The program consists of research-based techniques integrated into an approach that includes: individual sessions; family sessions; group sessions; introduction to Twelve Step programs; parent substance abuse education and adolescent substance education. The Matrix Model for Teens & Young Adults integrated several treatment approaches in the program to include motivational interviewing and contingency management by hosting several youth and parent clean and sober activities, incentives for clean urine tests for youth, and acknowledging graduates from the outpatient program with incentives such as movie passes, gas coupons, and department store gift certificates.
II.1f Describe in detail how the project will address issues of age, race, ethnicity, culture and other similar issues.	Sanctuary has employees that are bilingual and our program is consistently developing and strengthening our bilingual volunteers, including our AmeriCorps members. We continue to work with the Superior Court of Guam who provides court appointed trained interpreters for both individual and family sessions. Psycho-educational group topics are adapted to use language and concepts that are culturally appropriate and sensitive to allow for a more enriched individual and group learning experience. Thus, experiential learning is incorporated through exercises and activities that include cultural references.

To date, "Pathways" has provided services to a total of thirty-eight (38) adolescents during this 2018 fiscal year. There are two (2) adolescents on a waiting list pending PPD clearances and orientation. Program staff continues to work with DYA social workers, I'Famagu'on-ta case managers, and family members in obtaining PPD clearances by referring to the Express Care clinics, DPHSS northern and southern clinics or free outreach immunization clinics. The strength of the class based on staff observation, was that each client was able to share in a small group setting and get feedback from peers that support their efforts towards recovery. Clients are able to encourage each other and share their experience on what has helped them overcome obstacles, and helps debunk the belief that clients are "alone" in their addiction. The groups allow the parents and their child to practice new skills and information learned, build communication skills, and enhance the relationship between parent and child. All groups are "open" in structure. The Matrix program and its various components are arranged to accommodate the open structure. Clients who have been in treatment longer serve as role models for those just entering treatment.
II.3f Provide provisions that will address clients needing psychiatric and medical services by consultation or referral arrangements.	Sanctuary's current Clinical Director is a licensed Professional Counselor. Additionally, Sanctuary, Inc. has a Memorandum of Understanding with two (2) private practitioners that are licensed Professional Counselors and ICRC Certified. The Clinical Director and the two practitioners provide consultation to program staff as needed.
II.3g Ensure adolescent females who are pregnant or who are intravenous drug users be given preference to treatment.	Counselors are aware to give preference to this population. None have been identified during this reporting period.
II.3h Provide provisions that will assess and implement motivational strategies that will assist clients with their transition towards the next level of care.	Counselors meet with clients individually to transition client towards next level of care as needed. Counselors also utilize the ASAM's six dimensions to ensure transitions are clinically appropriate.

Problems Encountered:

A challenge encountered this quarter is again not being able to identify an alternate placement in a timely manner for youth who are wards of the state due to exhaustion of alternate familial/relative placement and

limited foster care placement. The youth and parent(s)/legal guardian(s) are always encouraged to sign up for aftercare services to assist with transitioning the youth back home and if problems may arise. Unfortunately, for this quarter, most clients who exited from our care chose not to participate in aftercare; however, they were still provided with a transitional plan to be used at home with their family or individuals they have transitioned to/with. Parent involvement in the programs we offer (groups and supportive counseling) is limited; parents do not participate in all the services we recommend despite agreeing to participate and access other services upon intake of client. Lastly, parents and/or guardians failed to make regular or any contact with their child while in the shelter. It was a challenge to establish communication and schedule family quality time due to parents and/or guardians being out of reach or difficult to contact.

Future Plans:

The Case Management and Counseling department continue to develop corrective action plans to address several gaps in services such as improving placement time periods, monitoring of case management activities, and case updates. Sanctuary continues to partner with agencies such as Child Protective Services and the Department of Youth Affairs by increasing day to day communication to discuss ways to better serve clients in shelter. To assist with these plans, we continue to increase our staff population. Executive Director Theresa C. Arriola continues to find innovative ways to access support services that directly benefit the COED Emergency shelter. We also receive funding under the VOCA grant to assist victims of crimes, which we often encounter; and funding through the Basic Center grant to assist in funding self-referrals in shelter. We have also just received another grant Administration for Native Americans (ANA), "Inafa'maulek" Summer/After School Program to build resiliency among youth we serve and in the community.

Performance Measures:

Social Competence	Case Manager and shelter staff have reported to observe improvement in social interactions and, defined as maintaining positive relationships with others 15 of 17 (88%) clients served within this reporting period. Observations are based on demeanor and nature of client interactions as documented using daily client progress reports.
Family Relationships	Noted improvements in family relationships, defined as willingness to address family issues, and improved styles of communication, has been reported by case manger 7 of 17 (41%) based on parents verbal feedback to the Case Manager. Several of the clients during this reporting period were wards of the state. The number provided above only includes clients who were able to work towards reunification with a family member or foster parent. It is challenging to work on a family relationship when a family member or foster parent is not identified or uninvolved. More than 30 days are needed to work on fostering a positive relationship when working with CPS clients and their family members or foster parent.
Families Satisfied with Program	A total of out of 23 family members reported verbal feedback during this reporting period. Of the total number of family members who have reported

	92% have stated to be satisfied with all aspects of the program including, 84% of families stating that they will access Sanctuary services for future familial issues. Again the numbers above only include cases in which parental involvement is present. Areas surveyed include: 1) Noted quality in family relationships 2) Future access of services 3) Accessibility and response time 4) Overall rating of services 5) Recommending services to others
Client Satisfaction	Of all clients who have completed satisfaction survey, 100% have reported that they felt safe while here at Sanctuary. A total of 100% have rated that they were either very satisfied or satisfied with the overall care and support services received.
