll out disconnect/reconnect for a total of 37 customers; 24(65%) were disconnected; 13(35%) deferred; 0(0%) incompletes.

SPORD FY 2018 Budget Status

2

SPORD FY 2018 Budget Status

- Major Contracts (Non-O&M) thru August 2018

	Annual Contract Amount	Actuals	Balance
Aggreko Contract	$ 11,751,171	$ 9,834,273	$ 1,916,898
Fuel Contracts	$ 229,805,548	$ 190,286,861	$ 39,518,687
MEC IPP (Piti 8&9)	$ 31,909,347	$ 29,201,479	$ 2,707,868
NRG Contract (Renewable)	$ 10,170,682	$ 7,875,041	$ 2,295,641

SPORD FY 2018 Budget Status

- DSM Expenses

Description	FY16	FY17	FY18 as of Aug 31	Total to Date
Regular/OT Pay	$11,348.80	$22,256.00	$20,469.95	$ 54,074.75
Other Contractual	$28,278.50	$85,550.05	$79,752.25	$193,580.80
Bank Fees	$155.00	$1,032.06	$1,070.08	$2,2457.14
Paid Rebates-Split AC	$154,700.00	$557,275.00	$1,039,700.00	$1,751,675.00
Paid Rebates-Central AC	$3,400.00	$8,200.00	$3,600.00	$15,200.00
Paid Rebates-Washer/Dryer	$2,800.00	$7,425.00	$31,800.00	$42,025.00
Total Expenses	**$200,682.30**	**$681,738.11**	**$176,392.28**	**$2,058,812.69**

Ongoing Activities

- Contract Performance Management (IPP, PMC, Agrekko)
- Generation Fuel Supply & Fuel Farm Management
- DSM Rebate Processing
- Renewables (Wind Turbine Maint & DOAg MOA, NRG Invoicing)
- Smart Grid/Network Support
- Project Management
  - Procurement
  - *August Project Activities*

PROCUREMENT ACTIVITIES

PENDING AWARD / NTP

Responsible	PROJECT	Description	CCU Date Approved (Resolution No.)	PUC Date Approved (Docket No.)	Projected Start*	Projected Completion	Status
SPORD (FJI)	RENEWABLES	Phase II - KEPCO/LG CNS	1/23/18 (2018-01)	18-06	4/30/2021	4/24/2046	Pending contract signature & ntp scheduled for Aug 24, 2018
SPORD (FJI)	RENEWABLES	Phase II - Hanwha	2/27/18 (2018-04)	18-08	8/15/2021	8/9/2046	Pending contract signature & ntp scheduled for Aug 22,2018
SPORD (ANF)	FUEL	Petroleum Inspection Services			8/1/2018	7/31/2020	Procurement Completed. 2-yr Contract commenced Aug 1, 2018.
SPORD (ANF)	FUEL	Supply of Residual Fuel Oil No. 6	(2018-16)	Pending	12/1/2018	2 yrs	Phase II evaluation complete. Notice of Intent to Award issued (14 day protest period)
SPORD (FJI)	NEW POWER PLANT	Geotechnical Services	RFP	Resolicitation GPA-RFP-18-002	pending permit	TBD	Contracted awarded.
ENGINEERING	FUEL	GPA Tank Farm RFO Pipeline Upgrade - Design / Build			7/31/2018	TBD	NTP issued in Jul 2018. To repair existing RFO lines at the Bulk Fuel Farm

ONGOING PROCUREMENT

Responsible	PROJECT	Description	Bid or RFP	Bid/RFP No	Announced	Bid Opening / Due	Notes
SPORD (RAC)	SCADA	SCADA Workstations	Bid	GPA-049-18	2/13/2018	3/14/2018	Completed
SPORD (RAC)	SMART GRID	MV90 Integration Services	RFP	GPA-RFP-18-001	1/30/2018	3/6/2018	Negotiations Ongoing -September 2018
SPORD (RAC)	PLANNING	Milsoft Systems Software Services	RFP	GPA-RFP-18-003	2/1/2018	3/7/2018	Negotiations Ongoing -September 2018
SPORD (FJI)	NEW POWER PLANT	Build, Operate & Transfer Contract for 120-180MW of New Generation Capacity. **(PHASE I - REQUEST FOR QUALIFICATIONS)**	MS Bid	GPA-034-18	1/16/2018	4/5/2018	Step I - Qualifications completed. Total of 7 Qualified bidders selected. Obtained CCU approval to petition PUC for approval of technical bid documents in July 2018.

ONGOING PROCUREMENT (continued)

Responsible	PROJECT	Description	Bid or RFP	Bid/RFP No	Announced	Bid Opening / Due	Notes
SPORD (ANF)	FUEL	Supply of Diesel Fuel Oil No. 2	MS Bid	GPA-008-18	11/16/2017	9/18/18 (Phase I) 10/15,10/22, 10/29, 11/05	Price per Site Location (4 Total)
SPORD (JTL)	RENEWABLES	Renewable Energy Resource Phase III	MS Bid	GPA-007-18	11/16/2017	10/4/2018	Lease modifications ongoing to address bidders' concerns/questions. Completed lease discussions in July.
SPORD (RAC)	SMART GRID	Mobile Workforce Management System (MWMS) **RE-BID**	MS Bid	GPA-023-17	10/5/2017	3/20/2018	GPA Review of Insurance -September 2018
SPORD (MAT)	PLANNING	Planning Software Consulting Services	RFP	GPA-RFP-18-010	7/26/2018	8/30/2018	Consulting Services for GPA's ABB Software utilized in planning and operations research activities.

DEVELOPING PROCUREMENT

Responsible	PROJECT	Description	Bid or RFP	Projected Start	Projected Completion	Status
SPORD (FJI)	NEW POWER PLANT	Build, Operate & Transfer Contract for 120-180MW of New Generation Capacity. **(PHASE II - TECHNICAL SPECIFICATIONS)**	MS Bid			Pending final bid documents.
ENGINEERING	FUEL	GPA Tank Farm DFO Pipeline Upgrade - Design / Build	Bid	2/8/2018	11/30/2018	Preparation of bid specs in progress. To install new diesel line from Navy Tie-in to the Bulk
ENGINEERING	FUEL	Tank 1935 API 653 Internal Inspection	Bid	5/1/2018	5/31/2019	Preparation of bid specs in progress. Budgeted for FY 2018.
ENGINEERING	FUEL	OWS Upgrading	Bid	5/1/2018	5/31/2019	Preparing IFB bid specs.
ENGINEERING	FUEL	LD System Upgrading	Bid	5/1/2018	5/31/2019	Preparing IFB bid specs.

DEVELOPING PROCUREMENT (continued)

Responsible	PROJECT	Description	Bid or RFP	Projected Start	Projected Completion	Status
SPORD (RAC)	ELECTRIC VEHICLE	Electric Vehicle Charging Stations	Bid	Jul-18	Sep-18	Cancelled
SPORD (RAC)	SCADA	DNP3 SA training	RFP	Jul-18	Dec-18	Announced Closing (October 5, 2018)
SPORD (RAC)	ELECTRIC VEHICLE	Electric Vehicle Infrastructure	RFP	Aug-18	Dec-18	Cancelled
SPORD (RAC)	STUDIES	Consulting Services for Distribution Study using Smart Grid Analytics	RFP	Jul-18	May-19	Submitted to Procurement (July 2018)
SPORD (RAC)	SMARTWORK SYSTEMS	Smartworks Systems Software Services	RFP	Aug-18	Continous	Developing RFP
SPORD (ANF)	FUEL	Bulk ULSD Supply	Bid	Aug-18	Dec-18	Draft Bid review by Mgt Fuel Committee
SPORD (ANF)	FUEL	ULSD supply for WSD and other plant sites	Bid	Sep-18	Mar-19	Developing Specifications
SPORD (ANF)	FUEL	GPA Bulk Fuel Storage Facility PMC	Bid	Sep-18	Sep-19	Developing Specifications to convert to PMC
ENGINEERING	FUEL	Guatali Bridge for ULSD Tankertruck access from Tristar	Bid	FY2018	FY2019	Developing Specifications w/ DPW Consultant (WSP)
SPORD (MAT)	FUEL / OPERATIONS	IFB for the Supply of Reprocessed Waste Oil Meeting GPA's ULSD Specifications	Bid	FY2018	FY2019	Bid Documents, Scope of Work, Bid Price Structure under review by Management
SPORD (LOS)	STUDIES	Power System Analyses and Studies	RFP	FY2018	FY2019	Pending RFP No. and announcement date from Procurement
SPORD (LOS)	WIND TURBINE	Wind Turbine O&M Supervision and Materials	RFP	FY2019	FY2019	Developing RFP documents

Project Activities

No.	Project Description	August 2018 Activities	Status / Est. Completion	RFP/Bid No
1	Energy Storage System (Phase I)	GPA reviewing Pre-Final design. Clearing and grading permit work commenced in November 2017. Foundation permit work commenced in January 2018. Construction is 45% completed.	December 31, 2018	MS Bid GPA-082-15
2	Renewable Energy Resource Phase II	GPA and the Contractors signed both contracts at the end of August 2018.	KEPCO PV plant COD is APR 2021. Hanwha's COD is anticipated for 1st qtr of 2020.	MS Bid GPA-070-16
3	New Power Plant Bid (EPCM)	PUC has given approval of the technical bid documents to GPA.	Award (2019 Q3) COD (2022 Q2)	MS GPA-034-18
4	DSM Marketing	None	Continuous	
5	DSM Rebate Program	Processed over 600 equipment in applications for rebates totaling ~ $138K	Continuous	
6	Wireless Network Expansion	Commenced Southern Expansion in collaboration with GWA: 30% Assessment of GWA Well Locations: Completed Assessment of Existing Tropos Units: 100% Router Equiqment and Accessories purchase Routers programming Preparing next router order and installation documents	Dec-18 Completed Completed Received routers - May 2018 Completed - June 2018 Accessories - May 2018 October 2018	GPA-019-18
7	Performance Metrics Automation Project	Presentation on iDashboard provided to GM. GPA contiues to work with consultant on automating reports and formating.	Mar-18	
8	Electric Grid Analysis Software	Additional training for users Realtime Voltage Module Training on Planning and Analysis Cases	Completed Completed (July 2018) November 2018	GPA-064-16
9	Services to Develop Business Performance Indices using iDashboards	Dashboard builds 95%	Ongoing	GPA-RFP-16-008

Project Activities

No.	Project Description	August 2018 Activities	Status / Est. Completion	RFP/Bid No
10	Supervisory Control and Data Acquisition (SCADA) System	Change Order Approved for October 2018 Completion and hardware costs Servers; Programs, & Workstations Installed Point to Point Test Ongoing Training	Oct 2018 (SCADA COD) Completed 'Sept 2018 (Estimated Completion) September 2018	GPA-066-16
11	Mobile Workforce Management System	Bid Evaluation Completed, Clevest recommendation memo submitted for approval March 21, 2018 Purchase Order being Processed Pending GPA legal comment on Insurance	May 2018 (Bid Award) August 2018 September 2018	GPA-023-17
12	Consulting Services for Smart Grid Analytics Enabled Distribution System Planning, Technical, and Economic Feasibility Studies	New Bid	Sepember 2018 (Announcement)	RFP-18-XXX
13	MEC Piti &8 and #9 - ECA Expiration	Environmental Assessment Report completed. Condition Assessment being finalized by consultant.	[Completed] OVERDUE	RFP-17-002
14	MEC Piti &8 and #9 - ECA Extension	CCU approval received. PUC approval received, pending review of contract amendment. Amendment discussions w/ MEC on-going.	[Completed] In progress	
15	Generation Software (GADS open software)	Pending data entry from Generation & SPORD.	[On-going work]	
16	IFB for ULSD Supply for Baseloads and Peaking Units	Solicitation in progress. Bid package revised to include delivery requirements.	Start Date: Nov 2017 Est. completion: FY2019	IFB GPA-008-18
17	Contract for Lease of Bulk ULSD Storage	196KB tank repairs completed. Lease commenced January 01, 2018 until December 31, 2018 with annual extension option up to 4 years as approved by PUC	Start: November 2017 Est. Completion: FY2018 Contract Start: Jan 1, 2018	TTGI-SA-2018-001
18	EV Infrastructure	Fast charge station scope for Mangilao offices. Developing fast charge station scope for Mangilao offices.	Cancelled	

Project Activities

No.	Project Description	August 2018 Activities	Status / Est. Completion	RFP/Bid No
19	Fuel Conversion Plan	Condition Assessment & Transition Plan completed, submitted to Executive Mgmt and Key Employees Additional Support as Owner's Engineer - not needed at this time, per Engr Proj Mgmt Supv & Team, and Spord Fuel Mgmt Engr III	[Completed] Cancelled	
20	Fuel Bulk Storage Facility Assessment	ESA completed, RECs being addressed by GPA/IP&E CA completed	Start: Sept 2017 End: June 2018	
	Renewable Energy Resource Phase III	Completed pre-bid conference and site visits January 23-24 2018.	(Mar 2018) Tech Proposal Due	
21	Utility Energy Services Contract (UESC)	Conducted Best Schools program site assessments. Continued discussions with Navy.		
22	IFB for Delivery Services for GPA Plants	Bid canceled. Requirements to be included in the ULSD Supply solicitation	IFB Canceled Feb 2018	IFB GPA-006-18
	IFB for RFO Supply to Baseload Plants	Solicitation for a 2-Year Contract in progress. Note: PUC approves a 3-month extension of existing contract until November 30, 2018.	Solicitation in progress (for award) Est. Completion: FY2019 (1st Qtr)	IFB GPA-009-18
23	IFB for Petroleum Inspection Services	Solicitation completed. 2-Year contract to commence August 1, 2018 and will expire on July 31, 20120 with three (3) annual extension options	(Contract signed)	IFB GPA-014-18
27	RFO Storage Lease Agreement w/ Tristar	4-Year Lease extension (Sep 2018-Aug 2022) Approved by CCU.	Included in the August 2018 PUC meeting Contract Start: Sep 1, 2018	TTGI-SA-2013-001
28	GPA Fuel Farm RFO Pipeline Repair & Upgrade	c/o Engineering Project Mgt	Completed. Project Implementation in progress (Design phase)	IFB GPA-047-18
29	GPA Fuel Farm ULSD Pipeline Upgrade	c/o Engineering Project Mgt	Estimated Start: Oct 2019 Est. Completion: Sep 2019	For CCU/PUC approval for IFB Solicitation

Project Activities

No.	Project Description	August 2018 Activities	Status / Est. Completion	RFP/Bid No
30	Tk 1934 & Tk1935 API 653 Internal Inspection	c/o Engineering Project Mgt	Estimated Start: Jun 2018 Est. Completion: FY2019	For CCU/PUC approval for IFB Solicitation
31	Milsoft Systems Software Services	Negotiations - June 2018	Continuous	GPA-RFP-18-003
32	MV90 Integration Services	Negotiations ongoing - June 2018	Dec-18	GPA-RFP-18-001
33	SCADA Workstations and Monitors	Delivered	July 2018 Completed	GPA-049-18
34	Grant Proposal Development and Proposal Application Management Services	GPA submitted a grant request for the Department of Interior funding opportunity which includes partnered projects with GDOE(Best Schools Program), Public-Access Parking Lot Solar Canopy, Demand-Side Management Expansion, Electric Vehicle (EV) Infrastructure, Employees-Access Parking Lot Solar Canopy, Wind Turbine Battery Storage, and Geothermal Studies and Exploration.	Feb 2018 (Contract signed)	Re-Solicitation GPA-RFP-16-011
