**JON J. P. FERNANDEZ**
Superintendent of Education

May 24, 2019

35GL-19-0553
Speaker Tina Rose Muña Barnes

MAY 2 4 2019
Time 1:13 ( )AM (X)PM
Received By: Matt

2019 MAY 24 PM 2:35

The Honorable Lourdes A. Leon Guerrero
Governor of Guam
Ricardo J. Bordallo Governor's Complex
Adelup, Guam 96910

**SUBJECT: Tiyan Educational Campus**

*Hafa Adai,* Governor Leon Guerrero:

I had the opportunity last week to meet with Lieutenant Governor Joshua Tenorio, and part of our discussion focused on support needed for the Guam Department of Education ("GDOE") at the Tiyan Campus. Although our discussion was brief, I promised to outline these needs more clearly for your consideration and support. These priorities are detailed below:

1. **Completion of the headquarters.** GDOE needs to complete the outfitting of the headquarters originally agreed upon with Coretech International as part of the headquarters design. The headquarters includes all buildings at Tiyan that house central office functions, including the warehouses. Approximately $332,000 was committed as part of the original collateral equipment budget to support this work, and GDOE is seeking support for this amount to be made available to complete the outfitting needed, which would allow for the movement of facilities and maintenance administrative functions from the second floor of Tiyan Building E to the headquarters area anchored by Buildings A, B, and C.

2. **Support for Tiyan High School athletic facilities.** Tiyan High School is petitioning for the fulfillment of promises made in the prior administration to support full athletic facilities for the high school. Currently, THS has a full-size gym to support indoor sports. However, the school lacks outdoor fields and requests support for the acquisition of a land-locked parcel that is adjacent to the school's soccer field. This parcel would enable the construction of a new recreational football/soccer field to serve the school and the surrounding community. Additionally, the school is requesting support for baseball and softball fields, if possible. A petition renewing the school's call for support for the necessary resources to make this vision possible includes the names of approximately 800 students and employees at Tiyan. (Petition attached.)

3. **Access to parking and warehouse space located in the middle of Guam Trades Academy and GDOE.** GDOE needs to secure access to the irregular parcel behind Building B, which includes a warehouse and a dirt parking area between GDOE and what

0553

is now going to be the expansion of the Guam Trades Academy. The Guam Trades Academy has offered to pave and share its portion of the lot, leaving a dirt portion between their parking and GDOE parking areas. Acquiring the warehouse would allow for GDOE (or another nonprofit organization) to continue to operate the The Emergency Food Assistance Program (TEFAP) which now is operating out of the GDOE Piti area warehouse, which will eventually be leased for other uses. GDOE is currently in discussion with the U.S. Department of Agriculture regarding the future of this program, which many families depend upon for weekly distribution of commodities. GDOE would like to avoid the possibility of an unrelated use being located at this site (Map attached).

With your support for these priorities at Tiyan, I believe that we can create a vibrant Tiyan education campus, anchored by GDOE headquarters, joined by Tiyan High School, Guahan Academy Charter School, and Science is Fun Academy Charter School, with the requisite sports facilities to support students and the broader Barrigada community. I believe there is also potential value and benefit that can be unleashed by the government's support to help master plan the broader Tiyan area and incorporate the infrastructure investment needed to improve access to the site and create even greater opportunities for educational, commercial and industrial uses as well as government revenue.

We would be happy to work with you, the Guam Economic Development Administration, Department of Public Works, and our stakeholders (to include Guahan Academy Charter School) to make this vision a reality and to collaborate on solutions that will benefit all of Tiyan's students, families and employees. Your positive response and support for these priorities would be much appreciated.

*Senseramente,*

Jon J.P. Fernandez

CC: Guam Education Board
Lieutenant Governor Joshua Tenorio
Speaker Tina Muna-Barnes, 35th Guam Legislature
Vice-Speaker Telena Nelson, 35th Guam Legislature
Sophia Duenas, Principal, Tiyan High School
Bert Johnston, Guam Trades Academy
Board of Trustees, Guahan Academy Charter School
Board of Trustees, Science is Fun Academy Charter School
Melanie Mendiola, Administrator, GEDA

We call on the Governor of Guam, Lou Leon Guerrero, the Guam Legislature, the Guam Economic Development Agency and CoreTech International to construct a football field, track and fielding facilities, and baseball and softball fields, all with their respective spectator seating areas, storage and locker rooms for Tiyan High School.

---

We, the Tiyan High School community of parents, faculty, staff, alumni, and students, since the inception of our school five years ago have made do with our limited athletic facilities and we *deserve* to finally be on an equal playing field with the other public high schools.

During the first couple of years, we existed with only a single soccer field and small gym enclosure barely large enough to contain a full-sized basketball court. And in spite of that, through our resilience and overwhelming desire, we were able to field *all* of the sports during those years by borrowing various facilities and, at times, even having to pay for them. For the first 2 years, majority of our athletes had to leave campus in order to practice and play *every* game at a foreign site—there was no such thing as a true "home game." Building real school pride through sports was truly difficult, an almost titanic feat. When we have finally been given an indoor facility, the change was dramatic: school pride increased and an interest for indoor sports skyrocketed. And while we have met with success in these areas, our outdoor sports programs continue to struggle.

However passionate for their sport our athletes are, their further success is still dependent on having their *own* field. And as such, we are in desperate need of a ***football field, track and fielding facilities, baseball and softball fields***, all with their respective spectator seating areas, storage and locker rooms. Just as there was a huge boost in school morale and athletic competitiveness with the introduction of our school gymnasium, we ardently believe that providing our school with these much-needed facilities will undoubtedly and unprecedentedly improve the overall quality of student life on our campus through sports.

We call on the Governor of Guam, Lou Leon Guerrero, the Guam Legislature, the Guam Economic Development Agency and CoreTech International to construct a football field, track and fielding facilities, and baseball and softball fields, all with their respective spectator seating areas, storage and locker rooms for Tiyan High School.

We, the Tiyan High School community of parents, faculty, staff, alumni, and students, since the inception of our school five years ago have made do with our limited athletic facilities and we *deserve* to finally be on an equal playing field with the other public high schools.

During the first couple of years, we existed with only a single soccer field and small gym enclosure barely large enough to contain a full-sized basketball court. And in spite of that, through our resilience and overwhelming desire, we were able to field *all* of the sports during those years by borrowing various facilities and, at times, even having to pay for them. For the first 2 years, majority of our athletes had to leave campus in order to practice and play *every* game at a foreign site—there was no such thing as a true "home game." Building real school pride through sports was truly difficult, an almost titanic feat. When we have finally been given an indoor facility, the change was dramatic: school pride increased and an interest for indoor sports skyrocketed. And while we have met with success in these areas, our outdoor sports programs continue to struggle.

However passionate for their sport our athletes are, their further success is still dependent on having their *own* field. And as such, we are in desperate need of a ***football field, track and fielding facilities, baseball and softball fields***, all with their respective spectator seating areas, storage and locker rooms. Just as there was a huge boost in school morale and athletic competitiveness with the introduction of our school gymnasium, we ardently believe that providing our school with these much-needed facilities will undoubtedly and unprecedentedly improve the overall quality of student life on our campus through sports.

· We call on the Governor of Guam, Lou Leon Guerrero, the Guam Legislature, the Guam Economic Development Agency and CoreTech International to construct a football field, track and fielding facilities, and baseball and softball fields, all with their respective spectator seating areas, storage and locker rooms for Tiyan High School.

---

We, the Tiyan High School community of parents, faculty, staff, alumni, and students, since the inception of our school five years ago have made do with our limited athletic facilities and we *deserve* to finally be on an equal playing field with the other public high schools.

During the first couple of years, we existed with only a single soccer field and small gym enclosure barely large enough to contain a full-sized basketball court. And in spite of that, through our resilience and overwhelming desire, we were able to field *all* of the sports during those years by borrowing various facilities and, at times, even having to pay for them. For the first 2 years, majority of our athletes had to leave campus in order to practice and play *every* game at a foreign site—there was no such thing as a true "home game." Building real school pride through sports was truly difficult, an almost titanic feat. When we have finally been given an indoor facility, the change was dramatic: school pride increased and an interest for indoor sports skyrocketed. And while we have met with success in these areas, our outdoor sports programs continue to struggle.

However passionate for their sport our athletes are, their further success is still dependent on having their *own* field. And as such, we are in desperate need of a ***football field, track and fielding facilities, baseball and softball fields***, all with their respective spectator seating areas, storage and locker rooms. Just as there was a huge boost in school morale and athletic competitiveness with the introduction of our school gymnasium, we ardently believe that providing our school with these much-needed facilities will undoubtedly and unprecedentedly improve the overall quality of student life on our campus through sports.

We call on the Governor of Guam, Lou Leon Guerrero, the Guam Legislature, the Guam Economic Development Agency and CoreTech International to construct a football field, track and fielding facilities, and baseball and softball fields, all with their respective spectator seating areas, storage and locker rooms for Tiyan High School.

---

We, the Tiyan High School community of parents, faculty, staff, alumni, and students, since the inception of our school five years ago have made do with our limited athletic facilities and we *deserve* to finally be on an equal playing field with the other public high schools.

During the first couple of years, we existed with only a single soccer field and small gym enclosure barely large enough to contain a full-sized basketball court. And in spite of that, through our resilience and overwhelming desire, we were able to field *all* of the sports during those years by borrowing various facilities and, at times, even having to pay for them. For the first 2 years, majority of our athletes had to leave campus in order to practice and play *every* game at a foreign site—there was no such thing as a true "home game." Building real school pride through sports was truly difficult, an almost titanic feat. When we have finally been given an indoor facility, the change was dramatic: school pride increased and an interest for indoor sports skyrocketed. And while we have met with success in these areas, our outdoor sports programs continue to struggle.

However passionate for their sport our athletes are, their further success is still dependent on having their *own* field. And as such, we are in desperate need of a ***football field, track and fielding facilities, baseball and softball fields***, all with their respective spectator seating areas, storage and locker rooms. Just as there was a huge boost in school morale and athletic competitiveness with the introduction of our school gymnasium, we ardently believe that providing our school with these much-needed facilities will undoubtedly and unprecedentedly improve the overall quality of student life on our campus through sports.

And in spite of that, through our resilience and overwhelming desire, we were able to field *all* of the sports during those years by borrowing various facilities and, at times, even having to pay for them. For the first 2 years, majority of our athletes had to leave campus in order to practice and play *every* game at a foreign site—there was no such thing as a true "home game." Building real school pride through sports was truly difficult, an almost titanic feat. When we have finally been given an indoor facility, the change was dramatic: school pride increased and an interest for indoor sports skyrocketed. And while we have met with success in these areas, our outdoor sports programs continue to struggle.

However passionate for their sport our athletes are, their further success is still dependent on having their *own* field. And as such, we are in desperate need of a ***football field, track and fielding facilities, baseball and softball fields***, all with their respective spectator seating areas, storage and locker rooms. Just as there was a huge boost in school morale and athletic competitiveness with the introduction of our school gymnasium, we ardently believe that providing our school with these much-needed facilities will undoubtedly and unprecedentedly improve the overall quality of student life on our campus through sports.

We call on the Governor of Guam, Lou Leon Guerrero, the Guam Legislature, the Guam Economic Development Agency and CoreTech International to construct a football field, track and fielding facilities, and baseball and softball fields, all with their respective spectator seating areas, storage and locker rooms for Tiyan High School.

---

We, the Tiyan High School community of parents, faculty, staff, alumni, and students, since the inception of our school five years ago have made do with our limited athletic facilities and we *deserve* to finally be on an equal playing field with the other public high schools.

During the first couple of years, we existed with only a single soccer field and small gym enclosure barely large enough to contain a full-sized basketball court. And in spite of that, through our resilience and overwhelming desire, we were able to field *all* of the sports during those years by borrowing various facilities and, at times, even having to pay for them. For the first 2 years, majority of our athletes had to leave campus in order to practice and play *every* game at a foreign site—there was no such thing as a true "home game." Building real school pride through sports was truly difficult, an almost titanic feat. When we have finally been given an indoor facility, the change was dramatic: school pride increased and an interest for indoor sports skyrocketed.
