Guam Power Authority
Overview

Established in 1968, the Guam Power Authority (GPA) is a public corporation and autonomous instrumentality of the Government of Guam. The Consolidated Commission on Utilities (CCU) comprised of an elected five-member board of directors provides governance over GPA. Owning assets of $955M, GPA employs a workforce of 467 and serves approximately 52,000 customers.

The Guam Public Utilities Commission (PUC) regulates GPA rates. It holds rate oversight authority including review of all GPA contracts impacting rates and charges. GPA has adopted the Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission (FERC). GPA continually works to improve its credit worthiness and maintain an investment grade rating from the Moody's, Standard & Poor's and Fitch, U.S. bond rating agencies.

2019 JAN 22 AM 11:17

As Guam's sole electric power utility, GPA supports Guam's economy with conventional and renewable electrical energy. Guam's island wide power system (IWPS) consists of transmission, distribution, and generation infrastructure operated by GPA and contractors including: 429 megawatts (MW) of installed generation capacity, 1,827 miles of transmission and distribution lines, and 29 substations. Through a Power Purchase Agreement, GPA buys 26.5-megawatts of solar energy produced by the NRG Solar Dandan LLC plant. Additionally, a 100 percent, federally funded 275-kilowatt Vergnet wind turbine also provides low cost electricity to the grid.

GPA has awarded low-cost public-private solar photovoltaic renewable energy contracts that will supply about 25 percent of Guam's electricity by 2021. A planned addition of 180 megawatts of new, flexible base load generation capacity by 2022 will allow GPA to meet future Guam load growth, as well as facilitate significantly more renewable energy sources to the IWPS. GPA is working to achieve a 50 percent renewable energy portfolio before 2030, providing a significant hedge against erratic fuel oil prices. Utility-scale energy storage battery additions will also allow GPA to capture the sun's energy during the day and use the energy during evening peak hours to reduce costs to ratepayers. GPA's utility-scale renewable and battery energy storage system (BESS) projects have gained attention world-wide.

Committed to providing affordable and reliable power, GPA maintains the lowest rates compared to other neighboring Pacific islands at an average rate of 20.56 cents per kWh in 2017. GPA's Energy Sense Program has paid over $2,205,150 of energy efficient appliance rebates, launched the Bringing Energy Savings To (BEST) Schools Program, large Customer Utility Energy Services Program, and operates two Nissan Leaf Electric Vehicles (EV).

The Guam Power Authority is a member of the American Public Power Association, a Washington D.C., based service organization representing 2,011 community-owned electric utilities in 49 states and 5 U.S. territories. Collectively, public-power utilities service more than 49 million Americans. In 2017, GPA ranked 63rd in the top 100 public power utilities by number of customers, and 37th in revenues.

GPA VISION

GPA will be the best utility providing outstanding energy solutions to our island community.

Mr. John J.E. Kim, CPA
Chief Financial Officer

About Us

The Guam Power Authority (GPA) was created in 1968 as a public corporation and autonomous instrumentality of the Government of Guam. GPA is governed by the Consolidated Commission of Utilities (CCU) comprised of five elected members. GPA is also subject to the regulation of the Guam Public Utilities Commission (GPUC), and has adopted the Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission (FERC). The Authority has total assets of $955M and a workforce of 467 employees. Guam Power Authority has 420 megawatts of installed generation capacity, owns 1,827 miles of transmission and distribution lines and operates and maintains 29 substations, a 26.5 megawatt solar farm and 275KW wind turbine. Steadfastly committed to energy production and fuel diversification, GPA continues to work towards its goal of 50 percent energy from cost-effective renewable sources by 2028, and bringing natural gas to Guam.

Demographics

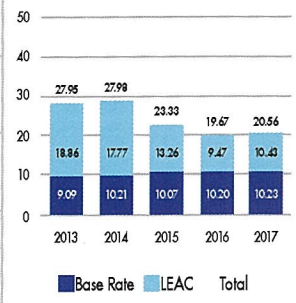

As of September 30, 2017, GPA serves 50,843 customers comprised of residential, commercial, Government of Guam, and GPA's largest customer, the U.S. Navy. GPA has established six strategic measures including superior customer service. The Authority has installed smart meters and online tools to help customers understand and manage their energy use, including the online website "My Energy Guam," which provides residential customers these capabilities; and the online "Bizconnect" tool serving non-residential customers.

Our Rate(s)

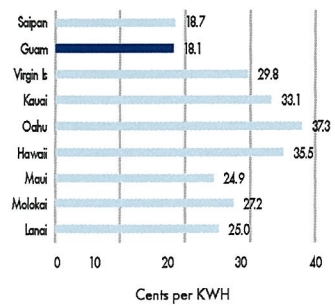

Committed to providing affordable and reliable power to the people of Guam, GPA maintains the lowest rates compared to other neighboring Pacific islands as shown in the table below. GPA's system average rate of 20.56 cents per kWh in 2017, was just slightly higher than the 2016 rate of 19.7 cents per kWh.

Customers	2015	2016	2017
Residential	42,888	43,252	43,756
Commercial	5,695	5,720	5,758
Government	1,097	1,235	1,328
Navy	1	1	1
Total	49,681	50,208	50,843

OUR PROGRESS

KEY STRATEGIES	2015	2016	2017
PRODUCT AFFORDABILITY	Dededo Indoor substation. 26.5 MW Dandan Solar Farm. 275 KW wind turbine in Santa Rita.	Levelized Energy Adjustment Clause reduced by 17.4%. Line losses further dropped to 4.55% as well as Station use dropped to 3.77%. A 1% reduction in line losses means a $1.5M fuel cost savings to our customers.	Station power dropped by 0.03% from 3.77% to 3.74%. Reduction in station power results in fuel savings. Line losses remained at 4.55%. Reduction in line losses results in lower fuel expenses. The CCU Board and GPA Management remain committed to reducing operating costs by maintaining levels of FTEs and reducing overtime expenditures.
SUPERIOR CUSTOMER SERVICE	Launched Demand-Side Management Program providing customer rebates to reduce the cost for approved energy efficient appliances.	Paid out over $150,000 customer rebates since 2015. Redesigned GPA energy statement to provide customers useful information using easy to understand graphics and energy management tips.	GPA paid out $560,000 in Energy Sense Rebates to customers for purchasing approved energy efficient appliances. GPA launched additional payment options for customers including Pay-By-Phone, Online payments, Mobile APP payments and ACH payments.
HIGH SYSTEM RELIABILITY	Completed the following: 1. Dededo Indoor substation. 2. Upgraded Geographic Information System.	CCU and PUC approved procuring up to 180MW of reliable, very efficient, flexible generation. GPA signed a Rent-To-Own agreement with Aggreko for 40MW to shore up GPA generation. Replaced Cabras 1 Power Transformer.	Dededo Combustion Turbine Units 1&2 returned to service, contributing 40 megawatts of standby generating capacity. Completed Cabras Unit 2 annual turbine and boiler overhaul maintenance work. Completed major refurbishment of Cabras (T300), Piti (T700), Tamuning (T51), and Macheche (T90) power transformers.
FINANCIALLY SOUND AND STABLE	80 days unrestricted cash. Debt service coverage of 2.62x. Credit Rating improving: Standard & Poor-BBB. Moody's– upgrade to Baa2. Fitch–BBB.	207 days unrestricted cash. Debt service coverage of 3.38x. GPA maintained its current ratings in spite of the Cabras 3&4 incident: S&P-BBB/Stable Moody's-Baa2/Stable Fitch-BBB-/Stable Working with Insurers to settle claim per policy limits.	71 days unrestricted cash. Debt service coverage of 2.65x. GPA maintained its current ratings: S&P-BBB/Stable Moody's-Baa2/Negative Fitch-BBB-/Stable
COMMITMENT TO WORKFORCE DEVELOPMENT	Quarterly employee and MagPro recognition awards. Service awards for employees. Training and continuing education to all employees.	Quarterly employee and annual MagPro recognition awards. Service awards for employees. Training and continuing education to all employees.	Fifteen (15) apprentices completed GPA's 4th Cycle Graduate Apprentice Program. Provided training and continuing education benefits to all employees.
OPTIMIZE THE USE OF TECHNOLOGY	Smart Grid Command Center section established to use smart grid tools to better manage over 50,000 smart meters and identify customer outages almost instantaneously.	Revamped Online Payment System - customers can change their contact information, view financial history for the past 12 months. iDashboards–analytics to monitor our achievements in providing superior customer service. Advanced Grid Analytics (AGA) - monitor and solve power quality and reliability issues.	Launched new Android and iOS Mobile Payment APP. Upgraded MYENERGYGUAM.COM. On-going and continuous review of all security processes and network systems to ensure customer data security.

OUR FINANCES

REVENUES (in $000)	2013	2014	2015	2016	2017	% Change from 2016
Residential	125,932	125,023	105,533	92,057	100,602	9%
Commercial	174,126	171,805	145,356	120,186	126,806	6%
Government	64,072	62,311	53,710	45,460	48,761	7%
Navy	84,899	75,323	61,586	49,193	54,905	12%
Other	17,881	9,317	14,691	8,900	47,794	437%
Total	466,910	443,779	380,876	315,796	378,868	20%

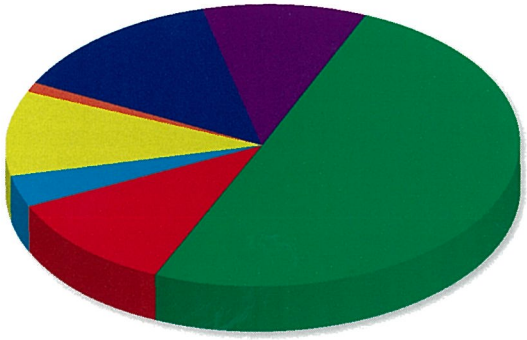

FY 2017

- Residential
- Commercial
- Government
- Navy
- Other

GPA's revenue increased by 20% from the prior year. The increase is due to the increase in peak demand of electricity and customer consumption, and to the increase in the global fuel price. Decline of sales in the prior year is due to conservation efforts of the customers, efficiencies in household appliances and also to the growing number of net metering customers. Increase in other income and extraordinary revenues was due to the Cabras 3&4 explosion insurance recovery.

EXPENSES (in 000)	2013	2014	2015	2016	2017	% Change from 2016
Production Fuel	295,473	271,175	204,136	146,340	166,426	14%
IPP and Other Production Costs	42,273	39,937	38,483	32,635	37,697	16%
Transmission and Distribution	13,368	12,950	11,170	10,817	11,750	9%
Administrative and General	31,589	28,394	21,908	31,686	32,484	3%
Customer Accounting	5,101	3,999	4,739	5,492	4,095	-25%
Depreciation and Amortization	31,156	36,989	41,765	44,240	44,292	0%
Interest and Other Expenses	43,069	43,756	43,484	54,261	33,770	-38%
Total	462,029	437,200	365,685	325,471	330,514	2%

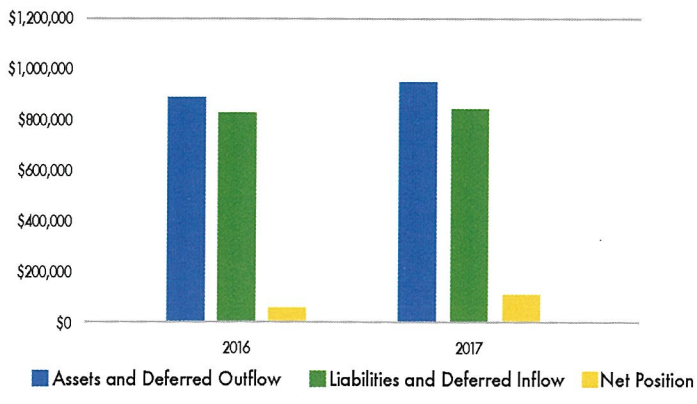

FY 2017

- Production Fuel
- IPP and Other Production Costs
- Transmission and Distribution
- Administrative and General
- Customer Accounting
- Depreciation and Amortization
- Interest and Other Expenses

GPA's expenses slightly increased from Fiscal Year 2016. The increase of Production fuel is due to the increase in the global fuel prices. The increase in the IPP and other production cost is due to the new capital lease agreement with Aggreko which started on January 2017.

NET POSITION (In $000)	2016	2017	% Change from 2016
Assets and Deferred Outflow	888,435	955,488	8%
Liabilities and Deferred Inflow	826,612	845,311	2%
Net Position	61,823	110,177	78%

Assets are the economic resource(s) which GPA controls. Deferred outflow is the consumption of the assets of the company to be reported in the future period. Liabilities and Deferred inflow are the acquisition of the assets of the company that should be recorded in the future period. Net position is the residual of the two elements.

All financial activities of GPA are in line with the Mission, Vision and Goals established by the Authority. GPA's financial statements for fiscal year 2017 received a clean opinion from the auditors of Deloitte & Touche. A comprehensive financial statement of GPA may be viewed online at www.guampowerauthority.com

OUR FUTURE CHALLENGES

GUAM POWER AUTHORITY
ATURIDÅT ILEKTRESEDÅT GUAHAN
P.O.BOX 2977 • HAGÅTÑA, GUAM U.S.A. 96932-2977

GPA continues to make considerable progress on its Clean Power Initiative.

Clean Power Means Cleaner Air
Non-compliance with USEPA's RICE MACT and EGU MACT affects over 200 MW of capacity. Our compliance plan transitions generation from residual fuel oil-burning generation to dual-fuel capabilities using clean fuels including ultralow sulfur diesel (ULSD) and natural gas while installing clean, low-cost utility-scale renewable energy. The combination of renewable energy, cleaner fuel, and more efficient, flexible generation dramatically improves air quality along the southwest to northwestern coast of Guam and keeps power affordable. Installing new flexible generation enables integration of more low-cost, utility-scale renewable energy allowing GPA to reduce and stabilize LEAC rates.

Clean Power Means Good Power Always and Power When You Want it
Clean power means reliable, resilient power that is safe for customers and their equipment. The island wide power system is monitored and controlled to eliminate voltage sags, swells, or surges and ensure system reliability. Faulty equipment and system issues are identified, fixed, or replaced before they cause customer outages or power quality problems. Customer outages are located and responded to before the customer calls. Ongoing activities include accelerated vegetation management and an Infrared Analysis Program, Advanced Grid Analytics Program, and Predictive T&D Maintenance Program.

Clean Power Means Affordable Power
Fuel diversification using ULSD, natural gas, and renewable energy sources reduces and stabiliz-es fuel costs (LEAC). Demand-side Management (DSM) programs help manage load growth reducing expansion of generation, transmission & distribution (T&D) systems and need for additional staff. DSM has paid out over $1.5 million energy sense rebates since December 2015. While expanding its rebate program, GPA is working with UOG, GDOE, the Navy, and other large customers to help them become more efficient. GPA champions electric vehicles (EVs). Industry forecasts indicate by the mid 20's, EVs will cost less than gas ones. Energy sales growth for EV charging will allow GPA to lower its base rate. GPA has been rightsizing its workforce; from 524 at the start of FY 2014 to 463 FTEs today. GPA will continue to right-size as the Cabras 1, 2, 3, & 4 units are retired and invest in productivity enhancing technologies such as smart grid. GPA has reduced overtime from $3.7M annually to $1.4M. GPA's bond refinancing reduces debt service by $500,000/year. GPA actively seeks ways to cut costs including leveraging information and intelligent business systems to modernize aging bulk power infrastructure and achieve operational excellence. GPA continues to improve its creditworthiness and maintain its investment grade status ensuring access to inexpensive capital. GPA's competitive advantage is its transmission and distribution system. GPA plans and executes least-cost plan for upgrading and replacing legacy equipment and improving infrastructure.

Clean Power Means Enhancing Customer Engagement
Customers expect higher levels of electric service quality and engagement. GPA is finding better ways to engage, inform, communicate, and satisfy customers. As customers now increasingly engage by using technology and social media, GPA is making every effort to exceed customer expectations.

JOHN M BENAVENTE, P.E.
General Manager

2017

Mobile workforce Management System (in progress)

Outage Management System (in progress)

2018

Achieve American Public Power Association designation as a Reliable Power Provider

Commission a 40MW/22MW battery Energy Storage System (BESS) at Talofofo and Agana (online in late 2018)

Execute Renewable Integration/Long Range Transmission Plan (2018 to 2023)

2019

Establish a complex Supervisory Control and Data Acquisition (SCADA) system and Automation Generation Control

2021

Addition of new 180MW base load power plant (late 2021)

Convert RFO Fuel Storage & Pipelines to Ultra Low Sulfur Diesel Fuel (ULSD)

Convert Piti 8 & 9 to Dual-Fuel Operation (2021-22)

2022

Integrate 160 MW Utility Scale Solar with Renewable Integration (RI-ESS) and Energy-Shifting ESS

Initiate LNG Infrastructure and Supply

Retire Cabras Units 1, 2, 3, & 4

2025

Establish 50% GPA Energy Production from Renewable Sources (2025 - 2030)

"GPA has aggressively diversified our energy sources that best fit our island through economically sound and best-practiced principles in the industry."

Governor Eddie Baza Calvo

Doc. No. 35GL-19-0045.

SUPPORTING 50 YEARS OF GROWTH & PROSPERITY

Buenas yan Hafa Adai! The Guam Power Authority commemorates its 50th year of existence as Guam's sole public-power electric utility working to provide safe, reliable, affordable, and environmentally responsible electricity to its ratepayers. Throughout its history, GPA supported the needs of our island's economy with conventional generation that were the most efficient and reliable for its time.

Today, GPA has aggressively diversified our energy sources that best fit our island through economically sound and best-practiced principles in the industry. Such achievements include public/private solar generation, battery storage partnerships in resolving infrequent outages, and reduced the need for more fossil fired generators during peak hours. GPA has also partnered with the U.S. Navy for more renewable energy projects that will ultimately benefit our island community.

We thank the thousands of GPA retirees, current employees, and their family members for their dedication and support throughout a half century of service to Guam and our people.

Si Yu'us Ma'ase'!

GPA's 50th Anniversary
Proclamation Signing
5/8/18

To GPA's Valued Customers:

May 8, 2018, marks 50 years of service by the Guam Power Authority (GPA) to the people of Guam—50 years of challenges, struggles, successes and service by the men and women of GPA who are mothers, fathers, sisters, brothers, parents and friends of the people they serve. It also marks 50 years of service provided to all the people of Guam: Chamorrros, Filipinos, Micronesians, Guamanians, military service members and our visitors.

I encourage the men and women of the Guam Power Authority to continue this rich history of service not just with their heads—their intelligence and knowledge; or with their hands—their skills and competence, but most importantly with their hearts, every moment of every day during good or bad weather.

May our island continue to be blessed with our 'Hafa Adai' spirit.

On behalf of my fellow CCU Commissioners, thank you.

Joseph "Joey' T. Duenas
Chairman
Consolidate Commission on Utilities

GUAM POWER AUTHORITY
ATURIDÅT ILEKTRESEDÅT GUAHAN
P. O. BOX 2977 • HAGÅTÑA, GUAM U.S.A. 96932-2977

Message from the General Manager

Buenas yan Hafa Adai,

Our annual report for Fiscal Year 2017 is the story of the completion of 49 years of meeting our island's energy needs. It is an exciting story and it belongs to all of us. As ratepayers, we are the true owners of the Guam Power Authority.

On your behalf, we serve our mission of providing safe, reliable, affordable and environmentally responsible electricity to all. We are truly committed to developing solutions that will be fair and equitable to all ratepayers, while allowing GPA to maintain a reliable energy grid to power our island's needs today and in the future.

We are proud of the progress and accomplishments made this year. Much of the work that has been done in recent years is realized today in the stabilization of the "bottom line' you see on your monthly energy statement. We have avoided or minimized rate increases by employing cost-cutting measures including reductions in manpower and overtime expenditures. In 2017, GPA employed 475 employees and reduced its overtime costs from $3.7 million down to $1.4 million.

GPA's greatest challenge continues to be holding down rates, subject to the rise and fall of fuel oil prices on the world market. Approximately 80 percent of the $25.5 million increase from FY 2016 to FY 2017 was due to the increases in fuel oil costs, which is beyond our control.

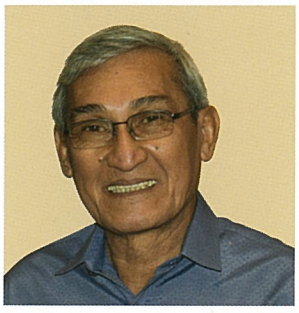

As you will see in this report, GPA made significant progress toward adding more renewable energy to the island wide power system and has laid the groundwork for a new base load power plant to serve the entire island, expected to come on-line in late 2022. The combination of renewables and the new base load power plant's dual fuel capabilities will help ensure that Guam does not again experience the financial impacts caused by $100 per barrel oil prices experienced in the past.

Our progress comes through the efforts of the governance of the Consolidated Commission on Utilities and the oversight of the Guam Public Utilities Commission, as well as the dedicated work of GPA's employees who are committed to delivering improvements for the benefit of all GPA ratepayers.

Let us always remain mindful that our efforts not only support a prosperous economy and improved quality of life for all, but also preserve the natural resources and a clean environment for Guam. We at GPA thank you for the honor of serving you and we look forward to a bright future.

Senseramente,

John M. Benavente, P.E.
General Manager

Doc. No. 35GL-19-0045.

OUR PEOPLE
OUR ISLAND
OUR POWER

GPA's Leap Forward

Fiscal Year 2017 was an important year for the future of our people, our island and our power.

For the past decade the Guam Power Authority has been focused on developing sources of clean, alternative energy, continuing to increase the reliability of our service, and minimizing rate increases. Much progress has been made in these areas.

In the past ten years we have successfully added both solar and wind sources to the Island Wide Power System. We have buried main lines underground and instituted other technology to increase the reliability of our service. And we have stabilized our fuel expenditures through the LEAC which in turn has stabilized our customers' monthly charges.

New Base Load Power Plant

In FY2017 the Consolidated Commission on Utilities (CCU) was authorized by the Guam Public Utilities Commission (PUC) to build a new base load power plant that will provide up to 180 megawatts.

The new power plant will be environmentally friendly. The plant will use several types of cleaner fuels allowing GPA to "comparison shop" for the most economical fuel. The facility will more easily integrate energy from Guam's alternative sources through a new Energy Storage System (ESS). It will be built on a site that is well above sea level out of reach of damaging storm surges or a tsunami event.

In addition, our land lease agreement with the Navy will allow GPA to add 40 megawatts of solar arrays on 164 acres.

Ready for the Next 50 Years

In 2018, GPA begins a year-long celebration of 50 years of service to the people of our island. FY2017 might be said to be the last year of groundwork for a new era. It has been a long, but exciting, journey that is far from over because on Guam, we use the power that we generate and deliver ourselves—our people make the power for our island!

Doc. No. 35GL-19-0045.

Integrated Resource Plan

The Power of Ideas In Our Changing World

In 2007 the Guam Power Authority launched an effort to study a ternative, renewable sources of energy for Guam. The goal of th plan—called the Integrated Resource Plan (IRP)—was to uncove new ideas and resources that could be used to meet the growin demand and the rising cost of power on Guam.

Almost immediately it became apparent that meeting Guam's en ergy needs would require an investment in our people, our islan and our power. Specifically, as a community, we would need to b mindful of the sustainability of the our island and to be able to mee the needs of our children and grandchildren.

Following careful reviews and public comments, the draft of the IR was submitted to the Guam PUC in 2008. Even as this documen was under review, the PUC granted permission for GPA to conduc studies in the use of two sources of renewable energy—solar an wind.

By the end of FY 2015 GPA's partner, NRG had completed construc tion and commissioning of Guam's first utility scale solar projec and by January 2016 a grant funded pilot wind turbine was als completed. Both projects continue to provide renewable energy t GPA customers. These two alternate sources of energy are makin a contribution to GPA's continuing commitment to finding energ solutions for our island.

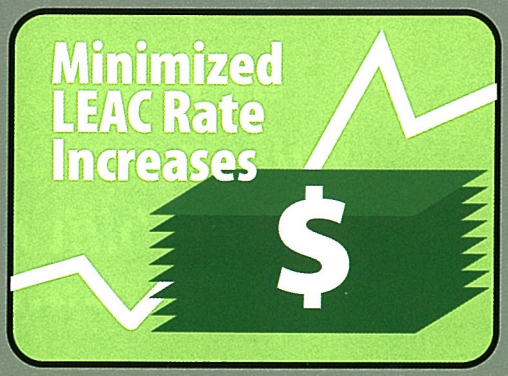

In FY 2013, GPA updated its IRP to address impending USEPA a and water regulations and identify strategies to meet Guam's en ergy needs, address fuel diversity and security and to continue t be environmental stewards. GPA achieved a major milestone in F 2017 by obtaining PUC approval to initiate the procurement for new power plant that allows GPA to accomplish this. The new pow er plant would allow dual fuel operations to optimize on future fue costs, bring GPA into compliance with air emissions regulations, an improve the GPA grid to allow for further integration of renewabl energy.

In the past ten years GPA has made substantial strides forward in th quest to not only meet our energy needs for today, but to prepar for the needs of generations to come.

Top Accomplishments

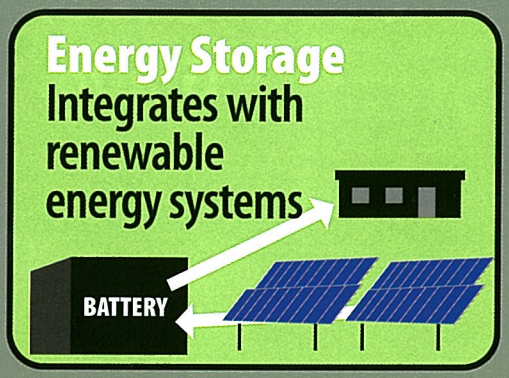

MINIMIZED LEAC RATE INCREASES

to customers despite dramatically higher oil prices on the world market.

INVESTED IN ESS,

a $35 million Energy Storage System to increase reliability of electrical service from solar power.

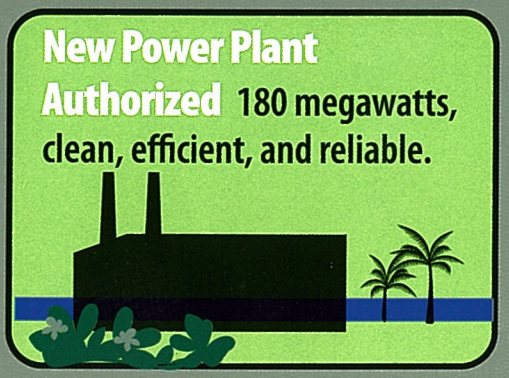

LAND LEASE AGREEMENT

reached with Navy to provide 164 acres for installation of utility-scale solar farms to generate an additional 40 megawatts.

NEW POWER PLANT AUTHORIZED

which will bring up to180 megawatts of clean, efficient, reliable power.

New Base Load Power Plant

The Future of Guam's Energy

The Guam Power Authority received authorization
a new and up to 180 megawatt base load power pla
in FY2017. Forecast to be operational by late 2020, t
new facility will use "combined cycle" units which w
be cleaner and consume less fuel. The new plant will
compliant with local and federal regulations and sta
dards.The Guam PUC approved the procurement
base load units on October 20, 2016, as requested
GPA and the CCU.

"The facility will improve the reliability of electricity for everyone on Guam."

GPA General Manager
John M. Benavente, P.E.

Prototype of new type of facility with notable absence of smoke stacks. The new facility burns clean ultra low sulfur diesel fuel and natural gas.

Proposed location in northern Guam is well above sea level. The base load generator will serve the entire island.

Doc. No. 35GL-19-0045.

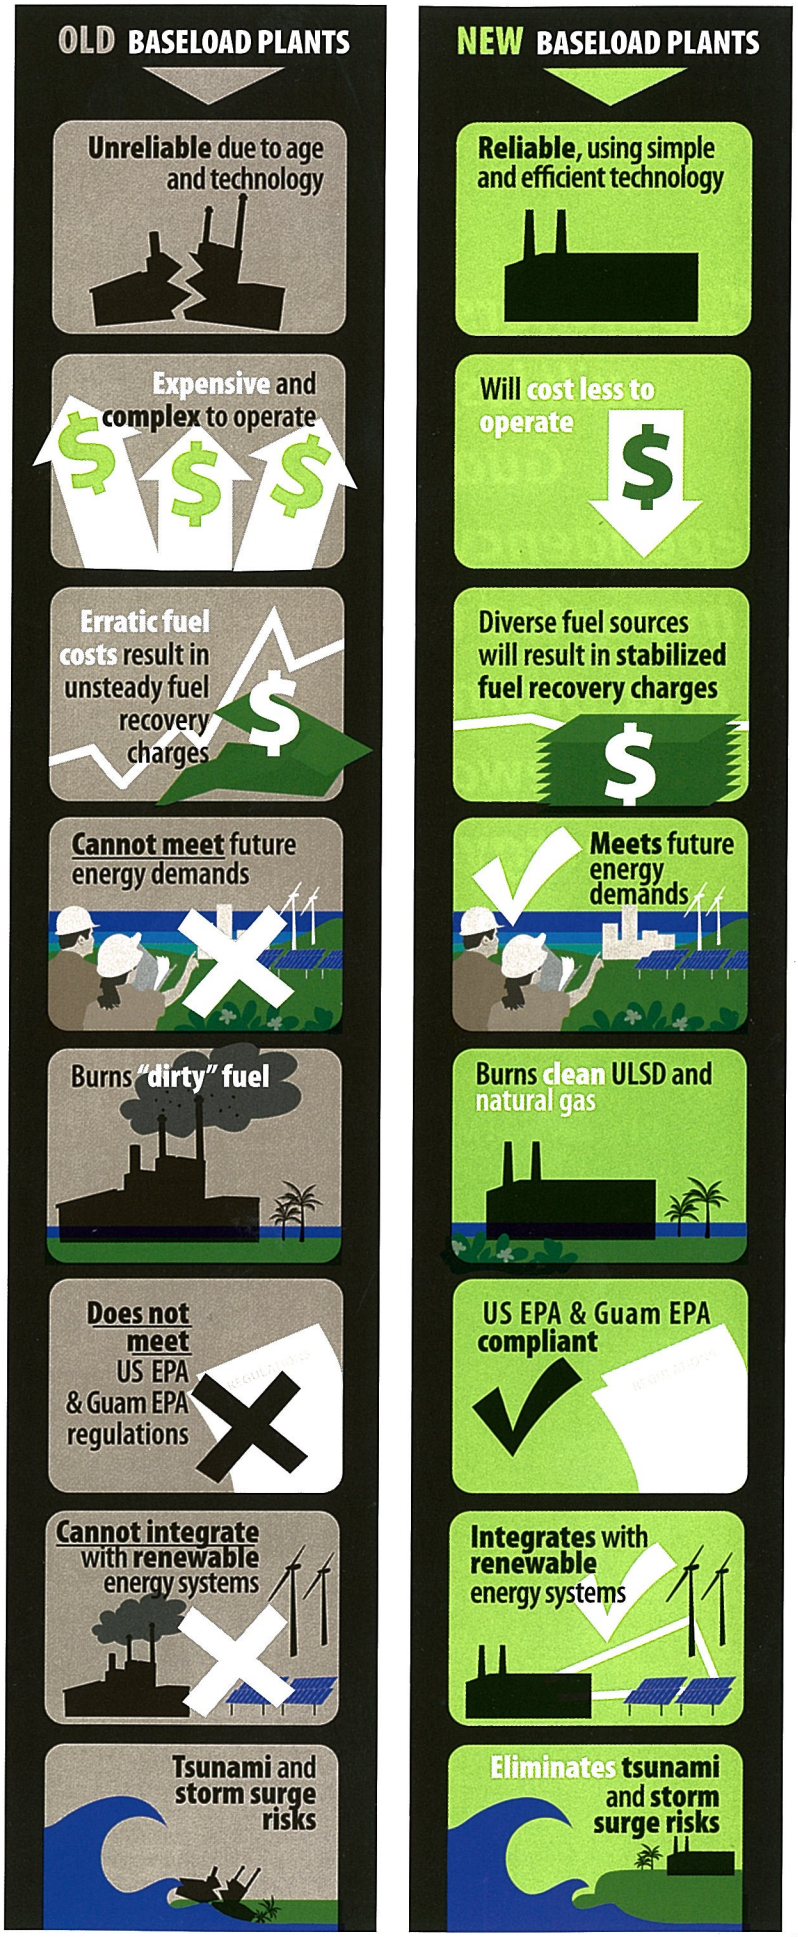

GPA General Manager John M. Benavente, P.E., said that the PUC's action "sets the stage for GPA to bring online up to 180 megawatts of combined cycle generation which will utilize a cleaner source of fuel." He added that the facility will improve the reliability of electricity for everyone on Guam.

"This action also allows GPA to pursue and integrate an additional 120 megawatts of renewable energy resources to meet renewable energy standards for Guam," he said in early FY2017. Another feature of the combined cycle units is that they require less fuel than generation facilities currently in use.

The site of the new power plant will be moved from the island's shoreline to avoid the current vulnerability to storm surges and tsunami threats. The site of the new power plant is adjacent to the Guam Waterworks Authority Sewage Treatment Plant. This site allows for treated water to augment cooling requirements for the base load power plant's operations.

A key advantage of developing new technology generation units is the ability to comply with the United States Environmental Protection Agency (US EPA) regulations that are already in place. Failure to comply with the new federal regulations on the timetable set could result in heavy fines.

Benavente noted that with additional work on existing units and the major overhaul of diesel units over the next two years, GPA will be positioned to provide dependable generation while adding more renewable energy sources to the power grid.

Doc. No. 35GL-19-0045.

Military Land Leased For More Solar Farms

A lease agreement for 164 acres of military land was signed with the Navy on May 16, 2017. GPA will contract for construction of utility-s solar farms generating an additional 40 megawatts of energy. This a tional renewable energy will decrease GPA's needs for purchasing importing fuel.

At the signing ceremony held at the Gloria B. Nelson Public Ser Building in Mangilao, GPA General Manager John M. Benavente, said that the partnership will lessen Guam's dependency on impo fuel and will promote new job opportunities in renewable energ Guam residents.

The lease agreement is part of the One-Guam collaborative effo provide affordable energy to residents of Guam. The 164 acres ar cated on five properties on Navy Base Guam and at the Navy's S Finegayan facility.

Rear Admiral Shoshana Chatfield, Commander, Joint Region Maria said that the collaborative effort will help provide "clean and afford energy to all Guam residents, help reduce our use of carbon fuel, contribute to our military readiness."

The land lease agreement was completed several years after an tial request on behalf of GPA to utilize the Navy properties. The cess included an environmental impact study that was completed presented for public comment in 2015. At that time, the GPA ger manager said he considered the completion of the study to be a "m milestone" in reaching goals for renewable energy production se GPA, as well as those established by the Secretary of the Navy and Department of Defense.

"...partnership will lessen Guam's dependency on imported fuel and promote new renewable energy job opportunities for residents."

GPA General Manager John M. Benavente, P.E.

Sitting (L-R): Commissioner Simon A. Sanchez, II, Consolidated Commission on Utilities (CCU); Honorable Telena C. Nelson; Commissioner Judith T. Guthertz, CCU; Lt. Governor Ray Tenorio; GPA General Manager John M. Benavente, P.E.; CCU Chairman Joseph "Joey" T. Duenas; Rear Adm. Shoshana Chatfield, Commander, Joint Region Marianas; Capt. Stephanie Jones, Commanding Officer, NAVFAC Marianas and Capt. Hans Sholley, Commanding Officer, Naval Base Guam. Standing (L-R): Cora Montellano, Asst. Chief Financial Officer; Joven Acosta, P.E., Manager of Engineering; Jennifer G. Sablan, P.E., Strategic Planning & Operations Research Division Manager; Melinda C. Mafnas, P.E., Assistant General Ma Operations; Tricee P. Limtiaco, Asst. GM of Administration; John J. Cruz, P.E GM of Engineering & Technical Services; John Kim, Chief Financial Officer; Stiner, NAVFAC Pacific Asset Management/Real Estate; Desiree Masterson, Marianas Energy Manager; Kirstin Punu, NAVFAC Pacific Asset Manageme Estate; Karianne Camacho, NAVFAC Marianas Asset Management/Real Es Masterson, NAVFAC Marianas Counsel and LT Bud Allen (previous) Flag Ai Region Marianas.

Doc. No. 35GL-19-0045.

GPA Contracts for ESS to Increase Reliability, Availability of Solar Power

GPA customers will see substantial improvement in the reliability of their electrical service upon completion of a $35 million Energy Storage System (ESS). Since ESS plays a key role in integrating renewable sources of energy into electrical power grids, the new storage capacity is expected to add a total of 40 megawatts to the Island Wide Power System. The contract was signed on May 15, 2017, with the South Korea based company LG CNS at the Gloria B. Nelson Public Service Building in Fadian, Mangilao. A world leader in energy storage system technology, LG CNS will be responsible for the construction, operation and maintenance of the facilities for 25 years.

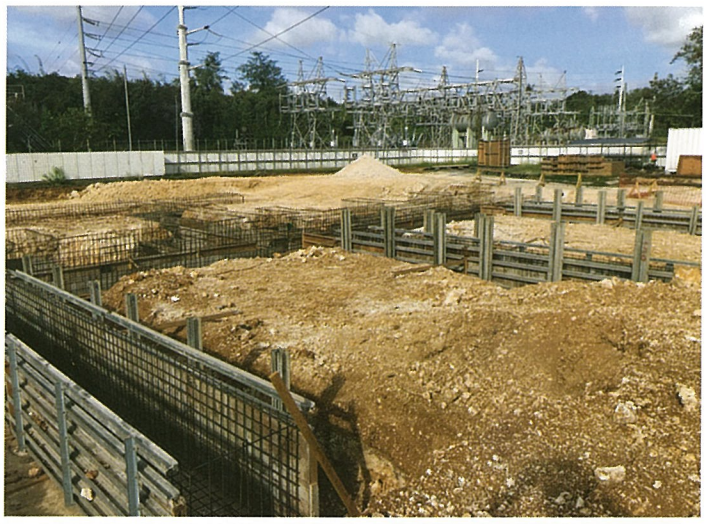

"This contract represents a $35 million investment in the ESS Phase I Project into the Island Wide Power System involving design, procurement, installation and interconnection of two utility-scale energy storage systems," General Manager John M. Benavente, P.E., said.

Two units will be built—a 24 megawatt ESS located at the Hagåtña Substation and a 16 megawatt ESS at the Talofofo Substation. Energy storage systems can be used to store energy generated from solar PV plants during the day for use at night.

According to the general manager, the facilities will alleviate intermittency of renewable power generated from the solar photo-voltaic farm in Dandan and from the "net metering" power generated by the solar roof top panels throughout the island. In addition, ESS will help alleviate system frequency issues and outages such as the short outages that customers typically experience whenever a generator "trips" in the system.

ESS will help alleviate system frequency issues and outages.

GPA General Manager John M. Benavente, P.E.

Two units will be built, a 24 megawatt ESS located at the Hagåtña Substation (shown above) and a 16 megawatt ESS at the Talofofo Substation.

At present, the short outages serve to avoid a widespread blackout, but the ESS would eliminate about 77 percent of these brief, but inconvenient, outages and will contribute to GPA's mission of delivering reliable service to customers.

The ESS facilities were expected to deliver energy directly to the existing GPA transmission system within 12 months of the May 2017 signing. The project is funded by the GPA 2014 bond issuance with the operation and maintenance from revenue funds.

Key participants in the signing representing LG CNS included: Gilbert Gilho Choi, LG CNS America, President; Ryan Sangdong Kim, Energy Business Director; and Myungjin Bae, ESS Business Leader.

Dededo Power Plant Rehabilitation Completed

The rehabilitation of two Combustion Turbi (CT) Plants that had not been operational several years was completed in July 2016. T return to service of Dededo CT Units 1 and brought a combined 40 megawatts of pow to the Island Wide Power System.

"This project was necessary and urgent to ea the generation shortfall caused by the lo of Cabras 3 and 4 by adding 40 megawa of capacity to the power grid," GPA Gene Manager John M. Benavente, P.E., said at t recommissioning ceremony in Octob 2017 at the GPA Dededo facility on Mari Corps Drive.

"Bringing these two units on line pr vides greater flexibility for our operatio group to conduct maintenance on oth generation assets," Benavente said.

He noted that the Dededo units c provide power directly to the islan power grid or directly to Andersen Force Base through an undergrou transmission line. This is especially critical after heavy tropical storm and typhoons.

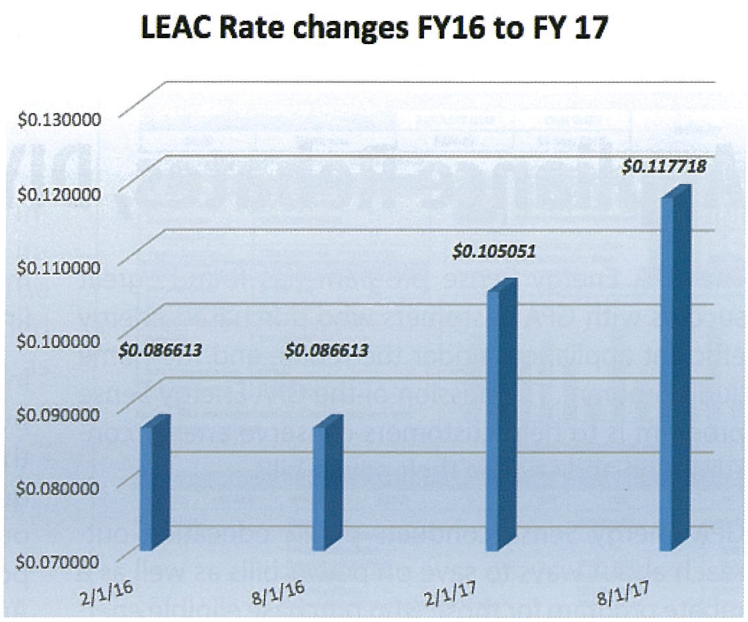

Rates Minimized Despite Rising Fuel Prices

GPA held the line on rate increases despite an upward trend in fuel prices during FY2017. Two increases in the fuel recovery surcharge were instituted. The increases were by just under 2¢ per kWh in February 2017 and by only 1.2¢ per kWh in August 2017.

Power rates had been decreasing since 2013 because of falling oil prices, but in 2016 the price of fuel oil on world markets rose. GPA was able to protect rate payers by managing the Levelized Energy Adjustment Clause (LEAC) seen on their monthly energy statements as the Fuel Recovery Charge.

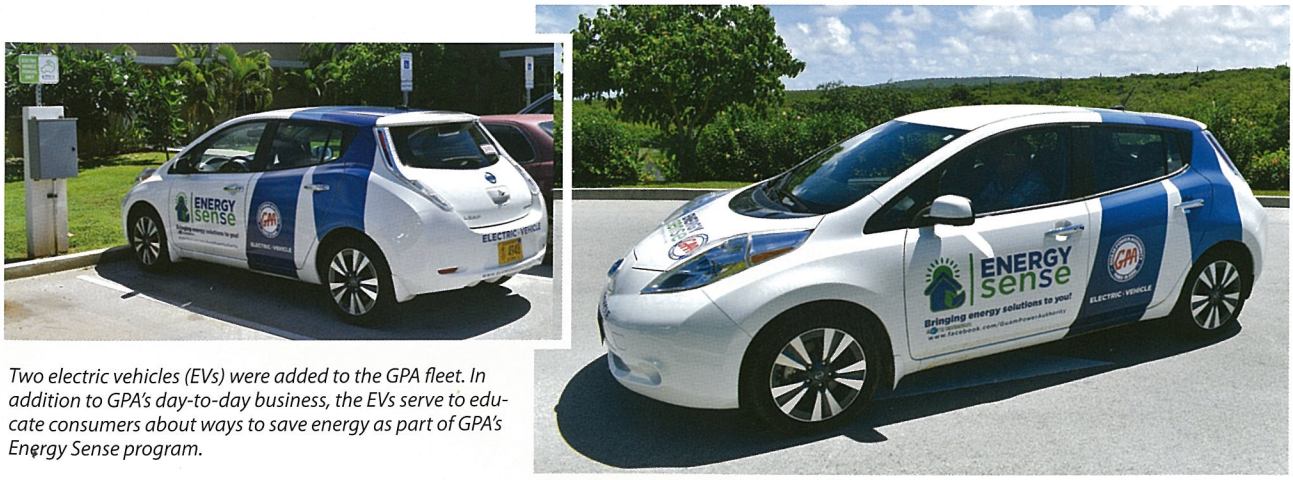

In addition, in FY2017, GPA was able to further offset costs resulting from a steep increase in oil prices by using the initial insurance proceeds from the downed Cabras 3 and 4 power plants, which were damaged by fire in August 2015.

EVs, Vans, Trucks

Two electric vehicles (EVs) were added to the GPA fleet in June 2017. The two Nissan Leaf vehicles are used to conduct the Authority's day-to-day business, as well as for environmental education demonstrations. The 2017 Nissan Leaf SL, 4-door electric sedans were purchased from Nissan Motors Corporation at a cost of $38,675 each. Level II chargers, costing $874 each, for the vehicles were installed at the Gloria B. Nelson Public Utilities Building. Future plans call for additional chargers to be located around the island.

Several more traditional utility vehicles were also added to the GPA fleet. Three additional bucket trucks, two dump trucks, four mid-size utility trucks, and two utility vans were ordered in FY2017. For the purpose of vegetation trimming, which is a part of GPA's commitment to tropical storm and typhoon preparedness, three "mulchers" and three boom rotary mowers were also ordered.

Two electric vehicles (EVs) were added to the GPA fleet. In addition to GPA's day-to-day business, the EVs serve to educate consumers about ways to save energy as part of GPA's Energy Sense program.

Appliance Rebates, DIY Energy Audits

The GPA Energy Sense program has found great success with GPA customers who purchased energy efficient appliances under the rebate and the home audit program. The mission of the GPA Energy Sense program is to help customers conserve energy consumption and save on their power bills.

GPA Energy Sense conducts public education outreach about ways to save on power bills as well as a rebate program for those who purchase eligible energy efficient appliances.

The rebate program shares up-to-date information about which air conditioners qualify for rebates of $100-$800 and about clothes washers and dryers that qualify for rebates of $200. An up-to-date list of Guam businesses selling qualified appliances and a list of the specific appliances to include manufacturer, model numbers, and amount of rebate is listed line at guampowerauthority.com.

In order to qualify for a rebate, consumers purchase qualified appliances and must three additional requirements after purcha qualified appliances: submit proof of purchas out a W-9 tax form, and show proof of proper posal of old appliances with the Guam Solid W Authority or a Guam EPA listed recycler.

The program also provides steps for conducti do-it-yourself audit to uncover ways energy m be wasted at home and provides simple wa creating a more energy efficient home. Custo can find ways to save significantly by implem ing simple energy conservation practices t duce their energy consumption.

DSM Program Expenses

Description	FY16	FY17	Total June 20
GPA Labor (Reg/OT)	$ 11,348.80	$ 22,256.00	$ 33,604.80
Other Contractual	$ 28,278.50	$ 85,550.05	$ 113,828.55
Paid Rebates - Split AC	$ 154,700.00	$ 557,275.00	$ 711,975.00
Paid Rebates - Central AC	$ 3,400.00	$ 8,200.00	$ 11,600.00
Paid Rebates - Washers/Dryers	$ 2,800.00	$ 7,425.00	$ 10,225.00

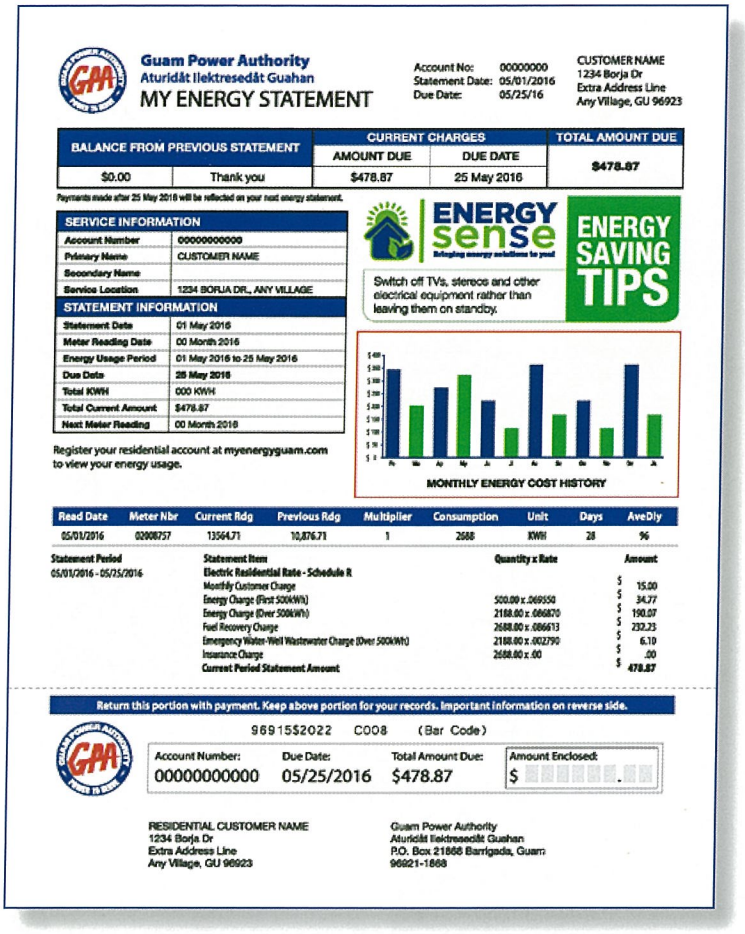

GPA customers who purchase eligible energy efficient appliances from an approved vendor list can qualify for rebates of $100-$800 on qualifying split air conditioners, central air conditioners and $200 for qualifying washers and dryers.

Doc. No. 35GL-19-0045.

Customer Service Adds Conveniences

New Monthly Statement Provides Better Tools To Monitor Energy Use

A new design of the monthly statement was introduced to provide GPA customers with more information to help manage their power usage. The monthly energy statements that were redesigned in FY2017 show current energy consumption as well as consumption over the past year.

Mastercard Accepted For Commercial Accounts

As of July 2017, GPA's commercial customers were able to pay their energy statements with Mastercard debit and credit cards. In the past, this service was not offered because of high transaction rates. GPA continues to accept debit and credit card payments from residential customers.

Saturday Hours Added At Upper Tumon

Customer Service hours were extended to include Saturdays as of April 2017. Saturday hours are 9 am to 1 pm at the GPWA Customer Service Satellite Office in Upper Tumon. Customers can make payments, inquire about their account, and start or stop service during these weekend hours.

Combining GPA and GWA Customer Services

A "One GPWA Customer Service" mandate from the CCU was initiated in June 2017. The initial phase included plans for an assessment of key customer features focused on payments, complaints and requests. In October 2017, GPA rolled out the first phase of the project.

Excellent Safety Practices

The Guam Power Authority earned the American Public Power Association's Safety Award of Excellence for safe operating practices for 2017.

"Safety is and always will be our industry's top priority," Kenneth Gutierrez, Safety Administrator, said. "This recognition is an achievement of the Guam Power Authority as a whole committed towards delivering safe, reliable and quality electrical services."

Gutierrez added that GPA employees "are proud of our safety record—proud that we do everything we can to send our people home to their families each and every night."

GPA earned a third place award in the category for utilities with 250,000 to 999,999 hours of annual worker exposure.

More than 250 utilities entered the annual APPA Safety Awards. The participation was among the highest number of entrants in the history of the program.

The incidence rate used to judge entries is defined by the Occupational Safety and Health Administration (OSHA).

Aguon, Safety Inspector II.

Engineering Internships

GPA's annual 12-week Summer Internship Program for university engineering majors offers an opportunity for college students to work with GPA engineering professionals and gain hands-on experience.

Interns are given the opportunity to apply their academic skills by working alongside professional engineers in the Divisions of Generations, Transmission & Distribution, Engineering and Planning & Regulatory (P&R).

Among the internship program participants in summer 2017 were Camille L. Facun and Chadler Q. Iriarte who served in the Planning & Regulatory Division under the supervision of Roger U. Pabunan, P&R Engineer Supervisor.

Doc. No. 35GL-19-0045.

GPA's Financial Outlook Stable

The Future

S&P recognizes GPA for improving its financial position, cost cutting initiatives, and operational performance.

Standard & Poor's (S&P) bond rating company issued an updated notice in January 2017 indicating that the Guam Power Authority' rating of BBB with a stable outlook has been affirmed.

"We (GPA) remain an investment grade utility. S&P continues to have a stable outlook for the Authority," GPA's Chief Financial Officer John J. E. Kim said. "S&P has recognized GPA's continued progress toward improving our financial position and cost-cutting initiatives, as well as GPA's operational performance."

Some of the reasons cited for affirming the positive rating were the solid track record of GPA's governance structure, continued improvements of system reliability, an improved financial profile and a good working relationship between GPA, the Consolidated Commission on Utilities (CCU) and the Public Utilities Commission (PUC). S&P also noted that the Government of Guam remains current on all Department of Education and Department of Public Works payments, and that overall cash flow and reserves have improved greatly since 2012.

"Improving system reliability, operational efficiency and fuel cost recovery continue to lead the Authority's drive to maintain investment grade ratings," the GPA CFO said. He emphasized that adding alternate energy resources and building generation facilities will help keep customers' power bills stable.

About GPA

Guam Power Authority is a public corporation and an automous instrumentality of the Government of Guam established in 1968. It is governed by the Consolidated Commission on Utilities (CCU), a five member board elected by the people of Guam.

GPA is subject to the regulation of the Guam Public Utilities Commission (PUC) and has adopted the Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission (FERC).

The Authority has total assets of $904 million and employs approximately 466 employees. The Authority has 429 megawatts (MW) of generation capacity, 663 miles of transmission and distribution lines and 29 substations.

In FY 2016, GPA's power purchase agreement to chase solar energy produced by NRG Solar Da LLC's 25.65 megawatt solar plant was fully in mented and a 275 kilowatt wind turbine pilot pr became operational in early 2016.

GPA continues to work towards its goal of 50 pe energy from cost-effective renewable source 2018, and bringing natural gas to Guam.

As of October 1, 2017, GPA had approximately 5 customers. They are categorized as residential, mercial, GovGuam and the U.S. Navy.

INDEPENDENT AUDITORS' REPORT

Commissioners
Consolidated Commission on Utilities:

Report on Financial Statements

We have audited the accompanying financial statements of Guam Power Authority (GPA), a component unit of the Government of Guam, which comprise the statements of net position as of September 30, 2017 and 2016, and the related statements of revenues, expenses and changes in net position and of cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Doc. No. 35GL-19-0045.

Deloitte.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respe the financial position of the Guam Power Authority as of September 30, 2017 and 2016, and changes in its net position and its cash flows for the years then ended in accordance v accounting principles generally accepted in the United States of America.

Emphasis of a Matter

As discussed in Note 1 to the financial statements, in 2017, GPA adopted Governmental Account Standards Board (GASB) Statement No. 73, *Accounting and Financial Reporting for Pensions Related Assets That Are Not Within the Scope of GASB Statement No. 68, and Amendments Certain Provisions of GASB Statements No. 67 and No. 68*. GPA has elected to restate its 2 financial statements to reflect the adoption of this standard. Our opinion is not modified v respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis on pages 1 through 10 as well as the Schedules Proportional Share of the Net Pension Liability on pages 54 through 56, the Schedule of Pens Contributions on page 57, and the Schedule of Funding Progress and Actuarial Accrued Liabilit Post Employment Benefits Other Than Pensions on page 58 be presented to supplement financial statements. Such information, although not a part of the financial statements, required by the Governmental Accounting Standards Board who considers it to be an essential p of financial reporting for placing the financial statements in an appropriate operational, econon or historical context. We have applied certain limited procedures to the required supplement information in accordance with auditing standards generally accepted in the United States America, which consisted of inquiries of management about the methods of preparing information and comparing the information for consistency with management's responses to inquiries, the financial statements, and other knowledge we obtained during our audit of financial statements. We do not express an opinion or provide any assurance on the informat because the limited procedures do not provide us with sufficient evidence to express an opinion provide any assurance.

Other Financial Information

Our audits were conducted for the purpose of forming an opinion on the financial statements a whole. The Schedules of Sales of Electricity, Operating and Maintenance Expenses and Salaries Wages on pages 59 through 62 are presented for purposes of additional analysis and are no required part of the financial statements.

The Schedules of Sales of Electricity, Operating and Maintenance Expenses and Salaries and Wa are the responsibility of management and were derived from and relate directly to the underly accounting and other records used to prepare the financial statements. Such information has b subjected to the auditing procedures applied in the audit of the financial statements and cert additional procedures, including comparing and reconciling such information directly to underlying accounting and other records used to prepare the financial statements or to the finan statements themselves, and other additional procedures in accordance with auditing standa generally accepted in the United States of America. In our opinion, the Schedules of Sales Electricity, Operating and Maintenance Expenses and Salaries and Wages are fairly stated, in material respects, in relation to the financial statements as a whole.

Deloitte.

Other Matters, Continued

Other Financial Information, Continued

The Schedule of Employees by Department on page 63 has not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated April 16, 2018 on our consideration of GPA's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of GPA's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering GPA's internal control over financial reporting and compliance.

Deloitte & Touche LLP

April 16, 2018

GUAM POWER AUTHORITY
(A COMPONENT UNIT OF THE GOVERNMENT OF GUAM)

FINANCIAL STATEMENTS, ADDITIONAL INFORMATION AND INDEPENDENT AUDITORS' REPORT

YEARS ENDED SEPTEMBER 30, 2017 AND 2016

(AS RESTATED)

GUAM POWER AUTHORITY
(A COMPONENT UNIT OF THE GOVERNMENT OF GUAM)

Management's Discussion and Analysis
Years Ended September 30, 2017 and 2016

This Management's Discussion and Analysis should be read in conjunction with the Guam Power Authority's September 30, 2017 audited financial statements and accompanying notes.

OVERVIEW

The Guam Power Authority (GPA or the Authority) was created in 1968 as a public corporation and autonomous instrumentality of the Government of Guam. Since that time, the Authority has maintained and expanded the island wide power system on Guam. The Authority has 420 megawatts (MW) of generation capacity, 663 miles of transmission and distribution lines, 29 substations, $955 million in assets, and $333 million in annual revenues. GPA currently serves approximately 51,000 customers with the U.S. Navy being the largest representing about 17% of revenues.

In 2002, the Consolidated Commission on Utilities (CCU) was established as the board of directors for both the Guam Power Authority and the Guam Waterworks Authority. The CCU is made up of five elected members and is vested with the same powers exercised by the previous board of directors. In addition, it retains contracting authority, establishes policies and controls the selection of the top management of the Authority. GPA also continued its existence as a public corporation.

The Authority is regulated by the Guam Public Utilities Commission (PUC) – a rate setting body made up of Commissioners appointed by the Governor of Guam. The PUC has established rules of operation that are similar to those of other jurisdictions within the United States. The PUC has broad regulatory authority over GPA including approval of any contracts that might have an impact on GPA's rates.

GPA'S STRATEGY

GPA is committed to providing outstanding energy solutions to our island community by focusing on capital discipline and operational excellence. Key components of GPA's strategy include:

- Achieve Superior Customer Service – GPA is continuously reaching for ways to better serve our customers through accountability, efficiency and reliability.

- Optimize Energy Production Cost – Focus on driving down cost and on improved productivity.

- Achieve Energy Diversification – GPA implemented the Integrated Resource Plan which includes renewable energy resources like solar and wind power generating 25 megawatts. An additional 120 megawatts of solar renewable generation have been contracted and approved by the CCU and the PUC.

- Become Financially Sound and Stable – Improve credit rating and debt service coverage.

Doc. No. 35GL-19-0045.

Promote Energy Innovation

GPA has been operating the smart grid for the past couple of years. The smart grid includes smart meters for all customers, substation automation, AMI technology and high broadb communication. The smart meters give customers greater control over their energy use and c by allowing them to monitor their energy consumption online and determine which activities contributing to the fluctuations in their power bills.

In conjunction with the smart grid, GPA has been using the Customer Care and Billing system Oracle since March 2015 which enables GPA to improve billing processes, customer service, credit management. In addition, it enables GPA to integrate online bill payment, mobile payn application for Android and Apple, and 24/7 pay-by-phone where account balance and payn posting are real time. Future integrations include prepaid power services, payment kiosks, an billing.

Customers can visit the MyEnergy online site which enables customers to see their current u and past history allowing them to take actions to mitigate their consumption before being cha in their bill. Information also helps customers decide on which energy efficient appliance purchase.

Lastly, GPA redesigned the energy statement to provide immediate information on energy usag historical consumption graphic, a "Tips" section on energy services, rebate program or remi notices and much more that will enable consumers to manage their energy usage.

Cabras 3 & 4 Fire

On August 31, 2015, GPA experienced a major failure with two of its base load units - Cabras 3 & 4 - when an explosion and fire occurred in the Cabras 4 engine. The power system lost MW of base load capacity. GPA promptly coordinated efforts with large customers to establish MW interruptible load program, run smaller peaking units, and installed 40MW of diesel generat

In addition, GPA aggressively implemented a rehabilitation plan for its Diesel engines and turb GPA activated its decommissioned Dededo Combustion Turbines 1 & 2 with 40MW becoming operational by April 2017.

Currently, GPA has about 420 MW of generation capacity without Cabras 3 & 4 and GPA also 25MW of renewable generation. In 2017, GPA's peak demand was 261MW which GPA was ab meet despite the loss of Cabras 3 & 4.

Prior to the outage, Cabras 3 & 4 represented 19% of GPA's total system capacity of 420MW, GPA's reserve margin was approximately 39% with its peak at 258MW. With its baseload o service, the reserve margin was thin. Low reserve margin caused GPA to shed some load du peak demand and unplanned repairs. Over the past years, GPA was able to bring various s generations online and increased capacity of some generators thus bringing its total capacity to 420MW of generation.

Due to GPA's focused service efforts, the average customer experienced less than 1% of the period hours of load shedding.

GPA has in place $300 million insurance policy with Lloyd's of London which provided $84 milli cash advances to mitigate the impact of the outages. The savings on the operational cost from running Cabras 3 and 4 were used to fund other generation projects.

Doc. No. 35GL-19-0045.

GPA filed its updated 2016 Integrated Resource Plan (IRP) with the CCU and PUC. The IRP included a plan to install 180MW of dual-fired combined-cycle generation units, retire Cabras 1 & 2 generators, expand the renewable energy portfolio, and install energy storage. The 180MW of new generation is planned to be commissioned on December 31, 2021. MEC 8 and 9 generators with 88MW of generation are to be converted to burn Ultra Low Sulfur Diesel (ULSD) within one year after the commission of the new combined-cycle generation. The PUC approved GPA's generation plan in October 2016 and GPA hired a consulting engineer to assist with the engineering and procurement.

Obtaining the combined-cycle generation has several benefits such as better fuel efficiency, lower capital cost compared to installing emission control system to its existing generation plants, promotion of fuel diversity and compliance with USEPA requirements.

United States Environmental Protection Agency

The United States Environmental Protection Agency (USEPA), under the Clean Air Act, established rules under National Emission Standard for Hazardous Air Pollutants (NESHAP) for Reciprocating Internal Combustion Engine Maximum Achievable Control Technology (RICE MACT). These rules require stack emissions control and continuous monitoring systems (CPMS) equipment to be installed on all GPA peaking and base load diesel generators including its Cabras 3 & 4 and MEC 8 & 9 slow speed units. The deadline for complying with the rules was May 3, 2013. GPA applied for and received an extension for complying with the rules with respect to its small diesel peaking units. The required stack emission equipment for the small peaking units was installed within the extension period.

With regards to the slow speed diesel units, GPA engaged the assistance of USEPA along with U.S. Department of Justice (USDOJ) to negotiate a consent decree that will allow sufficient time to implement recommendations in its Integrated Resource Plan (IRP) which included new and efficient generation, renewable energy, and diversification of its fuel sources.

In 2016, the CCU and the PUC approved the procurement of combined combustion turbine plants which will put GPA in compliance with USEPA requirements. GPA believes that ongoing negotiations with USEPA and USDOJ will defer potential fines after the RICE MACT deadlines for the slow speed units. If the consent decree is not reached, the maximum liability for GPA would not exceed $195 million as of February 19, 2018.

FINANCIAL HIGHLIGHTS

The table below highlights the financial comparison from fiscal year 2015 through 2017. In 2017, the Authority adopted GASB Statement No. 73, *Accounting and Financial Reporting for Pensions and Related Assets That Are Not Within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68*, which aligns the reporting requirements for pensions and pension plans not covered in GASB Statements 67 and 68 with the reporting requirements in Statement 68. The implementation of this statement had a material effect on the accompanying financial statements resulting in the restatement of the Authority's fiscal year 2016 and 2015 financial statements to reflect the reporting of pension liabilities, deferred inflows of resources and deferred outflows of resources for ad hoc COLAs and supplemental annuity payments and the recognition of pension expense in accordance with the provisions of GASB Statement No. 73. The 2016 and 2015 financial statements were also restated due to changes in actuarial assumptions and other inputs used to determine the pension liabilities, deferred inflows of resources and deferred outflows of resources for the qualified pension plan. See note 1 to the financial statements.

During fiscal year 2016, Guam Power Authority implemented GASB Statement No. 72, *Fair Measurement and Application*, which addresses accounting and financial reporting issues relat fair value measurements; GASB Statement No. 76, *The Hierarchy of Generally Accepted Accou Principles for State and Local Governments*, which eliminates two of the four categori authoritative GAAP that exist under the existing hierarchy prescribed by Statement No. 55 GASB Statement No. 79, *Certain External Investment Pools and Pool Participants*, which addr certain external investment pools and their participants the accounting and financial rep implications that result from changes in the regulatory provisions referenced by pre accounting and financial reporting standards.

Statements of Net Positions (in $ millions):

	2017	2016 (Restated)	2015 (Restated)
Assets			
Current assets	$ 349.9	$ 311.2	$ 244.4
Non-current investments	12.5	9.8	9.5
Other non-current assets	61.2	74.4	84.3
Utility plant	494.8	467.5	541.4
	918.4	862.9	879.6
Deferred outflows of resources	37.1	25.5	25.2
	$ 955.5	$ 888.4	$ 904.8
Liabilities			
Current liabilities	$ 116.3	$ 91.9	$ 79.6
Non-current liabilities	725.9	731.0	742.1
	842.2	822.9	821.7
Deferred inflows of resources	3.1	3.7	11.6
Net position			
Net investment in capital assets	(40.2)	(49.2)	16.9
Restricted	15.2	4.6	21.2
Unrestricted	135.2	106.4	33.4
	110.2	61.8	71.5
	$ 955.5	$ 888.4	$ 904.8

The increase in current assets in 2017 compared to 2016 is due to the global increase i prices. GPA used its working capital to fund the under recovery from LEAC and the fuel inve increased in 2017 compared to 2016. The accounts receivable increased in 2017 due t insurance claim from the insurance company for Cabras 3 & 4 fire. The increase in the cu assets in 2016 compared to 2015 is due to insurance recoveries and recovery receivables ac in 2016 (Note 3).

The increase in the current liabilities in 2017 compared to 2016 is attributable to increase i price. The increase in current liabilities in 2016 compared to 2015 is due to accrual of estim repair costs for Cabras 3 and 4 offset by the reduction in the principal bond payment in the cu maturities of the long-term debt.

Financial results summary:

- 2017 had income of $48.4 million compared to a loss of $11 million in 2016.
- Operating income for 2017 was $36.5 million, compared to $38 million in 2016.

The table below details certain items from GPA's Statements of Revenue, Expenses and Changes in Net Position from 2015 through 2017. The presentation below separately identifies activities that impact earnings and cost recovery activities that do not impact earnings.

	2017			2016 (Restated)			2015		
(in $ '000)	Earning Activities	Cost Recovery Activities	Total Utility	Earning Activities	Cost Recovery Activities	Total Utility	Earning Activities	Cost Recovery Activities	Total Utility
Sales of electricity	$ 164,849	$ 166,426	$ 331,275	$ 159,567	$ 146,340	$ 305,907	$ 162,049	$ 204,136	$ 366,185

Income (Loss)			**$ 48,353**			**$ (11,027)**			**$ 13,600**

Operating Revenues

GPA's operating revenues increase by $25 million or 8.2% in 2017 compared to 2016. The increase is due to increase in demand of electricity and increase in the global fuel price. Operating revenues decreased by $61.8 million, or 16.7%, in 2016 compared to 2015, primarily due to reduction in the LEAC rate over the course of the year. Reduction in LEAC was due to drop in global fuel prices.

Electric Sales Information

	2012	2013	2014	2015	2016	2017
Peak Demand (MW)	263	257	249	255	258	261
Total Electric Sales (MWh)	1,563,475	1,566,410	1,533,323	1,539,587	1,574,000	1,610,093
Sales Growth (%)	(3.4)	0.2	(0.2)	0.4	2.2	2.29
Total Customers	48,512	48,598	48,918	49,530	50,207	51,114

The energy sales increased by 2.29% in fiscal year 2017 compared to fiscal year 2016. increase in sales is due to increase in peak demand and customer consumption. The energy increased by 2.2% in fiscal year 2016 and 0.4% in fiscal year 2015. Annual electric sales 1,610 gWh, and 1,574 gWh for 2017 and 2016, respectively. Number of customers was 5 and 50,207 for 2017 and 2016, respectively.

The strong growth of 2.29% and 2.2% in 2017 and 2016, respectively, is a departure from years and the industry where the growth is stagnating or declining in customer demand. previously noted decline in the demand is attributable to conservation efforts, efficienci appliances, and a growing number of net metering customers.

Operating and Maintenance

GPA's operating and maintenance expenses increase in 2017 compared to 2016 due to the ad of 40 MW of power generation and repairs of existing combustion turbine. GPA's operatin maintenance expense increased slightly in 2016 compared to 2015 due to higher insurance In 2016, GPA achieved several cost saving measures like headcount reduction, overtime redu fleet fuel consumption cost reduction, greater energy station efficiencies, reduced transmissio distribution (T&D) line loss and station use, and lower merchant service cost from credit card to better rates. This savings carried its benefits through 2017.

GPA headcount increased slightly to 475 in 2017 from 466 in 2016. Overtime increased from million in 2016 to $1.4 million in 2017. Headcount reduced from 489 in 2015 to 466 in Increase in overtime in 2017 is attributed to emergency repairs and GPA's commitment to pr electric service to the community. Overtime decreased from $1.5 million in 2015 to $1.2 mill 2016.

Station use in 2017 of 65,895 mWh remained comparable to 2016 of 64,952 mWh. In compa from 2016 to 2015, station use of energy went down from 83,060 MWH in 2015 to 64,952 M 2016.

T&D line loss in 2017 of 83,949 mWh increased from 2016 of 80,852 mWh. T&D line loss sl increase from 79,267 mWh in 2015 to 80,852 mWh in 2016.

Depreciation and Amortization

GPA's depreciation and amortization expense for 2017 and 2016 remained the same.

GPA's depreciation and amortization expense increased by $2.5 million, or 5%, in 2016 com to 2015. The change is due to reassessment of the estimated useful lives of Cabras 1 and 2 on the expected retirement of these plants when the new power plant becomes operational.

Utility Cost Recovery Activities

Cost of Electricity

GPA's cost of electricity includes the costs of fuel used in its own generation facilities, th supplied to other facilities under power purchase agreement, cost of fuel handling and the c power purchased from third parties.

In line with the GPA IRP to increase its renewable resources, GPA procured a power purchase agreement for a utility scale solar farm of 25MW with NRG Energy, located in southern Guam and the system became available to the grid in August 2015. The project performed as expected and it is producing approximately 4,300 MWH of emission free energy each month.

In addition, GPA commissioned a 275kW wind project which became operational in March 2016. The $2 million wind project was funded by a USDOI Grant and provided available experience and data on the potential of wind renewable projects.

GPA completed its bid process for the acquisition of an additional 120 MW of utility scale solar farm power under the Phase II renewal project. This project includes batteries to mitigate sudden drops or increases in production due to electrical or atmospheric conditions such as rain. GPA anticipates the signing of the contract in early 2018 and operations to commence in 2020.

There is a Phase III renewable project where GPA will be utilizing a 30-year lease of Navy property for 35MW solar PV. The proposed property has been identified and the CCU and PUC have approved the lease.

Interest Income, Interest Expense, and Other Income and Expenses

Interest expense decreased in 2017 compared to 2016 due to GPA's lease with an independent power producer being near the end of its contract where the principal balance is lower. Interest expense decreased in 2016 compared to 2015 due to completion of payments for the 2010 Series Subordinate Revenue Bonds.

Operating Activities

GPA's cash flows from operating activities primarily consist of receipts from customers less payments of operating expenses.

GPA's cash flows from operating activities from 2015 to 2017 are as follows:

(in $ millions)	2017	2016	2015
Cash received from customers	$ 326.1	$ 305.2	$ 354.8
Cash payments to suppliers	(233.0)	(198.8)	(245.3)
Cash payments to employees for services	(35.5)	(35.3)	(40.1)
Cash payments to retiree benefits	(4.3)	(4.2)	(3.8)
Net cash provided by operating activities	**$ 53.3**	**$ 66.9**	**$ 65.6**

Capital Activities

GPA's capital activities primarily consist of new construction and replacement of facilities necessary to deliver safe and reliable power to its customers. The largest capital costs incurred during the year were Cabras #1 overhaul ($7.7M), 40MW diesel generation ($32M), Dededo CT 1&2 ($9.4M), Macheche CT ($2.1M), Yigo CT ($2.3M), transmission plant ($4.4M), distribution plant ($6.8M) and general plant ($5.3M).

The largest capital costs incurred in 2016 were the Cabras #2 turbine overhaul ($4.4M) extension and distribution plant ($5.8M), Solar Dandan Interconnection ($1.8M), Yigo and Ma CT overhaul ($2.5M), Street lights ($1.1M), and general plant ($2.5M). Cash used in c activities includes proceeds from bonds and from revenue funds.

Please refer to Note 14 to the financial statements for details of GPA's capital activities.

Investing Activities

GPA's cash flows from investing activities from 2015 to 2017 are as follows (in millions):

	2017	2016	2015
Net cash provided by (used in) investing activities	$ 17.4	$ (37.8)	$ (8.9)

Borrowing Activities

No new borrowing was done in 2015, 2016, and 2017. Please refer to Note 7 to the fina statements for details of GPA's borrowing activities.

GPA's cash flows from capital and non-capital financing activities from 2015 to 2017 are as fo (in millions):

	2017	2016	2015
Net cash provided by non-capital financing activities	$ 34.0	$ 52.7	$ 2.9
Net cash used in capital and related financing activities	$ (94.5)	$ (83.4)	$ (96.4)

Credit Ratings

GPA's credit rating relates to the Authority's cost of funds and liquidity. In particular, GPA's a to access and engage in certain activities on a cost-effective basis is primarily dependent maintaining a strong credit rating.

GPA's long-term senior debt ratings are as follows:

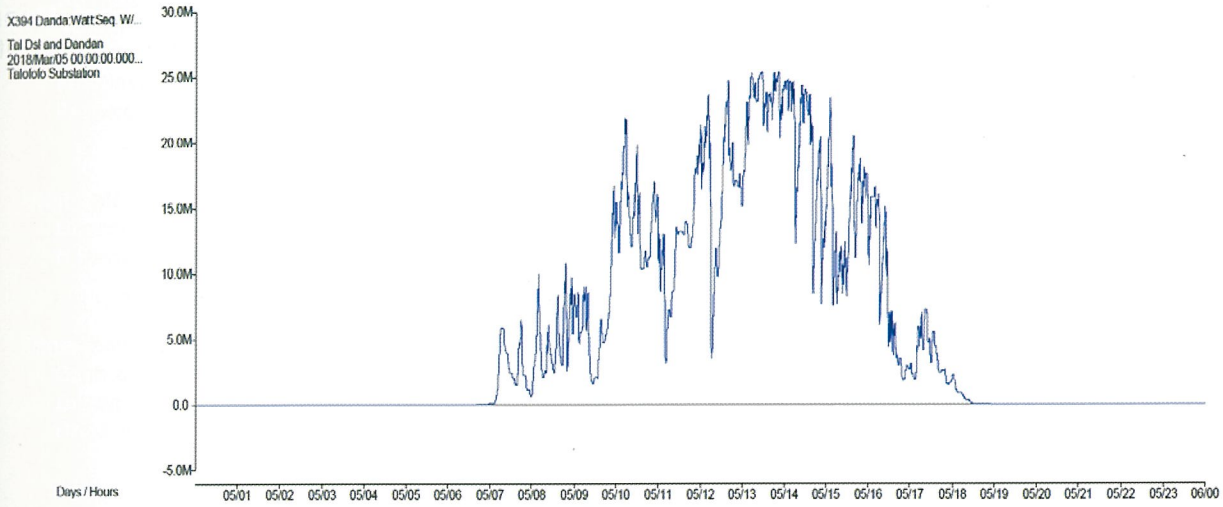

Long-Term Senior Debt	Rating	Long-Term Outlook
Standard & Poor's	BBB	Stable
Moody's Rating	Baa2	Negative
Fitch Rating	BBB-	Positive

Future Capital Activities

GPA is committed to renewable energy and the reduction of greenhouse gas emissions. invested in an industry scale solar farm of 25MW which became operational in 2015. GPA w adding 120MW of solar PV as part of the phase II renewable project and anticipates the syste be online by 2020. The phase III project is underway and is expected to add 35MW of renew energy with energy storage systems (ESS); shifting 100% of the energy to evening load.

The investment in solar farm and increase in net metering customers (NEM) has led to a grid that is becoming physically and operationally very different from historical patterns. The energy received from the solar farm in Dandan and net metering customers are "must take" contracts, meaning their energy goes into the grid whenever they can generate. The Power System Control Center must now monitor and respond to dramatic changes in system frequencies during certain times of the day. These fast changes are known as ramping events. Historically, the need for fast ramping was in response to load changes, but now is also due to generation output from non-GPA sources.

GPA is required to absorb all the power fluctuations emitted by the solar farm and NEM. On any given day, the solar farm can fluctuate as much as 15MW in an hour. Below is a sample reading for a day on March 5, 2018.

To mitigate the sudden drop in power generation by solar PV, GPA procured energy storage solution (ESS) to cut the shortfall and inject power to the system to prevent an outage. The ESS system is being installed and should be fully operation around August of 2018.

In 2016, the CCU and the PUC approved to proceed with the procurement of a 180MW dual-fired combined cycle combustion turbine. The project is planned to be completed by December 2021.

Future Borrowing

Despite the advancement of renewable energy generation and storage, traditional power generation is still required. As noted earlier, GPA filed an integrated resource plan (IRP) with the CCU and the PUC for the construction of combined cycle combustion turbine plants and approval was provided by the CCU and the PUC to authorize GPA to proceed with the procurement of up to 180MW. The plan for the procurement model is an independent power purchase agreement (IPP) where the IPP finances the construction of the plant. However, GPA is not ruling out the review to determine if financing by GPA is more economical.

In December 2017, Guam Power Authority refunded its 2010 Series bonds through the issuance of the 2017 Series bonds. The advanced refunding will reduce GPA's debt service payments by $11.5 million over the course of the next twenty-two years.

Contacting GPA's Financial Management

The Management Discussion and Analysis report is intended to provide information conce known facts and conditions affecting GPA's operations. This financial report is designed to pr a general overview of GPA's finances and to demonstrate GPA's accountability for the fu receives and expends.

Management's Discussion and Analysis for the years ended September 30, 2016 and 2015 forth in GPA's report on the audit of financial statements which is dated April 6, 2017. Discussion and Analysis explains in more detail major factors impacting the 2016 and financial statements. A copy of that report can be obtained by contacting the CFO office at 648-3066 or from GPA's website at the addresses noted below.

For additional information about this report, please contact Mr. John J.E. Kim, Chief Fin Officer, Guam Power Authority, P.O. Box 2977, Hagåtña, Guam 96932-2977 or visit the webs www.guampowerauthority.com.

(1) Organization and Summary of Significant Accounting Policies

Organization

Guam Power Authority (GPA) is a component unit of the Government of Guam (GovGu GPA provides electrical services on Guam to residential, commercial and GovGuam custo and to the United States (U.S.) Navy under a Utility Services Contract (USC). G governed by the Consolidated Commission on Utilities (CCU), an elected five-member b GPA is subject to the regulations of the Public Utilities Commission of Guam (PUC) an adopted the Uniform System of Accounts prescribed by the Federal Energy Regu Commission. Because of the rate-making process, certain differences arise in the applic of accounting principles generally accepted in the United States of America between regu and non-regulated businesses. Such differences mainly concern the time at which va items enter into the determination of net earnings in order to follow the principle of mat costs and revenues.

Basis of Accounting

The accounting policies of GPA conform to accounting principles generally accepted i United States of America, as applicable to governmental entities, specifically propri funds. GPA utilizes the flow of economic resources measurement focus. The Governm Accounting Standards Board (GASB) is the accepted standard-setting body for establi governmental accounting and financial reporting principles.

Accounting Estimates

The preparation of financial statements in conformity with accounting principles gen accepted in the United States of America requires management to make estimates assumptions that affect the reported amounts of assets and liabilities and disclosu contingent assets and liabilities at the date of the financial statements and the rep amounts of revenues and expenses during the reporting period. Actual results could from those estimates.

Taxes

As an instrumentality of GovGuam, GPA and all property acquired by or for GPA, ar revenues and income therefrom are exempt from taxation by GovGuam or by any po subdivision or public corporation thereof and from all taxes imposed under the author the Guam Legislature, or with respect to which the Guam Legislature is authorized to exemption.

Cash, Cash Equivalents and Investments

Cash and cash equivalents classified as current assets include cash on hand, cash in b money market accounts, certificates of deposit, and U.S. treasury bills with original matu of three months or less in the interest and principal funds for debt repayment, the indenture funds, the bond reserve fund, the energy sense fund and the self-insurance fu

Cash and cash equivalents restricted for the acquisition or construction of capital asset classified as noncurrent assets.

Doc. No. 35GL-19-0045.

(1) Organization and Summary of Significant Accounting Policies, Continued

Cash, Cash Equivalents and Investments, Continued

Investments in short-term, highly liquid debt instruments, including commercial paper, banker's acceptances, and U.S. Treasury and agency obligations are recorded at amortized cost.

All other investments are recorded at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability (i.e., the exit price) in an orderly transaction between market participants at the date as of which the fair value of an asset or liability is determined.

The deposit and investment policies of GPA are governed by 5 GCA 21, *Investments and Deposits,* in conjunction with applicable bond indentures. Authorized investments include obligations issued or guaranteed by the U.S. government or agencies of the U.S. government; bonds, notes or other indebtedness rated in the highest rating by Moody's Investors Service (Moody's) or Standard & Poor's Corporation (S&P); obligations issued by the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation with remaining maturities of not more than three years; any bonds or other obligations of any state of the U.S. or any agency, instrumentality or local government unit of such state which are rated in the highest rating category of either Moody's or S&P; demand and time deposits in or certificates of deposit or bankers acceptances with U.S. domestic banks which have a rating of their short term certificates of deposit of A-1 or better by S&P and P-1 by Moody's and mature no more than 360 days after purchase; commercial paper which has a rating in the highest classification by S&P and Moody's; and money market funds rated AAAm or better by S&P.

Allowance for Doubtful Receivables

The allowance for doubtful receivables is stated at an amount which management believes will be adequate to absorb possible losses on accounts receivable that may become uncollectible based on evaluations of the collectability of these accounts and prior collection experience. The allowance is established through a provision for bad debts charged to expense. Uncollectible accounts are written-off against the allowance or are charged to expense in the period GPA deems the accounts to be uncollectible but with prior approval of the CCU.

Inventory Valuation

Materials and supplies inventories and fuel inventories are stated at the lower of cost (using the weighted average and the first-in, first-out method, respectively), or market.

Allowance for inventory obsolescence is provided for inventory items with no movement for a period of five years and over and for parts and supplies for equipment no longer in use. Allowance for inventory obsolescence was $1,528,226 and $1,485,450 as of September 30, 2017 and 2016, respectively.

(1) Organization and Summary of Significant Accounting Policies, Continued

Utility Plant

Utility plant purchased or constructed is stated at cost. Cost includes an allowance on c projects for funds used during construction of specific power generation plants based o net cost of borrowed funds used for construction purposes. Donated utility is recorded a market value at the date of donation or at the donating entity's basis in the asset if do by GovGuam or a GovGuam agency. Current policy is to capitalize utility plant with a c $1,000 or more.

Depreciation

Depreciation is computed under the straight-line method over the estimated useful liv the respective assets.

Compensated Absences

Vesting annual leave is accrued and reported as an expense and a liability in the p earned. No liability is accrued for non-vesting sick leave benefits. Annual leave expect be paid out within the next fiscal year is accrued and is included in current liabilities. maximum accumulation of annual leave convertible to pay upon termination of employm limited to 320 hours. Pursuant to Public Law 27-106, employees who have accumu annual leave in excess of three hundred twenty (320) hours as of February 28, 2003, carry over their excess and shall use the excess amount of leave prior to retireme termination from service. Any unused leave over 320 hours shall be lost upon retirement

Public Law 26-86 allows members of the Defined Contribution Retirement System (DCR receive a lump sum payment of one-half of their accumulated sick leave upon retireme liability is accrued for estimated sick leave to be paid out to DCRS members upon retirem

Pensions

Pensions are required to be recognized and disclosed using the accrual basis of accour GPA recognizes a net pension liability for the defined benefit pension plan in whi participates, which represents GPA's proportional share of excess total pension liability the pension plan assets – actuarially calculated – of a single employer defined benefit measured one year prior to fiscal year-end and rolled forward. The total pension liability includes GPA's proportionate share of the liability for ad hoc cost-of-living adjustm (COLA) and supplemental annuity payments that are anticipated to be made to de benefit plan members and for anticipated future COLA to DCRS members. Changes in th pension liability are recorded as pension expense, or as deferred inflows of resource deferred outflows of resources depending on the nature of the change, in the period incu Those changes in net pension liability that are recorded as deferred inflows of resourc deferred outflows of resources that arise from changes in actuarial assumptions or inputs and differences between expected or actual experience are amortized over weighted average remaining service life of all participants in the qualified pension plan recorded as a component of pension expense beginning with the period in which they incurred. Projected earnings on qualified pension plan investments are recognized component of pension expense. Differences between projected and actual invest earnings are reported as deferred inflows of resources or deferred outflows of resources are amortized as a component of pension expense on a closed basis over a five-year p beginning with the period in which the difference occurred.

Doc. No. 35GL-19-0045.

(1) Organization and Summary of Significant Accounting Policies, Continued

Forward Delivery Contract Costs and Revenues

The forward delivery contract costs and revenues arose as a result of the Bond Reserve Fund Forward Delivery Agreements entered into in September 2000. The unamortized forward delivery contract costs represent termination fees and closing costs while the unearned forward delivery contract revenues represent the gross proceeds. The costs and revenues are amortized on a straight line basis until 2034.

Unamortized Debt Issuance Costs

Unamortized debt issuance costs mainly include insurance costs related to the issuance of the Series 2010, 2012 and 2014 bonds. These costs are being amortized using the effective interest method over the life of the applicable debt.

Net Position

Net position represents the residual interest in GPA's assets and deferred outflows of resources after liabilities and deferred inflows of resources are deducted and consist of four sections:

Net investment in capital assets - include capital assets, restricted and unrestricted, net of accumulated depreciation, reduced by outstanding debt net of debt service reserve.

Restricted expendable - net position whose use is subject to externally imposed stipulations that can be fulfilled by actions of GPA pursuant to those stipulations or that expire with the passage of time.

Restricted nonexpendable - net position subject to externally imposed stipulations that require GPA to maintain them permanently.

Unrestricted - net position that is not subject to externally imposed stipulations. Unrestricted net position may be designated for specific purposes by management or the CCU or may otherwise be limited by contractual agreements with outside parties.

All of GPA's restricted net position is expendable.

Sales of Electricity

Sales of electricity are recorded as billed to customers on a monthly cycle billing basis. At the end of each month, unbilled revenues are accrued for each cycle based on the most recent cycle billing.

Operating and Non-Operating Revenue and Expenses

Operating revenues and expenses generally result directly from the operation and maintenance of systems to provide electrical services to the island of Guam. Non-operating revenues and expenses result from capital and financing activities, costs and related recoveries from natural disasters, and certain other non-recurring income and costs.

(1) Organization and Summary of Significant Accounting Policies, Continued

Deferred Outflows of Resources

Deferred outflows of resources represent consumption of net position that applies to a fu
period and will not be recognized as an outflow of resources (expense) until that future ti

Deferred Inflows of Resources

Deferred inflows of resources represent an acquisition of net position that applies to a fu
period and therefore will not be recognized as an inflow of resources (revenue) until
future time.

Levelized Energy Adjustment Clause

Fuel oil costs increase or decrease billings to customers based on increases or decreas
the price of fuel oil purchased by GPA. Under or over recoveries of fuel oil costs includin
fair value of outstanding commodity swap agreements (if any) are recorded as unrecov
fuel cost or unearned fuel revenue, respectively, in the accompanying statements of
position, and are recovered or deducted in future billings to customers based on the Leve
Energy Adjustment Clause (LEAC) approved by the PUC in January of 1996. The LEAC re
in the conversion of the monthly fuel charge to a levelized fuel charge, which is reviewed
adjusted by the PUC on a bi-annual basis. GPA is only permitted to recover its actual fue
related costs.

GPA also bills customers fuel surcharges to recover the cost difference between fuel inver
on hand against a base year.

Derivative Instruments

GPA is exposed to market price fluctuations on its purchases of fuel oil. GPA uses deriva
such as commodity swaps to protect itself from increases in market prices. GPA rec
commodity swap agreements associated with its fuel oil hedging activities at fair value
gains and losses recognized in operations in the statement of revenues, expenses
changes in net position. The fair value of outstanding commodity swaps at year-en
included as a component of the LEAC and is recorded as part of unrecovered fuel cos
unearned fuel revenue in the accompanying statements of net position. GPA did not
outstanding commodity swap agreements at September 30, 2017 and 2016.

GPA's power purchase agreements are considered "normal purchases and normal sales"
accordingly, the operations and maintenance portions of GPA's energy conversion agreem
are not recognized in the statements of net position. Operations and maintenance c
associated with the power purchase agreements are expensed as incurred with
independent power producers.

Allowance for Funds Used During Construction

The allowance for funds used during construction (AFUDC) is provided only for constru
projects of more than $50,000, which require a minimum of 90 days to complete. AFUD
computed using the interest expense on directly assignable borrowings to finance the pro
less interest income on the related unused borrowings which have been invested. AFUD
provided only during the period in which such projects are undergoing activities to pre
them for their intended use and is capitalized as part of the cost of the applicable proj
AFUDC of $3,675,581 and $4,137,421 was recognized during the years ended Septembe
2017 and 2016, respectively.

Doc. No. 35GL-19-0045.

(1) Organization and Summary of Significant Accounting Policies, Continued

New Accounting Standards

During the year ended September 30, 2017, GPA implemented the following pronouncements:

- GASB Statement No. 73, *Accounting and Financial Reporting for Pensions and Related Assets That Are Not Within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68*, which aligns the reporting requirements for pensions and pension plans not covered in GASB Statements 67 and 68 with the reporting requirements in Statement 68. The implementation of this statement had a material effect on the accompanying financial statements resulting in the restatement of GPA's fiscal year 2016 financial statements to reflect the reporting of pension liabilities, deferred inflows of resources and deferred outflows of resources for ad hoc COLAs and supplemental annuity payments and the recognition of pension expense in accordance with the provisions of GASB Statement No. 73. The 2016 financial statements were also restated, as follows, due to changes in actuarial assumptions resulting from the implementation of GASB 73 and other inputs used to determine the pension liabilities, deferred inflows of resources and deferred outflows of resources for the qualified pension plan.

	As Previously Reported	Adjustment	As Restated
As of October 1, 2015:			
Net position	$ 84,105,278	$ (12,609,048)	$ 71,496,230
For the year ended September 30, 2016:			
Change in net position	$ (7,044,949)	$ (2,628,451)	$ (9,673,400)
As of September 30, 2016:			
Deferred outflows of resources from pension	$ 8,168,718	$ 2,672,974	$ 10,841,692
Net pension liability	$ (71,049,220)	$ (17,850,399)	$ (88,899,619)
Deferred inflows of resources from pension	$ (732,788)	$ (60,074)	$ (792,862)
Net position	$ 77,060,329	$ (15,237,499)	$ 61,822,830

- GASB Statement No. 74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, which replaces Statements No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans, as amended*, and No. 57, *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans*, and addresses financial reporting requirements for governments whose employees are provided with postemployment benefits other than pensions (other postemployment benefits or OPEB).

- GASB Statement No. 77, *Tax Abatement Disclosures*, which requires governments that enter into tax abatement agreements to disclose certain information about the agreements.

- GASB Statement No. 78, *Pensions Provided through Certain Multiple-Employer Defined Benefit Pension Plans*, which addresses a practice issue regarding the scope and applicability of Statement No. 68, *Accounting and Financial Reporting for Pensions*.

(1) Organization and Summary of Significant Accounting Policies, Continued

New Accounting Standards, Continued

- GASB Statement No. 80, *Blending Requirements for Certain Component Units - amendment of GASB Statement No. 14*, which improves financial reporting by clarif the financial statement presentation requirements for certain component units.

- GASB Statement No. 82, *Pension Issues - an amendment of GASB Statements No. 67, 68, and No. 73*, which addresses issues regarding (1) the presentation of payroll-rel measures in required supplementary information, (2) the selection of assumptions and treatment of deviations from the guidance in an Actuarial Standard of Practice for finar reporting purposes, and (3) the classification of payments made by employers to sa employee (plan member) contribution requirements.

Except for GASB Statement No. 73, the implementation of these statements did not ha material effect on GPA's financial statements.

In June 2015, GASB issued Statement No. 75, *Accounting and Financial Reporting Postemployment Benefits Other Than Pensions*, which replaces the requirements of Staten No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits O Than Pensions*, as amended, and No. 57, *OPEB Measurements by Agent Employers and A Multiple-Employer Plans*, and provides guidance on reporting by governments that pro OPEB to their employees and for governments that finance OPEB for employees of o governments. The provisions in Statement No. 75 are effective for fiscal years begin after June 15, 2017. Based on an actuarial valuation dated October 1, 2015, the net O obligation that GPA will record upon implementation of GASB Statement No. 75 is anticip to be $59,348,450 as of September 30, 2017.

In March 2016, GASB issued Statement No. 81, *Irrevocable Split-Interest Agreements,* w improves accounting and financial reporting for irrevocable split-interest agreements providing recognition and measurement guidance for situations in which a government beneficiary of the agreement. The provisions in Statement No. 81 are effective for f years beginning after December 15, 2016. Management does not believe that implementation of this statement will have a material effect on the financial statements.

In November 2016, GASB issued Statement No. 83, *Certain Asset Retirement Obligati* which addresses accounting and financial reporting for certain asset retirement obligat (AROs) associated with the retirement of a tangible capital asset. The provision Statement No. 83 are effective for fiscal years beginning after June 15, 2018. Manager does not believe that the implementation of this statement will have a material effect on financial statements.

In January 2017, GASB issued Statement No. 84, *Fiduciary Activities*, which establis criteria for identifying fiduciary activities of all state and local governments. The provisior Statement No. 84 are effective for fiscal years beginning after December 15, 2 Management does not believe that the implementation of this statement will have a mat effect on the financial statements.

Doc. No. 35GL-19-0045.

(1) Organization and Summary of Significant Accounting Policies, Continued

New Accounting Standards, Continued

In March 2017, GASB issued Statement No. 85, *Omnibus 2017*, which address practice issues that have been identified during implementation and application of certain GASB Statements including issues related to blending component units, goodwill, fair value measurement and application, and postemployment benefits (pensions and other postemployment benefits). The provisions in Statement No. 85 are effective for fiscal years beginning after June 15, 2017. Management does not believe that the implementation of this statement will have a material effect on the financial statements.

In May 2017, GASB issued Statement No. 86, *Certain Debt Extinguishment Issues*, which improves consistency in accounting and financial reporting for in-substance defeasance of debt. The provisions in Statement No. 86 are effective for fiscal years beginning after June 15, 2017. Management does not believe that the implementation of this statement will have a material effect on the financial statements.

In June 2017, GASB issued Statement No. 87, *Leases*, which establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. The provisions in Statement No. 87 are effective for fiscal years beginning after December 15, 2019. Management has yet to determine whether the implementation of this statement will have a material effect on the financial statements.

Reclassification

Certain items in the 2016 financial statements have been reclassified to correspond with the 2017 financial statement presentation.

(2) Cash, Cash Equivalents and Investments

The bond indenture agreements for the 2010, 2012 and 2014 series revenue bonds (note 7) require the establishment of special funds to be held and administered by trustees and by GPA. In addition, proceeds from borrowings to finance generation and transmission facility construction are maintained by GPA in construction accounts. Funds in these accounts are required by loan agreement or public law to be used for generation and transmission facility construction. Certain funds are restricted by rate orders of the PUC.

At September 30, 2017 and 2016, cash and cash equivalents, certificates of deposit and investments held by trustees and by GPA in these funds and accounts were as follows:

	2017						
	Cash and Cash Equivalents and Certificates of Deposit				Investments

	$ 176,367,288	$ 21,152,837	$ 33,833,970	$ 231,354,095	$ 51,169,094	$ 282,523,

The operating funds include the remaining insurance monies of $49,700,979 and $21,005 as of September 30, 2017 and 2016, respectively, recovered by GPA from the Cabras 3 a explosion and fire insurance claims.

GASB Statement No. 40, *Deposit and Investment Risk Disclosures*, addresses com deposit and investment risks related to credit risk, concentration of credit risk, interest risk, and foreign currency risk. As an element of interest rate risk, disclosure is requir investments that have fair values that are highly sensitive to changes in interest rates. C Statement No. 40 also requires disclosure of formal policies related to deposit and invest risks.

A. Cash and Cash Equivalents

Custodial credit risk is the risk that in the event of a bank failure, GPA's deposits ma be returned to it. Such deposits are not covered by depository insurance and are e uncollateralized, or collateralized with securities held by the pledging financial instit or held by the pledging financial institution but not in the depositor-government's n GPA does not have a deposit policy for custodial credit risk.

As of September 30, 2017 and 2016, the carrying amount of GPA's total cash and equivalents and certificates of deposit was $231,572,055 and $231,354,095, respecti and the corresponding bank balances were $231,788,408 and $230,764,038, respecti Of the bank balance amount as of September 30, 2017 and 2016, $68,427,002 $53,327,876, respectively, was maintained in financial institutions subject to Fe Deposit Insurance Corporation (FDIC) insurance. As of September 30, 2017 and 2 bank deposits in the amount of $988,101 and $739,756, respectively, were FDIC insu GPA does not require collateralization of its cash deposits; therefore, deposit leve excess of FDIC insurance coverage are uncollateralized. At September 30, 2017 2016, $67,222,548 and $53,972,549, respectively, of cash and cash equivalents certificates of deposit were subject to custodial credit risk. GPA has not experienced losses in such accounts and management believes it is not exposed to any significant c risk on its deposits. Bank balances as of September 30, 2017 and 2016, also in $163,315,616 and $176,367,288, respectively, representing cash, cash equivalents certificates of deposit held and administered by GPA's trustees in GPA's nam accordance with various trust agreements and bond indentures.

Custodial credit risk for investments is the risk that in the event of the failure c counterparty to a transaction, GPA will not be able to recover the value of the invest or collateral securities that are in the possession of an outside party. GPA's investm are held and administered by trustees in accordance with various trust agreement bond indentures.

Credit risk for investments is the risk that an issuer or other counterparty t investment will not fulfill its obligations.

Concentration of credit risk for investments is the risk of loss attributed to the magn of an entity's investment in a single issuer. GASB Statement No. 40 requires discl by issuer and amount of investment in any one issuer that represents five percent or more of total investments. As of September 30, 2017 and 2016, each of investments exceeded 5% of total investments, except for the investment in Fe Home Loan Mortgage Corporation which represents 4% of total investments at Septe 30, 2016.

Interest rate risk is the risk that changes in interest rates will adversely affect th value of debt instruments. Maturities of investments in certain funds are limited t years to limit interest rate risk. Maturities of investments in all funds may not be than the dates that such moneys are expected to be required by the trustees.

Doc. No. 35GL-19-0045.

(2) Cash, Cash Equivalents and Investments, Continued

B. Investments, Continued

Investments Measured at Fair Value

GPA categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. As of September 30, 2017 and 2016, the following investments are valued using Level 1 inputs:

	2017	2016
Federal National Mortgage Association	$ 1,999,040	$ -
Federated Government Ultrashort Duration Fund (mutual fund)	4,840,862	4,835,963
	$ 6,839,902	$ 4,835,963

(3) Receivables

Accounts receivable at September 30, 2017 and 2016, were summarized as follows:

	2017	2016
Customers:		
Private	$ 26,893,888	$ 22,865,829
Government	4,977,262	4,546,621
	31,871,150	27,412,450
U.S. Government - Navy (note 8)	4,020,017	2,379,893
U.S. Government - grants	2,066,272	1,964,866
Insurance	41,844,342	34,040,000
Others	1,224,184	869,189
	81,025,965	66,666,398
Less allowance for doubtful receivables	(3,199,831)	(4,030,630)
	$ 77,826,134	$ 62,635,768

Unbilled accounts receivable included in the accounts receivable – private customers amounted to $7,768,323 and $5,658,070 at September 30, 2017 and 2016, respectively.

At September 30, 2017 and 2016, receivables included $42 million and $34 million, respectively, of insurance receivables representing insurance recoveries realizable as at year end (see note 10).

Substantially all of GPA's customer accounts receivable are from individuals, companies and government agencies based in Guam. Concentrations largely result from accounts receivable from GovGuam agencies and the U.S. Navy. Management assesses the risk of loss and provides for an allowance for doubtful accounts to compensate for known and estimated credit risks.

Doc. No. 35GL-19-0045.

(4) Levelized Energy Adjustment Clause

At September 30, 2017 and 2016, GPA has an under recovery of fuel costs of $16,7
and $1,492,055, respectively.

At September 30, 2017 and 2016, no under or over recovery of the fuel inventor
difference is recognized as the fuel prices for the years are lower than the base year.

(5) Obligations Under Capital Leases

In 1996 through 1999, GPA entered into energy conversion agreements to pu
electricity produced by generating plants constructed or refurbished and operated b
companies. The agreements have twenty-year terms.

In January 2017, GPA extended its contract to purchase power services for four years
includes payments for the acquisition of the underlying power plant.

At the end of the agreements, ownership of the plants and the plant improvements rev
GPA. Under each of the agreements, GPA pays capacity and operation and maintenanc
and purchases fuel for the plants.

GPA has determined that the agreements to purchase electricity are in fact capital le
acquire the plants and that the capacity payments made under the agreements ar
payments. The operations and maintenance payments under the agreements are refle
energy conversion costs under operation and maintenance expenses.

At September 30, 2017 and 2016, the costs of plant and plant improvement
$184,849,243 and $155,382,727 and accumulated depreciation was $74,722,6
$69,298,046, respectively, which were presented as part of depreciable utility plant
accompanying statements of net position. The leases have effective interest rates
from 8.6% to 13.7%.

Future capacity payments under these agreements are as follows:

Year Ending September 30,	Principal	Interest	Total
2018	$ 23,330,193	$ 3,033,848	$ 26,364,041
2019	13,621,228	916,292	14,537,520
2020	8,582,729	346,471	8,929,200
2021	2,224,875	18,578	2,243,453
	$ 47,759,025	$ 4,315,189	$ 52,074,214

Doc. No. 35GL-19-0045.

(6) Employees' Retirement Plans

A. General Information About the Pension Plans:

Defined Benefit Plan

Plan Description: GPA participates in the GovGuam Defined Benefit (DB) Plan, a single-employer defined benefit pension plan administered by the GovGuam Retirement Fund (GGRF). The DB Plan provides retirement, disability, and survivor benefits to plan members who enrolled in the plan prior to October 1, 1995. Article 1 of 4 GCA 8, Section 8105, requires that all employees of GovGuam, regardless of age or length of service, become members of the DB Plan prior to the operative date. Employees of a public corporation of GovGuam, which includes GPA, have the option of becoming members of the DB Plan prior to the operative date. All employees of GovGuam, including employees of GovGuam public corporations, whose employment commenced on or after October 1, 1995, are required to participate in the Defined Contribution Retirement System (DCRS). Hence, the DB Plan became a closed group.

A single actuarial calculation is performed annually covering all plan members and the same contribution rate applies to each employer. GGRF issues a publicly available financial report that includes financial statements and required supplementary information for the DB Plan. That report may be obtained by writing to the Government of Guam Retirement Fund, 424 A Route 8, Maite, Guam 96910, or by visiting GGRF's website – www.ggrf.com.

Plan Membership: As of September 30, 2016, the most recent measurement date, plan membership consisted of the following:

Retirees and beneficiaries currently receiving benefits	7,298
Terminated employees entitled to benefits but not yet receiving them	4,463
Current members	2,208
	13,969

Benefits Provided: The DB Plan provides pension benefits to retired employees generally based on age and/or years of credited service and an average of the three highest annual salaries received by a member during years of credited service, or $6,000, whichever is greater.

Members who joined the DB Plan prior to October 1, 1981 may retire with 10 years of service at age 60 (age 55 for uniformed personnel); or with 20 to 24 years of service regardless of age with a reduced benefit if the member is under age 60; or upon completion of 25 years of service at any age.

Members who joined the DB Plan on or after October 1, 1981 and prior to August 22, 1984 may retire with 15 years of service at age 60 (age 55 for uniformed personnel); or with 25 to 29 years of service regardless of age with a reduced benefit if the member is under age 60; or upon completion of 30 years of service at any age.

Members who joined the DB Plan after August 22, 1984 and prior to October 1, 1995 may retire with 15 years of service at age 65 (age 60 for uniformed personnel); or with 25 to 29 years of service regardless of age with a reduced benefit if the member is under age 65; or upon completion of 30 years of service at any age.

(6) Employees' Retirement Plans, Continued

A. General Information About the Pension Plans, Continued:

Defined Benefit Plan, Continued

Upon termination of employment before attaining at least 25 years of total ser member is entitled to receive a refund of total contributions including intere member who terminates after completing at least 5 years of service has the op leaving contributions in the GGRF and receiving a service retirement benefit attainment of the age of 60 years. In the event of disability during emplo members under the age of 65 with six or more years of credited service who a entitled to receive disability payments from the United States Government are elig receive sixty six and two-thirds of the average of their three highest annual s received during years of credited service. The DB Plan also provides death benefit

Contributions and Funding Policy: Contribution requirements of participating emp and active members are determined in accordance with Guam law. Em contributions are actuarially determined under the One-Year Lag Methodology. this methodology, the actuarial valuation date is used for calculating the em contributions for the second following fiscal year. For example, the September 30 actuarial valuation was used for determining the year ended September 30, statutory contributions. Member contributions are required at 9.55% of bas (9.54% in 2016).

As a result of actuarial valuations performed as of September 30, 2015, 201 2013, contribution rates required to fully fund the Retirement Fund liability, as re by Guam law, for the years ended September 30, 2017, 2016 and 2015, respec have been determined as follows:

	2017	2016	
Normal costs (% of DB Plan payroll)	16.27%	15.86%	1
Employee contributions (DB Plan employees)	9.55%	9.54%	
Employer portion of normal costs (% of DB Plan payroll)	6.72%	6.32%	
Employer portion of normal costs (% of total payroll)	1.87%	1.94%	
Unfunded liability cost (% of total payroll)	21.60%	22.42%	2
Government contribution as a % of total payroll	23.47%	24.36%	2
Statutory contribution rates as a % of DB Plan payroll:			
Employer	27.41%	28.16%	2
Employee	9.55%	9.54%	

GPA's contributions to the DB Plan for the years ended September 30, 2017, 20 2015 were $2,284,475, $2,438,748 and $2,772,299, respectively, which were e the required contributions for the respective years then ended.

Defined Benefit Plan, Continued

Actuarial Assumptions: Actuarially determined contribution rates are calculated as of September 30, two years prior to the end of the fiscal year in which contributions are reported. The methods and assumptions used to determine contribution rates are as follows:

Valuation Date:	September 30, 2015
Actuarial Cost Method:	Entry age normal
Amortization Method:	Level percentage of payroll, closed
Remaining Amortization Period:	14.58 years
Asset Valuation Method:	3-year smoothed market value
Inflation:	2.75%
Total payroll growth:	3.00% per year
Salary Increases:	4.50% to 7.50%
Expected Rate of Return:	7.00%
Discount Rate:	6.70%
Retirement age:	40% are assumed to retire upon first eligibility for unreduced retirement. Thereafter, the probabilities of retirement are 15% until age 65, 20% from 65-69, and 100% at age 70.
Mortality:	RP-2000 healthy mortality table set forward by 4 years for males and 1 year for females. Mortality for disabled lives is the RP 2000 disability mortality table with no set forwards.
Other information:	Actuarial assumptions are based upon periodic experience studies. The last experience study reviewed experience from 2007-2011, and was first reflected in the actuarial valuation as of September 30, 2012.

(6) Employees' Retirement Plans, Continued

A. General Information About the Pension Plans, Continued:

Defined Benefit Plan, Continued

Discount Rate: The total pension liability is calculated using a discount rate tha blend of the expected investment rate of return and a high quality bond index rate expected investment rate of return applies to benefit payments that are funded by assets (including future contributions), which includes all plan benefits except a COLA and supplemental annuity (SA) payments to DB retirees. The rate of return high quality bond index applies to the ad hoc COLAs and supplemental annuity payn to DB retirees, which are not funded by plan assets. The blended rate calculat described above is 6.70%.

Discount Rate Sensitivity Analysis: The following schedule shows the impact on th Pension Liability if the discount rate used was 1% less than and 1% greater tha discount rate that was used (6.70%) in measuring the 2016 Net Pension Liability.

	1% Decrease in Discount Rate 5.70%	Current Discount Rate 6.70%	1% Increase in Discount Rate 7.70%
Net Pension Liability	$ 86,707,750	$ 71,113,926	$ 57,691,871

Ad Hoc COLA/Supplemental Annuity Plan for DB Retirees

Plan Description: GPA participates in the GovGuam ad hoc COLA/supplemental an plan for DB retirees, a single-employer defined benefit pension plan administered b GGRF. GPA considers this as a separate pension plan for DB retirees. A single act calculation is performed annually covering all plan members and the same contrib rate applies to each employer. GGRF issues a publicly available financial report includes financial statements and required supplementary information for this plan. report may be obtained by writing to the Government of Guam Retirement Fund, Route 8, Maite, Guam 96910, or by visiting GGRF's website – www.ggrf.com.

Plan Membership: The plan membership is the same as the DB plan described abov

Benefits Provided, Contributions and Funding Policy: Ad hoc COLA and supplem annuity benefits are provided to members and beneficiaries at the discretion o Guam Legislature, but are funded on a "pay-as-you-go" basis so there is no plan Ad hoc COLAs are made through annual allocations to provide DB Plan retired mem and spouse survivors with COLA payments of $2,000 per year. In addition, DB retired members and survivors whose benefits commenced prior to October 1, have received supplemental annuity payments in the amount of $4,238 per year not to exceed $40,000 per year when combined with their regular annual retire annuity. It is anticipated that ad hoc COLA and supplemental annuity payment continue to be made for future years at the same level currently being paid.

GPA's contributions to the Ad Hoc COLA/Supplemental Annuity Plan for DB Retire the years ended September 30, 2017, 2016 and 2015 were $1,221,634, $1,151,07 $1,132,303, respectively, which were equal to the statutorily required contributions

Defined Contribution Retirement System

Contributions into the Defined Contribution Retirement System (DCRS) plan by members are based on an automatic deduction of 5% of the member's regular base pay. The contribution is periodically deposited into an individual investment account within the DCRS. Employees are afforded the opportunity to select from different investment accounts available under the DCRS.

Doc. No. 35GL-19-0045.

(6) Employees' Retirement Plans, Continued

Defined Contribution Retirement System, Continued

Statutory employer contributions for participants in the DCRS plan for the years en September 30, 2017, 2016 and 2015 are determined using the same rates as the DB Of the amount contributed by the employer, only an amount equivalent to 5% of member's regular pay is deposited into the member's individual investment account in DCRS. The remaining amount is contributed towards the unfunded liability of the DB Plan

Members of the DCRS plan, who have completed five years of government service, ha vested balance of 100% of both member and employer contributions plus any earn thereon.

GPA's contributions for participants in the DCRS plan for the years ended September 2017, 2016 and 2015 were $5,280,871, $5,075,223, and $5,244,535, respectively, w were equal to the required contributions for the respective years then ended. Of t amounts, $4,173,926, $4,036,044 and $4,221,066 were contributed toward the unfu liability of the DB Plan for the years ended September 30, 2017, 2016 and 2015, respectiv

GPA has accrued an estimated liability of $4,008,397, $3,436,738 and $3,113,91 September 30, 2017, 2016 and 2015, respectively, for potential future sick leave paym pursuant to Public Law 26-86 (note 1). However, this amount is an estimate and a payout may be materially different than estimated.

Other Post-Employment Benefits

Plan Description: GovGuam, through its substantive commitment to provide other p employment benefits (OPEB), maintains a cost-sharing multiple employer defined benefit to provide certain postretirement healthcare benefits to retirees who are members of GovGuam Retirement Fund. Under the Plan, known as the GovGuam Group Health Insur Program, GovGuam provides postemployment medical, dental and life insurance benefi retirees, spouses, children and survivors. Active employees and retirees who waive me and dental coverage are considered eligible for the life insurance benefit only. Because Plan consists solely of GovGuam's firm commitment to provide OPEB through the payme premiums to insurance companies on behalf of its eligible retirees, no stand-alone fina report is either available or generated.

Funding Policy: GovGuam contributes to the Plan a portion of the medical and de premiums based on a schedule of semi-monthly rates provided through insurance compa with GovGuam's contribution amount set each year at renewal. Retirees are also require pay a portion of the medical and dental insurance premiums. Medical coverage continue the spouse after the death of the retiree provided the spouse makes the requ contributions. Retirees and covered spouses are eligible for a $10,000 life insurance ben Retirees do not share in the cost of this benefit. Monthly life insurance premium is $15.52 covered life.

For the years ended September 30, 2017, 2016 and 2015, GPA reimbursed GovG $2,884,459, $2,911,552 and $2,621,098, respectively, for its share of the costs of the al mentioned Plan, which were equal to the statutorily required contributions.

Doc. No. 35GL-19-0045.

(6) Employees' Retirement Plan, Continued

Other Post-Employment Benefits, Continued

GPA's net OPEB obligation at September 30, 2017, 2016 and 2015 for the above mentioned Plan is as follows:

2017	2016	2015
$ 59,348,450	$ 51,711,054	$ 44,213,000

Defined Benefit 1.75 Retirement System (the DB 1.75 Plan) and the Guam Retirement Security Plan (GRSP)

In September 2016, Public Law 33-186 was enacted to create two new government retirement plans: the DB 1.75 Plan and the GRSP. Beginning January 1, 2018, the DB 1.75 Plan and GRSP are to become the primary retirement systems for all new hires.

The DB 1.75 Plan is open for participation by certain existing employees, new employees, and reemployed employees who would otherwise participate in the DCRS Plan or the new GRSP and who make election on a voluntary basis to participate in the DB 1.75 Plan by December 31, 2017. Employee contributions are made by a mandatory pre-tax payroll deduction at the rate of 9.5% of the employee's base salary while employer contributions are actuarially determined. Members of the DB 1.75 Plan automatically participate in the GovGuam deferred compensation plan, pursuant to which employees are required to contribute 1% of base salary as a pre-tax mandatory contribution.

The GRSP will be the primary retirement plan for new employees beginning January 1, 2018, unless the employee elects to participate in the DCRS Plan within 60 days of the employee's hire date. Certain existing and reemployed employees are also provided a limited opportunity to participate in the GRSP. Employee contributions are made by a mandatory pre-tax payroll deduction at the rate of 6.2% of the employee's base salary. The employer makes matching contributions at the same rate of 6.2% of the employee's base salary.

(7) Noncurrent Liabilities

A. Long-term Debt

Long-term debt at September 30, 2017 and 2016 is as follows:

	2017	2016
2014 Series Senior Revenue Bonds, initial face value of $76,470,000, interest at varying rates from 4.0% to 5.0% per annum payable semi-annually in October and April, principal and mandatory sinking fund payments payable in varying annual installments commencing with a payment of $1,310,000 in October 2017, increasing to a final payment of $4,855,000 in October 2044.	$ 76,470,000	$ 76,470,000

Less current maturities	(1,780,000)	(115,
	564,960,000	566,740,
Add premium on 2014 and 2012 bonds	29,002,672	31,824,
Less discount on 2010 bonds	(3,393,810)	(3,506,
Total bonds	$ 590,568,862	$ 595,057,

Proceeds of the 2010 Series Senior Revenue Bonds were used to finance capital proj generally consisting of a new administration building and various generation, transmis and distribution facilities, make a deposit to the Bond Reserve Fund, provide capita interest through October 1, 2013, and pay costs of issuance.

Proceeds of the 2012 Series Revenue Bonds were used to refund GPA's 1993 and 1999 Se Bonds, make a deposit to the Senior Bond Reserve Fund to increase the amount on de therein to the Bond Reserve Fund Requirement, and pay costs of issuance.

Proceeds of the 2014 Series Revenue Bonds were used to finance a variety of genera transmission and distribution improvements and systems and information techno upgrades, make a deposit to the Senior Bond Reserve Fund, provide capitalized inte through September 30, 2017, and pay costs of issuance.

All gross revenues of GPA have been pledged to repay the 2010, 2012 and 2014 series b principal and interest. For the years ended September 30, 2017 and 2016, the debt se for the 2010, 2012 and 2014 series bonds was $30,532,400 and $28,870,850, respecti or approximately 9% of pledged gross revenues.

Doc. No. 35GL-19-0045.

(7) Noncurrent Liabilities, Continued

A. Long-term Debt, Continued

Premium and discount associated with the 2010, 2012 and 2014 series bonds at September 30, 2017 and 2016 are being amortized on the effective interest method over the life of the applicable debt.

As of September 30, 2017, future maturities of long-term debt are as follows:

Year Ending September 30,	Principal	Interest	Total Debt Service
2018	$ 1,780,000	$ 28,712,600	$ 30,492,600
2019	1,495,000	28,636,625	30,131,625
2020	15,950,000	28,201,700	44,151,700
2021	20,515,000	27,290,075	47,805,075
2022	21,540,000	26,238,700	47,778,700
2023 through 2027	126,010,000	113,699,200	239,709,200
2028 through 2032	155,915,000	77,723,800	233,638,800
2033 through 2037	126,725,000	39,724,750	166,449,750
2038 through 2042	82,905,000	14,691,725	97,596,725
2043 through 2045	13,905,000	1,017,025	14,922,025
	$ 566,740,000	$ 385,936,200	$ 952,676,200

Debt Refunding

In October 2012, GPA refunded its 1993 and 1999 Series bonds through the issuance of the 2012 Series bonds. At the time of refunding, the 1993 and 1999 Series bonds had principal balances outstanding of $56,370,000 and $299,680,000, respectively. The proceeds for the refunding were transferred to an escrow agent who used the proceeds to purchase non-callable and non-prepayable obligations of the United States of America or held as cash and are to be held in an irrevocable trust to be used for the payment of the principal of and interest on the 1993 and 1999 Series bonds. The advance refunding met the requirements of an in-substance defeasance and the 1993 and 1999 bonds were removed from GPA's financial statements. The advance refunding resulted in a loss on defeasance totaling $17,283,801 representing the difference between the reacquisition price and the carrying amount of the 1993 and 1999 bonds. Although the advance refunding resulted in the recognition of an accounting loss, GPA in effect reduced its aggregate debt service payments by $16,506,398 over the next twenty years and obtained an economic gain (difference between the present values of the old debt and the new debt service payments) of $27,940,966.

The loss on refunding of the 1993 and 1999 Series bonds is being amortized using the effective interest method over the average remaining life of the 1993 and 1999 bonds which approximated the average life of the 2012 Series bonds. The unamortized balance of the loss on refunding of the 1993 and 1999 Series bonds is $11,076,064 and $12,324,400 as of September 30, 2017 and 2016, respectively.

Doc. No. 35GL-19-0045.

Forward Delivery Contract

On September 28, 2000, GPA entered into Bond Reserve Fund Forward Delivery Agreen (the agreements) with Lehman Brothers and Bank of America. In connection with agreements, GPA received cash of $13.5 million in October 2000, representing the pr value of interest income on certain invested bond proceeds. Based on the terms o agreements, gross proceeds totaled $17,521,029 while GPA incurred termination fees closing costs totaling $3,530,000 and $1,250,000, respectively. The $13.5 million i proceeds included $759,500 of interest income earned as of the closing dates o agreements.

The gross proceeds, termination fees and closing costs have been deferred and amortize a straight line basis over the average remaining life of the 1993 and 1999 bonds. The proceeds, net of amortization, are reflected as unearned forward delivery contract reven the accompanying statements of net position. The termination fees and closing cost reflected as unamortized forward delivery contract costs in the accompanying statemer net position. The amortization of forward delivery contract revenues and costs is reflect components of interest income and interest expense, respectively, in the accompa statements of revenues, expenses and changes in net position.

The following summarizes the unearned revenues and unamortized costs on the for delivery contract at September 30, 2017 and 2016:

	2017	2016
Unearned forward delivery contract revenues	$ 8,760,514	$ 8,760,5
Accumulated amortization	(6,424,443)	(5,840,4
	$ 2,336,071	$ 2,920,0
Unamortized forward delivery contract costs	$ 2,390,265	$ 2,390,2
Accumulated amortization	(1,752,908)	(1,593,5
	$ 637,357	$ 796,7

(8) Agreements with the U.S. Navy

On September 15, 1996, a lease agreement was entered into between GPA and the U.S. Navy (Navy) to transfer to GPA the operations, maintenance, and custody of certain Navy-owned electrical transmission and distribution lines, electric power generation facilities, related structures and equipment, together with the associated land interest. The facilities are leased to GPA at no cost for a period of 50 years.

(8) Agreements with the U.S. Navy, Continued

On August 1, 2012, GPA and the Navy entered into a Utility Services Contract (USC) period of ten years, unless terminated early at the option of the Navy, with no optic extension. Key features of the USC include transfer of certain Navy facilities to GPA charge, calculation of power rates charged to the Navy in accordance with the method approved by the PUC, GPA's continued use of the Navy's assets and associated real e assets at no charge, compensation by GPA to the Navy for energy supplied to customers from Navy dedicated facilities, weekly fuel payments by the Navy, supply of to Guam Waterworks Authority (GWA) by the Navy for power generation faci maintenance of a minimum contract demand with no maximum demand provision, payment within fifteen days of electric billing by the Navy, subject to late payment cha During the years ended September 30, 2017 and 2016, GPA billed the Navy $54,904,63 $49,193,414, respectively, for sales of electricity under the USC. Receivables from the were $4,020,017 and $2,379,893 at September 30, 2017 and 2016, respectively.

On August 31, 2015, GPA and the Navy entered into a Basic Ordering Agreement (BOA) enumerates task items that are to be contracted to identify, develop and/or implement on Navy facilities and utility systems. The tasks are generally related to energy se including renewable energy and energy efficiency. The period during which the orders m placed against the BOA may not exceed five years. As of September 30, 2017, no wor commenced on this BOA.

On September 12, 2016, GPA and the Navy entered into a lease agreement to lease a p of the land controlled by the Navy to construct and operate a renewable energy plant lease will not be effective until a final decision to determine if the project is consistent the Federal Renewable Energy Program is obtained. If the terms and conditions of the agreement are satisfied, the land will be leased to GPA at no cost until April 30, 2054. September 30, 2017, the effectivity of the lease is not yet established.

(9) Commitments and Contingencies

Fuel Purchase Contracts

In August 2013, GPA entered into a fuel purchase contract with Hyundai Corporation. agreement is for two years commencing on September 1, 2013 with options to exter three additional one-year terms upon mutual agreement of both parties. In August 201 parties amended and agreed to extend the contract for three years commencin September 1, 2015 with options to extend for a three-year term upon mutual agreeme both parties.

In January 2015, GPA entered into diesel fuel supply contracts with IP&E Guam, Inc Mobil Oil Guam, Inc. The agreements are for three years ending December 31, 2017 wi option to extend for two additional one-year terms, renewable annually. In December GPA exercised the option and extended the contract through December 31, 2018.

In May 2015, GPA entered into cylinder lubrication oil supply contract with Pacific Petro Trading Corporation. The agreement is for three years commencing June 1, 2015 with op to extend for two additional one-year terms, renewable annually.

Doc. No. 35GL-19-0045.

(9) Commitments and Contingencies, Continued

Performance Management Contracts

In 2010, GPA entered into Performance Management Contracts (PMC) with two companies for the operation and maintenance of Cabras 1 and 2, and Cabras 3 and 4 generators, which became effective on October 1, 2010 and July 1, 2010, respectively. The PMCs are for a period of five years with an option to extend for another five-year term. The fees are subject to certain incentives and penalties, as agreed by both parties. Several extensions were made on both PMCs. The latest extension of the PMC for Cabras 1 and 2 expires on September 30, 2020 while the PMC for Cabras 3 and 4 expires on February 28, 2018.

In 2016, GPA entered into a PMC for the Dededo, Macheche and Yigo combustion turbine power plants for a period of five years commencing on March 1, 2016 with options to extend for one additional three-year term and one additional two-year term. The fees are subject to certain incentives and penalties, as agreed by both parties.

At September 30, 2017, the minimum future fixed management fees are as follows:

Year Ending September 30,	Amount
2018	$ 2,688,626
2019	2,449,963
2020	2,515,840
2021	293,203
	$ 7,947,632

Fuel Bulk Storage Facility Contract

In September 2017, GPA entered into an agreement for the management and operations of its fuel bulk storage facility. The agreement is for two years ending September 30, 2019 with an option to extend the contract for three additional one-year terms. At September 30, 2017, the minimum future management fees for the years ending September 30, 2018 and 2019 are $516,560 and $532,057, respectively.

Operating Leases

GPA entered into a sublease agreement for vehicle, equipment, and material storage and for a power substation beginning November 1, 2002 with annual rental of $61,261 through October 31, 2012, which was extended for ten years.

GPA entered into a lease agreement for fuel storage tanks effective September 1, 2013. The contract includes fixed annual fees escalating 4% every year until August 31, 2018.

GPA entered into a commercial space lease beginning July 1, 2010, with monthly rentals of $4,495 through June 30, 2015, which was extended for five years.

Doc. No. 35GL-19-0045.

(9) Commitments and Contingencies, Continued

Operating Leases, Continued

At September 30, 2017, future minimum lease payments for operating leases are as follo

Year Ending September 30,	Amount
2018	$ 1,630,481
2019	115,196
2020	101,712
2021	61,261
2022	61,261
2023	5,105
	$ 1,975,016

Rent expense under the aforementioned agreements totaled $1,709,954 and $1,648 during the years ended September 30, 2017 and 2016, respectively.

Renewable Energy Contracts

GPA entered into two renewable energy purchase agreements to purchase 20 MW and MW of solar renewable energy. The commercial operation date of the two solar plants October 30, 2015. The agreements include escalating contract prices per MW hour until and 90% minimum production which is the minimum requirement per contract year that be met to avoid production shortfall penalties. The total minimum renewable energy purc commitment is 1.1 million MW hours.

At September 30, 2017, the minimum future renewable energy purchases are as follows:

Year Ending September 30,	Amount
2018	$ 9,164,695
2019	9,157,338
2020	9,162,071
2021	9,171,682
2022	9,200,983
2023 through 2027	46,045,437
2028 through 2032	46,118,779
2033 through 2037	46,575,874
2038 through 2041	28,968,797
	$ 213,565,656

Capital Commitments

As of September 30, 2017, GPA has various on-going construction contracts with a contract price of $62 million, of which $27 million has been paid.

Doc. No. 35GL-19-0045.

(9) Commitments and Contingencies, Continued

Letters of Credit

As of September 30, 2017, GPA has a $35 million uncollaterized revolving documentary letter of credit for purchases of fuel. There was an outstanding commitment of $14 million under the standby letter of credit at September 30, 2017.

Self-Insurance

GPA self-insures its transmission and distribution (T&D) plant, because no insurance is available at reasonable rates.

As the result of a PUC Order, GPA adds an insurance charge of $0.00290 per kWh for civilian ratepayers and from $0.00035 per kWh to $0.00070 per kWh for the Navy until a self-insurance fund balance of $20 million is achieved. Insurance charge proceeds are transferred to the restricted self-insurance fund to be used to cover losses that would normally be covered by insurance. GPA is not prohibited from petitioning PUC for approval to use the self-insurance fund for additional purposes to the extent that such losses are not covered by insurance.

The self-insurance fund, included in cash and cash equivalents held by GPA, was $19,251,372 and $19,506,796 at September 30, 2017 and 2016, respectively.

In 2015, GPA reached the $20 million self-insurance cap and the insurance surcharge was discontinued. The insurance surcharge will be reactivated after the fund balance falls to less than $18 million.

Autonomous Agency Collections Fund

On March 31, 2011, GPA received an invoice from the Government of Guam Department of Administration (GovGuam DOA) of $12,250,000 representing an annual assessment of $875,000 for each of the fiscal years 1998 to 2011 pursuant to 5 GCA Chapter 22 Section 22421, *Transfer of Autonomous Agency Revenues To Autonomous Agency Collections Fund*. In September 2013, GPA received another invoice for $875,000 from the Chamorro Land Trust Commission referring to the same annual assessment aforementioned. There was no invoice received for the years ended September 30, 2017 and 2016. GPA obtained approval from the CCU to offer GovGuam DOA a settlement amount of $2.6 million. However, such settlement offer is conditional on the approval by the PUC of a surcharge to recover the assessment from ratepayers. The PUC has not approved the surcharge as of September 30, 2017 and therefore, no liability or other impact has been recognized in the accompanying financial statements.

Hazardous Waste Assessment

Guam Public Law 20-110 requires certain entities to remit payments to a hazardous substance expense fund. There are questions as to the enforceability of the law; accordingly, no provision has been made in the accompanying financial statements for payments to be made under this law. GPA is covered by its self-insurance and worker's compensation insurance in case of accidents due to hazardous substances.

Doc. No. 35GL-19-0045.

(9) Commitments and Contingencies, Continued

Litigation

GPA has several asserted and unasserted claims outstanding as of September 30, 2017. not possible for the management of GPA to estimate the ultimate resolution of these ma and therefore, no provision for any liability that may result from these claims has been m in the accompanying financial statements.

Merit System

In 1991, Public Law 21-59 was enacted to establish a bonus system for employee GovGuam, autonomous and semi-autonomous agencies, public corporations and other p instrumentalities of GovGuam who earn a superior performance grade. The bonu calculated at 3.5% of the employee's base salary beginning 1991 but was suspended by for the years 1996, 2002, 2003 and 2004. Between 1991 and 2008, GPA did not calculat pay any bonuses. In 2010, the Guam Legislature authorized GPA to implement a Pay Performance program, similar to the GovGuam unified pay systems for certified, technical professional positions, covering the evaluation period of 2009. As of September 30, 2017 2016, the CCU determined that there was no liability for employees covered in the new system. Therefore, no liability has been recognized in the accompanying financial stateme

U.S. Environmental Protection Agency

On May 24, 1986, the administrator of the U.S. Environmental Protection Agency (granted a continuing exemption to GPA under the provisions of Section 325(b) of the C Air Act, as amended. The terms of the exemption require monitoring by EPA, ce commitments by GPA regarding fuel stocks, and reporting and delineation of grounds revocation of the exemption.

In February 2011, EPA, under the Clean Air Act, established new rules under Nat Emission Standards for Hazardous Air Pollutants for Reciprocating Internal Combustion En Maximum Achievable Control Technology (RICE MACT). These new rules require s emissions control and continuous monitoring system equipment to be installed on all peaking and baseload diesel generators including its Cabras 3 and 4 and MEC 8 and 9 speed diesel units. Compliance under the diesel MACT was due May 3, 2013. compliance under the diesel MACT could result in penalty fees of $37,000 per unit per GPA applied for and received a one-year extension for complying with the rules with res to its small diesel peaking units. The required stack emission equipment was installed w the extension period. As to compliance with the other units subjected to RICE MACT, requested EPA to enter into a consent decree allowing time for GPA to comply with regulations and allowing potential fines and penalties for non-compliance to be used compliance with regulations. In January 2015, GPA submitted its compliance plan outl the proposed timelines for inclusion in the consent decree.

In August 2015, due to explosion and fire at Cabras 3 and 4 power plant (see note 10), t units are no longer subject to compliance. As of September 30, 2017, GPA is still negotia the consent decree with EPA. GPA believes result of negotiations with EPA will defer pote fines post RICE MACT deadlines for the slow speed diesel units. If the consent decree is reached, the maximum liability of GPA would be $186 million as of September 30, 2017. liability that may result from potential noncompliance has been recorded in the accompan financial statements.

Doc. No. 35GL-19-0045.

(9) Commitments and Contingencies, Continued

Environmental Protection Agency, Continued

EPA also established rules for Electric Generating Unit Maximum Achievable Control Technology (EGU MACT) which applies to Cabras 1 and 2 and Tanguisson steam boiler units. Compliance under the EGU MACT was due in April 2015. Non-compliance could result in penalty fees of $37,000 per unit per day. GPA obtained PUC approval to early terminate the associated energy conversion agreement of the Tanguisson unit. By deactivating the Tanguisson unit, GPA did not incur compliance costs for this unit. As to compliance for Cabras 1 and 2, a consent decree requested from EPA for compliance with RICE MACT is also expected to cover the EGU MACT compliance.

Integrated Resource Plan

In 2012, GPA developed its Integrated Resource Plan (IRP). The objectives of the IRP are primarily to identify the timing, size, technology of future power generating units, and to address issues such as fuel diversification and the renewable energy portfolio standards. Specifically, the IRP recommendations include the replacement of older generation equipment with combined cycle combustion turbine generators which can utilize either Liquefied Natural Gas (LNG) or Ultra-Low Sulfur (ULS) diesel fuel oil; adding 40-45 MW of generation from renewable energy sources; and diversification of its fuel source to LNG and ULS diesel fuel oil.

In August 2015, GPA lost 78MW of base load capacity and experienced insufficient generation reserve after the explosion and fire at the Cabras 4 Power Plant. The PUC ordered GPA to update the IRP in consideration of this event. The results of the updated IRP indicated that GPA should procure up to 180 MW of combined cycle units. In October 2016, the PUC authorized GPA to proceed with procurement which shall be based upon the Independent Power Producer (IPP) model. No approval was given in regards to bond financing, restructuring, or financing/leasing for the IPP. The PUC also ordered GPA to retire Cabras 1 and 2 upon commission of the new combined cycle plants.

GPA reassessed the estimated useful life of Cabras 1 and 2 based on the expected retirement of these plants when the new combined cycle plant becomes operational. GPA recorded additional depreciation expense of approximately $3.7 million during each of the years ended September 30, 2017 and 2016 due to the revised estimated useful life of these power plants.

Asset Retirement Obligation

GPA has power plants that were identified to be retired in the future. Upon retirement, GPA may incur costs to dismantle and clean-up the power plants. GPA has no legal or contractual obligation to perform these actions when they retire their assets; therefore, no provision for this potential cost was recorded in the accompanying financial statements.

Doc. No. 35GL-19-0045.

(10) Explosion and Fire at Cabras Power Plant

On August 31, 2015, GPA suffered an explosion and fire at its Cabras 3 and 4 genera building. GPA commissioned an investigation and evaluation of the loss of Cabras generator. In 2016, it was determined that Cabras 4 was a total loss. It was later determin that repair of the Cabras 3 generator was economically infeasible. As a result, both t Cabras 3 and 4 generators and related facilities and equipment were written down to ze value at September 30, 2016.

As of September 30, 2017, GPA received $84 million of insurance recoveries. Subsequent September 30, 2017, GPA entered into a final insurance settlement of $126 million. As result, GPA recorded an additional $42 million recovery receivable at September 30, 20 (see note 3). GPA applied the insurance recoveries against actual damage incurred a estimated repair costs, and presented these as an extraordinary item in the accompanyi financial statements.

The extraordinary item amount estimated for the years ended September 30, 2017 and 20 comprise of the following:

	2017	2016
Insurance recoveries	$ 125,884,342	$ 84,040,000
Impairment of Cabras 3 and 4	(52,873,884)	(52,873,884
Temporary power services	(13,923,247)	(13,923,247
Repair and other costs	(24,780,107)	(24,780,107
Administrative charges	(4,645,452)	(2,850,577
Clean-up costs	(1,018,075)	(1,018,075
Fuel recovery	(4,600,000)	(4,600,000
Provision for inventory obsolescence	(1,069,158)	(1,069,158
Revenue loss	(2,730,560)	(2,730,560
	20,243,859	$ (19,805,608
Extraordinary loss recognized in 2016	19,805,608	
Extraordinary gain recognized in 2017	$ 40,049,467	

Total damage costs are based on GPA's current best estimate and may ultimately materially different than estimated.

(11) Related Party Transactions and Balances

During the years ended September 30, 2017 and 2016, GPA billed GovGuam agenci $48,761,147 and $45,460,183, respectively, for sales of electricity. Receivables fr GovGuam agencies were $4,977,262 and $4,546,621 at September 30, 2017 and 201 respectively (see note 3).

GPA provides electrical and administrative services to GWA, a component unit of t GovGuam, which is also governed by the CCU. Electricity sales to GWA for the years end September 30, 2017 and 2016 were $12,073,592 and $11,193,172, respective Outstanding receivables were $1,083,783 and $897,240 at September 30, 2017 and 201 respectively, which are included in the GovGuam agencies receivable mentioned above.

Doc. No. 35GL-19-0045.

(11) Related Party Transactions and Balances, Continued

On June 23, 2009, GPA and GWA entered into a Memorandum of Understanding (MOU) where each agency agrees to provide administrative, operational, maintenance, repair and other specified services on behalf of the other agency and each will reimburse the other for their actual costs for providing said services. Total billings by GPA to GWA for administrative expenses and cost reimbursements were $147,538 and $202,090 for the years ended September 30, 2017 and 2016, respectively. Outstanding receivables totaled $12,254 and $112,815 at September 30, 2017 and 2016, respectively, and were included in other receivables (see note 3).

In 2015, GPA and GWA replaced their revenue billing systems with a combined billing system. In accordance with a MOU between GPA and GWA, costs necessary for the implementation and operation of the combined billing system are shared by GPA and GWA. Total amounts billed by GPA to GWA for its share in the operation of the combined billing system amounted to $250,000 in 2016. Outstanding receivables were $56,272 and $118,774 at September 30, 2017 and 2016, respectively, and were included in other receivables (see note 3).

Effective October 1, 2015, GPA and GWA implemented an agreement to share in the costs of the office building commonly occupied by them for an annual cost of $269,170 due from GWA to GPA. GWA also shares in the actual costs incurred for security, janitorial services, building insurance and other maintenance costs. Total billings by GPA to GWA for its share of the costs of the office building were $454,941 and $353,291 for the years ended September 30, 2017 and 2016, respectively. Outstanding receivables were $36,678 and $31,935 at September 30, 2017 and 2016, respectively, and were included in other receivables (see note 3).

GWA billed GPA for water and sewer charges on the facilities transferred by the Navy to GPA under the USC (see note 8) totaling $493,549 and $1,166,911 for the years ended September 30, 2017 and 2016, respectively. The amount due to GWA at September 30, 2017 and 2016 was $505,031 and $139,738, respectively, which was included in accounts payable - operations in the accompanying statements of net position.

In October 2011, U.S. Federal Emergency Management Agency (FEMA) reimbursed GPA for certain typhoon related costs incurred in 2002 of approximately $1,800,000. The reimbursement was received by GovGuam DOA which plans to offset such amount against billings to GPA related to the Autonomous Agency Collections Fund (see note 9). Due to uncertainty of receipt, GPA has not recorded the reimbursement in the accompanying financial statements.

Doc. No. 35GL-19-0045.

(12) Restricted Net Position

At September 30, 2017 and 2016, net position was restricted for the following purposes:

	2017	2016
Debt service	$ 3,685,679	$ 1,627,138
Budgeted maintenance and operating expenses	10,472,662	1,372,165
Demand Side Management Program and projects	1,074,491	1,646,041
	$ 15,232,832	$ 4,645,344

(13) Subsequent Events

In December 2017, GPA refinanced the 2010 Senior Revenue bonds through the issuance of the 2017 Revenue Refunding bonds. The 2017 series bonds have the same maturity date as the 2010 series bonds but bear a lower interest rate and reduced the principal amount to $148,670,000. GPA saved approximately $7.8 million from this refunding.

(14) Utility Plant

A summary of changes in capital assets for the years ended September 30, 2017 and 2016 were as follows:

2017:	Estimated Useful Lives in Years	Beginning Balance October 1, 2016	Transfers and Additions	Transfers and Deletions	Ending Balance September 30, 2017
Depreciable:					
Steam production plant	25 - 50	$ 116,221,073	$ 7,786,668	$ (491,386)	$ 123,516,355
Other production plant	25	225,201,904	17,570,519	(17,745,997)	225,026,426
Transmission plant	30 - 45	178,576,835	4,590,737	(867,325)	182,300,247
Distribution plant	25 - 45	220,981,069	6,170,868	(1,380,702)	225,771,235
General plant	03 - 60	93,158,754	5,255,343	(2,806,737)	95,607,360
Production plant under capital lease	20 - 40	155,382,727	29,466,516	-	184,849,243
		989,522,362	70,840,651	(23,292,147)	1,037,070,866
Accumulated depreciation		(540,262,573)	(44,291,589)	22,703,091	(561,851,071)
		449,259,789	26,549,062	(589,056)	475,219,795
Non-depreciable:					
Land and land rights		1,072,236	-	-	1,072,236
Construction work in progress		17,206,430	61,099,405	(59,825,662)	18,480,173
		18,278,666	61,099,405	(59,825,662)	19,552,409
		$ 467,538,455	$ 87,648,467	$ (60,414,718)	$ 494,772,204
